Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws, 8:20733 (TG;US)

Instrumentation and Controls Division progress report, September 1, 1980-July 1, 1982, 8:21565 (R;US)

Interactive effects of acid rain and gaseous air pollutants on natural terrestrial vegetation, 8:21696 (R;US)

ISOSEARCH; isotope production flux, cross section calculations, 8:21290 (R;US)

Licensee Event Report (LER) compilation for month of January 1983, 8:20463 (R;US)

LINSED; one-dimensional multireach sediment transport model, 8:22027 (R;US)

Measurements and analysis of critical assemblies for research reactors with mixed enrichments, 8:20640 (R;US)

Meteorological effects of thermal energy releases (METER) program. Progress report, October 1980-September 1982, 8:21813 (R;US)

Methods to deal with self-selection in estimating conservation-program energy savings: use of synthetic data to test alternative approaches, 8:20912 (R;US)

Nature of stack emissions from the experimental-scale combustion of crude oil, 8:21711 (R;US)

Neutron-scattering studies of magnetic superconductors, 8:21120 (R;US)

Oak Ridge Research Reactor quarterly report, July, August, and September 1982, 8:20648 (R;US)

Opportunities for improved residential cool-storage systems, 8:20896 (R;US)

ORTEP2; crystal structure illustration plots, 8:22547 (R;US)

ORTHIS;ORTHAT; 2-dimensional heat conduction, 8:20662 (R;US)

Physical-property estimation for coal liquids, 8:19544 (R;US)

PMS1; fast neutron polarization experiment, 8:22500 (R;US)

Process for locating shallow land-burial sites for low-level radioactive waste. National Low-Level Radioactive Waste Management program, 8:19826 (R;US)

RAFFLE; first flight collision probabilities for multiple-cell geometries, 8:20517 (R;US)

REFCO8; discounted cash flow fuel cycle cost, 8:20476 (R;US)

Residential Conservation Service Program: summary of the second annual reports submitted to the US Department of Energy by states and non-regulated utilities. Final report, 8:20913 (R;US)

RICE; primary recoil atom spectra ENDF/B data, 8:22497 (R;US)

SATDSK; saturated iron magnetic field study, 8:21483 (R;US)

Short-rotation woody crops as a source of energy, 8:19983 (R;US)

SUPERTOG; ENDF/B fine-group constants generation, 8:22492 (R;US)

Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R;US)

Wilderness designation of Bureau of Land Management lands and impacts on the availability of energy resources, 8:20778 (R;US)

Oak Ridge Y-12 Plant, TN (USA)

Interactive control charts using SAS82, 8:22879 (R;US)

Reduction in airborne contamination levels at the 9201-5 Arc Melt sawing operation. A Y-12 Plant 1982 ALARA goal, 8:21805 (R;US)

Thermal profiles from electron-beam welds on uranium-6 niobium alloy, 8:21091 (R;US)

O'Brien and Gere Engineers, Inc., Syracuse, NY (USA)

Radisson community heating systems: technical and economic comparison of options. Final report, 8:21001 (R;US)

Observatoire de Nice, 06 (France)

Spectroscopic diagnostics of solar flares, 8:22102 (R;FR;French)

Observatoire de Paris, Section de Meudon, 92 (France)

Determination of magnetic fields and anisotropies of a milieu from interpretation of the linear polarization of lines, 8:22103 (R;FR;French)

Metric emissions in conjunction with solar activity, 8:22106 (R;FR;FRENCH)

The sites of solar flares, 8:22104 (R;FR;French)

Why solar flares are studied, 8:22100 (R;FR;French)

Oceanroutes, Inc., Palo Alto, CA (USA)

An evaluation of Seasat-A data in relation to optimum track ship weather routing and site specific forecasting for the offshore oil industry, 8:19725 (R;US)

Office National d'Etudes et de Recherches Aerospatiales (ONERA), 75 - Paris (France)

KrF laser pumping by electron beam discharge, 8:21389 (R;FR)

Laser techniques in chemical diagnostics, 8:21628 (R;FR)

Office of Personnel Management, Washington, DC (USA). Office of Compensation Program Development

Interim report to the President and the Congress, 8:22826 (R;US)

Office of Technology Assessment (U.S. Congress), Washington, DC

Synthetic fuels for transportation. Background Paper Number 1: the future potential of electric and hybrid vehicles, 8:21029 (R;US)

Office of the Secretary of Defense (Research and Engineering), Washington, DC (USA)

Shock, vibration and associated environments. Part III, 8:21657 (R;US)

Officine Galileo S.p.A., Florence (Italy)

Study of image processing in a photon detection assembly. Final report, 8:21629 (R;IT)

Ohio Agricultural Research and Development Center, Columbus (USA)

Ohio biomass for energy: annual potential by county, 8:20015 (R;US)

Ohio State Univ., Columbus (USA). Dept. of Agricultural Economics and Rural Sociology

Ohio biomass for energy: annual potential by county, 8:20015 (R;US)

Ohio State Univ., Columbus (USA). Dept. of Nuclear Engineering

AIM6; one-dimensional multi-group diffusion slabs, cylinders, and spherese, 8:22421 (R;US)

FORM; fast neutron spectrum cross section calculations, 8:22425 (R;US)

Okahara, Shigeoka and Associates, Inc., Hilo, HI (USA)

Utilization of geothermal heat in tropical fruit-drying process, 8:20192 (R;US)

Oklahoma City Univ., OK (USA)

Energy-pricing policies and their implications: a case study for a planned economy, 8:20770 (R;US)

Oklahoma State Univ., Stillwater (USA)

Investigations of flowfields found in typical combustor geometries, 8:21453 (R;US)

Oklahoma Univ., Norman (USA)

Seismicity and tectonic relationships of the Nemaha Uplift in Oklahoma. Part V. Final report, 8:22052 (R;US)

Old Dominion Univ., Norfolk, VA (USA)

N_2 pressure - broadened O_3 line widths and strengths near 1129.4 cm-1, 8:22203 (R;US)

Open Univ., Milton Keynes (UK)

The nuclear controversy: unequal competition in public policy-making, 8:20783 (R;GB)

Oregon Graduate Center, Beaverton (USA)

Photolysis of water for production of fuel gases. Annual report Jan-Dec 80, 8:19916 (R;US)

Oregon State Dept. of Geology and Mineral Industries, Portland (USA)

Prospects for oil and gas in the Coos Basin, western Coos, Douglas, and Lane Counties, Oregon. Oil and gas investigation 6, 8:19676 (R;US)

Oregon State Univ., Corvallis (USA). Dept. of Atmospheric Science

Inland transport, mixing, and deposition of sea-salt particles, 8:21776 (R;US)

ORI, Inc., Silver Spring, MD (USA)

Aircraft energy conservation during airport ground operations. Final report, 8:20941 (R;US)

Oxford Univ. (UK)

The solar atmosphere: from photosphere to corona, 8:22128 (R;GB)

Oxford Univ. (UK). Nuclear Physics Lab.

Terminal pumping using a turbomolecular pump as a recirculating gas compressor, 8:21529 (R;US)

The multiple scattering optical potential for scattering of electrons on he atom, 8:22204 (R;US)

Development of polyphase ceramics for the immobilization of high-level Defense nuclear waste, 8:19823 (R;US)

Rogers, Golden and Halpern, Inc., Reston, VA (USA)
Gulf of Mexico summary report 3. A revision of Outer Continental Shelf oil and gas activities in the Gulf of Mexico and their onshore impacts: Gulf of Mexico summary report 2, August 1981, 8:19683 (R;US)

Ross (Bernd) Associates, San Diego, CA (USA)
Development of an all-metal thick film cost affective metallization system for solar cells, 8:20010 (R;US)
Development of an all-metal thick film cost effective metallization system for solar cells, 8:20009 (R;US)

Royal Inst. of Tech., Stockholm (Sweden)
High frequency probe circuits for plasma diagnostics, 8:22630 (R;SE)
Plasma phase of the evolution of the solar system, 8:22126 (R;SE)
Very strong double layers in a magnetized plasma column, 8:22629 (R;SE)

Royal Signals and Radar Establishment, Malvern (UK)
Anomalous reflectivity losses of coated mirrors used in the infrared, 8:21086 (R;GB)

S

Sandia National Labs., Albuquerque, NM (USA)
Analysis, scale modeling, and full-scale tests of low-level nuclear-waste-drum response to accident environments, 8:19814 (R;US)
Antireflection pyrex envelopes for parabolic solar collectors, 8:20132 (R;US)
Approach to resolution of geologic uncertainty in the licensing of a high-level-waste repository in tuff, 8:19868 (R;US)
Basic data report for drillhole AEC 8 (Waste Isolation Pilot Plant - WIPP), 8:19866 (R;US)
Bechgaard salts: magnetotransport, dimensionality, spin-density waves, and the threshold field, 8:22558 (R;US)
Bonding wire for semiconductor-element use, 8:21447 (TG;US)
Computing minimum cost fire protection, 8:21353 (R;US)
Development of an ice-penetration model, 8:21464 (R;US)
DOBIS multiple data base support as implemented at Sandia National Laboratories Technical Library, 8:22877 (R;US)
Effects of oxygen, salt, and pH level on corrosion rate of drill-stem steel, 8:20183 (R;US)
Electronic properties of superlattices, 8:21166 (R;US)
FC;LSEI;WNNLS; constrained least squares fit, 8:22859 (R;US)
Geothermal versus conventional drilling, 8:20184 (R;US)
High-average-power electron accelerators for generating gigawatt microwave pulses, 8:21477 (R;US)
IIR algorithms for adaptive line enhancement, 8:21631 (R;US)
In-situ stress variations and hydraulic-fracture containment in layered rock: observations from a mineback experiment, 8:19767 (R;US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R;US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R;US)
Laboratory technique for simulation of projectile penetration into geological targets, 8:21351 (R;US)
LPMGB; linear programming subroutine with bounds, 8:22862 (R;US)
MARIAH - a finite-element computer program for incompressible porous-flow problems: user's manual, 8:21427 (R;US)
Melt depth and regrowth kinetics in pulsed laser annealing of silicon and gallium arsenide, 8:21167 (R;US)
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R;US)
New designs and installations of photovoltaic-array fields with low balance-of-system costs, 8:20048 (R;US)
ORVIS: optically recording velocity interferometer system. Theory of operation and data-reduction techniques, 8:21630 (R;US)
PAMA; preferred acquisition method analysis, 8:22849 (R;US)
PATH1 self-teaching curriculum: example problems for Pathways-to-Man Model, 8:19883 (R;US)
Proceedings of the second PFN uranium logging seminar, 8:21639 (R;US)
Proceedings of the workshop on nuclear-power-plant aging, 8:20574 (R;US)
PV concentrator array power costs, 8:20046 (R;US)
Relationships between the sol-to-gel and gel-to-glass conversions, 8:21168 (R;US)
SANDIA-ORIGEN; isotope generation & depletion, 8:19901 (R;US)
Second-generation photovoltaic-concentrator-array design, 8:20020 (R;US)
SOLCEL2; simulation of photovoltaic systems, 8:20031 (R;US)
Sol-gel derived AR coatings, 8:20134 (R;US)
Subsidence prediction for high-extraction mining using complementary influence functions, 8:19613 (R;US)
Surface chemical information from electron- and photon-stimulated desorption, 8:21273 (R;US)
Tactical Improvement and Security Force Evaluation Program, 8:20317 (R;US)
Thermal analysis of a linear infrared lamp, 8:21352 (R;US)
USA program in geothermal drilling and completion research and development, 8:20182 (R;US)

Sandia National Labs., Livermore, CA (USA)
Application of complex equilibrium calculations to the study of mineral matter during coal combustion, 8:19642 (R;US)
Fundamental combustion and diagnostics research at Sandia. Progress report, October-December 1982, 8:21302 (R;US)
HEATMESH; geometrical data heat transfer study, 8:21328 (R;US)

San Diego Unified School District, CA (USA)
Integrated solar heating, cooling and hot water system for the San Diego City Schools, University City High School (Engineering Materials), 8:20117 (E;US)

San Francisco Univ., CA (USA)
Radiation environment mapping, 8:21801 (R;US)

Sante Fe Corp., Alexandria, VA (USA)
Estimated maintenance and repair requirements for coal-fired propulsion systems. Final report, 8:21014 (R;US)

Schonberg Radiation Corp., Mountain View, CA (USA)
Portable linear accelerator development. Final report, 8:20328 (R;US)

Science and Engineering Research Council, Chilton (UK). Rutherford Appleton Lab.
A high throughput inelastic neutron scattering spectrometer for the Harwell linac and the spallation neutron source, 8:21585 (R;US)
Electron excitation in atoms and molecules by neutron-nucleus scattering, 8:22372 (R;US)

Science Applications, Inc., Boulder, CO (USA)
Field manual for oil spills in cold climates. Final report Sep 78-May 79, 8:19733 (R;US)

Science Applications, Inc., Chatsworth, CA (USA). Combustion Science and Advanced Technology Dept.
Spray combustion of synthetic fuels. Phase II. Spray-combustion phenomena. First quarterly report, 1 October 1981-1 January 1982, 8:19934 (R;US)

Science Applications, Inc., Fort Collins, CO (USA)
Evaluation of EL836 explosive stimulation of Devonian gas shale, 8:19763 (R;US)

Science Applications, Inc., La Jolla, CA (USA)
Radiation field characterization for the AFRRI TRIGA Reactor. Volume I. Baseline measurements and evaluation of calculational data. Final report 5 May 80-31 Dec 80, 8:20631 (R;US)

Science Applications, Inc., McLean, VA (USA)
Soviet post-strike civil defense rescue, damage-limiting, repair and restoration operations. Final report 13 aug 81-12 aug 82, 8:21661 (R;US)

Science Applications, Inc., Oak Ridge, TN (USA)
Wilderness designation of Bureau of Land Management lands and impacts on the availability of energy resources, 8:20778 (R;US)

Science Applications, Inc., Salt Lake City, UT (USA)
Conceptual Nuclear Energy Center at Green River, Utah. Volume 1. Environmental impacts, 8:20624 (R;US)

Science Applications, Inc., Steamboat Springs, CO (USA)
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R;US)
Mechanical properties of Devonian shales from the Appalachian Basin, 8:19769 (R;US)

Scientific Systems, Inc., Cambridge, MA (USA)
Determination of material properties by limited scan x-ray tomography. Final technical report Sep 79-Jan 81, 8:21911 (R;US)

Sealed Insulating Glass Manufacturers Association, Chicago, IL (USA)
Field correlation of performance standards for organically sealed sinsulating glass, 8:20933 (R;US)

Sea Loft Restaurant, Long Branch, NJ (USA)
Solar preheating of both domestic hot water and space. Final technical report for the Sea Loft restaurant in Long Branch, New Jersey, 8:20087 (R;US)
Solar preheating of both domestic hot water and space. Final technical report for the Sea Loft restaurant in Long Branch, New Jersey (Engineering Materials), 8:20111 (E;US)

Secretaria de Asentamientos Humanos y Obras Publicas, Mexico City (Mexico)
(seminario usos de la energia solar en la vivienda) solar energy applications for dwellings. Seminar 17-19 nov 80, 8:19976 (R;US)

Semix, Inc., Gaithersburg, MD (USA)
Semicrystalline casting process development and verification. Quarterly progress report number 8, March 19, 1982-June 19, 1982, 8:19988 (R;US)

Sentralinstitutt for Industriell Forskning, Oslo (Norway)
Well control in case of offshore blowout: collecting oil in the water. New concept based on using a separate underwater work base and a collection unit. Final report Oct 80-Mar 81, 8:19690 (R;US)
Well control in case of offshore blowout: oil collection on platforms. Final report, 8:19688 (R;US)

Serice de la Programmation de la Politique Scientifique, Brussels (Belgium)
National energy research and development program, 8:20800 (R;BE;FR)

Sheff (James R.) Co., Richland, WA (USA)
NOISY1; auto- and cross-spectral densities, 8:20536 (R;US)

Siemens A.G., Muenchen (Germany, F.R.)
Laser diode. Final report, May 1980, 8:21385 (R;DE;In several languages)
Optical pumped neodymium miniature laser transmitter. Final report, October 1978, 8:21384 (R;US;In several languages)

Siemens A.G., Neustadt b. Coburg (Germany, F.R.)
Crosslinking of polyolefin insulation of cables and insulated wires by the use of energy-rich radiation. Part 1: material of irradiation. Final report, March 1980, 8:21276 (R;US;In several languages)
Crosslinking of polyolefin insulations of cables and insulated wires by the use of energy-rich radiation. Part 3: production engineering. Final report, March 1980, 8:21277 (R;DE;In several languages)

Sloan-Kettering Inst. for Cancer Research, New York (USA)
Biomedical research with cyclotron-produced radionuclides. Progress report, August 1, 1982-February 28, 1983, 8:21913 (R;US)

Solarelectronics, Inc., Bellingham, MA (USA)
Flat-plate solar array project. Task 1: silicon material: investigation of the hydrochlorination of $SiCl_4$, 8:20008 (R;US)
Investigation of the hydrochlorination of $SiCl_4$. Quarterly report, October 9, 1982-January 8, 1983. Flat-Plate Solar-Array Project, Advanced-Materials Research Task, 8:19995 (R;US)

Solar Energy Industries Association, Washington, DC (USA)
Impediments to capital formation in solar-thermal-energy systems, 8:19971 (R;US)
Solar industry index. The comprehensive guide to manufacturers and service organizations, 8:19966 (R;US)

Solar Energy Research Inst., Golden, CO (USA)
Analysis of the potential of the electrofluid dynamic wind-driven generator, 8:20238 (R;US)
Beer's-law-based, simple spectral model for direct normal and diffuse horizontal irradiance, 8:19970 (R;US)
Conceptual design of the Truscott Brine Lake solar pond system. Volume II. Utility-integrated scenario, 8:20138 (R;US)
Detailed design procedure for solar industrial-process-heat systems: overview, 8:20104 (R;US)
Development of a consensus standard for determining thermal performance of high-concentration-ratio solar collectors, 8:20135 (R;US)
Development of SOLIPH - a detailed computer model of solar industrial-process-heat systems, 8:20105 (R;US)
Direct steam generation in line-focus solar collectors, 8:20136 (R;US)
Ethanol production using microbial cells trapped in polyacrylamidegels, 8:19986 (R;US)
Evaluation of air-cooled central receivers, 8:20068 (R;US)
Evaluation of solar domestic-hot-water control systems, 8:20107 (R;US)
Fermentation of soluble cello-oligosaccharides by yeasts, 8:20023 (R;US)
Flash evaporation from turbulent water jets, 8:20078 (R;US)
Fourier-transform approach to building simulations with thermostatic controls, 8:20938 (R;US)
Fuel-gas production from animal and agricultural residues and biomass. Anaerobic Digestion Program, 8:19937 (R;US)
Long-duration thermal storage for solar-thermal high-pressure steam IPH, 8:20103 (R;US)
Photo/biological hydrogen program progress reports, 8:19919 (R;US)
Research and development project evaluation and selection methods for the Solar-Thermal-Technology Program, 8:20069 (R;US)
Simple energy-calculation method for solar industrial-process-heat steam systems, 8:20106 (R;US)
Technology and economics of close-coupled gasifiers for retrofitting gas/oil combustion units to biomass feedstock, 8:19956 (R;US)
Testing of a prototype Fresnel-lens concentrator for thermal applications, 8:20137 (R;US)
Thermochemical energy transport in a 1-MW industrial-process-heat solar system, 8:20102 (R;US)
WECS; wind energy value to electric utilities, 8:20206 (R;US)
Windmill wake turbulence decay: a preliminary theoretical model, 8:20239 (R;US)

Solar Environmental Engineering Co., Inc., Fort Collins, CO (USA)
SOLCOST3.0; solar heating & cooling design, 8:20081 (R;US)

Solarex Corp., Rockville, MD (USA)
Solarex final report: design and fabrication of a prototype system for a photovoltaic residence in the Southwest, 8:20037 (R;US)

South African Atomic Energy Board, Pretoria
- AIREK3; space-independent kinetics with feedback, 8:20492 (R;US)
- BLAST; reactor kinetics temperature distribution study, 8:20516 (R;US)
- WELWING; material buckling cylindrical fuel elements, 8:20603 (R;US)

South Carolina Univ., Columbia (USA). Coll. of Engineering
- General approach to the testing of binary solubility systems for thermodynamic consistency. Consolidated Fuel Reprocessing Program, 8:21232 (R;US)

South Coast Technology, Inc., Ann Arbor, MI (USA)
- Review and evaluation of automotive fuel conservation technologies. Final report, 8:21017 (R;US)

Southeastern Louisiana Univ., Hammond (USA). Coll. of Business
- Technological response to environmental protection regulations and energy price/supply structure: a case study of chlorine/caustic soda manufacturing. Executive summary report 1 Jul 79-30 Jun 81, 8:20985 (R;US)

Southern California Gas Co., Los Angeles (USA)
- Experimental evaluation of NO/sub x/ control using a glass tank simulator, 8:21695 (R;US)

Southern Illinois Univ., Carbondale (USA). Coal Extraction and Utilization Research Center
- Mining/reclamation handbook project. Final technical report, September 1980-February 1983, 8:19597 (R;US)

Southern Research Inst., Birmingham, AL (USA)
- Sampling for high-molecular-weight organic compounds in power plant stack gases. Final report, 8:20301 (R;US)

Southern Services, Inc., Atlanta, GA (USA)
- HEATING2; transient steady-state heat transfer, 8:21407 (R;US)

Southwest Engineering Associates, El Paso, TX (USA)
- Analysis, scale modeling, and full-scale tests of low-level nuclear-waste-drum response to accident environments, 8:19814 (R;US)

Southwestern Public Service Co., Amarillo, TX (USA)
- Harrington Station Unit 2 fabric filter system special testing report. Final report Dec 78-Jul 81, 8:20296 (R;US)

Southwest Research Inst., San Antonio, TX (USA)
- Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels, 8:21762 (R;US)
- Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels. Final report Jun 80-Oct 81, 8:21763 (R;US)
- Characterization of exhaust emissions from methanol- and gasoline-fueled automobiles. Final report Jun 81-Mar 82, 8:21033 (R;US)

Southwest Research Inst., San Antonio, TX (USA). Army Fuels and Lubricants Research Lab.
- Assessment/review of methanol technology and utilization as a fuel. Interim report Oct 81-Sep 82, 8:19945 (R;US)

Spire Corp., Bedford, MA (USA)
- Hermetic edge sealing of photovoltaic modules. Quarterly technical report, 8:19998 (R;US)

SRI International, Menlo Park, CA (USA)
- Development and demonstration of a reverse-osmosis energy-recovery device. Final report, 8:20984 (R;US)
- Electrochemical measurement of corrosion rates in cathodically protected systems. Final report, 8:21070 (R;US)
- Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R;US)
- Fire and the related effects of nuclear explosions. 1982 Asilomar Conference, 8:21670 (R;US)
- Monitoring techniques for pH, hydrogen, and redox potential in nuclear-reactor circuits, 8:20370 (R;US)
- Scale-model turbine-missile-casing impact tests. Final report, 8:20691 (R;US)

Stanford Linear Accelerator Center, CA (USA)
- Alpha magnet assembly (Engineering Materials), 8:21550 (E;US)
- Breakdown of QCD factorization theorems for inclusive reactions, 8:22320 (R;US)

Evaluation of transient heat transfer in parallel tube bundles by the Monte-Carlo-Method, 8:21425 (R;DE;In German)
Using parallel-computer systems to evaluate the dynamical protection of power networks, 8:20272 (R;DE;In German)

Technische Univ. Muenchen (Germany, F.R.). Fakultaet fuer Maschinenwesen
Heat transfer through transparent and non-transparent outer walls with a curtain of adjustable light shades, 8:20910 (R;DE;In German)

Technische Univ., Vienna (Austria)
Contribution to the determination of J-integral and crack opening displacement as material characteristics and their application in safety-assessments of pressure vessels, 8:21432 (R;AT;In German)

Technology for Energy Corp., Knoxville, TN (USA)
Voids in neutron-irradiated metals and alloys, 8:21041 (R;US)

Teknekron, Inc., Berkeley, CA (USA)
Distributing the risks of interbasin water transfers under drought conditions: the dilemma posed by coal slurry pipelines, 8:19623 (R;US)

Teledyne Engineering Services, Waltham, MA (USA)
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R;US)
Continued investigation of the failure of Midland Unit 1 RPV anchor studs analysis report, 8:20384 (R;US)

Teledyne Geotech, Alexandria, VA (USA). Seismic Data Lab.
A statistical discrimination experiment for eurasian events using a twenty-seven-station network. Technical report, 8:21673 (R;US)

Temple, Barker and Sloane, Inc., Lexington, MA (USA)
Electric-utility financial database documentation, 8:20836 (R;US)

Tennessee Energy Authority, Nashville (USA)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R;US)

Tennessee Univ., Knoxville (USA)
Comparison of three years of performance for air-to-air parallel solar-heat-pump system in TECH House IV, 8:20085 (R;US)
Evaluation of solar-assisted heat pumps and solar house. Final report, June 1, 1977-September 30, 1981, 8:20110 (R;US)

Tennessee Univ., Knoxville (USA). Dept. of Physics and Astronomy
Nuclear spectroscopic studies. Progress report, June 1, 1982-May 31, 1983, 8:22343 (R;US)

Tennessee Valley Authority, Chattanooga (USA)
LASER; spectrum calculations with burnup cylindrical lattice, 8:20499 (R;US)
UPD; source deck maintenance utility routine, 8:22847 (R;US)

Tennessee Valley Authority, Chattanooga (USA). Div. of Energy Conservation and Rates
Nashville solar-water-heater demonstration project. Monitoring-data analysis. Interim report, September 1981-November 1981, 8:20108 (R;US)

Tennessee Valley Authority, Chattanooga (USA). Div. of Fossil and Hydro Power
Fossil steam reliability & availability. Quarterly status report, 8:20283 (R;US)

Tennessee Valley Authority, Chattanooga (USA). Div. of Power Production
Availability and reliability improvement program, 8:20282 (R;US)

Tennessee Valley Authority, Chattanooga (USA). Office of Natural Resources
Microprocessor-controlled ion selective electrode determination of total chlorine. Final report, 8:20279 (R;US)

Tennessee Valley Authority, Knoxville (USA). Div. of Energy Conservation and Rates
Nashville Solar-Water-Heater Demonstration Project. Monitoring data analysis interim report, December 1981-February 1982, 8:20109 (R;US)

Tennessee Valley Authority, Knoxville (USA). Office of Economic and Community Development
Floods on North Toe River and Kentucky Creek in the vicinity of Newland, North Carolina. Flood report, 8:21883 (R;US)

Tennessee Valley Authority, Muscle Shoals, AL (USA). Div. of Agricultural Development
Optimization of biological recycling of plant nutrients in livestock waste by utilizing waste heat from cooling water, 8:21855 (R;US)

Tennessee Valley Authority, Norris (USA). Div. of Land and Forest Resources
Transportation methods and costs for sawlogs, pulpwood bolts, and longwood, 8:20960 (R;US)
Users manual for YIELD: timber-yield forecasting and planning tool, Version 1.2, 8:21932 (R;US)

Tennessee Valley Authority, Norris (USA). Office of Natural Resources
Comparable Sale Data Base users manual. Version 1.1, 8:21933 (R;US)
User's manual for the TVA lumber yield and value program (LYVP). Version 1.0, 8:21934 (R;US)

TERA Corp., Englewood, CO (USA)
Information system for generation availability: executive summary. Final report, 8:20839 (R;US)

Tetra Tech, Inc., Lafayette, CA (USA)
Assessment methodology for new cooling lakes. Volume 1. Methodology to assess multiple uses for new cooling lakes. Final report, 8:20266 (R;US)
Assessment methodology for new cooling lakes. Volume 2. Development of empirical multivariate relationships for evaluating fish communities in new cooling lakes. Final report, 8:21853 (R;US)

Texas A and M Univ., College Station (USA). Center for Energy and Mineral Resources
Fuel-conservation efforts of Texas municipal, 8:20944 (R;US)

Texas A and M Univ., College Station (USA). Center for Tectonophysics
Mechanical and transport properties of rocks at high temperatures and pressures. Task III. Technical progress report Number 3, 1 March 1982-30 October 1982, 8:22057 (R;US)

Texas A and M Univ., College Station (USA). Dept. of Chemical Engineering
Simple model of Exxon's Zn/Br_2 battery, 8:20752 (R;US)

Texas Energy and Natural Resources Advisory Council, Austin (USA)
Texas energy history, 8:20794 (R;US)

Texas Engineering Experiment Station, College Station (USA)
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R;US)

Texas Gas Transmission Corp., Owensboro, KY (USA)
Anaerobic sludge digestion with a biocatalytic additive, 8:20998 (R;US)

Texas Research and Development Foundation, Austin (USA)
Vehicle operating costs, fuel consumption, and pavement type and condition factors. Final report Sep 79-Oct 81, 8:20775 (R;US)

Texas Univ., Austin (USA)
Kinetic studies following state-selective laser excitation. Progress report, March 15, 1981-March 14, 1983, 8:22190 (R;US)

Texas Univ., Austin (USA). Center for Research in Water Resources
Appropriate technology for planning hydroelectic power projects in Nepal: the need for assumption analysis. Technical report, 8:19962 (R;US)

Texas Univ., El Paso (USA)
Geotectonics of South America, 8:22046 (R;US)
The crustal structure and tectonics of South America, 8:22045 (R;US)

Texas Univ., Richardson (USA)
Investigation of the effects of external current systems on the MAGSAT data utilizing grid cell modeling techniques, 8:22043 (R;US)

Thermo Electron Corp., Waltham, MA (USA)
High-efficiency, gas-fired heat-pipe, warm-air heating system. Final report on phase 1, Jun 79-Jun 81, 8:20918 (R;US)

Tokyo Univ. (Japan)
Investigation from Japanese MAGSAT team. Part a. crustal structure near Japan and in antarctic station. Part b. electric currents and hydromagnetic waves in the ionosphere and the magnetosphere, 8:22041 (R;JP)
Space experiments with particle accelerators, 8:22170 (R;US)

Toledo Edison Co., OH (USA)
System for automated diagnosis of reactor-coolant pumps, 8:20352 (R;US)

Toledo Univ., OH (USA). Dept. of Physics and Astronomy
Semi-empirical studies of atomic structure. Progress report, 1 July 1982-1 February 1983, 8:22599 (R;US)

Toronto Univ., Ontario (Canada)
Modelling of polymer photodegradation for solar cell modules, 8:20006 (R;US)
Modelling of polymer photodegradation for solar cell modules, 8:20007 (R;US)

Toulouse-3 Univ., 31 (France). Centre d'Etude Spatiale des Rayonnements
Precise source location of the anomalous 1979 March 5 gamma ray transient, 8:22149 (R;US)

Transport and Road Research Lab., Crowthorne (UK)
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R;US)
Vehicle operating costs in the Caribbean: an experimental study of vehicle performance, 8:21016 (R;US)

Trans Systems Corp., Vienna, VA (USA)
Assessment of battery buses and battery technology. Final report Aug 81-May 82, 8:21028 (R;US)

TRC Environmental Consultants, Inc., East Hartford, CT (USA)
Air-pollution damage to man-made materials: physical and economic estimates. Final report, 8:20773 (R;US)

Tri-County Metropolitan Transportation District of Oregon, Portland (USA)
Noise reduction retrofit for a 'new look' GMC transit bus: service bulletin. Final report Apr 80-Nov 81, 8:21020 (R;US)

Tri-State Synfuels Co., Houston, TX (USA)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results, 8:19550 (R;US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork, 8:19551 (R;US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs, 8:19492 (R;US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2B. Collection and shipment analytical testwork, 8:19493 (R;US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 3A. Gasification test at Sasolburg, overview, 8:19496 (R;US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal, 8:19549 (R;US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests, 8:19500 (R;US)

LEOPARD;SPOTS; sjectrum calculation with depletion, 8:20503 (R;US)
Westinghouse Electric Corp., Pittsburgh, PA (USA). Fusion Power Systems Dept.
COAST4; costing & sizing of tokamak reactors, 8:22686 (R;US)
Westinghouse Electric Corp., Pittsburgh, PA (USA). Nuclear Energy Systems Div.
ETOG1; ENDF/B to MUFT, GAM, ANISN corss sections format, 8:22494 (R;US)
ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format, 8:20552 (R;US)
ETOM1; ENDF/B format to MUFT format cross sections, 8:22493 (R;US)
ETOT2; thermal libraries from ENDF/B data, 8:20542 (R;US)
Westinghouse Electric Corp., Pittsburgh, PA (USA). PWR Systems Div.
CHAINS; analysis of radioactive decay chains, 8:22539 (R;US)
DOS; neutron flux-dosimeter activity relation, 8:20522 (R;US)
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2, 8:22341 (R;US)
GROUSE; space-dependent cross section generation, 8:20521 (R;US)
Westinghouse Electric Corp., Pittsburgh, PA (USA). Research and Development Center
Mercury bromide laser discharge life studies. Final report 1 May 81-31 Jan 82, 8:21382 (R;US)
Westinghouse Electric Corp., West Mifflin, PA (USA). Bettis Atomic Power Lab.
ASPIS; gamma-ray source buildup factor calculations, 8:22490 (R;US)
BE21; few-group, discrete ordinates for slab geometry, 8:22482 (R;US)
BETTIS ENVIRONMENTAL ROUTINES; MODEL6/ 3.3;MODEL7/2.0; modified Bettis Environmental Library scope 3.3, 8:22835 (R;US)
BL47; drafting tool to plot plane structures, 8:21318 (R;US)
BUBL1; fuel swelling & gas release simulation, 8:20608 (R;US)
BUSHL; cylindrical shell buckling collapse analysis, 8:20609 (R;US)
CHIC-KIN; fast and intermediate power transients, 8:20632 (R;US)
CINDER;M0102; point depletion fission product, 8:20510 (R;US)
CYGRO3; oxide fuel rod stress & deformation, 8:20606 (R;US)
CYGRO2; stress analysis of cylindrical fuel element, 8:20599 (R;US)
DAFT1; least squares fit for fissile nuclide data, 8:22386 (R;US)
DUZ2; 2-dimensional axisymmetric and plane elastic-plastic, 8:20570 (R;US)
EPOCH; neutron age calculation of ENDF/B data, 8:20321 (R;US)
FIGRO; LWBR fuel swelling temperature study, 8:20600 (R;US)
FLASH3; loss-of-coolant accident analysis, 8:20564 (R;US)
FLASH6;FLASH4; fully-implicit transient simulation, 8:20654 (R;US)
GAPL3; inelastic large deflection stress study, 8:21322 (R;US)
GLUB1; water-logged fuel element analysis, 8:20604 (R;US)
GRAMP; r-m parameters of unresolved resonances, 8:22387 (R;US)
HOT2; two-dimensional transient heat conduction program, 8:21408 (R;US)
JITER; fluctuation experiment analysis, 8:20518 (R;US)
M0552; dynamic analysis of linear elastic systems, 8:21311 (R;US)
M0266; linear elastic structural dynamics, 8:21321 (R;US)
M0648; one-dimensional slab transport with slowing down, 8:22461 (R;US)
M0807; two-dimensional diffusion absorption removal cross sections, 8:22446 (R;US)
M0555;ACT1; loss-of-coolant accident analysis, 8:20563 (R;US)
MANE1; rectangular magnetic network solution, 8:21327 (R;US)
M0219;FLOT1; PWR flow transient analysis, 8:20350 (R;US)
M0678;FUGIT1; dynamic response of elastic structures, 8:21437 (R;US)
M0899;hoh; steam tables 14.5-2538 psia, 8:21150 (R;US)
M0756;LETO; one-dimensional slab gamma-ray transport, 8:22462 (R;US)
M0661;M0657;M0626; polynomial curve fitting, 8:22829 (R;US)
M0457;PIPE; elastic stress of piping system, 8:21313 (R;US)
NOWIG; one-dimensional, two-group kinetics with temperature feedback, 8:22471 (R;US)
PAX03; harmony-PDQ cross section generation code, 8:22489 (R;US)
PDQ8;PDQ7; one, two, or three-dimensional, few group, 8:22444 (R;US)
PUN1; unresolved resonance integral cross sections, 8:22467 (R;US)
REDUX; reactor fluctuation experiment analysis, 8:20523 (R;US)
RELO2; failure probability calculation by Monte Carlo, 8:21436 (R;US)
RESQ2;RESQ0;DBFL; resonance integral for a hexagonal cell, 8:20601 (R;US)
SEALSHELL2;M0110; shell stress analysis for axisymmetric loading, 8:21310 (R;US)
SPAN4; a point-kernel shield evaluation code, 8:22499 (R;US)
SUMOR;m0271; s-wave neutron cross section calculation, 8:22483 (R;US)
TOPS; transient thermodynamics of pressurizers, 8:21317 (R;US)
TWIGL;TWIGGLE; two-dimensional, two-group space-time diffusion feedback, 8:22458 (R;US)
WASP2; water properties for safety analysis, 8:21152 (R;US)
WATER; steam tables at 14.5-14,500 psia and 32-472°F, 8:21149 (R;US)
WHIP1; structural deflection due to blowdown, 8:21330 (R;US)
WIGL2; one-dimensional, two-group space-time diffusion, 8:22443 (R;US)
West Virginia Univ., Morgantown (USA). Dept. of Chemical Engineering
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R;US)
West Virginia Univ., Morgantown (USA). Dept. of Geology and Geography
Field techniques for measuring joint intensity, 8:22029 (R;US)
West Virginia Univ., Morgantown (USA). Dept. of Physics
X-ray diffraction and scattering studies of coal constituents. Semi-annual technical progress report, July 1, 1982-December 31, 1982, 8:19557 (R;US)
West Virginia Univ., Morgantown (USA). Harley O. Staggers National Transportation Center
Power and energy measurement on Morgantown People Mover system. Final report Jul 80-Nov 81, 8:20957 (R;US)

Williams Bros. Engineering Co., Tulsa, OK (USA)
Dunn-Nokota Methanol Project, Dunn County, North Dakota. Volume IV. Product transportation analysis, 8:19949 (R;US)
Equipping a shaft and mining bulk samples of oil shale, nahcolite and dawsonite. Report for Jan 78-Apr 81, 8:19774 (R;US)
Wisconsin Univ., Madison (USA)
A diffuse soft x-ray spectrometer, 8:21582 (R;US)
Calculated and measured emittance of sputter-type negative-ion source, 8:21517 (R;US)
Improved Cs^0 source for the production of polarized H^- ions, 8:22192 (R;US)
Investigation of Antarctic crust and upper mantle using MAGSAT and other geophysical data, 8:22044 (R;US)
Spheromak heating with Alfven waves, 8:22624 (R;US)
Wisconsin Univ., Madison (USA). Dept. of Chemical Engineering
Microstructural analysis of ion-containing polymers. Progress report, January 1-December 31, 1982, 8:21145 (R;US)
Multivariable internal model control, 8:21191 (R;US)
Multivariable process control: a survey, 8:19685 (R;US)
Wisconsin Univ., Madison (USA). Dept. of Chemistry
Photoluminescence and electroluminescence as probes of interfacial charge-transfer processes relevant to cadmium sulfoselenide-based photoelectrochemical cells. Technical report, 8:19978 (R;US)
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R;US)
Wisconsin Univ., Madison (USA). Inst. for Environmental Studies
Impact of air pollution on vegetation near the Columbia Generating Station - Wisconsin power plant impact study, 8:22006 (R;US)
Wisconsin Univ., Milwaukee (USA)
Chemistry of ash deposits in the U-GAS process, 8:19421 (R;US)
Interaction of low-energy electrons with surface lattice vibrations. Progress report and future research plans, 8:22189 (R;US)
Two-fluid model and importance of the interfacial area in two-phase flow analysis, 8:21421 (R;US)

STEAG coal-fired power plant at Voerde or changing German clean air policy, 8:20288 (R;DE)
Wollongong Univ. (Australia). Dept. of Electrical Engineering
SAFE; fail-to-safe analysis of protective networks, 8:20670 (R;US)
Woodward-Clyde Consultants, San Francisco, CA (USA)
Manual of practice - chemical treating agents in oil spill control. Final report Sep 77-Dec 80, 8:19732 (R;US)
Worcester Polytechnic Inst., MA (USA). Dept. of Chemistry
Gas-phase radiolysis and vacuum-ultraviolet photolysis of heterocyclic organic compounds, 8:21265 (R;US)
World Data Center A for Solar-Terrestrial Physics, Boulder, CO (USA)
Evolutionary charts of solar activity (calcium plages) as functions of heliographic longitude and time 1964-1979, 8:22070 (R;US)
Experimental comprehensive solar flare indices for 'major' and certain lesser flares 1975-1979, 8:22069 (R;US)
Wyoming Univ., Laramie (USA)
Analysis of crack propagation as an energy absorption mechanism in metal matrix composites, 8:21139 (R;US)
Wyoming Univ., Laramie (USA). Dept. of Physics and Astronomy
Hadronic atoms. Technical progress report, February 1, 1982-January 31, 1983, 8:22188 (R;US)

Y

Yale Univ., New Haven, CT (USA). Dept. of Applied Mechanics
Wavelength scaling of the two-plasmon decay and stimulated Raman-scattering instabilities. Annual progress report, September 10, 1981-September 9, 1982, 8:22703 (R;US)

Z

Zhejiang Univ., Hangzhou (China)
Higher-order modes calculation of rf cavity with cylindrical symmetry, 8:21484 (R;US)

PERSONAL AUTHOR INDEX

Authors' surnames are indexed in the form appearing in the abstracted publication; given names are reduced to initials. Each author entry gives the publication title and the citation number. The document type, e.g., R for Report; country of publication, e.g., US; and language of the document, e.g., In German; are given in parentheses at the end of the entry. If no language statement appears, the language is English. Tables of document types and country of publication codes appear after the indexes. For publications with multiple authors, an entry is provided for each author. Entries for the second and succeeding authors give references to the first author.

Because of problems involved in the mechanical preparation of this index, all accent marks are omitted. Changes in spelling introduced as a result of accent omission follow standard conventions.

SUBJECT INDEX

The subject index is based on the use of subject descriptors selected from a controlled thesaurus of terms (DOE/TIC-7000). Subject descriptors and qualifiers (subheadings) are selected and presented in the following format:

SUBJECT DESCRIPTOR
  Qualifier
    Title, (supplementary information), citation number, (R:US)

The notations in the final parentheses indicate the type of document, e.g., R for Report; the country of publication, e.g., US; and the language if other than English, e.g., In German. Tables of document types and country of publication codes appear after the indexes.

The title may be supplemented with additional words, or a phrase, if it appears additional information would be helpful. In cases for which the title contains little or no information related to the subject entry, it may be replaced entirely by the supplementary information. A qualifier is not always required, and in such cases the title will follow the unqualified subject descriptor.

The descriptors selected for use as subject terms are generally the names of specific materials, things, or processes. To the extent possible, a qualifier is selected to describe the properties of, or processes applied to, the subject term.

Index entries are selected to indicate the important ideas and concepts presented in a document, rather than words that may appear in the text. Within the available thesaurus terms, the most probable or logical place to look for typical information is selected. "See references" are included to guide users from synonymous terms or phrases to the descriptor selected as a subject heading for the concept. (e.g. Pipeline Quality Gas see HIGH BTU GAS). "See also references" are used to indicate where to find references to subject concepts that are narrower, broader, or related to a particular subject heading. To complete an exhaustive search of a given subject, all such headings should be reviewed. Copies of DOE/TIC-7000, the Subject Thesaurus, are available from the National Technical Information Service (NTIS), U. S. Department of Commerce, Springfield, VA 22161.

A

A2-1310 RESONANCES
  Radiative Decay
    Radiative width of the A_2(1310), 8:22280 (J:NL)

AGRICULTURAL WASTES
See also MANURES
Acid Hydrolysis
Parametric analysis support for alcohol-fuels process development. Final report, 1 January-30 June 1981, 8:20022 (R:US)
Anaerobic Digestion
Anaerobic fermentation of beef-cattle manure and crop residues, 8:19941 (RA:US)
Fuel-gas production from animal and agricultural residues and biomass. Anaerobic Digestion Program, 8:19937 (R:US)
Low cost approach to methane generation, storage and utilization from crop and animal residues. Informal progress report, January 1, 1982-June 30, 1982, 8:19942 (RA:US)
Bioconversion
Regional analysis of potential energy production from agricultural wastes: a technical and economic study. Final report, 8:19957 (R:US)
Inventories
Ohio biomass for energy: annual potential by county, 8:20015 (R:US)
Resource Potential
Energetic and environmental aspects of utilizing crop and forest residues for biomass energy. Final report, 8:19987 (R:US)

AGRICULTURE
See also DAIRY INDUSTRY
Air Pollution
Release of N_2O from cultivated soils, 8:21735 (RA:DE:In German)
Water Requirements
Energy siting in Utah: a programming model, 8:20292 (R:US)
Two level multi-objective reconnaissance system study of a large water resource system. Doctoral thesis, 8:21882 (R:US)

AIR
See also SURFACE AIR
Chemical Composition
Physical, chemical and optical characteristics of a clean air mass over northern Michigan, 8:21782 (J:GB)
Optical Properties
Physical, chemical and optical characteristics of a clean air mass over northern Michigan, 8:21782 (J:GB)
Radiosensitivity Effects
Radiation responses in air-, nitrous oxide-, and nitrogen-saturated mammalian cells, 8:21974 (J:US)

AIR CONDITIONERS
See also SOLAR AIR CONDITIONERS
Cold Storage
Design and demonstration of a storage assisted air conditioning system, 8:20911 (R:US)
Design
Design and demonstration of a storage assisted air conditioning system, 8:20911 (R:US)
Thermal Energy Storage Equipment
Design and demonstration of a storage assisted air conditioning system, 8:20911 (R:US)

AIR FILTERS
Materials
Porous polymers as new sorptive materials, 8:21467 (R:NL)

AIR HEATERS
Deposits
Ammonium sulfate and bisulfate formation in air preheaters. Final report Oct 80-Oct 81, 8:20278 (R:US)
Design
MHD oxidant intermediate temperature ceramic heater study. Final report, 8:20882 (R:US)
Performance
MHD oxidant intermediate temperature ceramic heater study. Final report, 8:20882 (R:US)
AIR POLLUTION
See also INDOOR AIR POLLUTION
1976 national emissions report: national emissions data system of the aerometric and emissions reporting system (AEROS). Annual report, 8:21770 (R:US)
National air pollutant emission estimates, 1970-1981. Final report, 8:21771 (R:US)
Aerosol Monitoring
Hydroscopic and hydrate water in aerosols and their effect on fine-particle mass and on atmospheric extinction, 8:21697 (R:US)
Natural ion concentration in air as an indication of atmosphere pollution by nanometer aerosol particle, 8:21787 (BA:DE)
New approach to the determination of atmospheric strong acids, 8:21788 (BA:DE)
Atmospheric Chemistry
Atmospheric aerosol research. Excerpt from the Energy and Environment Division annual report, FY 1981, Chapter 4, 8:21737 (R:US)
Atmospheric Precipitations
Potpourri of deposition and resuspension questions, 8:21775 (R:US)
Biological Effects
Effects of air pollutants on corn, 8:21989 (R:US)
Data Acquisition Systems
National Emissions Report (1978): National Emissions Data Systems (NEDS) of the Aerometric and Emissions Reporting System (AEROS). Annual report, 8:21749 (R:US)
Environmental Effects
Air-pollution damage to man-made materials: physical and economic estimates. Final report, 8:20773 (R:US)
Dendroecological analysis of forest growth responses, 8:21991 (R:US)
Interactive effects of acid rain and gaseous air pollutants on natural terrestrial vegetation, 8:21696 (R:US)
Forecasting
Guidance for the future use of NASN (This guideline replaces OAQPS number 1.2-020), 8:21769 (R:US)
Gas Flow
Methods for estimating wake flow and effluent dispersion near simple block-like buildings. Technical memo, 8:21753 (R:US)
Information Systems
AEROS (Aerometric and Emissions Reporting System) information, 8:21765 (R:US)
AEROS manual series. Volume III: summary and retrieval manual. update number 2, 8:20780 (R:US)
Manuals
AEROS manual series. Volume III: summary and retrieval manual. update number 2, 8:20780 (R:US)
Meetings
Influences of environmental chemicals on the climate and biological after-effects, 8:21712 (R:DE:In German)
Particulate sampling and characterization. Extractive sampling in situ characterization available instrumentation, 8:21699 (R:US)
Monitoring
Techniques to determine a company's ability to conduct a quality stack test. Technical assistant document, 8:21752 (R:US)
Particle Resuspension
Potpourri of deposition and resuspension questions, 8:21775 (R:US)
Standards
Example Scope of Work for contracts to prepare SIP revisions to attain and maintain NAAQS. Guideline series, 8:21821 (R:US)
Preliminary assessment of adverse health effects from carbon monoxide and implications for possible modifications of the standard, 8:21819 (R:US)
Temperature Effects
Influences of environmental chemicals on the climate and biological after-effects, 8:21712 (R:DE:In German)
Visibility
Relative importance of atmospheric sulfates and nitrates in visibility reduction, 8:21784 (J:GB)
AIR POLLUTION CONTROL
Use this term for items that involve the removal or management of pollutants after they are formed by a source.
Model for fabric-filter cleaning: single-element and multiple-compartment effects, 8:21691 (R:US)
Vehicle refueling emissions seminar, 8:21823 (R:US)
Comparative Evaluations
Pollution-control costs: a status report, 8:19576 (R:US)
Economic Analysis
Pollution-control costs: a status report, 8:19576 (R:US)
Environmental Impacts
Environmental impact assessment of control measures required for attainment of the national ambient air quality standard for ozone, 8:21820 (R:US)
Technology Assessment
Combustion modification controls for stationary gas turbines. Volume II: Utility unit field test. Final report Jul 78-Jul 79, 8:21757 (R:US)
AIR POLLUTION MONITORS
Design
Application of optical particle measuring systems to high temperature/high pressure process streams, 8:21710 (RA:US)
Development of an in-situ real-time particulate monitoring system for application in hostile environments, 8:21708 (RA:US)
Extractive sampling with dilution probes, 8:21704 (RA:US)
On-line particulate measurement system for hot pressurized gas streams utilizing laser spectrometers, 8:21709 (RA:US)
Evaluation
Evaluation of filter-tape analyzing devices, part 1, 8:21777 (R:SE:In several languages)
Evaluation of filter-tape analyzing devices, part 2, 8:21778 (R:SE:SE)
Performance
On-line particulate measurement system for hot pressurized gas streams utilizing laser spectrometers, 8:21709 (RA:US)
Performance Testing
Application of optical particle measuring systems to high temperature/high pressure process streams, 8:21710 (RA:US)
Development of an in-situ real-time particulate monitoring system for application in hostile environments, 8:21708 (RA:US)
Resolution
Instrument resolution (For measuring aerosol physical properties), 8:21706 (RA:US)
Technology Assessment
Continuous-emission monitoring in the electric-utility industry. Final report, 8:20837 (R:US)
AIR PREHEATERS
See AIR HEATERS
AIR QUALITY
Monitoring
Plutonium aerosols size distribution in a reprocessing plant, 8:19804 (BA:DE)
Planning
Guidelines for air quality maintenance planning and analysis. Volume 5: Case studies in plan development, 8:21822 (R:US)
AIR SAMPLERS
Design
Dust sampling at high temperature and pressure, 8:21700 (RA:US)
Performance
New particle sizing impactor for heavy grain loading, 8:19586 (RA:US)

Test Facilities
Sampling procedures used at the Westinghouse high temperature and pressure particulate control test facility, 8:21701 (RA:US)

AIRBORNE PARTICLES
See PARTICULATES

AIRBORNE PARTICULATES
See PARTICULATES

AIRCRAFT
Aerodynamics
Accelerated development and flight evaluation of active controls concepts for subsonic transport aircraft. Volume 1: load alleviation/extended span development and flight tests. Final report, 8:20952 (R:US)
Selected advanced aerodynamic and active control concepts development, 8:20951 (R:US)
Control Systems
Accelerated development and flight evaluation of active controls concepts for subsonic transport aircraft. Volume 1: load alleviation/extended span development and flight tests. Final report, 8:20952 (R:US)
Selected advanced aerodynamic and active control concepts development, 8:20951 (R:US)
Energy Conservation
Aerodynamics/ACEE: aircraft energy efficiency, 8:20953 (R:US)
Aircraft energy conservation during airport ground operations. Final report, 8:20941 (R:US)
Sideslip indication system as a fuel saving aid in jet transport aircraFt operation, 8:20949 (R:DE)
Exhaust Gases
Remote sensing of turbine engine gases. Final report 1 Oct 80-30 Sep 81, 8:21688 (R:US)
Fuel Consumption
Accelerated development and flight evaluation of active controls concepts for subsonic transport aircraft. Volume 1: load alleviation/extended span development and flight tests. Final report, 8:20952 (R:US)
Selected advanced aerodynamic and active control concepts development, 8:20951 (R:US)
Gas Turbine Engines
Efficiency improved turboprop. Technical memo, 8:21010 (R:US)

AIRCRAFT ACCIDENTS
See ACCIDENTS

AIRCRAFT FUELS
See AVIATION FUELS

AIR-FUEL RATIO
See FUEL-AIR RATIO

ALABAMA
Petroleum Refineries
Preliminary assessment of the integration of a coal gasifier into a petroleum refinery, 8:19539 (J:US)

ALAP
See RADIATION PROTECTION

ALARM SYSTEMS
Information Dissemination
Principles of warning and criteria governing eligibility of National Warning Systems (NAWAS) terminals, 8:22897 (R:US)

ALASKA
Coal Deposits
Characterization and evaluation of washability of Alaskan coal: selected seams from Northern Alaska, Chicago Creek, Unalakleet, Nenana, Matanuska, Beluga, Yentna, and Herendeen Bay coal fields. Final technical report for phase IV, August 1, 1980-January 31, 1982, 8:19615 (R:US)
Characterization and evaluation of washability of Alaskan coals: selected seams from the Northern Alaska, Nulato, Eagle, Nenana, Broad Pass, Kenai, Beluga, and Chignik coal fields. Final technical report for phase III, March 1979-January 31, 1982, 8:19616 (R:US)
Hydroelectric Power Plants
Black Bear Lake project, FERC No. 5715 - Alaska. Draft Environmental Impact Statement, 8:19963 (R:US)
Uranium Deposits
Uranium hydrogeochemical and stream sediment reconnaissance of the Beaver NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19792 (R:US)
Uranium hydrogeochemical and stream sediment reconnaissance of the Ketchikan NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19794 (R:US)

ALBEDO-NEUTRON DOSEMETERS
Calibration
Measurement of neutron field reference data using a standardized single sphere albedo technique, 8:21593 (RA:US)
Procedures for calibrating neutron personnel dosimeters, 8:21590 (RA:US)
Universal albedo neutron dosemeter combined with a track etch detector, 8:21594 (RA:US)
Comparative Evaluations
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)
Design
Universal albedo neutron dosemeter combined with a track etch detector, 8:21594 (RA:US)
Sensitivity
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)
Spectral Response
Gamma-ray component from a Cf fission source, 8:21591 (RA:US)
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)

ALCOHOL FUELS
Use for pure alcohols, alcohol-water mixtures, or alcohols with additives; for alcohol-gasoline mixtures, use GASOHOL.
See also ETHANOL FUELS
METHANOL FUELS
Environmental Effects
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)
Fuel Consumption
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)
Performance
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)
Technology Assessment
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)

ALCOHOLS
See also BUTANOLS
ETHANOL
GLYCOLS
METHANOL
Chemical Reactions
Reaction between alcohol and nitric acid in the presence of metal nitrates, 8:21247 (TJ:DE:GE)
Recovery
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)

Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Creep
Irradiation creep in simple binary alloys, 8:21044 (R:US)
Electronic Structure
Magnetic ordering and electronic structure of CeAl$_2$, 8:21059 (R:US)
Erosion
Deformation of microstructures due to low-velocity particulate erosion of ductile metals by spherical particles, 8:21072 (R:US)
Expansion
In-situ determination of dimensional changes of electrodes in LiAl/FeS cells during cycling, 8:20744 (R:US)
Gas Tungsten-Arc Welding
Gas-tungsten arc welding of aluminum alloys, 8:21109 (P:US)
Magnetic Properties
Magnetic ordering and electronic structure of CeAl$_2$, 8:21059 (R:US)
Mechanical Properties
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)
Physical properties data compilations relevant to energy storage. V. Mechanical properties data on alloys for use in flywheels, 8:20734 (R:US)
Microstructure
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)
Oxidation
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)
Physical Radiation Effects
Irradiation creep in simple binary alloys, 8:21044 (R:US)
Voids
Quantitative comparison of the void distribution in a β'-phase Ni-Al-In alloy using x-ray small-angle scattering and transmission-electron microscopy (Ni-51.2 at. % Al-2.6 at. % In), 8:21047 (R:US)
ALUMINIUM ARSENIDES
Superlattices
Electronic properties of superlattices, 8:21166 (R:US)
ALUMINIUM BASE ALLOYS
Domain Structure
Magnetic hyperfine fields in Dy/sub 1-x/Y/sub x/Al$_2$, 8:21054 (R:US)
Grain Boundaries
Grain boundary precipitation in aluminum alloys: effect of boundary structure, 8:21113 (J:US)
ALUMINIUM HYDROXIDES
Solubility
Preliminary determination of the Al(OH)$_4^-$ stability constants in the aqueous phase at elevated temperatures, 8:20197 (RA:US)
Temperature Effects
Preliminary determination of the Al(OH)$_4^-$ stability constants in the aqueous phase at elevated temperatures, 8:20197 (RA:US)
ALUMINIUM OXIDES
Activation Energy
Activation enthalpy, Gibbs free energy, and entropy for conduction in Na β''-alumina, 8:21182 (J:US)
Catalytic Effects
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
Simultaneous measurement of CO oxidation rate and surface coverage on Pt/Al$_2$O$_3$ using infrared spectroscopy: rate hysteresis and CO island formation (Temperature and pressure effects), 8:21259 (J:US)
Sulfur deactivation of nickel methanation catalysts, 8:19943 (J:US)
Compatibility
Compatibility studies of structural alloys with solid breeder materials, 8:22723 (RA:US)

Enthalpy
Activation enthalpy, Gibbs free energy, and entropy for conduction in Na β''-alumina, 8:21182 (J:US)
Entropy
Activation enthalpy, Gibbs free energy, and entropy for conduction in Na β''-alumina, 8:21182 (J:US)
Fabrication
High-temperature fuel-cell research and development. Final technical progress report, 1 Oct 1980-30 Sep 1981, 8:20887 (R:US)
Free Energy
Activation enthalpy, Gibbs free energy, and entropy for conduction in Na β''-alumina, 8:21182 (J:US)
Ionic Conductivity
Activation enthalpy, Gibbs free energy, and entropy for conduction in Na β''-alumina, 8:21182 (J:US)
Phase Diagrams
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Sintering
Experimental test to unify sintering theory. Progress report, 8:21123 (R:US)
Sorptive Properties
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Structural Chemical Analysis
Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)

Radionuclide sorption on basalt-interbed materials. Annual report FY 1981, 8:19887 (R:US)
AMERICIUM 241
Alpha Decay
Gamma radiation of ^{241}Am, 8:22389 (RA:CS:In Slovak)
Internal pair production in alpha decay of ^{241}Am, 8:22388 (RA:CS:In Slovak)
Internal Pair Production
Internal pair production in alpha decay of ^{241}Am, 8:22388 (RA:CS:In Slovak)
AMINES
See also ADENINES
HYDROXYLAMINE
Solvent Extraction
Improved procedure for extraction of aromatic bases from synfuel materials (Aromatic amines; azaarenes), 8:21196 (R:US)
AMINO ACIDS
Organic acids containing both a basic amino group and an acidic carboxyl group.
Metabolism
Biomedical research with cyclotron-produced radionuclides. Progress report, August 1, 1982-February 28, 1983, 8:21913 (R:US)
AMINO ALCOHOLS
See ALCOHOLS
AMINES
AMINO SUGARS

AMMONIA
Chemical Reaction Kinetics
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Production
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)
Coal-based ammonia and methanol manufacture using Koppers-Totzek gasification, 8:19408 (RA:US)
Recovery
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Removal
Environmental studies, 8:19580 (RA:US)
AMMONIUM SULFATES
Deposition
Ammonium sulfate and bisulfate formation in air preheaters. Final report Oct 80-Oct 81, 8:20278 (R:US)
AMYLUM
See STARCH
ANAEROBIC DIGESTION
See also BIOGAS PROCESS
Biochemical Reaction Kinetics
Anaerobic fermentation of beef-cattle manure and crop residues, 8:19941 (RA:US)
Biochemical studies on the metabolic requirements of methanogenic bacteria and fatty acid utilizers as an approach to increasing the rate and yield of methanogenesis, 8:19939 (RA:US)
Continuous culture biomass fermentation studies. Quarterly report, 8:19940 (RA:US)
Meetings
Fuel-gas production from animal and agricultural residues and biomass. Anaerobic Digestion Program, 8:19937 (R:US)
Optimization
Autohydrolysis of organic residue to increase biodegradability to methane, 8:19938 (RA:US)
Parametric Analysis
Anaerobic fermentation of beef-cattle manure and crop residues, 8:19941 (RA:US)
Continuous culture biomass fermentation studies. Quarterly report, 8:19940 (RA:US)
ANALOG SYSTEMS
Signals
Fast transient digitizer (Patent), 8:21448 (P:US)
ANALYSIS (ACTIVATION)
See ACTIVATION ANALYSIS
ANALYSIS (THERMAL)
See THERMAL ANALYSIS
ANALYZERS (PULSE)
See PULSE ANALYZERS
ANGIOGRAPHY
See BIOMEDICAL RADIOGRAPHY
ANIMAL SHELTERS
Waste Heat
Heat pumps for air conditioning in animal shelters and for heating of buildings, 8:20974 (R:DE:In German)

ANIMALS
Chemical Composition
Chemicals identified in feral and food animals: a data base. Volume II. Records 533-1515. Second annual report, October 1982, 8:21827 (R:US)
ANIONS
See also HYDROGEN IONS I MINUS
Oxidation
Novel method for the electroless metallization of polyimide: surface oxidation of Zintl anions (Zintl anion Snq^{4-}), 8:21060 (R:US)
ANTARCTIC REGIONS
See also ANTARCTICA
Magnetic Surveys
Investigation of Antarctic crust and upper mantle using MAGSAT and other geophysical data, 8:22044 (R:US)
ANTARCTICA
Climates
West Antarctic ice sheet: diagnosis and prognosis, 8:21851 (RA:US)
ANTHRACITE
Coal is a gas, 8:19540 (J:US)
ANTIDEUTERONS
Annihilation
Annihilation of systems anti d-d and anti d-p, 8:22288 (RA:CS:In Czech)
ANTIMATTER
Gravitational Interactions
Experiments to measure the gravitational acceleration of antimatter, 8:22572 (J:NL)
ANTIMONY 124
Leaching
Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
ANTIMONY 125
Leaching
Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
Radioecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
ANTIMONY COMPOUNDS
See also ANTIMONY FLUORIDES
Refractivity
Dispersion of the refractive index near the absorption edge in compound semiconductors, 8:21161 (R:US)
ANTIMONY FLUORIDES
Chemical Reaction Kinetics
Spontaneous reactions of xenon, fluorine, and antimony pentafluoride, 8:21228 (R:US)
ANTIPROTON BEAMS
Electron Cooling
Proton-antiproton colliding beam electron cooling, 8:21553 (RA:SU:In Russian)
Experiment Planning
Antiproton-nucleus physics: LAMPF II nuclear physics working group report, 8:21522 (RA:US)
ANTIPROTON REACTIONS
Antiproton-nucleus interactions, 8:22367 (R:US)
Experiment Planning
Antiproton-nucleus physics: LAMPF II nuclear physics working group report, 8:21522 (RA:US)
Nuclear response to p, anti p, π and K^{+-} projectiles up to a few GeV, 8:22297 (RA:US)
Pair Production
Comparison of dimuon production by 125 GeV/c anti p and π^- with predictions of the Drell-Yan model, 8:22254 (R:US)
ANTIREFLECTION COATINGS
Antireflection pyrex envelopes for parabolic solar collectors, 8:20132 (R:US)
Deposition
Sol-gel derived AR coatings, 8:20134 (R:US)
ANTRIM SHALES
See BLACK SHALES
APARTMENT BUILDINGS
Air Infiltration
Energy efficiency in Chinese apartment buildings: parametric runs with the DOE.2 computer program, 8:20906 (R:US)
Energy Conservation
Energy conservation manual for multi-family dwellings, 8:20899 (R:US)
Energy Efficiency
Energy efficiency in Chinese apartment buildings: parametric runs with the DOE.2 computer program, 8:20906 (R:US)
Thermal Insulation
Energy efficiency in Chinese apartment buildings: parametric runs with the DOE.2 computer program, 8:20906 (R:US)
APPALACHIA
The mountainous region, including valleys and plateaus extending through the eastern USA from New England to Georgia and Alabama.
Black Shales
Final report of special geological, geochemical, and petrological studies of the Devonian shales in the Appalachian Basin, 8:19750 (R:US)
APPLIANCES
See also GAS APPLIANCES
WOOD BURNING APPLIANCES
Recycling
Recycling for solar applications. Final report, 8:20127 (R:US)
APPLICATORS (RADIOTHERAPY)
See RADIATION SOURCES
APPROPRIATE TECHNOLOGY
Program Management
Methods for evaluating the DOE Appropriate-Technology Program: A review and compilation of evaluation methods, 8:20865 (R:US)
AQUACULTURE
Economic Analysis
Optimization of biological recycling of plant nutrients in livestock waste by utilizing waste heat from cooling water, 8:21855 (R:US)
Environmental Impacts
Optimization of biological recycling of plant nutrients in livestock waste by utilizing waste heat from cooling water, 8:21855 (R:US)
AQUATIC ECOSYSTEMS
Biota and biological principles of the aquatic environment, 8:21854 (R:US)
AQUATIC ORGANISMS
Unspecified biota characteristic of aquatic ecosystems.
See also FISHES
MOLLUSCS
Biota and biological principles of the aquatic environment, 8:21854 (R:US)
Classification
Proposed classification of biotapological marine ecosystems off the coast of Italy. Part I, 8:21877 (R:IT:IT)
AQUEOUS HUMOR
See BODY FLUIDS
EYES
AQUEOUS SOLUTIONS
Thermodynamic Properties
EQ3/6; chemical equilibrium of aqueous systems (CDC7600;CRAY1; FORTRAN Extended 4.6 (CDC7600) and CFT (CRAY1)), 8:21154 (R:US)
AQUICULTURE
See AQUACULTURE
AQUIFERS
Cold Storage
Aquifer thermal-energy-storage costs with a seasonal-chill source, 8:20739 (R:US)
Computer Codes
Prickett and Lonnquist aquifer simulation program for the Apple II minicomputer, 8:20148 (R:US)
Heat Losses
Characterization of heat storage in confined aquifers with buoyancy flow, 8:20179 (RA:US)
Radionuclide Migration
Geohydrological considerations in land disposal of LLW, 8:19819 (R:US)
Sensible Heat Storage
United States Department of Energy aquifer thermal-energy-storage field-test facilities, 8:20740 (R:US)

Thermal Energy Storage Equipment
United States Department of Energy aquifer thermal-energy-storage field-test facilities, 8:20740 (R:US)
Waste-Rock Interactions
Investigation of silicate surface chemistry and reaction mechanisms associated with mass transport in geologic media, 8:19845 (RA:US)
ARAB REPUBLIC OF EGYPT
See EGYPTIAN ARAB REPUBLIC
ARC FURNACES
Heat Recovery
Possibilities of energy recovery and integrated energy supply of foundries, 8:20992 (TG:US)
ARCTIC REGIONS
Climates
Carbon particles in the Arctic, 8:21739 (RA:US)
Oil Spills
Oil spill response scenarios for remote arctic environments. Final report, 8:19731 (R:US)
ARGENTINA
Energy Models
Energy-sector-model applications in energy assessments of industrializing and developing countries, 8:20788 (R:US)
ARGON
Depolarization
Effect of multiple scattering on the intensity of depolarized light, 8:22223 (J:NL)
E1-Transitions
Relative population of the levels of the 1s2s2p and $1s2p^2$ configurations of argon from three electron excited atoms, 8:22225 (J:US)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Phase Transformations
The metallization of some simple systems, 8:22554 (BA:NL)
Radiolysis
Use of pulse radiolysis to study transient species in the gas phase, 8:21281 (R:US)
Thermal Conductivity
Transport in simple liquids and dense gases: kinetic mean-field theory and the KAC limit, 8:21144 (BA:US)
Viscosity
Transport in simple liquids and dense gases: kinetic mean-field theory and the KAC limit, 8:21144 (BA:US)
ARGON IONS
Electron-Ion Collisions
H-Division quarterly report, July-September 1982, 8:22564 (R:US)
ARIZONA
Energy Consumption
Handbook on solar energy and energy conservation for Arizona local governments, 8:21008 (R:US)
Energy Management
Handbook on solar energy and energy conservation for Arizona local governments, 8:21008 (R:US)
Solar Energy

Chemical Analysis
Chemistry of ash deposits in the U-GAS process, 8:19421 (R:US)
Chemical Composition
Chemistry of ash deposits in the U-GAS process, 8:19421 (R:US)
Combustion characterization of coals for industrial applications. Third quarterly progress report, 1 October 1982-31 December 1982 (Staged combustion), 8:19635 (R:US)
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; size and analytical data from 10 coal mines), 8:19551 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 3A. Gasification test at Sasolburg, overview (Proposed Henderson, Kentucky coal to gasoline plant; Sasolburg test of Illinois Basin coals in Lurgi Mark IV), 8:19496 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2B. Collection and shipment analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; West Kentucky No. 9 seam coal characterization and testing), 8:19493 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed

Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Deposition
Chemistry of ash deposits in the U-GAS process, 8:19421 (R:US)
Melting
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; size and analytical data from 10 coal mines), 8:19551 (R:US)
Melting Points
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Mutagen Screening
Mutagenicity of potential effluents from an experimental low Btu coal gasifier, 8:22018 (J:DE)
ASPHALTENES
Calibration Standards
Synthesis of oligomeric models of coal derived materials for use with GPC calibration. Quarterly report, September 1982-November 1982, 8:19562 (R:US)
Structural Chemical Analysis
Synthesis of oligomeric models of coal derived materials for use with GPC calibration. Quarterly report, September 1982-November 1982, 8:19562 (R:US)
Synthesis
Synthesis of oligomeric models of coal derived materials for use with GPC calibration. Quarterly report, September 1982-November 1982, 8:19562 (R:US)
ASPHALTS
See also ASPHALTENES
Extraction
Evaluation of asphalt cement extraction and recovery methods. Final report Oct 80-Jun 82, 8:20987 (R:US)
Materials Recovery
Evaluation of asphalt cement extraction and recovery methods. Final report Oct 80-Jun 82, 8:20987 (R:US)
ASTRONOMY

BEAM-GAS SPECTROSCOPY
See ION SPECTROSCOPY

BEAM-PLASMA SYSTEMS
Interaction of the intense focused REB with dense plasma, 8:22730 (RA:SU)
Beam Neutralization
Generation of plasma targets for a negative ion neutralizer, 8:22635 (J:US)
Boltzmann Equation
Nonlocal Boltzmann theory of plasma channels, 8:22632 (R:US)
Secondary Emission
Nonlocal Boltzmann theory of plasma channels, 8:22632 (R:US)
Stability
Influence of thermal motion of particles on stability of REB-plasma system, 8:22605 (RA:CS:In Czech)

BEHAVIOR
Limited to living systems.
Biological Radiation Effects
Behavioral studies following ionizing radiation exposures: a data base. Technical report, 8:21937 (R:US)

BELGIUM
Energy Conservation
National energy research and development program, 8:20800 (R:BE:FR)
Energy Source Development
National energy research and development program, 8:20800 (R:BE:FR)
National Energy Plan
National energy research and development program, 8:20800 (R:BE:FR)

BELT CONVEYORS
Design
Investigation of engineering and design considerations in selecting conveyors for densified refuse-derived fuel (drdf) and drdf: coal mixtures. Final report Jun 80-Sep 81, 8:19954 (R:US)
Performance Testing
Investigation of engineering and design considerations in selecting conveyors for densified refuse-derived fuel (drdf) and drdf: coal mixtures. Final report Jun 80-Sep 81, 8:19954 (R:US)

BELT PINCH
Magnetoacoustic Waves
Confinement and magnetoacoustic heating of a low density Belt-Pinch plasma, 8:22621 (RA:SU)
Plasma Confinement
Confinement and magnetoacoustic heating of a low density Belt-Pinch plasma, 8:22621 (RA:SU)

BENZENE
Catalytic Cracking
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Ion-Molecule Collisions
Gas-phase radiolysis and vacuum-ultraviolet photolysis of heterocyclic organic compounds, 8:21265 (R:US)
Shock Waves
H-Division quarterly report, July-September 1982, 8:22564 (R:US)

BENZOPYRENE
Biological Accumulation
Studies of sorption and remobilization of chemicals in artificial and natural sediments, 8:21861 (RA:DE:In German)
Biological Effects
Effects on rat lung immunity by acute lung exposure to benzo(a)pyrene, 8:22012 (J:US)
Environmental Transport
Studies of sorption and remobilization of chemicals in artificial and natural sediments, 8:21861 (RA:DE:In German)
Metabolism
Cytochrome P_{450} dependent monooxygenases in nasal epithelial membranes: effect of phenobarbital and benzo(a)pyrene, 8:22015 (J:US)

BENZOPYRROLES
See INDOLES

BERYLLIUM
Deposition
Mah, G. (Physical vapor deposition), 8:21084 (R:US)
Friction
Determination of static friction of beryllium to beryllium and beryllium to 1040 steel, 8:21089 (R:US)
Inelastic Scattering
COHBE;PREP; coherent inelastic scattering law calculations (UNIVAC1108; FORTRAN IV), 8:22478 (R:US)

BERYLLIUM 7
Gamma Spectroscopy
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)

BERYLLIUM 9 TARGET
Proton Reactions
Measurement of the p-C analyzing power between 100 and 750 MeV and the p-Be analyzing power at 780 MeV, 8:22354 (J:NL)

BERYLLIUM ALLOYS
Brazing
Vacuum brazing beryllium to Monel, 8:21107 (J:US)
Tensile Properties
Vacuum brazing beryllium to Monel, 8:21107 (J:US)
BERYLLIUM MODERATORS
See BERYLLIUM
BETA BACKSCATTERING GAGES
See RADIOMETRIC GAGES
BETA BEAMS (ELECTRONS)
See ELECTRON BEAMS
BETA BEAMS (POSITRONS)
See POSITRON BEAMS
BETA DECAY
For neutron and nuclear decay.
Strength Functions
Beta decay and strength distributions, 8:22413 (BA:US)
BETA DOSIMETRY
Corrections
Field measurement and interpretation of beta doses and dose rates, 8:21971 (R:US)
Quality Assurance
Quality assurance for measurements of ionizing radiation. Annual report for FY 1982, 8:19892 (R:US)
Research Programs
Beta measurement evaluation and upgrade, 8:19894 (R:US)
Thermoluminescent Dosemeters
Application of a multi-element beta dosimeter, 8:21589 (R:US)
BETA SPECTROMETERS
Operation
Los Alamos portable beta-ray spectrometer, 8:21579 (R:US)
Plastic Scintillation Detectors
Los Alamos portable beta-ray spectrometer, 8:21579 (R:US)
BETATRONS
Beam Dynamics
Equilibrium of a high current electron ring in a modified betatron accelerator. Memorandum report, 8:21482 (R:US)
Resistive wall instabilities in the modified betatron. Revision 1. Interim report, 8:21481 (R:US)
BF3 COUNTERS
Engineering Drawings
Neutron REM survey meter (Engineering Materials), 8:21613 (E:US)
BIG ROCK POINT REACTOR
Reactor Licensing
Systematic evaluation program. Status summary report, 8:20452 (R:US)
BINARY ALLOY SYSTEMS
Mathematical Models
Self-consistent approximations beyond the CPA. Part II, 8:22553 (BA:US)
BINARY MIXTURES
Shear
Microscopic theory of intrinsic shear and bulk viscosities, 8:22242 (J:US)
Solubility
General approach to the testing of binary solubility systems for thermodynamic consistency. Consolidated Fuel Reprocessing Program, 8:21232 (R:US)
Viscosity
Microscopic theory of intrinsic shear and bulk viscosities, 8:22242 (J:US)
BINARY STARS
Eclipse
Accretion disk coronae, 8:22144 (R:US)
Star Models
Accretion disk coronae, 8:22144 (R:US)
Stellar Atmospheres
Coronae of nondegenerate single and binary stars: a survey of our present understanding and problems ripe for solution, 8:22108 (R:US)
X-Ray Spectra
Neutron star binaries, pulsars and burst sources, 8:22110 (R:US)
BINDERS
Comparative Evaluations
Coal-gasification basic research and cost studies. Quarterly report No. 5, 8:19432 (R:US)
BIOACCUMULATION
See BIOLOGICAL ACCUMULATION
BIODEGRADATION
Bioassay
Development and proof-testing of a method for assaying the bio-degradibility of organic substances under anaerobic milieu conditions, 8:21997 (RA:DE:In German)
Screening
Investigations with respect to a test system for biodegradability evaluations under the aspects of surface waters and sewage treatment plants, 8:21860 (RA:DE:In German)
BIOFOULING
See BIOLOGICAL FOULING
BIOGAS PROCESS
Technology Assessment
Feasibility of biogas production on farms, 8:20021 (R:US)
BIOLOGICAL ACCUMULATION
Bioassay
Development and verification of a fish test in flowing water for comparable quantification of biological accumulation and the impacts of influencing factors, 8:22000 (RA:DE:In German)
BIOLOGICAL FOULING
Control
Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
BIOLOGICAL MATERIALS
See also BODY FLUIDS
Activation Analysis
Comparison of group separation techniques using NaI(Tl) and Ge(Li) spectrometry for trace elements determination in biological materials by neutron activation analysis, 8:21202 (RA:CS)
BIOLOGICAL RADIATION EFFECTS
See also DELAYED RADIATION EFFECTS
Information Systems
Behavioral studies following ionizing radiation exposures: a data base. Technical report, 8:21937 (R:US)
Low Dose Irradiation
Study of feasibility of detecting effects of low-dose radiation in shipyard workers. Final report, May 15-August 15, 1978, 8:21946 (R:US)
BIOLOGICAL RESEARCH REACTOR JANUS
See JANUS REACTOR
BIOLOGY
See also BOTANY
RADIOBIOLOGY
Research Programs
Report for 1979-1980, 1980-1981 of the Division of Engineering and Applied Science at the California Institute of Technology (California Institute of Technology), 8:21303 (R:US)
BIOMASS
Anaerobic Digestion
Fuel-gas production from animal and agricultural residues and biomass. Anaerobic Digestion Program, 8:19937 (R:US)
Energy Conversion
Production of liquid fuels out of plant biomass and refuse: Methods, cost, potential, 8:20003 (R:US:MIXED)
Energy Source Development
Present state of technology of recovery and conversion process for synthetic fuels, 8:20864 (R:XE)
Gasification
Catalytic steam gasification of biomass for methanol and methane production, 8:20019 (R:US)
Inventories
Ohio biomass for energy: annual potential by county, 8:20015 (R:US)
Resource Potential
Ohio biomass for energy: annual potential by county, 8:20015 (R:US)
Technology Assessment
Production of liquid fuels out of plant biomass and refuse: Methods, cost, potential, 8:20003 (R:US:MIXED)

Waste Product Utilization
Production of liquid fuels out of plant biomass and refuse: Methods, cost, potential, 8:20003 (R:US:MIXED)
BIOMASS CONVERSION PLANTS
Use only for plants converting biomass to fuel, do NOT use for plants preparing wastes and biomass for combustion.
Economic Analysis
Continuous culture biomass fermentation studies. Quarterly report, 8:19940 (RA:US)
Parametric Analysis
Parametric analysis support for alcohol-fuels process development. Final report, 1 January-30 June 1981, 8:20022 (R:US)
BIOMASS PLANTATIONS
Short Rotation Cultivation
Economic analysis method for short-rotation forestry, 8:19985 (R:US)
BIOMEDICAL RADIOGRAPHY
See also INDUSTRIAL RADIOGRAPHY.
Radiation Doses
Radiation burden of fetuses from radioisotope and X-ray examinations of pregnant women, 8:21951 (RA:CS:In Czech)
BIOREACTORS
Prior to March 1983 this concept was indexed to CHEMICAL REACTORS.
Design
Advanced process development for wastewater treatment processes, 8:19581 (RA:US)
BIPYRIDINES
Electron Transfer
Formation of fuel via photochemical electron transfer. Progress report, February 1, 1982-January 31, 1983, 8:21266 (R:US)
Photolysis
Formation of fuel via photochemical electron transfer. Progress report, February 1, 1982-January 31, 1983, 8:21266 (R:US)
BIRDS
See also FOWL
Behavior
Responses of airborne biota to microwave transmission from satellite power system. Final report, 8:22023 (R:US)
BISMUTH 209 TARGET
Lithium 7 Reactions
Method for the preparation of radon-211 (Patent), 8:21293 (P:US)
BITTER SPAR
See DOLOMITE
BITUMENS
See also ASPHALTS
Caking Power
Benzene-soluble bitumen constituents and coking power of hard coals, 8:19528 (RA:XE:In German)
Coking
Benzene-soluble bitumen constituents and coking power of hard coals, 8:19528 (RA:XE:In German)
Recovery
Pilot study on the isolation, metabolism and adaptation of microorganisms to Santa Rosa tar sand hydrocarbons. Phase II. Final report, June 17, 1982-July 17, 1982, 8:19782 (R:US)
BITUMINOUS COAL
Combustion Properties
Plane flame furnace combustion tests on JPL desulfurized coal, 8:19639 (R:US)
Desulfurization
Plane flame furnace combustion tests on JPL desulfurized coal, 8:19639 (R:US)
Pyrolysis
Characterization of tar products from rapid pyrolysis of bituminous coals. Fifth quarterly progress report, October 1982-December 1982, 8:19560 (R:US)
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Sorptive Properties
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)
BLACK HOLES
Gamma Astronomy
Compact objects, 8:22087 (R:US)
BLACK SHALES
Bulk Density
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Compression Strength
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Elasticity
Mechanical properties of Devonian shales from the Appalachian Basin, 8:19769 (R:US)
Exploration
Final report of special geological, geochemical, and petrological studies of the Devonian shales in the Appalachian Basin, 8:19750 (R:US)
Explosive Fracturing
Evaluation of EL836 explosive stimulation of Devonian gas shale, 8:19763 (R:US)
Fracture Properties
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Mechanical Properties
Mechanical properties of Devonian shales from the Appalachian Basin, 8:19769 (R:US)
Permeability
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Poisson Ratio
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Porosity
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Tensile Properties
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
Young Modulus
Material properties of Devonian shale for stimulation-technology development, 8:19768 (R:US)
BLADES (TURBINES)
See TURBINE BLADES
BLANKETS (BREEDING)
See BREEDING BLANKETS
BLASTS
See EXPLOSIONS
BLOCH EQUATIONS
Numerical Solution
Transient solutions of the Bloch equations for inhomogeneously broadened lines, 8:22594 (J:GB)
BLOOD
See also BLOOD CELLS
Biological Radiation Effects
Biochemical changes in blood components after lethal doses of radiation. Final report Oct 80-Sep 81, 8:21939 (R:US)
BLOOD CELLS
Agglomeration
Staticial mechanics of red blood cells aggregation: The distribution of Rouleaux in thermal equilibrium, 8:22568 (J:US)
Statistical Mechanics
Staticial mechanics of red blood cells aggregation: The distribution of Rouleaux in thermal equilibrium, 8:22568 (J:US)
BLOWDOWN
Hydrodynamics
BURST1; hydrodynamic analysis during blowdown (IBM360/75; FORTRAN IV), 8:21412 (R:US)

BLOWERS
Specifications
Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)
BLOWOUT PREVENTERS
Verification of cryogenic blowout control technology for offshore wells. Final report, 8:19689 (R:US)
BLOWOUTS
Control
Well control in case of offshore blowout: oil collection on platforms. Final report, 8:19688 (R:US)
BNL
Cogeneration
Final technical report on the development of cogeneration options at DOE facilities, 8:20247 (R:US)
Heavy Ion Accelerators
Improved four-stage accel-decel production of low-energy stripped heavy ions, 8:21499 (R:US)
BODY FLUIDS
See also BLOOD
MILK
URINE
Biochemical Reaction Kinetics
Introduction to high-resolution two-dimensional electrophoresis in clinical chemistry, 8:21897 (R:US)
BOILER FUEL
See BOILER FUELS
BOILER FUELS
Fuel Substitution
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Development of coal-water slurries as boiler fuel, 8:19644 (J:US)
Preliminary results from the DOE coal-oil mixture demonstration at Salem Harbor, 8:19629 (RA:US)
Performance
Achieving the best from boiler, through understanding Indian coal, 8:19640 (R:US)
Recommendations
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
BOILERS
See also FLUIDIZED BED BOILERS
Air Pollution Abatement
Field test results of eighteen industrial coal stoker fired boilers for emission control and improved efficiency. Paper 81.35.3, 8:19593 (J:US)
Air Pollution Control
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Combustion modification Nox controls for utility boilers. Volume I: tangential coal-fired unit field test. Final report Jul 78-Jul 79, 8:20293 (R:US)
Pollution-control costs: a status report, 8:19576 (R:US)
Combustion Control
Combustion modification Nox controls for utility boilers. Volume I: tangential coal-fired unit field test. Final report Jul 78-Jul 79, 8:20293 (R:US)
Combustion modification Nox controls for utility boilers. volume II: pulverized-coal wall-fired unit field test. Final report Jul 78-Jul 79, 8:20294 (R:US)
Combustion modification Nox controls for utility boilers. Volume III: residual oil wall-fired unit field test. Final report Jul 78-Jul 79, 8:20295 (R:US)
Environmental assessment of stationary source Nox control technologies. Final report Jun 76-Sep 79, 8:20305 (R:US)
Industrial boiler combustion modification Nox controls. Volume I: environmental assessment. Final report Jan 78-Jul 79, 8:21460 (R:US)
Industrial boiler combustion modification Nox controls. Volume II: stoker-coal-fired boiler field test - Site A. Final report Jul 78-Jul 79, 8:21461 (R:US)
Industrial boiler combustion modification Nox controls. Volume III: stoker-coal-fired boiler field test - Site B. Final report Jul 78-Jul 79, 8:21462 (R:US)
Energy Consumption
Report on the 1980 manufacturing industries energy consumption study and survey of large combustors, 8:20861 (R:US)
Environmental Effects
Industrial boiler combustion modification Nox controls. Volume III: stoker-coal-fired boiler field test - Site B. Final report Jul 78-Jul 79, 8:21462 (R:US)
Environmental Impacts
Industrial boiler combustion modification Nox controls. Volume I: environmental assessment. Final report Jan 78-Jul 79, 8:21460 (R:US)
Industrial boiler combustion modification Nox controls. Volume II: stoker-coal-fired boiler field test - Site A. Final report Jul 78-Jul 79, 8:21461 (R:US)
Feedwater
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Fuel Substitution
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Technology and economics of close-coupled gasifiers for retrofitting gas/oil combustion units to biomass feedstock, 8:19956 (R:US)
Gas Burners
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired firetube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Oil Burners
Effects of fuel properties and atomization parameters on Nox control for heavy liquid fuel fired package boilers. Final report Jan 77-Jan 79, 8:21459 (R:US)
Retrofitting
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Technology and economics of close-coupled gasifiers for retrofitting gas/oil combustion units to biomass feedstock, 8:19956 (R:US)
BOILING WATER COOLED AND MODERATED REACTO
See BWR TYPE REACTORS
BOLTZMANN COLLISION INTEGRAL
See BOLTZMANN EQUATION
BOLTZMANN EQUATION
Numerical Solution
Solutions of the Yvon-Born-Green equation for hard discs at very high densities, 8:22578 (J:GB)
BOLTZMANN TRANSPORT EQUATION
See BOLTZMANN EQUATION
BOLTZMANN-VLASOV EQUATION
Numerical Solution
A numerical method for solving the Vlasov equation, 8:22626 (R:US)
BONES
See SKELETON
BOOM TOWNS
Computerized Simulation
Management of social effects in oil-shale boomtowns, 8:21885 (R:US)
Management
Management of social effects in oil-shale boomtowns, 8:21885 (R:US)
BOOSTERS (PARTICLE)
See PARTICLE BOOSTERS
BOP
See BLOWOUT PREVENTERS
BOREHOLES
Drilling
Basalt Waste Isolation Project drilling and testing. Quarterly report, April 1, 1982-June 30, 1982, 8:19864 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, July 1, 1982-September 30, 1982, 8:19865 (R:US)

Lithology
Basic data report for drillhole AEC 8 (Waste Isolation Pilot Plant - WIPP) (Eddy County, New Mexico), 8:19866 (R:US)
Stratigraphy
Basic data report for drillhole AEC 8 (Waste Isolation Pilot Plant - WIPP) (Eddy County, New Mexico), 8:19866 (R:US)
Testing
Hydrologic analyses of two brine encounters in the vicinity of the Waste Isolation Pilot Plant (WIPP) Site, 8:22028 (R:US)
BORN-GREEN-YVON EQUATION
See BOLTZMANN EQUATION
BORON 11
Energy-Level Transitions
Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
BORON 11 TARGET
Pion Reactions
Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
BORON ALLOYS
Erosion
Erosion of hard-metal coatings (Ni-Cr-B), 8:21126 (R:US)
BORON INJECTION
See SAFETY INJECTION
BOROSILICATE GLASS

Fuel Management
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
Reactor Cores
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
BREEDING BLANKETS
Hybrid reactors, 8:22770 (BA:DE)
Maintenance
Central-cell blanket-module-maintenance approach for the MARS high-temperature blanket, 8:22746 (R:US)
Materials Testing
First-wall and blanket engineering development for magnetic-fusion reactors, 8:22697 (R:US)
Research Programs
Initial progress in the first wall, blanket, and shield Engineering Test Program for magnetically confined fusion-power reactors, 8:22696 (R:US)
BRICKS
Catalytic Effects
Thermal and catalytic cracking of tars and tar constituents from coal gasification processes, 8:19469 (RA:US)
Thermal Insulation
SBI low energy house model 79 - with a 410 mm cavity brick wall, 8:20937 (R:DK:In Danish)
BRINES
Environmental Transport
Hydrologic analyses of two brine encounters in the vicinity of the Waste Isolation Pilot Plant (WIPP) Site, 8:22028 (R:US)
Geochemistry
Fluid sampling and analysis of geopressured brine, 8:20162 (RA:US)
Materials Recovery
Operation of a mineral recovery unit on brine from the Salton Sea Known Geothermal Resource Area. Report of investigations/1982, 8:20167 (R:US)
Mathematical Models
Thermodynamics of high-temperature brines, 8:20196 (RA:US)
Solvent Properties
The solubility of methane, carbon dioxide, and oxygen in brines from 0 deg to 300 deg c. Report of investigations/1982, 8:20200 (R:US)
Thermodynamics
Thermodynamics of high-temperature brines, 8:20196 (RA:US)
Waste Disposal
Fluid sampling and analysis of geopressured brine, 8:20162 (RA:US)
BRONCHITIS
Diagnostic Techniques
Application of radioactive aerosols in diagnostic techniques of bronchial obstructions in the clinical practice, 8:21922 (BA:DE:In German)
Radioactive Aerosols
Application of radioactive aerosols in diagnostic techniques of bronchial obstructions in the clinical practice, 8:21922 (BA:DE:In German)

EVENT user's manual: a computer code for analyzing explosion-induced gas-dynamic transients in flow networks, 8:21439 (R:US)
Radiation Monitoring
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the National Guard Armory at Washington Park, 52nd Street and Cottage Grove Avenue, Chicago, Illinois, September 19, 1977-October 11, 1978, 8:19890 (R:US)
Research Programs
Building technology project summaries, 1981-1982. Special pub, 8:20931 (R:US)
Progress in energy-efficient buildings, 8:20907 (R:US)
Solar Space Heating
Passive solar architecture in Europe, 8:20116 (B:XE)
Space Heating
New ways of heating and cooling buildings with electricity, 8:20897 (R:US)
Space HVAC Systems
Validation data for mechanical system algorithms used in building energy analysis programs. Final report, 8:20891 (R:US)
Stack Disposal
Methods for estimating wake flow and effluent dispersion near simple block-like buildings. Technical memo, 8:21753 (R:US)
Thermal Analysis
Fourier-transform approach to building simulations with thermostatic controls, 8:20938 (R:US)
Thermal Efficiency
Building digests: heating and thermal aspects of building, 8:20924 (R:US)
BUILDINGS (CONTAINMENT)

OIL BURNERS
Fuel Substitution
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Fuel-Air Ratio
Exhaust sensor for heating systems, 8:20939 (TG:US)
BURNOUT
Test Facilities
Experimental study on natural-convection boiling burnout in an annulus (PWR; BWR), 8:20684 (R:US)
BURNUP
BURNUP; heavy element isotopic burnup analysis (GE635; FORTRAN IV), 8:20509 (R:US)
BURSA OF FABRICIUS
See BIRDS
BUSES
Diesel Engines
Noise reduction retrofit for a 'new look' GMC transit bus: service bulletin. Final report Apr 80-Nov 81, 8:21020 (R:US)
Gas Turbine Engines
Support and power-plant documentation for the gas-turbine-powered-bus demonstration program. Final report, 1 January 1980-30 September 1981, 8:21013 (R:US)
BUTADIENE
Chemical Preparation
Oxygen on iron oxide: effect on the selective oxidation of butane, 8:21235 (J:US)
BUTANE
Density
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Dielectric Properties
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Enthalpy
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Entropy
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)

Melting Points
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Vapor Pressure
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)
Vaporization Heat
Thermophysical properties of normal butane from 135 to 700 K at pressures to 70 MPa, 8:19770 (R:US)

BUTANOLS
Biosynthesis
Fermentative production of butanol from sorghum molasses as a potential agricultural fuel. Final report, June 26, 1981-September 25, 1982, 8:19990 (R:US)

BUTENES
Oxidation
Oxygen on iron oxide: effect on the selective oxidation of butane, 8:21235 (J:US)
Shock Waves
H-Division quarterly report, July-September 1982, 8:22564 (R:US)

Liquid transfer and entrainment correlation for droplet-annular flow, 8:20683 (R:US)
Economics
Loss of benefits resulting from mandated nuclear plant shutdowns, 8:20477 (R:US)
Electrical Equipment
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Electromagnetic Pulses
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Electronic Equipment
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Fasteners
Threaded-fastener experience in nuclear power plants, 8:20331 (R:US)
Fluid Flow
FLOW-MODEL; multi-channel two-dimensional, two-phase flow (IBM360;CDC CYBER73;CDC6600,7600; FORTRAN IV), 8:20318 (R:US)
Fuel Assemblies
Extended-burnup calculations for operating-reactor reload reviews, 8:20347 (R:US)
Fuel Cans
Experimental study on natural-convection boiling burnout in an annulus, 8:20684 (R:US)
Fuel Management
Extended-burnup calculations for operating-reactor reload reviews, 8:20347 (R:US)
Recent BWR fuel management reactor physics advances, 8:20338 (RA:US)
Fuel Rods
Fuel-cladding mechanical interaction in PCI-resistant LWR fuel designs during normal operation and power-ramping. Fuel-Performance Improvement Program, 8:20327 (R:US)
Fuel-Cladding Interactions
Fuel-cladding mechanical interaction in PCI-resistant LWR fuel designs during normal operation and power-ramping. Fuel-Performance Improvement Program, 8:20327 (R:US)
Hydraulics
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)
In Core Instruments
Investigation of the axial void propagation velocity profile in BWR fuel bundles, 8:20341 (RA:US)
Separate effects tests in support of BWR thermal/hydraulic monitoring, 8:20342 (RA:US)
Legal Aspects
Licensee Event Report (LER) compilation for month of January 1983, 8:20463 (R:US)
Operating reactors licensing actions summary, 8:20457 (R:US)
Loss of Coolant
Experimental study on natural-convection boiling burnout in an annulus, 8:20684 (R:US)
FLASH3; loss-of-coolant accident analysis (CDC6600; FORTRAN IV), 8:20564 (R:US)
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws, 8:20733 (TG:US)
NURLOC-1.0; loss-of-coolant thermal analysis (CDC6400; FORTRAN IV), 8:20319 (R:US)
Loss of Flow
Experimental study on natural-convection boiling burnout in an annulus, 8:20684 (R:US)
Neutron Spectra
LEOPARD;SPOTS; sjectrum calculation with depletion (IBM360;UNIVAC1108; FORTRAN IV(H) (IBM360) and FORTRAN V (UNIVAC1108)), 8:20503 (R:US)
Pipes
Investigation of special-purpose processors for real-time synthetic-aperture-focusing techniques for nondestructive evaluation of nuclear-reactor vessels and piping components, 8:20344 (R:US)
Power Systems
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Pressure Vessels
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws, 8:20733 (TG:US)
Investigation of special-purpose processors for real-time synthetic-aperture-focusing techniques for nondestructive evaluation of nuclear-reactor vessels and piping components, 8:20344 (R:US)
LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)
Primary Coolant Circuits
Monitoring techniques for pH, hydrogen, and redox potential in nuclear-reactor circuits, 8:20370 (R:US)
Stress corrosion cracking in boiling water reactor (BWR) piping, 8:20343 (RA:US)
Two-fluid model formulation and drag correlation for dispersed two-phase flow, 8:20324 (R:US)

Reactor Accidents
Aerosol Release and Transport Program. Quarterly progress report, July-September 1982, 8:20719 (R:US)
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
MIRAB;MIRAP; containment system iodine removal (CDC6400; FORTRAN IV), 8:20656 (R:US)
Post accident debris cooling, 8:20730 (B:DE)
RETRAN-02: a program for transient thermal-hydraulic analysis of complex fluid-flow systems. Volume 4. Applications, 8:20689 (R:US)
Volatile fission-product source term evaluation using the fastgrass comptuer code, 8:20681 (R:US)
Reactor Components
Portable linear accelerator development. Final report, 8:20328 (R:US)
Reactor Cores
Advances in LWR thermal hydraulics, 8:20333 (RA:US)
Application of nodal methods to light water reactors, 8:20339 (RA:US)
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Current challenges in light water reactor physics, 8:20332 (RA:US)
Extended-burnup calculations for operating-reactor reload reviews, 8:20347 (R:US)
Proceedings of the topical meeting on advances in reactor physics and core thermal hydraulics, 8:20554 (R:US)
Reactor Instrumentation
Monitoring techniques for pH, hydrogen, and redox potential in nuclear-reactor circuits, 8:20370 (R:US)
Reactor Kinetics
Application of nodal methods to light water reactors, 8:20339 (RA:US)
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Current challenges in light water reactor physics, 8:20332 (RA:US)
Importance of momentum dynamics in BWR neutronic stability, 8:20335 (RA:US)
Interaction of neutronics and thermal-hydraulics in the evaluation of BWR stability, 8:20334 (RA:US)
Lattice homogenization theory for coarse mesh diffusion analysis, 8:20340 (RA:US)
Neutronics analysis of BWR partial scrams with boron injection, 8:20337 (RA:US)
Proceedings of the topical meeting on advances in reactor physics and core thermal hydraulics, 8:20554 (R:US)
Recent BWR fuel management reactor physics advances, 8:20338 (RA:US)
Reactor Maintenance
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Reactor Materials
Fission reactors and materials, 8:20325 (R:US)
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws, 8:20733 (TG:US)
LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)
Stress corrosion cracking in boiling water reactor (BWR) piping, 8:20343 (RA:US)
Reactor Noise
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Reactor Operation
Licensed operating reactors. Status summary report, 8:20450 (R:US)
Licensee Event Report (LER) compilation for month of January 1983, 8:20463 (R:US)
Reactor Operators
Peer-review study of the draft handbook for human-reliability analysis with emphasis on nuclear-power-plant applications, NUREG/CR-1278, 8:20348 (R:US)
Reactor Shutdown
Loss of benefits resulting from mandated nuclear plant shutdowns, 8:20477 (R:US)
Reactor Stability
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Importance of momentum dynamics in BWR neutronic stability, 8:20335 (RA:US)
Interaction of neutronics and thermal-hydraulics in the evaluation of BWR stability, 8:20334 (RA:US)
Safety Injection
Neutronics analysis of BWR partial scrams with boron injection, 8:20337 (RA:US)
Seismic Effects
Seismic hazard analysis overview and executive summary, 8:20712 (R:US)
Steam Turbines
Scale-model turbine-missile-casing impact tests. Final report, 8:20691 (R:US)
Thermodynamics
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)
Transients
GARLIC-B. A digital code for real-time calculation of the transient behaviour of nodal and global core and plant parameters of BWR nuclear power plants, 8:20329 (R:DE)
Hydrodynamics of annular-dispersed flow, 8:20680 (R:US)
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)

CADMIUM
Biological Effects
Cadmium as an etiologic factor in hypertension (Rats), 8:22020 (BA:US)
Uptake and fate of Cd and Zn in edible fungi of the Agaricus bisporus species, 8:22002 (R:DE:In German)

Ecological Concentration
Study of endogenous and exogenous influence on lead (Pb) and cadmium (Cd) content in muscles and organs of deer (Capreolus capreolus L.) and wild rabbit (Lepus cuniculus L.), 8:21828 (R:DE:In German)
Genetic Effects
Cadmium as an etiologic factor in hypertension (Rats), 8:22020 (BA:US)
Tissue Distribution
Study of endogenous and exogenous influence on lead (Pb) and cadmium (Cd) content in muscles and organs of deer (Capreolus capreolus L.) and wild rabbit (Lepus cuniculus L.), 8:21828 (R:DE:In German)
Uptake
Uptake and fate of Cd and Zn in edible fungi of the Agaricus bisporus species, 8:22002 (R:DE:In German)
CADMIUM SELENIDE SOLAR CELLS
Performance
Development of a cadmium selenide thin film solar cell. Final report, Mar. 1980, 8:19981 (R:DE:In several languages)
CADMIUM SELENIDES
Electroluminescence
Photoluminescence and electroluminescence as probes of interfacial charge-transfer processes relevant to cadmium sulfo-selenide-based photoelectrochemical cells. Technical report, 8:19978 (R:US)
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R:US)
Photoluminescence
Photoluminescence and electroluminescence as probes of interfacial charge-transfer processes relevant to cadmium sulfo-selenide-based photoelectrochemical cells. Technical report, 8:19978 (R:US)
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R:US)
CADMIUM SULFIDE SOLAR CELLS
Heterojunctions
Process development for large-scale production of CdS thin film solar cells sputtered copper sulfide layers and cadmium sulfide-copper sulfide heterojunctions. Application of high rate sputtering using hot-pressed targets. Final report, 8:19980 (R:DE:In several languages)
Production
Development of a process for an inexpensive production of thin film solar cells on an industrial scale. Final report, Jul. 1980, 8:19982 (R:DE:In several languages)
Sputtering
Process development for large-scale production of CdS thin film solar cells sputtered copper sulfide layers and cadmium sulfide-copper sulfide heterojunctions. Application of high rate sputtering using hot-pressed targets. Final report, 8:19980 (R:DE:In several languages)
CADMIUM SULFIDES
Electroluminescence
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R:US)
Magnetic Properties
Potential for high temperature superconductivity. Final report Apr 80-Oct 81, 8:21148 (R:US)
Photoluminescence
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R:US)
Superconductivity
Potential for high temperature superconductivity. Final report Apr 80-Oct 81, 8:21148 (R:US)
CADMIUM TELLURIDE SOLAR CELLS
Performance
Low-cost, sprayed CdTe solar-cell research. Final report, 8:20024 (R:US)
CADMIUM TELLURIDES
Refractivity
Dispersion of the refractive index near the absorption edge in compound semiconductors, 8:21161 (R:US)
Spray Coating
Low-cost, sprayed CdTe solar-cell research. Final report, 8:20024 (R:US)
CAFETERIAS
See RESTAURANTS
CALCINED WASTES
Pelletizing
Pelletized Waste Form Demonstration Program. Volume II. Description and performance, 8:19855 (R:US)
CALCIUM 40
Energy-Level Transitions
Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
CALCIUM 40 TARGET
Pion Reactions

Crystallization
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)
Desorption
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
Diffusion
Geographical, seasonal, and secular variations of the partial pressure of CO_2 in surface waters of the North Atlantic Ocean: the results of the North Atlantic TTO Program, 8:21857 (RA:US)
Environmental Impacts
Carbon dioxide, science and consensus: a congressional staff point of view, 8:21815 (RA:US)
Greenhouse Effect
Carbon particles in the Arctic, 8:21739 (RA:US)

Simulating CO_2-induced climatic change with mathematical climate models: capabilities, limitations and prospects, 8:21680 (RA:US)
West Antarctic ice sheet: diagnosis and prognosis, 8:21851 (RA:US)

Isotope Ratio
Model experiments for the interpretation of the carbon isotope ratio variations of the CO_2 occurrences in Slovakia, 8:22066 (RA:CS)

Mathematical Models
Summary of some WMO activity relevant to atmospheric carbon dioxide, 8:21816 (RA:US)

Meetings
Carbon dioxide research conference: carbon dioxide, science and consensus, 8:21692 (R:US)

Metabolism
Biochemical and physiological characterization of higher plants with reduced photorespiration. Progress report, March 1, 1982-March 1, 1983, 8:21909 (R:US)

Phase Diagrams
Liquid-vapor equilibria for ternary natural gas systems. Annual report Sep 80-Sep 81, 8:19772 (R:US)

Production
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)

Quantitative Chemical Analysis
Theoretical studies of the thermal decomposition of carbonaceous aerosol particulates, 8:21741 (RA:US)

Removal
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)

Research Programs
CO_2 research program of CEC, 8:20777 (RA:US)

Separation Processes
Alcohol recovery and carbon dioxide purification in alcohol plants using semipermeable membranes. Final technical report, September 1, 1981-August 31, 1982, 8:19989 (R:US)

Solubility
The solubility of methane, carbon dioxide, and oxygen in brines from 0 deg to 300 deg c. Report of investigations/1982, 8:20200 (R:US)

Solvent Extraction
Application of selective solvent extraction to carbonaceous aerosols, 8:21742 (RA:US)

Thermalization
Electron thermalization in gases. V. Diatomic molecules H_2, N_2, and CO, 8:22522 (J:US)

CARBON DIOXIDE INJECTION

Additives
Enhanced oil recovery by CO_2 foam flooding, 8:19681 (R:US)

CARBON IONS

Energy-Level Transitions
Doubly excited states in some light atoms, 8:22180 (R:US)

Ion-Atom Collisions
Electron capture in low-energy collisions of C/sup q/+ and O/sup q/+ with H and H_2, 8:22212 (J:US)

Ion-Molecule Collisions
Electron capture in low-energy collisions of C/sup q/+ and O/sup q/+ with H and H_2, 8:22212 (J:US)

CARBON MONOXIDE

Air Pollution
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)

Air Pollution Abatement
Regulatory impact analysis of the national ambient air quality standards for carbon monoxide. Final report, 8:21466 (R:US)
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)

Air Pollution Control
Combustion modification Nox controls for utility boilers. Volume I: tangential coal-fired unit field test. Final report Jul 78-Jul 79, 8:20293 (R:US)
Combustion modification Nox controls for utility boilers. volume II: pulverized-coal wall-fired unit field test. Final report Jul 78-Jul 79, 8:20294 (R:US)
Combustion modification Nox controls for utility boilers. Volume III: residual oil wall-fired unit field test. Final report Jul 78-Jul 79, 8:20295 (R:US)

Biological Effects
Potentially hazardous air contaminants in the home, 8:21990 (R:US)

Chemisorption
Experimental studies of the geometric and electronic structure of chemisorption binding. Final report Feb 80-Jan 81, 8:21219 (R:US)

Corrosive Effects
VPI-4.8 - investigation of carbon monoxide disintegration of refractories in coal gasifiers, 8:19429 (R:US)

Desorption
Surface chemical information from electron- and photon-stimulated desorption, 8:21273 (R:US)

Ecological Concentration
Air quality non-attainment areas in Region V, 8:21824 (R:US)

Geographical Variations
Street level versus rooftop sampling: carbon monoxide and aerosol in New York City, 8:21783 (J:GB)

Health Hazards
Preliminary assessment of adverse health effects from carbon monoxide and implications for possible modifications of the standard, 8:21819 (R:US)

Infrared Spectra
Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)

Methanation
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Homogeneous carbon monoxide fixation. Progress report, May 1, 1980-March 1, 1982. Final rport, 8:19932 (R:US)
Sulfur deactivation of nickel methanation catalysts, 8:19943 (J:US)

Monitoring
Potentially hazardous air contaminants in the home, 8:21990 (R:US)

Oxidation
Simultaneous measurement of CO oxidation rate and surface coverage on Pt/Al_2O_3 using infrared spectroscopy: rate hysteresis and CO island formation (Temperature and pressure effects), 8:21259 (J:US)

Production
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)

Standards
Sensitivity analysis on Coburn model predictions of COHB levels associated with alternative CO standards (EPA staff paper), 8:22005 (R:US)

Toxicity
Sensitivity analysis on Coburn model predictions of COHB levels associated with alternative CO standards (EPA staff paper), 8:22005 (R:US)

Vibrational States
Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)

CARBON OXIDE SULFIDE
See CARBON OXYSULFIDE

CARBON OXYSULFIDE

Removal
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)
Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)

CARBON STEELS
See also STEEL-ASTM-A533-B

Corrosion
Alloy steel corrosion kinetics and oxide morphologies in acid chloride environments, 8:20360 (RA:US)
Characterization of model boiler specimens, 8:20366 (RA:US)
Corrosion of support materials, 8:20358 (RA:US)
Examinations of support plate samples from steam generators, 8:20362 (RA:US)
Measuring corrosion rates in crevices with a computer-controlled flow loop, 8:20361 (RA:US)
Modeling of salt concentrations in crevices, 8:20368 (RA:US)
Recent Westinghouse experience with tube support plate materials corrosion studies, 8:20357 (RA:US)
Corrosion Denting
Impedance studies of the growth of porous magnetite films on carbon steel in high temperature aqueous systems, 8:20369 (RA:US)
Wear Resistance
Microstructural influence on abrasive wear resistance of high-strength, high-toughness medium-carbon steels, 8:21074 (R:US)
CARBONACEOUS MATERIALS
See also *COAL*
OIL SANDS
OIL SHALES
Hydrogenation
Development of BEACON Technology, 8:19449 (RA:US)
CARBONYL SULFIDE
See CARBON OXYSULFIDE
CARBONYLS
Only for compounds of metals with carbonyl radicals.
Chemical Reaction Kinetics
Comments on the linear free-energy correlation between O_3 and OH addition reactions reported in Rate Constants for the Gas-Phase Reactions of O_3 with a Series of Carbonyls at 296 K, 8:21243 (J:US)
Radiolysis
Electron reactions in the pulse radiolysis of metal carbonyls dissolved in 2,2,4-trimethylpentane, 8:21287 (J:GB)
CARBOXYLIC ACIDS
See also AMINO ACIDS
Oxidation
Photo-Kolbe reaction in biomass wastestreams, 8:20814 (RA:US)
CARCINOGENESIS
Radioinduction
Carcinogenesis following prenatal exposure to radiation, 8:21983 (J:DE)
Impact of the 1980 BEIR-III report on low-level radiation risk assessment, radiation protection guides, and public health policy, 8:20711 (RA:US)
Radiation carcinogenesis. Cancergram ck06, 8:21969 (R:US)
Risk Assessment
Impact of the 1980 BEIR-III report on low-level radiation risk assessment, radiation protection guides, and public health policy, 8:20711 (RA:US)
CARCINOGENS
Biological Effects
Final progress report on carcinogenic agents, 8:21995 (R:US)
CARCINOMAS
Radioinduction
Associations between tumor types in irradiated BALB/c female mice, 8:21975 (J:US)
Risks of radiation: induced lung cancer, 8:21985 (BA:US)
Risk Assessment
Risks of radiation: induced lung cancer, 8:21985 (BA:US)
CARDIOVASCULAR DISEASES
See also HYPERTENSION
Biological Indicators
New developments in on-line isoenzyme monitoring for use in clinical diagnostics, 8:21901 (BA:US)
CARIBBEAN SEA
See also GULF OF MEXICO
Vehicles
Vehicle operating costs in the Caribbean: an experimental study of vehicle performance, 8:21016 (R:US)
CASCADE IMPACTORS
Aerosol Monitoring
Equivalence of low pressure impactor and differential mobility analyzer data for submicron particle size distributions, 8:21470 (BA:DE)
Calibration
Nonideal collection characteristics of a cascade impactor with various collection substrates, 8:21779 (J:US)
Efficiency
Parameters influencing the collection efficiency of solid aerosols in cascade impactor, 8:21468 (BA:DE)
Substrates
Nonideal collection characteristics of a cascade impactor with various collection substrates, 8:21779 (J:US)
CASKS
See also SPENT FUEL CASKS
Certification
Directory of Certificates of Compliance for Radioactive-Materials Packages. Summary report of NRC approved packages, 8:19808 (R:US)
Directory of Certificates of Compliance for Radioactive-Materials Packages. Summary report of NRC approved quality assurance programs for radioactive material packages, 8:19810 (R:US)
Directory of Certificates of Compliance for Radioactive-Materials Packages. Certificates of Compliance, 8:19809 (R:US)
Design
FFTF radioactive solid waste handling and transport, 8:19831 (R:US)
CAT SCANNING
X-Ray Equipment
CAT Scanner Electron Gun (Engineering Materials), 8:21923 (E:US)
CATALYSTS
Chemical Preparation
LC-Finer catalyst testing, 8:19485 (RA:US)
Deactivation
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Sulfur deactivation of nickel methanation catalysts, 8:19943 (J:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Performance Testing
LC-Finer catalyst testing, 8:19485 (RA:US)
Regeneration
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Structural Chemical Analysis
Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)
Surface Properties
Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)
Testing
Catalyst and reactor development for a liquid-phase Fischer-Tropsch process. Quarterly technical progress report, 1 July 1982-30 September 1982, 8:19933 (R:US)
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Thermodynamic Activity
Studies on molybdena catalysts. XI. Oxygen chemisorption on sulfided catalysts, 8:21234 (J:US)

CATHODES
Corrosion
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
Performance
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
Roughness
Effect of surface roughness on the hydrogen evolution reaction kinetics with mild steel and nickel cathodes, 8:19927 (J:GB)
CAVITY RECEIVERS
Design
Ceramic high temperature receiver design and tests, 8:20126 (RA:US)
Heat Exchangers
High-temperature ceramic heat exchanger element for a solar thermal receiver, 8:20125 (RA:US)
Performance Testing
Ceramic high temperature receiver design and tests, 8:20126 (RA:US)
CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Beam Dynamics
Self-consistent interaction of a set of ion extended bunches with a multigap resonator, 8:21490 (RA:SU:In Russian)
Electromagnetic Fields
Higher-order modes calculation of rf cavity with cylindrical symmetry, 8:21484 (R:US)
Engineering Drawings
50-MHz SPEAR r-f cavities (out of use since 1976) (Engineering Materials), 8:21564 (E:US)
7-foot accelerator section (Engineering Materials) (Stanford 20-GeV linac), 8:21540 (E:US)
PEP r-f accelerating cavities (Engineering Materials), 8:21562 (E:US)
Impedance
Impedance measurement method for double-gap klystron cavity, 8:21449 (J:US)
Tuning
Active tuning of rf cavities, 8:21527 (R:US)
CE ENTRAINED FUEL PROCESS
Demonstration Programs
Low-Btu gasification utility demonstration project, 8:19537 (J:US)

CELLS (IMMOBILIZED)
See IMMOBILIZED CELLS
CELLULOSE
Anaerobic Digestion
Biochemical studies on the metabolic requirements of methanogenic bacteria and fatty acid utilizers as an approach to increasing the rate and yield of methanogenesis, 8:19939 (RA:US)
Enzymatic Hydrolysis
Photoproduction of H_2 from cellulose by an anaerobic bacterial coculture, 8:19924 (RA:US)
Hydrolysis
Autohydrolysis of organic residue to increase biodegradability to methane, 8:19938 (RA:US)
Waste Product Utilization
Highway binder materials from cellulosic and related wastes. Final report, 8:20982 (R:US)
CEMENT INDUSTRY
Solar Process Heat
Capitol Concrete Solar Industrial Process Heat Experiment. Final technical report, May 30-November 24, 1982, 8:20086 (R:US)
PKI solar thermal plant evaluation at Capitol Concrete Products, Topeka, Kansas, 8:20089 (RA:US)
CEMENTS
Dimensions, Volume 65, Number 3, 8:20131 (R:US)
Catalytic Effects
Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)
Extraction
Evaluation of asphalt cement extraction and recovery methods. Final report Oct 80-Jun 82, 8:20987 (R:US)
Leaching
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Materials Recovery
Evaluation of asphalt cement extraction and recovery methods. Final report Oct 80-Jun 82, 8:20987 (R:US)
Regeneration
Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)
Sorptive Properties
Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)
CENTRAL AMERICA
Plate Tectonics
Geotectonics of South America, 8:22046 (R:US)
CENTRAL HEATING PLANTS
Air Pollution
Urban air-quality impacts of district-heating development, 8:20996 (R:US)
Economics
Energy consumption analysis and comparative study of the operational results from heat pump plants. Final Report, Oct. 1979, 8:20995 (R:DE:In several languages)
Energy Conservation
Conceptual study: potential energy savings based on reduction of pressure in the ANL-east central heating system, 8:20962 (R:US)
Heat Pumps
Energy consumption analysis and comparative study of the operational results from heat pump plants. Final Report, Oct. 1979, 8:20995 (R:DE:In several languages)

Pressure Gradients
Conceptual study: potential energy savings based on reduction of pressure in the ANL-east central heating system, 8:20962 (R:US)
Water Source Heat Pumps
Radisson community heating systems: technical and economic comparison of options. Final report, 8:21001 (R:US)
CENTRAL RECEIVERS
Cooling Systems
Evaluation of air-cooled central receivers, 8:20068 (R:US)
CERAMICS
Dielectric Properties
Certain experimental observations of the responses of PZT65/35 due to domain switching, 8:21134 (J:US)
Leaching
Dissolution of tailored ceramic nuclear waste forms, 8:19878 (J:US)
Piezoelectricity
Certain experimental observations of the responses of PZT65/35 due to domain switching, 8:21134 (J:US)
Production
Conversion of shale and slate wastes to glass and glass-ceramic products. Open file report 20 Oct 76-19 Sep 79, 8:20980 (R:US)
Strains
Certain experimental observations of the responses of PZT65/35 due to domain switching, 8:21134 (J:US)
Thermodynamic Properties
Thermo-mechanical and thermal behavior of high-temperature structural materials, 8:21117 (R:US)
Thermomechanical Treatments
Thermo-mechanical and thermal behavior of high-temperature structural materials, 8:21117 (R:US)
CERAMICS INDUSTRY
Energy Conservation
Research options for the development of sensors to measure the thermal state of solid steel bodies. Draft final report, 8:20989 (R:US)
CERIUM
Physical Properties
Effects of pressure on the mixed valent properties of Ce and its intermetallic compounds, 8:21115 (BA:US)
Solvent Extraction
Role of phosphorus in lunar samples: a chemical study, 8:21197 (R:US)
Valence
Effects of pressure on the mixed valent properties of Ce and its intermetallic compounds, 8:21115 (BA:US)
CERIUM 144
Delayed Radiation Effects
Long-term internal contamination with radiocerium: incorporation of ^{3}H-thymidine in circulating lymphocytes in rats, 8:21956 (RA:CS:In Slovak)
Gamma Spectroscopy
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)
Leaching
Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
Radioecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
CERIUM BASE ALLOYS
Electronic Structure
Magnetic ordering and electronic structure of CeAl$_3$, 8:21059 (R:US)
Magnetic Properties
Magnetic ordering and electronic structure of CeAl$_3$, 8:21059 (R:US)
CERMETS
Erosion
Evaluation of advanced materials. Final report, 8:21124 (R:US)
CERN
Research Programs
Neutrino oscillation searches at CERN, 8:22265 (RA:US)
CERN II SYNCHROTRON
See CERN SPS SYNCHROTRON
CERN SPS SYNCHROTRON
Beam Dynamics
Effects of magnetic non-linearities on a stored proton beam and their implications for superconducting storage rings, 8:21485 (R:US)
CERRO PRIETO GEOTHERMAL FIELD
Coordinated Research Programs
Geologic model of the Cerro Prieto Geothermal Field, 8:20152 (RA:US)
Overview of the Mexican-American cooperative program at the Cerro Prieto Geothermal Field, 8:20151 (RA:US)
Geochemistry
Overview of the Mexican-American cooperative program at the Cerro Prieto Geothermal Field, 8:20151 (RA:US)

Overview of the Mexican-American cooperative program at the Cerro Prieto Geothermal Field, 8:20151 (RA:US)
Geophysics
Overview of the Mexican-American cooperative program at the Cerro Prieto Geothermal Field, 8:20151 (RA:US)
Gravity Surveys
Geophysical monitoring at the Cerro Prieto Geothermal Field, 8:20163 (RA:US)
Reservoir Engineering
Reservoir engineering studies of the Cerro Prieto Geothermal Field, 8:20181 (RA:US)
Resistivity Surveys
Geophysical monitoring at the Cerro Prieto Geothermal Field, 8:20163 (RA:US)
Seismic Surveys
Geophysical monitoring at the Cerro Prieto Geothermal Field, 8:20163 (RA:US)
Structural Models
Geologic model of the Cerro Prieto Geothermal Field, 8:20152 (RA:US)
CESIUM
Atomic Beam Sources
Improved Cs^0 source for the production of polarized H$^-$ ions, 8:22192 (R:US)
Sorption
Radionuclide sorption on basalt-interbed materials. Annual report FY 1981, 8:19887 (R:US)
CESIUM 134
Radioecological Concentration
Four-year declines in radiocesium concentrations of American coots inhabiting a nuclear reactor cooling reservoir, 8:21875 (J:GB)
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
CESIUM 137
Diffusion
Studies of transport of waste radionuclides, through soil at the Maxey Flats, Kentucky, waste-burial site, 8:19885 (R:US)
Gamma Spectroscopy
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)
Leaching
Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
Radioecological Concentration
Cesium-137 in various Chicago foods: (collection month, April 1982), 8:21836 (RA:US)
Four-year declines in radiocesium concentrations of American coots inhabiting a nuclear reactor cooling reservoir, 8:21875 (J:GB)
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
Spatial Distribution
Radiological safety studies on ground disposal of radioactive wastes. Distribution and migration of radionuclides in the aerated zone, 8:19832 (R:JP:MIXED)
CESIUM FLUORIDES
Enthalpy
New calorimetric studies of inorganic fluorine compounds (Silver uranium fluoride, AgUF$_6$; cesium fluoroxysulfate, CsSO$_4$F), 8:21292 (R:US)

Entropy
New calorimetric studies of inorganic fluorine compounds (Silver uranium fluoride, $AgUF_6$; cesium fluoroxysulfate, $CsSO_4F$), 8:21292 (R:US)
CESIUM IONS
Autoionization
Influence of increasing nuclear charge on the Rydberg spectra of Xe, Cs^+, and Ba^{++}: Correlation, term dependence, and autoionization, 8:21220 (J:US)
Rydberg Correction
Influence of increasing nuclear charge on the Rydberg spectra of Xe, Cs^+, and Ba^{++}: Correlation, term dependence, and autoionization, 8:21220 (J:US)
CESIUM SULFATES
Enthalpy
New calorimetric studies of inorganic fluorine compounds (Silver uranium fluoride, $AgUF_6$; cesium fluoroxysulfate, $CsSO_4F$), 8:21292 (R:US)
Entropy
New calorimetric studies of inorganic fluorine compounds (Silver uranium fluoride, $AgUF_6$; cesium fluoroxysulfate, $CsSO_4F$), 8:21292 (R:US)
CHALKS

Corner-turning characteristics of TATB/HMX/Kel-F mixtures, 8:21651 (R:US)
Compacting
Summary of ignition and growth modeling of shock initiation and delayed detonation in full-density and porous propellants, 8:21654 (R:US)
Detonations
Oblique interactions of detonation waves with explosive/metal interfaces, 8:21650 (R:US)
Response of porous beds to rapid gas pressurization, 8:21653 (R:US)
Summary of ignition and growth modeling of shock initiation and delayed detonation in full-density and porous propellants, 8:21654 (R:US)
Evaluation
Evaluation of EL836 explosive stimulation of Devonian gas shale, 8:19763 (R:US)
Interfaces
Oblique interactions of detonation waves with explosive/metal interfaces, 8:21650 (R:US)
Particle Size
Corner-turning characteristics of TATB/HMX/Kel-F mixtures, 8:21651 (R:US)
Production
Coal-based ammonia and methanol manufacture using Koppers-Totzek gasification, 8:19408 (RA:US)
Reaction between alcohol and nitric acid in the presence of metal nitrates, 8:21247 (TJ:DE:GE)
Sensitivity
Corner-turning characteristics of TATB/HMX/Kel-F mixtures, 8:21651 (R:US)
Shock Waves
Oblique interactions of detonation waves with explosive/metal interfaces, 8:21650 (R:US)
Test Facilities
Tester design concepts for Component Test Facility, 8:21652 (R:US)
CHEMICAL FEEDSTOCKS
Production
Biomass: source of tomorrow's chemicals, 8:20030 (BA:US)
Raw Materials
Mini-assessment of environmental trends and problems: alternative feedstocks. Final report, 8:19687 (R:US)

CHEMICAL INDUSTRY
Cogeneration
Integration of open-cycle MHD with various chemical and metallurgical processes, 8:20874 (R:US)
Energy Conservation
Technological response to environmental protection regulations and energy price/supply structure: a case study of chlorine/caustic soda manufacturing. Executive summary report 1 Jul 79-30 Jun 81, 8:20985 (R:US)
Pollution Control
Technological response to environmental protection regulations and energy price/supply structure: a case study of chlorine/caustic soda manufacturing. Executive summary report 1 Jul 79-30 Jun 81, 8:20985 (R:US)
Technology Assessment
Technological response to environmental protection regulations and energy price/supply structure: a case study of chlorine/caustic soda manufacturing. Executive summary report 1 Jul 79-30 Jun 81, 8:20985 (R:US)
CHEMICAL LASERS
Operation
Mercury bromide laser discharge life studies. Final report 1 May 81-31 Jan 82, 8:21382 (R:US)
Service Life
Mercury bromide laser discharge life studies. Final report 1 May 81-31 Jan 82, 8:21382 (R:US)
CHEMICAL PLANTS
See also GASOLINE PLANTS
Energy Conservation
New concepts reduce process energy, 8:19686 (J:US)
Fluidized-Bed Combustors
New AFBC coal-fired steam generation facility for the Idaho Chemical Processing Plant, 8:19645 (J:US)
Process Control
Multivariable internal model control, 8:21191 (R:US)
Risk Assessment
Technical risks and law, 8:22894 (R:DE:In German)
Steam Generation
New AFBC coal-fired steam generation facility for the Idaho Chemical Processing Plant, 8:19645 (J:US)
Waste Heat Utilization
New concepts reduce process energy, 8:19686 (J:US)
CHEMICAL REACTION KINETICS
See also COMBUSTION KINETICS
Quantum Mechanics
Incorporation of quantum effects in generalized-transition-state theory, 8:21242 (J:US)
CHEMICAL REACTIONS
See also ALKYLATION
CHEMISORPTION
CORROSION
DENITRIFICATION
DESULFURIZATION
FISCHER-TROPSCH SYNTHESIS
HYDROGENATION
METHANATION
Mathematical Models
Applications of a simple dynamical model to the reaction path Hamiltonian: tunneling corrections to rate constants, product state distributions, line widths of local mode overtones, and mode specificity in unimolecular decomposition, 8:21237 (J:US)
CHEMICAL REACTORS
Design
Catalyst and reactor development for a liquid-phase Fischer-Tropsch process. Quarterly technical progress report, 1 July 1982-30 September 1982, 8:19933 (R:US)
Design and commissioning of a 2 to 5 kg/h continuous reactor unit (CRU Mark II), 8:19400 (R:AU)
Flat-plate solar array project. Task 1: silicon material: investigation of the hydrochlorination of $SiCl_4$, 8:20008 (R:US)
Temperature-time-reaction medium controlled hydropyrolysis, 8:19448 (RA:US)
Fermentation
Investigations of an airlift reactor with external circulation with respect to its application as a bioreactor, 8:21426 (R:DE:In German)
Flow Rate
Investigations of an airlift reactor with external circulation with respect to its application as a bioreactor, 8:21426 (R:DE:In German)
Fluidized Bed
Fluid bed consisting of fluid-bed units: a new fluidization method, 8:21190 (R:US)
Installation
Gravimelt process development. Quarterly technical progress report, 8:19620 (R:US)
Operation
Design and commissioning of a 2 to 5 kg/h continuous reactor unit (CRU Mark II), 8:19400 (R:AU)
Gravimelt process development. Quarterly technical progress report, 8:19620 (R:US)
Size
Steam pyrolysis of coal for two-stage gasification (Partial oxidation gasification vs steam pyrolysis), 8:19451 (RA:US)
CHEMICALS
See ADDITIVES
CARCINOGENS
DYES
CHEMISORPTION
Chemical Bonds
Experimental studies of the geometric and electronic structure of chemisorption binding. Final report Feb 80-Jan 81, 8:21219 (R:US)
CHERENKOV COUNTERS
Operation
Detectors for energies less than 10 MeV, 8:22092 (R:US)
CHERENKOV DETECTORS
See CHERENKOV COUNTERS
CHESAPEAKE BAY
Benthos
Long-term benthic monitoring programs for the mesohaline Chesapeake Bay. Interim report, 8:20306 (R:US)
Mathematical Models
A study of the spatial variations in the non-tidal currents of the Upper Chesapeake Bay. Final report, 8:21878 (R:US)
CHINA
Nuclear Explosions
^{237}U nelle ricadute atmosferiche): Ispra 1980 (^{237}U in atmospheric fall-out): Ispra 1980), 8:21804 (R:US)
CHIYODA THOROUGHBRED PROCESS
Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)
CHLOR-ALKALI INDUSTRY

COAL
See also SUBBITUMINOUS COAL
Energy information report to Congress: quarterly report. Second quarter, 1982, 8:19691 (R:US)
Alkylation
Coal-transformation chemistry. Eleventh quarterly progress report, 8:19514 (R:US)
Reductive alkylation reaction, 8:19573 (BA:US)
Caking Power
Benzene-soluble bitumen constituents and coking power of hard coals, 8:19528 (RA:XE:In German)
Calorific Value
Data base for the analysis of compositional characteristics of coal seams and macerals. Final report. Part 2. A multivariate study of the interrelationships among selected variables of the organic fraction of samples of United States' coals, 8:19555 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)
Chemical Analysis
Gravimelt process development. Quarterly technical progress report, 8:19620 (R:US)
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; size and analytical data from 10 coal mines), 8:19551 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs (Proposed Henderson, Kentucky coal to gasoline plant), 8:19492 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)
X-ray diffraction and scattering studies of coal constituents. Semi-annual technical progress report, July 1, 1982-December 31, 1982, 8:19557 (R:US)
Chemical Composition
Application of complex equilibrium calculations to the study of mineral matter during coal combustion, 8:19642 (R:US)
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
Combustion characterization of coals for industrial applications. Third quarterly progress report, 1 October 1982-31 December 1982, 8:19635 (R:US)
Data base for the analysis of compositional characteristics of coal seams and macerals. Final report. Part 2. A multivariate study of the interrelationships among selected variables of the organic fraction of samples of United States' coals, 8:19555 (R:US)
Examination of the mineral components of coal and its resultant fly ash in relation to resistivity characteristics of the fly ash, 8:19543 (R:AU)
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; size and analytical data from 10 coal mines), 8:19551 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 3A. Gasification test at Sasolburg, overview (Proposed Henderson, Kentucky coal to gasoline plant; Sasolburg test of Illinois Basin coals in Lurgi Mark IV), 8:19496 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2B. Collection and shipment analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; West Kentucky No. 9 seam coal characterization and testing), 8:19493 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)
Chemical Reactions
Coal-transformation chemistry. Eleventh quarterly progress report, 8:19514 (R:US)
Cleaning
Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
Coking
Benzene-soluble bitumen constituents and coking power of hard coals, 8:19528 (RA:XE:In German)
Combustion
Application of complex equilibrium calculations to the study of mineral matter during coal combustion, 8:19642 (R:US)
Combustion characterization of coals for industrial applications. Third quarterly progress report, 1 October 1982-31 December 1982, 8:19635 (R:US)
Development of coal-water slurries as boiler fuel, 8:19644 (J:US)
Investigate the effectiveness of calcium-treated coals in the capture of sulfur gases generated in staged fired combustors. First quarterly technical progress report, October 1, 1982-January 1, 1983, 8:19637 (R:US)

Combustion Products
- Environmental emissions from emerging coal technologies. Paper 81.3.1, 8:19605 (J:US)
- Field test results of eighteen industrial coal stoker fired boilers for emission control and improved efficiency. Paper 81.35.3, 8:19593 (J:US)
- Physical and chemical characterization of fine particle in off-gases from coal combustion and oil shale retorting, 8:21707 (RA:US)
- Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)

Comparative Evaluations
- Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)

Consumption Rates
- Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
- Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
- Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
- Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
- Cost and quality of fuels for electric utility plants (For August 1982), 8:20253 (R:US)
- Texas energy history, 8:20794 (R:US)

Cost
- Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
- Electric Power Annual (For 1981), 8:20823 (R:US)
- Monthly energy review, 8:20857 (R:US)
- Monthly energy review. First half 1982 summary, 8:20858 (R:US)
- Problems and rewards in building national self-sufficiency in energy (South Africa), 8:19646 (RA:US)

Deashing
- Gravimelt process development. Quarterly technical progress report, 8:19620 (R:US)
- Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)

Desulfurization
- Gravimelt process development. Quarterly technical progress report, 8:19620 (R:US)
- Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)

Devolatilization
- Physical structure of coal, 8:19571 (BA:US)

Distribution

Energy Supplies
- International energy annual, 1981, 8:19672 (R:US)
- Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
- Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Exports
- Coal distribution, January-June 1982, 8:19654 (R:US)
- Quarterly Coal Report, January-March 1982, 8:19650 (R:US)

Flammability
- Evaluation of the flammability of coals low in volatile matter, 8:19638 (RA:XE:In French)

Fluidized-Bed Combustion
- Atmospheric fluidized-bed combustor design whose performance will significantly exceed conventional FBC operation performance. Final report, 8:20264 (R:US)
- Fluidized bed combustion: an overview of design and operations (14 US manufacturers and their products are described briefly), 8:19628 (RA:US)
- New AFBC coal-fired steam generation facility for the Idaho Chemical Processing Plant, 8:19645 (J:US)
- Prospects for increasing the direct use of coal in industrial boilers. Final task report Nov 79-Nov 80, 8:19641 (R:US)
- Report to the IEA AFBC technical meeting at Petten, Netherlands, May 1982: TNO's environmental program on fluidized bed combustion, 8:19643 (B:NL)
- Review of gas cleanup systems for fluidized-bed coal combustors, 8:20245 (R:US)

Fuel Additives
- Investigate the effectiveness of calcium-treated coals in the capture of sulfur gases generated in staged fired combustors. First quarterly technical progress report, October 1, 1982-January 1, 1983, 8:19637 (R:US)

Fuel Consumption
- Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)

Grinding
- 20-mesh vs 200-mesh coal study, 8:19486 (RA:US)

Hydraulic Transport
- Data for intermodal comparison of environmental impacts of inland transport alternatives for coal energy, 8:19594 (R:US)
- Distributing the risks of interbasin water transfers under drought conditions: the dilemma posed by coal slurry pipelines, 8:19623 (R:US)

Hydrogenation
- Short residence time hydropyrolysis, 8:19438 (RA:US)
- Temperature-time-reaction medium controlled hydropyrolysis, 8:19448 (RA:US)

Imports
- Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)
- Monthly energy review, 8:20857 (R:US)
- Monthly energy review. First half 1982 summary, 8:20858 (R:US)
- Quarterly Coal Report, January-March 1982, 8:19650 (R:US)

Infrared Spectra
- Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
- Investigations of the changes of coal structure occurring during gasification, 8:19547 (RA:US)

Land Transport
- Data for intermodal comparison of environmental impacts of inland transport alternatives for coal energy, 8:19594 (R:US)

Laser-Radiation Heating
- Studies of initial reaction steps in the gasification of coal and selected model compounds, 8:19436 (RA:US)

Macerals
- Data base for the analysis of compositional characteristics of coal seams and macerals. Final report. Part 2. A multivariate study of the interrelationships among selected variables of the organic fraction of samples of United States' coals, 8:19555 (R:US)
- Laser micropyrolysis of coal macerals. Annual report Oct 80-Sep 81, 8:19569 (R:US)
- X-ray diffraction and scattering studies of coal constituents. Semi-annual technical progress report, July 1, 1982-December 31, 1982, 8:19557 (R:US)

Market
- Coal distribution, January-June 1982, 8:19654 (R:US)
- Coal distribution, January-December 1981, 8:19652 (R:US)
- Virginia metallurgical-coal production and exports: a prospects update, 8:19656 (R:US)

Marketing
- Pacific Bulk commodity Transportation System, phase III. Volume IV: marad/Boeing study. Final report, 8:19624 (R:US)

Materials Handling
- Tri-State Synfuels Project Review: Volume 2. Engineering and process summary (Proposed Henderson, Kentucky coal to gasoline plant), 8:19494 (R:US)
- Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky

coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)

Moisture
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

NMR Spectra
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Cross-polarization nuclear magnetic resonance studies of coals, coal-conversion products, and coal-conversion catalysts. Final technical report, 8:19554 (R:US)

Nuclear Magnetic Resonance
Investigations of the changes of coal structure occurring during gasification, 8:19547 (RA:US)

Oxidation
Photoassisted electrolysis applied to coal gasification, 8:19450 (RA:US)

Performance Testing
Tri-State Synfuels Project Review: Volume 14. Commercial scale coal test (Proposed Henderson, Kentucky coal to gasoline plant; gasification test of Illinois coal in Lurgi Mark IV at Sasol 1), 8:19512 (R:US)

Physical Properties
Physical structure of coal, 8:19571 (BA:US)

Plasticity
Physical structure of coal, 8:19571 (BA:US)

Pneumatic Transport
Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - booster-compresser failure, 8:20260 (R:US)

Porosity
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
Physical structure of coal, 8:19571 (BA:US)
Small-angle x-ray scattering studies of the porosity of coals and chars. Final technical report, Sept. 30, 1978-March 31, 1981, 8:19545 (R:US)

Prices
California energy prices, 1980-2000. Staff report (final), 8:19718 (R:US)
Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
Cost and quality of fuels for electric utility plants (For March 1982), 8:20250 (R:US)
Quarterly Coal Report, January-March 1982, 8:19650 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Production
Coal data: a reference, 8:19398 (R:US)
Coal distribution, January-March 1982, 8:19653 (R:US)
Coal distribution, January-December 1981, 8:19652 (R:US)
Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)
Monthly energy review, 8:20857 (R:US)
Monthly energy review. First half 1982 summary, 8:20858 (R:US)
Quarterly Coal Report, January-March 1982, 8:19650 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Pyrolysis
Advanced gasification projects, 8:19435 (R:US)
Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
Coal gasification and tar conversion reactions over calcium oxide, 8:19468 (RA:US)
Coal plasticity, agglomeration, and volatiles secondary reactions during gasification, 8:19439 (RA:US)
Kinetics of coal pyrolysis and gasification, 8:19437 (RA:US)
Low-temperature pyrolysis of coal under hydrogen pressure, 8:19523 (RA:XE:In French)
Short residence time hydropyrolysis, 8:19438 (RA:US)
Steam pyrolysis of coal for two-stage gasification (Partial oxidation gasification vs steam pyrolysis), 8:19451 (RA:US)
Studies toward improved techniques for gasifying coal (In steam-hydrogen mixtures), 8:19452 (RA:US)
Tar formation during pyrolysis of coals at pressures of up to 100 bar, 8:19526 (RA:XE:In German)
Temperature-time-reaction medium controlled hydropyrolysis, 8:19448 (RA:US)
Thermal reactions of aromatics with CaO, 8:19467 (RA:US)

Quality Control
Achieving the best from boiler, through understanding Indian coal, 8:19640 (R:US)

Rail Transport
Data for intermodal comparison of environmental impacts of inland transport alternatives for coal energy, 8:19594 (R:US)
Virginia metallurgical-coal production and exports: a prospects update, 8:19656 (R:US)

Reaction Heat
Reaction calorimetry for coal chemistry and catalysis. Quarterly report, November 1, 1982-January 20, 1983, 8:19563 (R:US)

Sales
Coal distribution, January-March 1982, 8:19653 (R:US)

Sampling
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs (Proposed Henderson, Kentucky coal to gasoline plant), 8:19492 (R:US)
Tri-State Synfuels Project Review: Volume 13. Coal sampling and testing (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal feeds), 8:19552 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

Sorptive Properties
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)
Small-angle x-ray scattering studies of the porosity of coals and chars. Final technical report, Sept. 30, 1978-March 31, 1981, 8:19545 (R:US)

Specific Heat
Review of needs for thermophysical property data on solid feedstocks: 1. coal. Final report, 8:19570 (R:US)

Specifications
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)

Stockpiles
Quarterly Coal Report, January-March 1982, 8:19650 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)

Storage
Tri-State Synfuels Project Review: Volume 2. Engineering and process summary (Proposed Henderson, Kentucky coal to gasoline plant), 8:19494 (R:US)

Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs (Proposed Henderson, Kentucky coal to gasoline plant), 8:19492 (R:US)

Structural Chemical Analysis
Coal-transformation chemistry. Eleventh quarterly progress report, 8:19514 (R:US)
Cross-polarization nuclear magnetic resonance studies of coals, coal-conversion products, and coal-conversion catalysts. Final technical report, 8:19554 (R:US)
Investigations of the changes of coal structure occurring during gasification, 8:19547 (RA:US)
Magnetic resonance studies of coal, 8:19572 (BA:US)
Structural concepts of coal and implications of dynamic interaction, 8:19546 (RA:US)
X-ray diffraction and scattering studies of coal constituents. Semi-annual technical progress report, July 1, 1982-December 31, 1982, 8:19557 (R:US)

Structural Models
Structural concepts of coal and implications of dynamic interaction, 8:19546 (RA:US)

Surface Area
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
Small-angle x-ray scattering studies of the porosity of coals and chars. Final technical report, Sept. 30, 1978-March 31, 1981, 8:19545 (R:US)
X-ray diffraction and scattering studies of coal constituents. Semi-annual technical progress report, July 1, 1982-December 31, 1982, 8:19557 (R:US)

Testing
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Tri-State Synfuels Project Review: Volume 13. Coal sampling and testing (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal feeds), 8:19552 (R:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

Thermal Conductivity
Review of needs for thermophysical property data on solid feedstocks: 1. coal. Final report, 8:19570 (R:US)

Transport
Coal distribution, January-March 1982, 8:19653 (R:US)
Coal distribution, January-June 1982, 8:19654 (R:US)
Coal distribution, January-December 1981, 8:19652 (R:US)
Investigation of engineering and design considerations in selecting conveyors for densified refuse-derived fuel (drdf) and drdf: coal mixtures. Final report Jun 80-Sep 81, 8:19954 (R:US)
Review of the commodity flow studies (1975-1979), 8:19622 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2C. Collection and shipment photographic review (Bulk coal sample; Kentucky, USA to Sasolburg, SA), 8:19610 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs (Proposed Henderson, Kentucky coal to gasoline plant), 8:19492 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

Uses
Optimum resource use in synfuels development, 8:20805 (R:US)

Washing
Characterization and evaluation of washability of Alaskan coal: selected seams from Northern Alaska, Chicago Creek, Unalakleet, Nenana, Matanuska, Beluga, Yentna, and Herendeen Bay coal fields. Final technical report for phase IV, August 1, 1980-January 31, 1982 (Experimental washing tests on samples from 15 deposits), 8:19615 (R:US)
Characterization and evaluation of washability of Alaskan coals: selected seams from the Northern Alaska, Nulato, Eagle, Nenana, Broad Pass, Kenai, Beluga, and Chignik coal fields. Final technical report for phase III, March 1979-January 31, 1982 (Experimental washing tests on samples from 15 deposits), 8:19616 (R:US)
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)

Weathering
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)

COAL CHEMICALS
See COAL EXTRACTS

COAL DEPOSITS
See also COAL SEAMS

Maps
Geologic map and coal deposits of the Canaan peak Quadrangle, Garfield and Kane Counties, Utah, 8:19607 (R:US)

Sampling
Characterization and evaluation of washability of Alaskan coal: selected seams from Northern Alaska, Chicago Creek, Unalakleet, Nenana, Matanuska, Beluga, Yentna, and Herendeen Bay coal fields. Final technical report for phase IV, August 1, 1980-January 31, 1982, 8:19615 (R:US)
Characterization and evaluation of washability of Alaskan coals: selected seams from the Northern Alaska, Nulato, Eagle, Nenana, Broad Pass, Kenai, Beluga, and Chignik coal fields. Final technical report for phase III, March 1979-January 31, 1982, 8:19616 (R:US)

COAL EXTRACTS

Chemical Analysis
Metal impurities in coal liquids and their removal during hydroprocessing, 8:19564 (RA:XE)

Demetallization
Metal impurities in coal liquids and their removal during hydroprocessing, 8:19564 (RA:XE)

Thermal Cracking
The thermal cracking of coal-derived materials to BTX and ethylene, 8:19527 (RA:XE)

COAL FINES

Briquetting
Coal-gasification basic research and cost studies. Quarterly report No. 5, 8:19432 (R:US)

Materials Handling
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)

Pelletizing
Coal-gasification basic research and cost studies. Quarterly report No. 5, 8:19432 (R:US)

Performance Testing
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)

Storage
Tri-state synfuels project commercial scale coal test. Volume 4. Coal fines utilization in furnace boilers (Proposed Henderson, Kentucky coal to gasoline plant; use of coal fines not processible in Lurgi process), 8:19497 (R:US)

COAL GAS
Chemical Reactions
Coal plasticity, agglomeration, and volatiles secondary reactions during gasification, 8:19439 (RA:US)
Desulfurization
Coal gasification and tar conversion reactions over calcium oxide, 8:19468 (RA:US)
Infrared Spectra
Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
COAL GASIFICATION

WESTINGHOUSE GASIFICATION PROCESS
Prospects for increasing the direct use of coal in industrial boilers. Final task report Nov 79-Nov 80, 8:19641 (R:US)
Vaporization and chemical transport under coal gasification conditions, 8:19532 (R:US)
Catalysts
Catalytic gasification of coal char, 8:19446 (RA:US)
Catalytic effects in coal gasification, 8:19447 (RA:US)
Change in catalyst activity during catalytic steam gasification of char. First quarterly report, 8:19517 (R:US)
Coal gasification support studies, 8:19454 (RA:US)
Investigation of coal gasification catalysis reaction mechanisms, 8:19445 (RA:US)
Kinetics of coal pyrolysis and gasification, 8:19437 (RA:US)
Research on the mechanisms of gasification reactions in the catalysis of coal, char, and other carbonaceous materials (catalytic gasification mechanisms), 8:19444 (RA:US)
Chemical Effluents
Toxicological characterization of the process stream from an experimental low Btu coal gasifier, 8:22017 (J:DE)
Chemical Reaction Kinetics
Coal reactivity, 8:19443 (RA:US)
Heterogeneous kinetics of coal gasification, 8:19441 (RA:US)
Chemical Reactions
Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
Coal-gasification-process concepts, 8:19424 (R:US)
Cogeneration
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process (Integrated power plants, briquetting plants, pressure gasification plants and waste treatment facilities with high overall efficiency), 8:19409 (RA:US)
Commercialization
Coal-gasification-process concepts, 8:19424 (R:US)
Commercialization of coal gasification in the US: Great Plains Gasification Associates, 8:19413 (RA:US)
Seventh annual international conference on coal gasification, liquefaction, and conversion to electricity, 8:19401 (R:US)
Comparative Evaluations
Coal-gasification-process concepts, 8:19424 (R:US)
Constraints
Role of coal gasification in the future supply and demand for gas energy in the US, 8:19417 (RA:US)
Economics
Role of coal gasification in the future supply and demand for gas energy in the US, 8:19417 (RA:US)
Studies toward improved techniques for gasifying coal, 8:19452 (RA:US)
Environmental Impacts
Environmental analyses: application of computer-controlled chromatography, 8:21194 (R:US)
Feasibility Studies
Coal Gasifier Cogeneration Power Plant Project, 8:19412 (RA:US)
Forecasting
Role of coal gasification in the future supply and demand for gas energy in the US, 8:19417 (RA:US)
Fuel Feeding Systems
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process (Integrated power plants, briquetting plants, pressure gasification plants and waste treatment facilities with high overall efficiency), 8:19409 (RA:US)
Government Policies
Comments on the gasification of coal, 8:19671 (RA:US)
Hot Gas Cleanup
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes (193 references), 8:19434 (R:US)
International Cooperation
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)
Materials Testing
Refractory/coal-slag compatibility studies: progress to date, 8:19420 (R:US)
Mathematical Models
Investigation of coal gasification catalysis reaction mechanisms, 8:19445 (RA:US)
Theoretical and experimental studies of fixed-bed coal gasification reactors, 8:19461 (RA:US)
Measuring Instruments
Measured data acquisition in an externally heated rotory kiln lignite gasification system, 8:19531 (R:DE:In German)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process (Integrated power plants, briquetting plants, pressure gasification plants and waste treatment facilities with high overall efficiency), 8:19409 (RA:US)
Meetings
Advanced gasification projects, 8:19435 (R:US)
KDV-pressure gasification of coal, 8:19423 (R:DE:In German)
Round table meeting on chemical and physical valorisation of coal, 8:19519 (R:XE)
Seventh annual international conference on coal gasification, liquefaction, and conversion to electricity, 8:19401 (R:US)
MHD Generators
Method of generating electricity using an endothermic coal gasifier and MHD generator, 8:20883 (P:US)
On-Line Measurement Systems
Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
Pilot Plants
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)
Process Control
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process (Integrated power plants, briquetting plants, pressure gasification plants and waste treatment facilities with high overall efficiency), 8:19409 (RA:US)
Process Heat Reactors
Development trends of the high-temperature reactor, 8:20395 (RA:DE:In German)
Process Solutions
Toxicological characterization of the process stream from an experimental low Btu coal gasifier, 8:22017 (J:DE)
Reaction Intermediates
Studies of initial reaction steps in the gasification of coal and selected model compounds, 8:19436 (RA:US)
Research Programs
Coal gasification support studies, 8:19454 (RA:US)
District gasification in New Jersey, 8:19538 (J:US)
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)
Theoretical and experimental studies of fixed-bed coal gasification reactors, 8:19461 (RA:US)
Reviews
Coal-gasification-process concepts, 8:19424 (R:US)

Thermal Gravimetric Analysis
Coal reactivity, 8:19443 (RA:US)
Waste Water
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process (Integrated power plants, briquetting plants, pressure gasification plants and waste treatment facilities with high overall efficiency), 8:19409 (RA:US)

COAL GASIFICATION PLANTS
Aerial Surveying
Tri-State Synfuels Project Review: Volume 9B. Subcontract information (Proposed Henderson, Kentucky coal to gasoline plant; aerial surveying and mapping, including topography of plant site), 8:19506 (R:US)
Air Pollution Control
Coal gasification/gas cleanup test facility: volume ii. environmental assessment of operation with devolatilized bituminous coal and chilled methanol. Final report Sep 80-Apr 81, 8:19601 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Baseline Ecology
Tri-State Synfuels Project Review: Volume 6. Environmental, health, safety and socioeconomic review (Proposed Henderson, Kentucky, coal to gasoline plant), 8:19501 (R:US)
Bibliographies
Tri-State Synfuels Project Review: Volume 1C. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant), 8:19491 (R:US)
By-Products
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)
Capital
Aspects of commercial medium Btu coal gasification (Need for a consortium due to egonomic optimum size and variety of work), 8:19416 (RA:US)
Tri-State Synfuels Project Review: Volume 2. Engineering and process summary (Proposed Henderson, Kentucky coal to gasoline plant), 8:19494 (R:US)
Chemical Effluents
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Cooling Systems

Cooling Towers
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Cost
Coal-gasification basic research and cost studies. Quarterly report No. 5, 8:19432 (R:US)
District gasification in New Jersey, 8:19538 (J:US)
Tri-State Synfuels Project Review: Volume 5. Engineering costs, budgets and schedules (Proposed Henderson, Kentucky coal to gasoline plant; engineering studies; capital cost), 8:19535 (R:US)
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Design
Coal is a gas (Pennsylvania), 8:19540 (J:US)
Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)
Tri-State Synfuels Project Review: Volume 2. Engineering and process summary (Proposed Henderson, Kentucky coal to gasoline plant), 8:19494 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 3A. Gasification test at Sasolburg, overview (Proposed Henderson, Kentucky coal to gasoline plant; Sasolburg test of Illinois Basin coals in Lurgi Mark IV), 8:19496 (R:US)
Economic Analysis
District gasification in New Jersey, 8:19538 (J:US)
Tri-State Synfuels Project Review: Volume 11B. Process development studies (Proposed Henderson, Kentucky coal to gasoline plant; alternative engineering studies; also Kentucky vs Wyoming coal), 8:19509 (R:US)
Tri-State Synfuels Project Review: Volume 1A. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant; executive summary and overall project review), 8:19489 (R:US)
Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)
Engineering
Coal-gasification basic research and cost studies. Quarterly report No. 5, 8:19432 (R:US)
Commercialization of coal gasification in the US: Great Plains Gasification Associates, 8:19413 (RA:US)
Status of the Cool Water Coal Gasification Program, 8:19415 (RA:US)
Tri-State Synfuels Project Review: Volume 4A. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; civil, structural and piping; little text; diagrams and maps), 8:19498 (R:US)
Tri-State Synfuels Project Review: Volume 12. Fluor project status (Proposed Henderson, Kentucky coal to gasoline plant; engineering), 8:19511 (R:US)
Tri-State Synfuels Project Review: Volume 11B. Process development studies (Proposed Henderson, Kentucky coal to gasoline plant; alternative engineering studies; also Kentucky vs Wyoming coal), 8:19509 (R:US)
Tri-State Synfuels Project Review: Volume 11C. Cost reduction studies (Proposed Henderson, Kentucky coal to gasoline plant; process alternatives and cost reduction studieas), 8:19510 (R:US)
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Environmental Effects
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Equipment
Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Feasibility Studies
Tri-State Synfuels Project Review: Volume 11B. Process development studies (Proposed Henderson, Kentucky coal to gasoline plant; alternative engineering studies; also Kentucky vs Wyoming coal), 8:19509 (R:US)

- Tri-State Synfuels Project Review: Volume 1A. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant; executive summary and overall project review), 8:19489 (R:US)

Financial Incentives
- Commercialization of coal gasification in the US: Great Plains Gasification Associates, 8:19413 (RA:US)
- Tri-State Synfuels Project Review: Volume 1A. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant; executive summary and overall project review), 8:19489 (R:US)

Financing
- Commercialization of coal gasification in the US: Great Plains Gasification Associates, 8:19413 (RA:US)
- Status of the Cool Water Coal Gasification Program, 8:19415 (RA:US)
- Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)

Fluidized Bed
- Fluidized-bed gasifier - systems model development, 8:19458 (RA:US)
- Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)

Fluorescence Spectroscopy
- Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)

Fuel Supplies
- Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 2. Analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; size and analytical data from 10 coal mines), 8:19551 (R:US)
- Tri-State Synfuels Project Review: Volume 13. Coal sampling and testing (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal feeds), 8:19552 (R:US)
- Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)
- Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)
- Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

Heat Exchangers
- Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)

Laser Spectroscopy
- Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)

Market
- Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)

Materials
- New class of steels for thick-wall pressure vessels. Final technical report, June 21, 1980-June 30, 1982, 8:21088 (R:US)

Materials Testing
- Corrosion and thermal-shock studies on slagging-coal-gasifier refractories, 8:19422 (R:US)

Mathematical Models
- Advanced gasification projects, 8:19435 (R:US)
- Evaluation of mechanistic models for coal gasification, 8:19457 (RA:US)
- Fluidized-bed gasifier - systems model development, 8:19458 (RA:US)
- Prediction and measurement of operating parameters for entrained-flow coal gasification processes, 8:19459 (RA:US)

Meetings
- Tri-State Synfuels Project Review: Volume 1C. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant), 8:19491 (R:US)

On-Line Measurement Systems
- Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)

Operation
- Coal gasification/gas cleanup test facility: volume ii. environmental assessment of operation with devolatilized bituminous coal and chilled methanol. Final report Sep 80-Apr 81, 8:19601 (R:US)

Oxygen Plants
- Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

Permit Applications
- Status of the Cool Water Coal Gasification Program, 8:19415 (RA:US)
- Tri-State Synfuels Project Review: Volume 7. Permitting, environmental impact statement and related environmental information (Proposed Henderson, Kentucky coal to gasoline plant), 8:19503 (R:US)
- Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)

Planning
- Tri-State Synfuels Project Review: Volume 1C. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant), 8:19491 (R:US)

Power Generation
- Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

Process Control
- Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)

Process Solutions
- Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)

Raman Spectroscopy
- Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)

Refractories
- VPI-4.8 - investigation of carbon monoxide disintegration of refractories in coal gasifiers, 8:19429 (R:US)

Research Programs
- Prediction and measurement of operating parameters for entrained-flow coal gasification processes, 8:19459 (RA:US)

Risk Assessment
- Tri-State Synfuels Project Review: Volume 1A. Executive summary and overall project review (Proposed Henderson, Kentucky coal to gasoline plant; executive summary and overall project review), 8:19489 (R:US)

Scaling Laws
- Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)

Simulation
- Evaluation of mechanistic models for coal gasification, 8:19457 (RA:US)

Site Selection
- Tri-State Synfuels Project Review: Volume 6. Environmental, health, safety and socioeconomic review (Proposed Henderson, Kentucky, coal to gasoline plant), 8:19501 (R:US)
- Tri-State Synfuels Project Review: Volume 9A. Subcontract information (Proposed Henderson, Kentucky coal to gasoline plant; water supply and civil engineering subcontracts), 8:19505 (R:US)
- Tri-State Synfuels Project Review: Volume 9B. Subcontract information (Proposed Henderson, Kentucky coal to gasoline

plant; aerial surveying and mapping, including topography of plant site), 8:19506 (R:US)
Size
Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
Socio-Economic Factors
Tri-State Synfuels Project Review: Volume 6. Environmental, health, safety and socioeconomic review (Proposed Henderson, Kentucky, coal to gasoline plant), 8:19501 (R:US)
Solid Wastes
Tri-State Synfuels Project Review: Volume 6. Environmental, health, safety and socioeconomic review (Proposed Henderson, Kentucky, coal to gasoline plant), 8:19501 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Steam Generators
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Vapors
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
Waste Water
Advanced gasification projects, 8:19435 (R:US)
Environmental studies, 8:19580 (RA:US)
Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
Operation of wastewater treatment PDU and PTPA 643 cooling tower simulation, 8:19471 (RA:US)
Treatment of coal gasification process wastewater, 8:19579 (RA:US)
Tri-State Synfuels Project Review: Volume 7. Permitting, environmental impact statement and related environmental information (Proposed Henderson, Kentucky coal to gasoline plant), 8:19503 (R:US)
Water Requirements
Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Water Supply
Tri-State Synfuels Project Review: Volume 1B. Executive summary and overall project review (Proposed Henderson, Kentucky coal and gasoline plant), 8:19490 (R:US)

COAL INDUSTRY
Data Compilation
Coal distribution, January-March 1982, 8:19653 (R:US)
Coal distribution, January-December 1981, 8:19652 (R:US)
Quarterly coal report, April-June 1982, 8:19651 (R:US)
Quarterly Coal Report, January-March 1982, 8:19650 (R:US)
Regulations
Cooperation and conflict: regulating coal production. Final report, 8:20812 (R:US)

COAL LIQUEFACTION
See also *EXXON LIQUEFACTION PROCESS*
FLASH HYDROPYROLYSIS PROCESS
H-COAL PROCESS
SASOL-II PROCESS
SRC-II PROCESS
SYNTHOIL PROCESS
TSL PROCESS
Catalysis
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Catalysts
Homogeneous catalysis of lignite liquefaction with hydrogen sulfide, 8:19431 (R:US)
Method for separation of x-ray-diffraction spectra for cobalt-ZSM-catalysts, 8:19516 (R:US)
Study of hydroliquefaction of a Lorraine coal, 8:19521 (RA:XE:In French)
Chemical Reactors
Design and commissioning of a 2 to 5 kg/h continuous reactor unit (CRU Mark II), 8:19400 (R:AU)
Chemistry
Coal-transformation chemistry. Eleventh quarterly progress report, 8:19514 (R:US)
Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R:US)
Commercialization
Seventh annual international conference on coal gasification, liquefaction, and conversion to electricity, 8:19401 (R:US)
Environmental Impacts
Environmental analyses: application of computer-controlled chromatography, 8:21194 (R:US)
International Cooperation
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)
Meetings
Round table meeting on chemical and physical valorisation of coal, 8:19519 (R:XE)
Seventh annual international conference on coal gasification, liquefaction, and conversion to electricity, 8:19401 (R:US)
Oil Yields
Homogeneous catalysis of lignite liquefaction with hydrogen sulfide, 8:19431 (R:US)
Pilot Plants
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)
Research Programs
Governmental and industrial measurements in the fields of coal gasification and coal liquefaction in the Federal Republic of Germany (Lists brief description of some 20 projects), 8:19402 (RA:US)

COAL LIQUEFACTION PLANTS
Computer-Aided Design
General-purpose transportation and storage simulator for the SRC-I Demonstration Plant (Fuel supplies, product and by-product storage; materials handling and transport and terminal facilities and equipment), 8:19475 (RA:US)
Computerized Simulation
Selection of process dynamic simulation software for control strategy analyses, 8:19476 (RA:US)
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
Gaseous Wastes
Baseline flare system design for the SRC-I demonstration plant, 8:19478 (RA:US)
Materials
New class of steels for thick-wall pressure vessels. Final technical report, June 21, 1980-June 30, 1982, 8:21088 (R:US)
Materials Testing
Evaluation of advanced materials. Final report, 8:21124 (R:US)
On-Line Measurement Systems
Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)
Process Control
Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)
Residues
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)

Valves
- Dynamic analysis of slurry letdown valves at H-Coal pilot plant, 8:19433 (R:US)
- Letdown valve performance at Exxon and H-coal pilot plants, 8:19534 (J:US)
- SRC-I high-pressure slurry letdown system study, 8:19479 (RA:US)

Waste Water
- Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
- Summary and analysis of SRC-I biological treatent data, 8:19481 (RA:US)

COAL LIQUIDS

Additives
- Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)

Aging
- Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
- Measurement of the physical structure of coal liquids by small-angle x-ray scattering. Final technical report, April 1, 1980-March 31, 1981, 8:19556 (R:US)

Catalytic Cracking
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Chemical Analysis
- Metal impurities in coal liquids and their removal during hydroprocessing, 8:19564 (RA:XE)

Chemical Composition
- Current status of H-Coal commercialization, 8:19404 (RA:US)

Chemical Properties
- Coordination of physical, chemical, and thermodynamic properties for coal conversion: proceedings of the Oak Ridge conference (Meetings), 8:19568 (R:US)

Corrosive Effects
- Evaluation of advanced materials. Final report, 8:21124 (R:US)

Cost
- Current status of H-Coal commercialization, 8:19404 (RA:US)
- Demonstration and commercialization of the SRC-I technology, 8:19407 (RA:US)

Deashing
- Demonstration and commercialization of the SRC-I technology, 8:19407 (RA:US)

Demetallization
- Metal impurities in coal liquids and their removal during hydroprocessing, 8:19564 (RA:XE)

Denitrification
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Desulfurization
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Enthalpy
- Enthalpy measurement of coal-derived liquids. Technical progress report, November 1982-January 1983, 8:19559 (R:US)

Fractionation
- Identification and comparative genotoxicity of polycyclic aromatic hydrocarbons and related nitrogen-containing heteroatomic species in products from coal liquefaction processes, 8:19667 (R:US)
- Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)

Fuel Substitution
- Compendium of synfuel end use testing programs. Final report mar-sep 81, 8:19784 (R:US)

Gas Chromatography
- SRC-I Demonstration Plant analytical laboratory, 8:19483 (RA:US)

Gasification
- Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

Hydrocracking
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
- Demonstration and commercialization of the SRC-I technology, 8:19407 (RA:US)

Hydrogenation
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
- Current status of H-Coal commercialization, 8:19404 (RA:US)
- Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
- LC-Finer catalyst testing, 8:19485 (RA:US)

Liquid Column Chromatography
- Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R:US)
- Separation of asphaltenes using high-resolution supercritical-fluid chromatography. Progress report, December 1, 1982-February 28, 1983 (Vacuum still bottoms; benzo fluoroanthene), 8:19561 (R:US)

Molecular Weight
- Enthalpy measurement of coal-derived liquids. Technical progress report, November 1982-January 1983, 8:19559 (R:US)

NMR Spectra
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Oxidation
- Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
- Measurement of the physical structure of coal liquids by small-angle x-ray scattering. Final technical report, April 1, 1980-March 31, 1981, 8:19556 (R:US)

Physical Properties
- Coordination of physical, chemical, and thermodynamic properties for coal conversion: proceedings of the Oak Ridge conference (Meetings), 8:19568 (R:US)
- Physical-property estimation for coal liquids, 8:19544 (R:US)

Prices
- Exxon donor solvent coal liquefaction process: development program status, 8:19403 (RA:US)
- Real cost of synthetic fuels (Includes discussion of future inflation in engineering economics methodology), 8:19418 (RA:US)

Refining
- Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Separation Processes
- Physical-property estimation for coal liquids, 8:19544 (R:US)

Solvent Extraction
- Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R:US)

Thermodynamic Properties
- Coordination of physical, chemical, and thermodynamic properties for coal conversion: proceedings of the Oak Ridge conference (Meetings), 8:19568 (R:US)

Viscosity
- Measurement of the physical structure of coal liquids by small-angle x-ray scattering. Final technical report, April 1, 1980-March 31, 1981, 8:19556 (R:US)

COAL MINERS
- **Training**
  - Haulage accident prevention, 8:19659 (R:US)
- **Working Conditions**
  - Mine ventilation planning: a case study, 8:19658 (RA:US)

COAL MINES
- **Dust Collectors**
  - Coal mine dust personal sampler (CMDPS). Final report, 8:19660 (R:US)
- **Dusts**
  - Coal mine dust personal sampler (CMDPS). Final report, 8:19660 (R:US)
- **Hydrology**
  - Procedures for predictive analysis of selected hydrologic impacts of surface mining. Final report Sep 76-Sep 81, 8:19603 (R:US)
- **Land Reclamation**
  - Mining/reclamation handbook project. Final technical report, September 1980-February 1983, 8:19597 (R:US)
- **Supports**
  - Development of lightweight hydraulic supports. Open file report Sep 78-May 82, 8:19611 (R:US)

COAL MINING
- Coal data: a reference, 8:19398 (R:US)
- **Land Reclamation**
  - Subsurface oxidation of pyritic coal-cleaning wastes by chemoautotrophic bacteria (51 references), 8:19595 (R:US)
- **Mineral Wastes**
  - Subsurface oxidation of pyritic coal-cleaning wastes by chemoautotrophic bacteria (51 references), 8:19595 (R:US)
- **Regulations**
  - Measurement and control of respirable dust in mines. Final report, 8:19665 (R:US)
- **Safety**
  - Haulage accident prevention, 8:19659 (R:US)
- **Socio-Economic Factors**
  - Northern Great Plains coal mining: regional impacts. Agriculture information bulletin, 8:19657 (R:US)

COAL PREPARATION
- *See also HEAVY MEDIA SEPARATION*
- Coal data: a reference, 8:19398 (R:US)
- Prospects for increasing the direct use of coal in industrial boilers. Final task report Nov 79-Nov 80, 8:19641 (R:US)
- Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2A. Collection and shipment mine, barge, ship and train programs (Proposed Henderson, Kentucky coal to gasoline plant), 8:19492 (R:US)
- **Comparative Evaluations**
  - Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
- **Cost Benefit Analysis**
  - Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
- **Energy Losses**
  - Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)
- **Environmental Impacts**
  - Environmental assessment of coal cleaning processes. Final report Jul 76-Sep 79, 8:19600 (R:US)
- **Evaluation**
  - Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
- **Grinding Machines**
  - 20-mesh coal system study, 8:19487 (RA:US)
- **Health Hazards**
  - Mining hazard evaluation and technical assistance report no. HHF-80-109-110, Patriot Coal Company Laboratory, Kingwood, West Virginia (Exposure to perchloroethylene during float-sink testing), 8:19661 (R:US)
- **Yields**
  - Characterization and evaluation of washability of Alaskan coal: selected seams from Northern Alaska, Chicago Creek, Unalakleet, Nenana, Matanuska, Beluga, Yentna, and Herendeen Bay coal fields. Final technical report for phase IV, August 1, 1980-January 31, 1982 (Experimental washing tests on samples from 15 deposits), 8:19615 (R:US)
  - Characterization and evaluation of washability of Alaskan coals: selected seams from the Northern Alaska, Nulato, Eagle, Nenana, Broad Pass, Kenai, Beluga, and Chignik coal fields. Final technical report for phase III, March 1979-January 31, 1982 (Experimental washing tests on samples from 15 deposits), 8:19616 (R:US)

COAL PREPARATION PLANTS
- **Comparative Evaluations**
  - Recent developments in coal preparation in the USA, 8:19618 (R:US)
- **Design**
  - Recent developments in coal preparation in the USA, 8:19618 (R:US)
- **Flowsheets**
  - Recent developments in coal preparation in the USA, 8:19618 (R:US)
- **Mineral Wastes**
  - Subsurface oxidation of pyritic coal-cleaning wastes by chemoautotrophic bacteria (51 references), 8:19595 (R:US)

COAL RESERVES
- Estimation of resources and reserves. Final report, 8:19673 (R:US)
- **Allocations**
  - Documentation of the reserve-related data inputs to the Resource Allocation and Mine Costing model, 8:19655 (R:US)

COAL SEAMS
- **Variations**
  - Data base for the analysis of compositional characteristics of coal seams and macerals. Final report. Part 2. A multivariate study of the interrelationships among selected variables of the organic fraction of samples of United States' coals, 8:19555 (R:US)

COAL TAR
- **Catalytic Cracking**
  - Thermal and catalytic cracking of tars and tar constituents from coal gasification processes, 8:19469 (RA:US)
- **Chemical Composition**
  - Tri-State Synfuels Project Commercial Scale Coal Test: Volume 6A. Export sample program/wastewater treatability study summary report (Proposed Henderson, Kentucky coal to gasoline plant; waste water from Lugri Mark IV test at Sasol), 8:19502 (R:US)
- **Chemical Reaction Yield**
  - Characterization of tar products from rapid pyrolysis of bituminous coals. Fifth quarterly progress report, October 1982-December 1982, 8:19560 (R:US)
- **Chemical Reactions**
  - Coal plasticity, agglomeration, and volatiles secondary reactions during gasification, 8:19439 (RA:US)
- **Cracking**
  - Coal gasification and tar conversion reactions over calcium oxide, 8:19468 (RA:US)
- **Gasification**

Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)

COMPTON SCATTERING TOMOGRAPHY

Tomography based on the detection by a gamma camera of the 90° Compton scattering of a planar gamma beam produced by an external source.

Density and composition imaging by photon energy spectrum sensing, 8:21921 (J:US)

COMPUTER AXIAL TOMOGRAPHY SCANNING

See CAT SCANNING

COMPUTER CODES

Computer codes are indexed by their initial letter and CODES, e.g., A CODES. If the code name begins with a number the code is indexed to NUMBER CODES.

See also D CODES

General approach to the testing of binary solubility systems for thermodynamic consistency. Consolidated Fuel Reprocessing Program, 8:21232 (R:US)

A Codes

ACSAP; resonance region cross section analysis (IBM360,370,303x; FORTRAN IV (92%) and BAL (8%)), 8:22512 (R:US)

ADEP; 1-dimensional and 2-dimensional few-group space-time kinetics (CDC6400; FORTRAN IV), 8:20539 (R:US)

AERIN; radioactive aerosol dose calculations (IBM360,303x; FORTRAN IV), 8:21940 (R:US)

AILMOE; cross section calculation of elastic scattering resonancess (IBM360; FORTRAN IV (H)), 8:22428 (R:US)

AIREK3; space-independent kinetics with feedback (IBM360; FORTRAN IV), 8:20492 (R:US)

AIROS2A; simulation of reactor dynamics (IBM360; FORTRAN IV (95%) and Assembly language (5%)), 8:20513 (R:US)

AISITE2; parametric site requirement study (IBM360; FORTRAN IV), 8:20622 (R:US)

ALEATO: code for processing numerical data by IBM-370, 8:22825 (R:IT:IT)

ALPHA-M; resolution of gamma-ray spectra (IBM360; FORTRAN IV), 8:22538 (R:US)

ANALYZE; hydrothermal reservoir test analysis (CDC7600; FORTRAN IV (99%) and COMPASS (1%)), 8:20170 (R:US)

ANCON; space-independent reactor kinetics code (CDC6600;IBM360,303x; FORTRAN IV), 8:20535 (R:US)

ANGCOR; directional correlation coefficients (CDC6600,7600; FORTRAN IV), 8:22514 (R:US)

ANSDDF; ANSI data description file utilities (IBM360,370,303x; PL/I), 8:22890 (R:US)

ANVENT; los of coolant analysis Duke Power McGuire units (GE635 MARK2 Time-Sharing System; FORTRAN IV), 8:20665 (R:US)

APACHE; two-dimensional chemically reactive fluid flow code (CDC7600; FORTRAN IV), 8:21415 (R:US)

APARNA2; one-dimensional integral neutron transport in slab geometries (IBM370,303x; FORTRAN IV), 8:22511 (R:US)

APRFX1; 99-group DLC-2B library group-collapsing (CDC6600; FORTRAN IV), 8:20530 (R:US)

ARC-NUI002 BCD Input Processor; BCD input data processing module (IBM360/50 and larger models; FORTRAN IV), 8:20549 (R:US)

ARC-SYSTEM; system subprograms and modules (IBM360/50 and larger models; FORTRAN IV, Assembler language, and macro definitions), 8:20544 (R:US)

ARRRG;FOOD; aquatic & terrestrial radiation (UNIVAC1100; FORTRAN), 8:21943 (R:US)

ASPIS; gamma-ray source buildup factor calculations (CDC6600; FORTRAN IV and ASCENT), 8:22490 (R:US)

Assessment of parameters in the simulation of an ANFLOW municipal-wastewater-treatment pilot plant (ANFLOW computer code), 8:21450 (R:US)

ATHENA4; inelastic scattering form factors (IBM360/75,91; FORTRAN IV), 8:22560 (R:US)

AVERAGE; unresolved region average cross section calculations (CDC6600; FORTRAN IV), 8:22474 (R:US)

AVOID; annular void cross section calculation (GE625; FORTRAN IV), 8:22445 (R:US)

ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format (CDC7600; FORTRAN IV), 8:20552 (R:US)

FAIMOS; one-dimensional, multigroup diffusion in slab, cylindrical, or spherical geometries (IBM360; FORTRAN IV (H)), 8:22427 (R:US)

FORM; fast neutron spectrum cross section calculations (IBM370; FORTRAN IV), 8:22425 (R:US)

GASPAN; complex gamma-ray spectra analysis (CDC6600; FORTRAN IV), 8:21566 (R:US)

KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)

PACTOLUS;CLOTHO; nuclear power plant cost code (UNIVAC1108; FORTRAN V), 8:20475 (R:US)

PERT; one-dimensional perturbation for AIM and FOG codes (IBM360; FORTRAN IV), 8:22422 (R:US)

RESEND;ADLER; ENDF/B resonance cross section codes (CDC6600;PDP10; FORTRAN IV), 8:20529 (R:US)
RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)
SIZZLE; one-dimensional multigroup diffusion depletion (IBM360; FORTRAN IV), 8:22426 (R:US)
STEAM-67; 1967 ASME steam and water properties (IBM360,370,303x; FORTRAN IV), 8:21227 (R:US)

B Codes
BE21; few-group, discrete ordinates for slab geometry (CDC6600; FORTRAN IV), 8:22482 (R:US)
BESFIT; diffraction model elastic scattering cross sections (CDC6600; FORTRAN IV), 8:22176 (R:US)
BETTIS ENVIRONMENTAL ROUTINES; MODEL6/3.3;MODEL7/2.0; modified Bettis Environmental Library scope 3.3 (CDC6600,7600; FORTRAN IV and ASCENT (Bettis), FORTRAN IV and COMPASS (MODEL 6/3.3, MODEL 7/2.0)), 8:22835 (R:US)
BISYN; two-dimensional, multigroup diffusion synthesis calculations (GE635;UNIVAC1108; FORTRAN IV), 8:22447 (R:US)
BL47; drafting tool to plot plane structures (CDC6600; FORTRAN IV), 8:21318 (R:US)
BLAST; reactor kinetics temperature distribution study (IBM360; FORTRAN IV), 8:20516 (R:US)
BLOOST6; combined kinetics two-dimensional heat transfer (UNIVAC1108; FORTRAN IV and Assembly language), 8:20505 (R:US)
BNWIGL;UNIWIGL; two-group time-dependent one-dimensional diffusion (UNIVAC1108,1100;CDC6600; FORTRAN (99%) and COMPASS (1%) (CDC6600), FORTRAN V (UNIVAC1108)), 8:22510 (R:US)
BRT1; thermal spectrum cross section calculations (UNIVAC1108; FORTRAN V), 8:20497 (R:US)
BUBL1; fuel swelling & gas release simulation (CDC6600; FORTRAN IV), 8:20608 (R:US)
BUG2; two-dimensional multigroup diffusion & burnup in xy, rz geometries (UNIVAC1108; FORTRAN IV and Assembly language), 8:22495 (R:US)
BUGTRI; two-dimensional multigroup diffusion & burnup in triangular geometries (UNIVAC1108; FORTRAN IV and Assembly language), 8:22496 (R:US)
BURNUP; heavy element isotopic burnup analysis (GE635; FORTRAN IV), 8:20509 (R:US)
BURST1; hydrodynamic analysis during blowdown (IBM360/75; FORTRAN IV), 8:21412 (R:US)
BUSHL; cylindrical shell buckling collapse analysis (CDC6600; FORTRAN IV), 8:20609 (R:US)
CAGE;BIRD;SPEC; time-of-flight data analysis (UNIVAC1108; FORTRAN V), 8:22501 (R:US)
Documentation for the QMC generic LP modelling system. Final report, 8:22874 (R:XE)
EPOCH; neutron age calculation of ENDF/B data (CDC6600; FORTRAN IV), 8:20321 (R:US)
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
HRG3; slowing-down spectrum, multigroup constants (UNIVAC1108;IBM360,370; FORTRAN IV), 8:20531 (R:US)
SUBDOSA; external dose airborne radionuclides (UNIVAC1100; FORTRAN), 8:21942 (R:US)
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)

C Codes
2DB; two-dimensional multigroup diffusion and depletion (UNIVAC1108;CDC6600; FORTRAN IV), 8:22457 (R:US)
BUBL1; fuel swelling & gas release simulation (CDC6600; FORTRAN IV), 8:20608 (R:US)
CAESAR4; liblst; one-dimensional, multigroup diffusion (IBM360; FORTRAN IV), 8:22441 (R:US)
CAGE;BIRD;SPEC; time-of-flight data analysis (UNIVAC1108; FORTRAN V), 8:22501 (R:US)
CATCH; map projection subroutine package (IBM360,370,303x; FORTRAN IV), 8:22850 (R:US)
CCC; one-phase conduction convection compaction (CDC7600; FORTRAN IV), 8:20171 (R:US)
CEXE;INCEXE; one-group, three-dimensional xyz xenon oscillation (IBM360; FORTRAN IV), 8:20520 (R:US)
CHAINS; analysis of radioactive decay chains (GE625,635; FORTRAN IV), 8:22539 (R:US)
CHECKER;CRECT;DAMMET;PLOTFB; SLAVE3 ENDF/B V1 processing codes; CHECKER,CRECT,DAMMET,PLOTFB,... ENDF/B V1 proc (CDC6600; FORTRAN IV), 8:22477 (R:US)
CHECKER;CRECT;STNDRD;FIZCON; PSYCHE;RESEND;INTER;INTEND;SUMRIZ;PLOTEF;LSTFCV;RIGEL ENDF/B V5 processing codes; CHECKER,CRECT,.. AND ENDF/B V5 processing codes (CDC6600,CYBER175; FORTRAN IV), 8:22891 (R:US)
CHIC-KIN; fast and intermediate power transients (CDC6600; FORTRAN IV), 8:20632 (R:US)
CINCAS; nuclear fuel cycle cost and economics (IBM360;CDC6600; FORTRAN IV), 8:20472 (R:US)
CINDER;M0102; point depletion fission product (CDC6600;IBM360; FORTRAN IV (CDC6600), FORTRAN IV and BAL (IBM360)), 8:20510 (R:US)
CITATION; one-, two-, and three-dimensional diffusion depletion using multigroup theory (IBM360,303x; FORTRAN IV), 8:22479 (R:US)
CLEM; angular distribution Legendre fitting (CDC6600; FORTRAN IV), 8:20547 (R:US)
CLIP; form or thredes library utility routine (IBM360; FORTRAN IV), 8:22442 (R:US)
CLOUD; gamma-ray dose rate from a cloud (IBM360; FORTRAN IV), 8:21795 (R:US)
CLUP77; square cell collision probability calculations (FACOM230-60;IBM360; FORTRAN IV), 8:20546 (R:US)
COAST4; costing & sizing of tokamak reactors (CDC7600; FORTRAN (FTN compiler)), 8:22686 (R:US)
COBRA4I; rod bundle & core thermal-hydraulics (CDC6600,7600,CYBER175;CRAY1; FORTRAN IV), 8:20605 (R:US)
CODILLI; least squares analysis of resonance data (IBM360; FORTRAN IV), 8:22463 (R:US)
COHBE;PREP; coherent inelastic scattering law calculations (UNIVAC1108; FORTRAN IV), 8:22478 (R:US)
COLCO; thermal diffusion column coefficients (IBM360,303x;CDC6600,CYBER175; FORTRAN IV), 8:19903 (R:US)
COMNUC;CASCADE; compound nucleus reaction (IBM360; FORTRAN IV with one Assembler language subroutine for performing internal I/O.), 8:22366 (R:US)
Comparable Sale Data Base users manual. Version 1.1, 8:21933 (R:US)
CONCEPT5;CONCEPT3; power plant conceptual cost estimate (IBM360,370;UNIVAC1108; FORTRAN IV (H) (98%) and Assembly language (2%) (IBM360); FORTRAN IV (UNIVAC1108)), 8:20474 (R:US)
CONTEMPT-LT/028;CONTEMPT-LT/026; pressure-temperature response (CDC7600,CYBER176;IBM360; FORTRAN IV and COMPASS (CDC7600), FORTRAN IV and BAL (IBM360)), 8:20569 (R:US)
CORGAM; unfolding of complex gamma-ray spectra (IBM360/50; FORTRAN IV Level G), 8:22559 (R:US)
CPDREV; spare parts inventory control system (UNIVAC1100;CDC6600,CYBER74,175; FORTRAN (99%) and Assembly language (1%)), 8:22824 (R:US)
CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
CURFIT; curve fitting experimental data points (CDC6600; FORTRAN IV and ASCENT), 8:20491 (R:US)
CURIE; fission product inventory decay history (IBM370; FORTRAN IV), 8:20498 (R:US)
CYGRO2; stress analysis of cylindrical fuel element (CDC6600; FORTRAN IV), 8:20599 (R:US)
CYGRO3; oxide fuel rod stress & deformation (CDC6600;IBM360,370; FORTRAN IV (CDC6600), FORTRAN IV and Assembly language (IBM360)), 8:20606 (R:US)

DTF4; one-dimensional, multigroup discrete ordinate program (IBM360;CDC6600;GE625; FORTRAN IV (CDC6600), FORTRAN IV and MAP (GE625), FORTRAN IV and BAL (IBM360)), 8:22432 (R:US)
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2 (CDC6600), 8:22341 (R:US)
LEOPARD;SPOTS; sjectrum calculation with depletion (IBM360;UNIVAC1108; FORTRAN IV(H) (IBM360) and FORTRAN V (UNIVAC1108)), 8:20503 (R:US)
MIRAB;MIRAP; containment system iodine removal (CDC6400; FORTRAN IV), 8:20656 (R:US)

Cross Sections

PUN1; unresolved resonance integral cross sections (CDC6600; FORTRAN IV), 8:22467 (R:US)

D Codes

1DX; one-dimensional diffusion fast cross section generation (UNIVAC1108;IBM360,370; FORTRAN IV (UNIVAC1108), FORTRAN IV and BAL (IBM360,370)), 8:22472 (R:US)
2DF; two-dimensional, multigroup discrete ordinate code (UNIVAC1108; FORTRAN V), 8:22430 (R:US)
3DDT; 3-dimensional multigroup diffusion xyz or r-theta-z (CDC6600; FORTRAN IV), 8:20528 (R:US)
3DXT;DEP3; 3-dimensional xenon transient and depletion (CDC6600; FORTRAN IV), 8:20534 (R:US)
APRFX1; 99-group DLC-2B library group-collapsing (CDC6600; FORTRAN IV), 8:20530 (R:US)
CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
DAC1; SN perturbation code using DTF4 fluxes (CDC6600; FORTRAN IV), 8:20525 (R:US)
DACRIN; radiation organ dose from inhalation (UNIVAC1100; FORTRAN), 8:21941 (R:US)
DAFT1; least squares fit for fissile nuclide data (CDC6600; FORTRAN IV), 8:22386 (R:US)
DATATRAN2; modular programming and data system (CDC6600,7600,CYBER176; FORTRAN (85), COMPASS (15)), 8:22828 (R:US)
DATATRAN2 RAD1 Geometry Modules; radial geometry modules for two-dimensional imput (CDC6600,7600; FORTRAN (90), COMPASS (5), DATATRAN2 (5)), 8:21325 (R:US)
DATATRAN2 Utility Plotting Modules; utility plot modules f(x) & f(x,y) (CDC6600,7600; FORTRAN (80), COMPASS (15), DATATRAN2 (5)), 8:21326 (R:US)
DBUFIT1; least squares transmutation analysis (UNIVAC1108; FORTRAN V), 8:20526 (R:US)
DESA; district energy system cost energy model (IBM370,303x; FORTRAN IV), 8:20994 (R:US)
DEVOG; coupled molecular scattering equations (CDC7600,CYBER175; FORTRAN IV), 8:22334 (R:US)
DOBIS multiple data base support as implemented at Sandia National Laboratories Technical Library, 8:22877 (R:US)
DOGGY; desk calculator form sheet DP package (CDC6600; FORTRAN IV and ASCENT), 8:22830 (R:US)
DOS; neutron flux-dosimeter activity relation (GE625,635; FORTRAN IV), 8:20522 (R:US)
DOT2DB; 2-dimensional multigroup diffusion & SN theory (GE635; FORTRAN IV), 8:22498 (R:US)
DSTRESS; transient fuel model for clad strain (CDC6600,CYBER175; FORTRAN IV), 8:20672 (R:US)
DUZ2; 2-dimensional axisymmetric and plane elastic-plastic (CDC6600), 8:20570 (R:US)
DYNAM; dynamic analysis boiling flow steam (UNIVAC1108; FORTRAN), 8:21413 (R:US)
DYNO1; photomultiplier electron distribution (CDC6600;IBM360; FORTRAN IV), 8:21624 (R:US)
KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)
NRTS OS/360 Remote Job Entry; OS/360 MVT remote job entry system (IBM360/75; Assembler), 8:22841 (R:US)
PHENIX; 2-dimensional diffusion burnup refueling history (CDC6600; FORTRAN IV), 8:20408 (R:US)
User's manual for geophysical well-logging software programs, 8:22054 (R:US)

Documentation

Computer program abstract as software documentation, 8:22872 (R:US)

E Codes

CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
ECCSA4; loss-of-coolant & emergency cooling (CDC6400; FORTRAN IV), 8:20566 (R:US)
EDITOR; ENDF/B tape processing and editing (IBM360;CDC6600; FORTRAN IV), 8:20540 (R:US)
ELEFUNT; tests of Fortran elementary functions (IBM360,370,303x;CDC6600,7600; UNIVAC1108,1100; FORTRAN), 8:22852 (R:US)
ENDRUN2; multigroup constants from ENDF/B data (GE635; FORTRAN IV), 8:20412 (R:US)
EPOCH; neutron age calculation of ENDF/B data (CDC6600; FORTRAN IV), 8:20321 (R:US)
EQ3/6; chemical equilibrium of aqueous systems (CDC7600;CRAY1; FORTRAN Extended 4.6 (CDC7600) and CFT (CRAY1)), 8:21154 (R:US)
EQUIPOISE3; two-dimensional, two group diffusion is slabs or cylinders (CDC CYBER73,175;CDC7600; FORTRAN IV), 8:22423 (R:US)
ERREST; loss of coolant rod bundle critical heat flux data analysis (IBM360; FORTRAN IV), 8:20660 (R:US)
ESP; Monte Carlo reactor analysis calculation (IBM360/75,91; FORTRAN IV and BAL), 8:20545 (R:US)
ETOG1; ENDF/B to MUFT, GAM, ANISN corss sections format (CDC6600; FORTRAN IV), 8:22494 (R:US)
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2 (CDC6600), 8:22341 (R:US)
ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format (CDC7600; FORTRAN IV), 8:20552 (R:US)
ETOM1; ENDF/B format to MUFT format cross sections (CDC6600; FORTRAN IV), 8:22493 (R:US)
ETOT2; thermal libraries from ENDF/B data (CDC7600; FORTRAN IV), 8:20542 (R:US)
ETOX3; multigroup constants from ENDF/B for one dimension (UNIVAC1108;IBM360,370; FORTRAN IV), 8:22480 (R:US)
EVENT user's manual: a computer code for analyzing explosion-induced gas-dynamic transients in flow networks, 8:21439 (R:US)
EXPALS; least squares exponential decay curves (CDC7600,6600; FORTRAN IV), 8:21289 (R:US)
EXPN; analysis of pulsed neutron source data (GE635; FORTRAN IV), 8:19904 (R:US)
EXTERMINATOR2; two-dimensional, multigroup diffusion program diffusion program (IBM360;GE625;CDC6600; FORTRAN IV), 8:22429 (R:US)
PHROG; multi-group constant and fast spectra calculations (IBM360; FORTRAN IV), 8:20543 (R:US)
TDOWN; spatial & composition-dependent cross sections (GE635; FORTRAN IV), 8:20541 (R:US)
ZPR-III Assembly 48 GAFGAR ENDF/B Data Tapes; ZPR-III assembly 48 GAFGAR ENDF/B data tapes (UNIVAC1108; Variable-length binary records), 8:20515 (R:US)

F Codes

AIM6; one-dimensional multi-group diffusion slabs, cylinders, and spherese (IBM370; FORTRAN IV), 8:22421 (R:US)
ARRRG;FOOD; aquatic & terrestrial radiation (UNIVAC1100; FORTRAN), 8:21943 (R:US)
ENDF/B-THERMOS; 30-group ENDF/B scattering kernels (Auxiliary program written in FORTRAN IV), 8:22506 (R:US)
FAIMOS; one-dimensional, multigroup diffusion in slab, cylindrical, or spherical geometries (IBM360; FORTRAN IV (H)), 8:22427 (R:US)
FARED; one-dimensional fast reactor design & survey study (CDC6600; FORTRAN IV and COMPASS), 8:20524 (R:US)

FC;LSEI;WNNLS; constrained least squares fit (CDC6600,7600,CYBER175 (designed to be machine-independent); FORTRAN IV), 8:22859 (R:US)
FCC4; fundamental mode fast reactor cross section calculations (UNIVAC1108; FORTRAN IV), 8:20243 (R:US)
FESH; x-y multi-group neutron transport method (CDC6600,7600; FORTRAN IV (MNF, University of Minnesota FORTRAN)), 8:22508 (R:US)
FEVER; one-dimensional, few-group diffusion depletion program (CDC CYBER73,175;CDC7600; FORTRAN IV), 8:20390 (R:US)
FEVER7; one-dimensional multigroup diffusion and depletion (UNIVAC1108; FORTRAN IV), 8:22454 (R:US)
FIGRO; LWBR fuel swelling temperature study (CDC6600; FORTRAN IV), 8:20600 (R:US)
FIGS; IBM360 and 2250 FORTRAN graphics subroutines (IBM360; FORTRAN IV and BAL), 8:22836 (R:US)
FINEL; finite-element study in two,-and three-dimensonal structures (CDC6600; FORTRAN IV), 8:21324 (R:US)
FLAC; steady-state flow, pressure distribution (UNIVAC1108;IBM370;CDC6600; FORTRAN V (UNIVAC1108) and FORTRAN IV (IBM370 and CDC6600)), 8:20568 (R:US)
FLANGE1; scattering law cross section calculation (UNIVAC1108; FORTRAN V), 8:22437 (R:US)
FLANGE2/71-1; ENDF/B thermal scattering data (IBM360; FORTRAN IV), 8:22469 (R:US)
FLARE; three-dimensional reactivity and power distribution (GE635;IBM360;CDC7600; FORTRAN IV), 8:20494 (R:US)
FLASH3; loss-of-coolant accident analysis (CDC6600; FORTRAN IV), 8:20564 (R:US)
FLASH6;FLASH4; fully-implicit transient simulation (IBM360,370;CDC6600,7600; FORTRAN IV), 8:20654 (R:US)
FLOCHT; computer drawn flow charts & diagrams (DEC PDP10 with IBM360,370 or 303x; FORTRAN IV (99%), Assembly language (1%)), 8:22870 (R:US)
FLOW-MODEL; multi-channel two-dimensional, two-phase flow (IBM360;CDC CYBER73;CDC6600,7600; FORTRAN IV), 8:20318 (R:US)
FOG; one-dimensional few-group few-gp diffusion slab cylinder sphere (GE625; FORTRAN IV), 8:22420 (R:US)
FORE2; fast reactor excursion calculations (GE635;IBM360; FORTRAN IV), 8:20496 (R:US)
FORSIM; solution of partial or ordinary differential equations (CDC6600; FORTRAN Extended), 8:22838 (R:US)
FRANTIC; least squares fit sum of exponentials (IBM370; FORTRAN IV), 8:21291 (R:US)
FRCRL2; LOCA fission product release analysis (CDC6400; FORTRAN IV), 8:20657 (R:US)
FREADM1; fast reactor core accident analysis (GE635; FORTRAN IV), 8:20655 (R:US)
FREVAP6; HTGR metallic fission product release (UNIVAC1108; FORTRAN IV), 8:20602 (R:US)
FSDP3; pointwise cross sections from Breit-Wigner parameters (UNIVAC1108; FORTRAN V), 8:22434 (R:US)
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
FX2-TH; two-dimensional time-dependent reactor kinetics (IBM370,303X; FORTRAN IV (99%) and Assembly language (1%)), 8:22509 (R:US)
PERT; one-dimensional perturbation for AIM and FOG codes (IBM360; FORTRAN IV), 8:22422 (R:US)
SYN; 2-dimensional synthesis multigroup diffusion and 1-group depletion (GE635; FORTRAN IV and GMAP), 8:20411 (R:US)

G Codes

BUSHL; cylindrical shell buckling collapse analysis (CDC6600; FORTRAN IV), 8:20609 (R:US)
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2 (CDC6600), 8:22341 (R:US)
ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format (CDC7600; FORTRAN IV), 8:20552 (R:US)
GADOSE;DOSET; HTGR accident analysis dose calculations (UNIVAC1108; FORTRAN IV), 8:20391 (R:US)
GAFFE; equilibrium fuel cycle calculation (UNIVAC1108; FORTRAN IV), 8:20470 (R:US)
GAFGAR;p3t;PROC;TAPCOP; spectra and group-averaged cross section calculation (UNIVAC1108; FORTRAN IV), 8:20511 (R:US)
GAKER; inelastic scattering cross section calculations for moderators (UNIVAC1108; FORTRAN IV), 8:22448 (R:US)
GAKIT; one-dimensional, multigroup kinetics with temperature feedback (UNIVAC1108; FORTRAN IV), 8:22470 (R:US)
GAMBLE5; two-dimensional, multigroup diffusion in xy and rz geometry (UNIVAC1108; FORTRAN IV and Assembly language), 8:22435 (R:US)
GAMTEC2; multigroup constant calculations for 0 to 10 MeV (UNIVAC1107;GE625;CDC6400; FORTRAN IV), 8:22431 (R:US)
GAMTRI; two-dimensional, multigroup, diffusion triangular mesh geometries (UNIVAC1108; FORTRAN IV (90%) and Assembly language (10%)), 8:22484 (R:US)
GAND; GAFGAR cross-section library preparation (UNIVAC1108; FORTRAN IV), 8:20514 (R:US)
GANDY3; unresolved resonance cross secton calculation (UNIVAC1108; FORTRAN IV), 8:22460 (R:US)
GAPER2D; 2-dimensional perturbation calculation from 2DF output (UNIVAC1108; FORTRAN V), 8:20532 (R:US)
GAPL3; inelastic large deflection stress study (CDC6600; FORTRAN IV and Assembly language), 8:21322 (R:US)
GAPOTKIN; space-independent reactor kinetics (UNIVAC1108; FORTRAN IV), 8:20512 (R:US)
GARLIC-B. A digital code for real-time calculation of the transient behaviour of nodal and global core and plant parameters of BWR nuclear power plants, 8:20329 (R:DE)
GASA (GA Stability Analysis); stability analysis for reactor kinetic equations (UNIVAC1108; FORTRAN IV), 8:20504 (R:US)
GASKET; thermal scattering law calculation (UNIVAC1108; FORTRAN IV), 8:22440 (R:US)
GASP7; one-dimensional burnup power distribution search (UNIVAC1108; FORTRAN IV), 8:22455 (R:US)
GASPAN; complex gamma-ray spectra analysis (CDC6600; FORTRAN IV), 8:21566 (R:US)
GATT; three-dimensional, few-group diffusion calculations in hexagonal geometries (UNIVAC1108; FORTRAN IV), 8:22476 (R:US)
GAUGE; two-dimensional, few-group, neutron diffusion in hexagonal geometries (UNIVAC1108; FORTRAN IV), 8:22459 (R:US)
GAZE2; one-dimensional multigroup diffusion in slab, spherical, and cylindrical geometries (UNIVAC1108; FORTRAN IV (95%) and Assembly language (5%)), 8:22491 (R:US)
GEM; eigenvalue problem for vibrating systems (CDC6600; FORTRAN IV and ASCENT), 8:21316 (R:US)
GENED ENVIRONMENTAL ROUTINES; subroutine library (GE635; FORTRAN IV and GMAP), 8:22839 (R:US)
GENRD; free-format card input processor (CDC6600;IBM360; ANSI Standard FORTRAN), 8:22842 (R:US)
GETOUT; radionuclide transport geologic media (UNIVAC1100; FORTRAN), 8:21870 (R:US)
GGC4; multigroup cross sections fast thermal spectra (UNIVAC1108;CDC6600; FORTRAN V (UNIVAC1108), FORTRAN IV (CDC6600)), 8:22451 (R:US)
GLEN; group constant calculations from TOR output data (CDC6600; FORTRAN IV), 8:22468 (R:US)
GLUB1; water-logged fuel element analysis (CDC6600; FORTRAN IV), 8:20604 (R:US)
GRAIL; a device-independent graphics language (CDC6600,7600; FORTRAN IV (81%) and COMPASS (19%)), 8:22860 (R:US)
GRAMP; r-m parameters of unresolved resonances (CDC6600; FORTRAN IV), 8:22387 (R:US)
GRDWRK; grid generation for safe programs (UNIVAC1108; FORTRAN IV), 8:21312 (R:US)
GROUSE; space-dependent cross section generation (GE625,635; FORTRAN IV), 8:20521 (R:US)

GSMP; general systems analysis modeling code (IBM370,303x; PL/I (90%), FORTRAN IV (9%), and Assembly language (1%)), 8:22853 (R:US)

GSSLRN1B; least squares photopeak spectra code (UNIVAC1108; FORTRAN V with Assembler language used for two minor routines), 8:20527 (R:US)

GWCORE; GSPC 79 core graphics routines package (DEC VAX11/780; The device-independent part of GWCORE is written solely in VAX11/780 FORTRAN IV-Plus. There is very limited use of FORTRAN 77 IF-THEN-ELSE control structures and CHARACTER data types. The Tektronix 4012 driver is written in FORTRAN. The Ramtek 9400 driver is written in C.), 8:22858 (R:US)

KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)

KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)

RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)

User's guide for 10 CFR 61 impact analysis codes (INTRUDE; GRWATER;OPTIONS;INVERSI;INVERSW), 8:19882 (R:US)

ZPR-III Assembly 48 GAFGAR ENDF/B Data Tapes; ZPR-III assembly 48 GAFGAR ENDF/B data tapes (UNIVAC1108; Variable-length binary records), 8:20515 (R:US)

H Codes

DUZ2; 2-dimensional axisymmetric and plane elastic-plastic (CDC6600), 8:20570 (R:US)

HAA3B; aerosol behavior lognormal model (IBM370; FORTRAN IV (H)), 8:20653 (R:US)

HAMMER;LITHE;HELP; critical analysis system (IBM360; FORTRAN IV and BAL), 8:20502 (R:US)

HEATING2; transient steady-state heat transfer (IBM370,3033; FORTRAN IV), 8:21407 (R:US)

HEATING5;HEATING3; 1,2, or 3-dimensional heat conduction program (IBM360,303x;CDC CYBER73;CDC7600; FORTRAN IV (95%) and Assembly language (5%) (HEATING5), FORTRAN IV (HEATING3)), 8:21414 (R:US)

HEATMESH; geometrical data heat transfer study (CDC6600; FORTRAN IV), 8:21328 (R:US)

HERESY3; two-dimensional heterogeneous reactor calculation (IBM360; FORTRAN IV and BAL), 8:20493 (R:US)

HERMES; regional radiological effects analysis (UNIVAC1108; FORTRAN IV and SLEUTH), 8:20663 (R:US)

HEXSCAT; elastic scattering cross sections hexagonal lattice (UNIVAC1108; FORTRAN IV), 8:22449 (R:US)

HFN; one-dimensional, multigroup diffusion in slabs, cylinders, and spheres (UNIVAC1107;CDC6600,CYBER74; FORTRAN IV (99.9%) and SLEUTH-II (0.1%) (UNIVAC1107), FORTRAN IV (CDC6600)), 8:22436 (R:US)

HOT2; two-dimensional transient heat conduction program (CDC6600; FORTRAN IV), 8:21408 (R:US)

HWOCR-SAFE; two-dimensional Monte Carlo cell calculation (IBM360; FORTRAN IV (H) and BAL), 8:20507 (R:US)

KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)

WSP-HASP/DOS; DOS-MFT remote workstation package (IBM360; DOS Assembler language), 8:22843 (R:US)

I Codes

CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)

ICARUS; redundant system unavailability model (IBM370,303x; FORTRAN IV), 8:20668 (R:US)

IDAP; interactive decision analysis procedure (IBM360,370,303x; PL/I), 8:22867 (R:US)

INTEROP; nonlinear optimization algorithms (CDC CYBER173;CDC6600,7600; FORTRAN IV (90%) and COMPASS (10%)), 8:22848 (R:US)

ISOGEN; radionuclide generation and decay (UNIVAC1108; FORTRAN V), 8:19905 (R:US)

ISOSEARCH; isotope production flux, cross section calculations (IBM360; FORTRAN IV and BAL), 8:21290 (R:US)

ISOTOPES; maximum yield from reaction or decay (UNIVAC1100; FORTRAN V), 8:19902 (R:US)

KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)

User's guide for 10 CFR 61 impact analysis codes (INTRUDE; GRWATER;OPTIONS;INVERSI;INVERSW), 8:19882 (R:US)

J Codes

JITER; fluctuation experiment analysis (CDC6600; FORTRAN IV), 8:20518 (R:US)

JOSHUA OPERATING SYSTEM; data storage, retrieval, and display (IBM360,370,303x; FORTRAN IV (60%) and Assembler language (40%)), 8:20537 (R:US)

JP1XR; coupled-channel scattering cross section calculations (CDC6600; FORTRAN IV), 8:22504 (R:US)

JUPITOR1;JP1; coupled channel x-sec evaluation (IBM360; FORTRAN IV), 8:22452 (R:US)

RAHAB Lattice Physics Modules; JOSHUA system lattice physics modules (IBM360; FORTRAN IV), 8:20551 (R:US)

K Codes

3DXT;DEP3; 3-dimensional xenon transient and depletion (CDC6600; FORTRAN IV), 8:20534 (R:US)

CLEM; angular distribution Legendre fitting (CDC6600; FORTRAN IV), 8:20547 (R:US)

ETOT2; thermal libraries from ENDF/B data (CDC7600; FORTRAN IV), 8:20542 (R:US)

K-FIX;3D; three-dimensional extension two-phase flow dynamics (CDC7600; FORTRAN IV), 8:20553 (R:US)

K-TIF; two-fluid PWR downcomer fluid dynamics (CDC7600; FORTRAN (LRLTRAN and CHAT compiler)), 8:20351 (R:US)

KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)

KAPPAS; semiclassical transmission probability (CDC7600,CYBER74,175; FORTRAN IV), 8:22340 (R:US)

KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)

MULTI; multi-level resonance theory cross section calculations (CDC6600; FORTRAN IV), 8:20550 (R:US)

PREP;KITT; system fault tree evaluation codes (IBM360;UNIVAC1108; FORTRAN IV), 8:20664 (R:US)

TEMPEST2; thermal neutron spectrum cross sections (IBM360; FORTRAN IV), 8:22424 (R:US)

L Codes

DBUFIT1; least squares transmutation analysis (UNIVAC1108; FORTRAN V), 8:20526 (R:US)

ETOT2; thermal libraries from ENDF/B data (CDC7600; FORTRAN IV), 8:20542 (R:US)

GSSLRN1B; least squares photopeak spectra code (UNIVAC1108; FORTRAN V with Assembler language used for two minor routines), 8:20527 (R:US)

LARCA; flux-weighting of DTF4 cross sections (CDC6600; FORTRAN IV), 8:22486 (R:US)

LASER; spectrum calculations with burnup cylindrical lattice (IBM360,370; FORTRAN IV), 8:20499 (R:US)

LASO; block lanczos symmetric eigenvalue code (IBM360,370,303x (designed to be machine-independent); FORTRAN IV), 8:22864 (R:US)

LCURVE; learning curve production calculations (Honeywell Series 60 Level 66 Model 20; BASIC), 8:22868 (R:US)

LIFE3; mixed-oxide fuel element performance (IBM370;CDC7600; FORTRAN IV), 8:20607 (R:US)

LINSED; one-dimensional multireach sediment transport model (IBM360,303x; FORTRAN IV), 8:22027 (R:US)

LION4;LION; three-dimensional temperature distribution program (CDC6600,7600;UNIVAC1108;IBM360,370;

FORTRAN IV and ASCENT (CDC6600,7600), FORTRAN IV (UNIVAC1108A,B and IBM360,370)), 8:20565 (R:US)
LIZARD4; nonlinear differential equations solution (CDC6600; FORTRAN IV and ASCENT), 8:22833 (R:US)
LOGD; multichannel log-derivative scattering (CDC7600,CYBER175; FORTRAN IV), 8:22338 (R:US)
LPMGB; linear programming subroutine with bounds (CDC7600,CYBER175;IBM370,303x; FORTRAN), 8:22862 (R:US)
User's manual for geophysical well-logging software programs, 8:22054 (R:US)
Wind systems life cycle cost analysis: a description and users manual (LIFECC), 8:20209 (R:US)

M Codes
BETTIS ENVIRONMENTAL ROUTINES; MODEL6/3.3;MODEL7/2.0; modified Bettis Environmental Library scope 3.3 (CDC6600,7600; FORTRAN IV and ASCENT (Bettis), FORTRAN IV and COMPASS (MODEL 6/3.3, MODEL 7/2.0)), 8:22835 (R:US)
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2 (CDC6600), 8:22341 (R:US)
ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format (CDC7600; FORTRAN IV), 8:20552 (R:US)
FORM; fast neutron spectrum cross section calculations (IBM370; FORTRAN IV), 8:22425 (R:US)
M0219;FLOT1; PWR flow transient analysis (CDC6600; FORTRAN IV), 8:20350 (R:US)
M0266; linear elastic structural dynamics (CDC6600; FORTRAN IV), 8:21321 (R:US)
M0457;PIPE; elastic stress of piping system (CDC6600; FORTRAN IV), 8:21313 (R:US)
M0552; dynamic analysis of linear elastic systems (CDC6600; FORTRAN IV), 8:21311 (R:US)
M0555;ACT1; loss-of-coolant accident analysis (CDC6600; FORTRAN IV), 8:20563 (R:US)
M0648; one-dimensional slab transport with slowing down (CDC6600; FORTRAN IV), 8:22461 (R:US)
M0661;M0657;M0626; polynomial curve fitting (CDC6600; FORTRAN IV), 8:22829 (R:US)
M0678;FUGIT1; dynamic response of elastic structures (CDC6600; FORTRAN IV), 8:21437 (R:US)
M0756;LETO; one-dimensional slab gamma-ray transport (CDC6600; FORTRAN IV), 8:22462 (R:US)
M0807; two-dimensional diffusion absorption removal cross sections (CDC6600; FORTRAN IV), 8:22446 (R:US)
M0899;hoh; steam tables 14.5-2538 psia (CDC6600; FORTRAN IV), 8:21150 (R:US)
MACH1; one-dimensional, multigroup diffusion is slabs, cylinders, and spheres (CDC6500;IBM360,370/195; FORTRAN IV (CDC6500, IBM360-98%), BAL (IBM360-2%)), 8:22439 (R:US)
MANE1; rectangular magnetic network solution (CDC6600; FORTRAN IV), 8:21327 (R:US)
MANTA; steady-state thermal-hydraulic analysis (GE635;CDC6600,7600; FORTRAN IV), 8:20597 (R:US)
MAPPER; report-quality graphics on command (IBM360,370;DEC10; FORTRAN IV), 8:22869 (R:US)
MARIAH - a finite-element computer program for incompressible porous-flow problems: user's manual, 8:21427 (R:US)
MC-2; fast neutron spectra & multigroup cross section (IBM360,370;CDC7600; FORTRAN IV (99nd Assembly language (1IBM370), FORTRAN IV (99) and COMPASS (1) (CDC7600).), 8:22465 (R:US)
MICHRD; microhardness measurement analysis (GE625,635; FORTRAN IV), 8:21039 (R:US)
MINPACK1; nonlinear equations & least squares (IBM360,370 (designed to be machine-independent); FORTRAN IV), 8:22855 (R:US)
MINX; multigroup crosssections from ENDF/B-IV data (CDC7600;IBM370; FORTRAN IV (H compiler) and BAL (IBM370), FORTRAN IV (RUN or FTN compiler) and COMPASS (CDC7600)), 8:22507 (R:US)
MIRAB;MIRAP; containment system iodine removal (CDC6400; FORTRAN IV), 8:20656 (R:US)
MNN; solution of close coupling equations (CDC7600,CYBER175,74; FORTRAN IV), 8:22339 (R:US)
MOCARS; mc distribution & simulation limits (CDC CYBER76;CDC7600; FORTRAN IV (76%) and COMPASS (24%)), 8:22861 (R:US)
MOD5; stochastic model of neutron slowing-down (IBM360; FORTRAN IV), 8:22502 (R:US)
MOST; a multidimensional optimization scheme (CDC6600; FORTRAN IV), 8:22834 (R:US)
MUCHA1;MUCHA2; multiple channel analysis emergency core cooling (CDC6400; FORTRAN IV), 8:20658 (R:US)
MULTI; multi-level resonance theory cross section calculations (CDC6600; FORTRAN IV), 8:20550 (R:US)
MUSCAT; view factor shielding code cavity geometry (UNIVAC1108; FORTRAN IV), 8:22438 (R:US)
PHENIX; 2-dimensional diffusion burnup refueling history (CDC6600; FORTRAN IV), 8:20408 (R:US)

Manuals
Users manual for YIELD: timber-yield forecasting and planning tool, Version 1.2, 8:21932 (R:US)

N Codes
HRG3; slowing-down spectrum, multigroup constants (UNIVAC1108;IBM360,370; FORTRAN IV), 8:20531 (R:US)
NASA; MHD-modified chemical equilibrium code (IBM370,303x; FORTRAN (42%) and PL/I (58%)), 8:21419 (R:US)
NJOY; neutron & photon crosssections from ENDF/B (CDC7600; American National Standard X3.9-1966 FORTRAN language is used with a few exceptions, such as CDC overlay commands, mixed-mode arithmetic, and expressions as array indices. Machine-dependent functions such as timing, input-output, and character manipulation are isolated in special subroutines. Changes required for IBM implementation are denoted by 'CIBM' comment cards. Some loops have been rearranged to facilitate vectorization.), 8:22513 (R:US)
NOAH; one-dimensional, one-group space-time diffusion feedback (CDC6600; FORTRAN IV), 8:22485 (R:US)
NOISY1; auto- and cross-spectral densities (UNIVAC1108; FORTRAN V), 8:20536 (R:US)
NOWIG; one-dimensional, two-group kinetics with temperature feedback (CDC6600; FORTRAN IV), 8:22471 (R:US)
NPRFCCP; fuel cycle costs performance data (CDC6600;IBM360,370/195; FORTRAN IV), 8:20466 (R:US)
NURLOC-1.0; loss-of-coolant thermal analysis (CDC6400; FORTRAN IV), 8:20319 (R:US)

Number Codes
3DDT; 3-dimensional multigroup diffusion xyz or r-theta-z (CDC6600; FORTRAN IV), 8:20528 (R:US)
DOT2DB; 2-dimensional multigroup diffusion & SN theory (GE635; FORTRAN IV), 8:22498 (R:US)
GAPER2D; 2-dimensional perturbation calculation from 2DF output (UNIVAC1108; FORTRAN V), 8:20532 (R:US)
PHENIX; 2-dimensional diffusion burnup refueling history (CDC6600; FORTRAN IV), 8:20408 (R:US)

O Codes
ESP; Monte Carlo reactor analysis calculation (IBM360/75,91; FORTRAN IV and BAL), 8:20545 (R:US)
KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)
OCTAVIA; pressure vessel failure probabilities (IBM370,303x; FORTRAN IV), 8:20573 (R:US)
OPUS; power plant performance and price study (UNIVAC1108; FORTRAN IV), 8:20469 (R:US)
ORTEP2; crystal structure illustration plots (IBM360,370,303x; FORTRAN IV (90%) and Assembly language (10%)), 8:22547 (R:US)
ORTHIS;ORTHAT; 2-dimensional heat conduction (IBM360; FORTRAN IV and BAL), 8:20662 (R:US)

User's guide for 10 CFR 61 impact analysis codes (INTRUDE; GRWATER;OPTIONS;INVERSI;INVERSW), 8:19882 (R:US)

P Codes

Computing minimum cost fire protection (PROTECT computer code), 8:21353 (R:US)
CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
EPOCH; neutron age calculation of ENDF/B data (CDC6600; FORTRAN IV), 8:20321 (R:US)
KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)
KENO2;KENO4; Monte Carlo multigroup criticality code (IBM360;CDC6600; FORTRAN IV and Assembly language (IBM360), FTN FORTRAN with COMPASS subroutine (CDC6600)), 8:21329 (R:US)
PABLM; accumulated environment radiation dose (UNIVAC1100; FORTRAN), 8:21944 (R:US)
PACTOLUS;CLOTHO; nuclear power plant cost code (UNIVAC1108; FORTRAN V), 8:20475 (R:US)
PAD; one-dimensional coupled Sn neutronics & hydrodynamics (CDC7600,6600,6400; FORTRAN IV (RUN compiler)), 8:20671 (R:US)
PAMA; preferred acquisition method analysis (CDC6600; COBOL), 8:22849 (R:US)
PARTI; optimal group or mesh collapsing (CDC6500; FORTRAN IV), 8:22488 (R:US)
PASOLE; simulation of passive solar systems (CDC6600,7600;IBM360,370,3033; FORTRAN IV), 8:20080 (R:US)
PAX03; harmony-PDQ cross section generation code (CDC6600; FORTRAN IV and COMPASS), 8:22489 (R:US)
PC; coupled molecular scattering equations (CDC7600,CYBER175; FORTRAN IV), 8:22335 (R:US)
PDFPLOT; statistical distribution functions (CDC CYBER76;CDC7600; FORTRAN IV (88%) and COMPASS (12%)), 8:22846 (R:US)
PDQ8;PDQ7; one, two, or three-dimensional, few group (CDC7600,6600,CYBER175,170;IBM360; PDQ8 - FORTRAN and COMPASS (RUN and FTN compatible); PDQ7 - FORTRAN IV and COMPASS (CDC CYBER175), FORTRAN FTN4.6 (CDC7600), FORTRAN IV (H) and BAL (IBM360)), 8:22444 (R:US)
PECS3; probabilistic evaluation cladding life (CDC7600; FORTRAN IV), 8:20413 (R:US)
PELE-IC; fluid-structure interaction analysis (CDC7600; FORTRAN IV), 8:21417 (R:US)
PERT4; two-dimensional perturbation in xy, rz, and r-theta geometry (UNIVAC1108; FORTRAN IV), 8:20506 (R:US)
PESTS; thermo-hydraulic system data analysis (IBM370,303x; FORTRAN IV), 8:20244 (R:US)
PHASER; phase shift cross section and polarization calculations (CDC6600; FORTRAN IV), 8:22505 (R:US)
PHENIX; 2-dimensional diffusion burnup refueling history (CDC6600; FORTRAN IV), 8:20408 (R:US)
PHROG; multi-group constant and fast spectra calculations (IBM360; FORTRAN IV), 8:20543 (R:US)
PL-MOD; fault tree analysis by modularization (IBM370,303x; PL/I), 8:22857 (R:US)
PLOT-3D; 3-dimensional plots on IBM2280 or CalComp780 (IBM360/75 with an IBM2280 film recorder or a CalComp 780 plotter; FORTRAN IV), 8:20666 (R:US)
PMS1; fast neutron polarization experiment (IBM360; FORTRAN IV(H) and BAL), 8:22500 (R:US)
PORTABLE LISP; a list-processing interpreter (CDC7600; PASCAL), 8:22844 (R:US)
POWERCO; nuclear station electricity costs (CDC6600; FORTRAN IV), 8:20471 (R:US)
PREP;KITT; system fault tree evaluation codes (IBM360;UNIVAC1108; FORTRAN IV), 8:20664 (R:US)
PSA2; stress analysis multianchor pipe system (IBM360,370; FORTRAN IV (H)), 8:20571 (R:US)
PSEUDO; statistical resonance parameter calculations (UNIVAC1108;IBM360; FORTRAN IV), 8:22450 (R:US)
PTAC11; 2-pass assembler for the PDP-11 on 360 (IBM360/75; PL/I), 8:22840 (R:US)
PWCOST; reactor fuel cycle cost calculation (UNIVAC1108; FORTRAN IV), 8:20473 (R:US)
TDOWN; spatial & composition-dependent cross sections (GE635; FORTRAN IV), 8:20541 (R:US)

Q Codes

QLEVEL; potential bound & quasibound levels (IBM370,303x; FORTRAN IV), 8:22866 (R:US)
QLN1; quantitative gamma-ray spectra analysis (UNIVAC1108,1100; FORTRAN V), 8:21567 (R:US)
QX1; quasistatic spatial reactor kinetics code (IBM360/75; FORTRAN IV), 8:20533 (R:US)

R Codes

CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
EPOCH; neutron age calculation of ENDF/B data (CDC6600; FORTRAN IV), 8:20321 (R:US)
GRAMP; r-m parameters of unresolved resonances (CDC6600; FORTRAN IV), 8:22387 (R:US)
HEATING5;HEATING3; 1,2, or 3-dimensional heat conduction program (IBM360,303x;CDC CYBER73;CDC7600; FORTRAN IV (95%) and Assembly language (5%) (HEATING5), FORTRAN IV (HEATING3)), 8:21414 (R:US)
INVERSE KINETICS;r102; space-independent inverse kinetics calculations (IBM360; FORTRAN IV), 8:20495 (R:US)
R101; space-independent kinetics kex options (IBM360; FORTRAN IV), 8:20500 (R:US)
RAFFLE; first flight collision probabilities for multiple-cell geometries (IBM360,370/195; FORTRAN IV and BAL), 8:20517 (R:US)
RAMP1; Reich-Moore resolved region cross-sections (CDC6600; FORTRAN IV), 8:22503 (R:US)
RAPFU; fuel cycle parameters for fast breeders (GE635; FORTRAN IV), 8:20407 (R:US)
RAPP; high-velocity flow study of steam-water mixtures (CDC6600; FORTRAN IV), 8:21409 (R:US)
RAS; reliability analysis for phased missions (CDC CYBER176;CDC7600,6600; FORTRAN IV (96%) and COMPASS (4%)), 8:20669 (R:US)
RAUMZEIT; one-dimensional time-dependent diffusion calculations (CDC6600; FORTRAN IV), 8:22464 (R:US)
REAX; resolved resonance epithermal cros sectionss (GE635; FORTRAN IV), 8:20598 (R:US)
REDUX; reactor fluctuation experiment analysis (CDC6600; FORTRAN IV), 8:20523 (R:US)
REFCO8; discounted cash flow fuel cycle cost (IBM360,370; FORTRAN IV), 8:20476 (R:US)
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)
RELAP5/MOD1/018; LWR loss of coolant analysis (CDC CYBER176;CDC7600; FORTRAN IV (90%) and COMPASS (10%)), 8:20673 (R:US)
RELO2; failure probability calculation by Monte Carlo (CDC6600,7600; FORTRAN IV), 8:21436 (R:US)
RELOAD FEVER; one-dimensional, few-group diffusion depletion (CDC CYBER73,175; FORTRAN IV), 8:20467 (R:US)
REPP; thermal-hydraulic water reactor design (UNIVAC1108; FORTRAN V), 8:20322 (R:US)
RESEND;ADLER; ENDF/B resonance cross section codes (CDC6600;PDP10; FORTRAN IV), 8:20529 (R:US)
RESQ2;RESQ0;DBFL; resonance integral for a hexagonal cell (CDC6600; FORTRAN IV (98%) and ASCENT (2%)), 8:20601 (R:US)
RETRAN-02: a program for transient thermal-hydraulic analysis of complex fluid-flow systems. Volume 4. Applications (PWR;BWR), 8:20689 (R:US)
RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)

RIO; power plant reliability characteristics (CDC7600,CYBER175; FORTRAN IV (86%) and COMPASS (14%)), 8:20675 (R:US)
ROPE; finding roots of a polynomial (CDC6600; FORTRAN IV), 8:22832 (R:US)
RSAC; radiological safety analysis program (IBM360; FORTRAN IV and Assembly language), 8:20652 (R:US)
SYN; 2-dimensional synthesis multigroup diffusion and 1-group depletion (GE635; FORTRAN IV and GMAP), 8:20411 (R:US)
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)

S Codes

APRFX1; 99-group DLC-2B library group-collapsing (CDC6600; FORTRAN IV), 8:20530 (R:US)
CAGE;BIRD;SPEC; time-of-flight data analysis (UNIVAC1108; FORTRAN V), 8:22501 (R:US)
CRECT;CHECKER;RIGEL;PLOTFB; LISTFC;DICTION;SLAVE3;DAMMET ENDF/B V2 processing codes (CDC6600;IBM360; FORTRAN IV), 8:22349 (R:US)
EFOM 12C software: general overview. Final report, 8:22876 (R:US)
Interactive control charts using SAS82, 8:22879 (R:US)
KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)
MOD5; stochastic model of neutron slowing-down (IBM360; FORTRAN IV), 8:22502 (R:US)
NOISY1; auto- and cross-spectral densities (UNIVAC1108; FORTRAN V), 8:20536 (R:US)
RESEND;ADLER; ENDF/B resonance cross section codes (CDC6600;PDP10; FORTRAN IV), 8:20529 (R:US)
RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)
SABOR4; discrete-element analysis of thin shells (IBM360; FORTRAN IV), 8:21323 (R:US)
SAFE; fail-to-safe analysis of protective networks (UNIVAC1106,1100; FORTRAN IV, ASCII FORTRAN (FTN) compiler), 8:20670 (R:US)
SAFE-2D; plane & axisymmetric stress analysis (UNIVAC1108; FORTRAN IV), 8:21320 (R:US)
SAFE-3D; three-dimensional composite structure stress study (UNIVAC1108;IBM360; FORTRAN IV (UNIVAC1108), FORTRAN IV and BAL (IBM360)), 8:21314 (R:US)
SAFE-AXISYM; stress analysis of axisymmetric load (CDC CYBER73;CDC7600; FORTRAN IV), 8:21307 (R:US)
SAFE-CRACK; viscoelastic analysis of concrete (UNIVAC1108; FORTRAN V), 8:21434 (R:US)
SAFE-CREEP; viscoelastic analysis of concrete (UNIVAC1108; FORTRAN IV), 8:21151 (R:US)
SAFE-PLANE; plane stress analysis, two-dimensional bodies (UNIVAC1108;CDC6600; FORTRAN IV), 8:21308 (R:US)
SAFE-SHELL; stress analysis of thin shells (UNIVAC1108;CDC CYBER73;CDC7600; FORTRAN IV), 8:21309 (R:US)
SALE; analytical chemistry quality control (IBM360,3033; FORTRAN IV (97%) and Assembly language (3%)), 8:21192 (R:US)
SALE2D; general transient fluid flow algorithm (CDC7600,CYBER175; FORTRAN IV), 8:21418 (R:US)
SAMPLE; Monte Carlo uncertainty analysis code (IBM360,370,303x; FORTRAN IV), 8:22851 (R:US)
SANDIA-ORIGEN; isotope generation & depletion (CDC7600,6600,6400; FORTRAN IV (FTN4.6(439) FORTRAN compiler, optimization level 2)), 8:19901 (R:US)
SAS1A; fast reactor power and flow transients (CDC6600;IBM360/75; FORTRAN IV), 8:20519 (R:US)
SATDSK; saturated iron magnetic field study (IBM360,370,303x; FORTRAN IV (89%) and Assembly language (11%)), 8:21483 (R:US)
SCAP; point kernel single or albedo scatter (CDC7600,CYBER175; FORTRAN (99%) and COMPASS (1%)), 8:22515 (R:US)
SCORE-EVET; three-dimensional hydraulic reactor core analysis (CDC7600,CYBER175; FORTRAN IV), 8:20610 (R:US)
SCORE3; SCISRS ENDF/B graphic cross section evaluation (IBM360; FORTRAN IV and BAL), 8:22473 (R:US)
SEALSHELL2;M0110; shell stress analysis for axisymmetric loading (CDC6600,7600;IBM360; FORTRAN IV), 8:21310 (R:US)
SHAFT79; two-phase geothermal reservoir model (CDC7600; FORTRAN IV), 8:20172 (R:US)
SHELL5; thin shell 3-dimensional structural analysis (UNIVAC1108; FORTRAN V), 8:21435 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
SIGPLOT; resolved multilevel Briet-Wigner cross section calculations (CDC6600; FORTRAN IV), 8:22475 (R:US)
SIZZLE; one-dimensional multigroup diffusion depletion (IBM360; FORTRAN IV), 8:22426 (R:US)
SNEQ; nonlinear algebraic equation solutions and curve plotting (CDC6600; FORTRAN IV and ASCENT), 8:22827 (R:US)
SOCOOL2; sodium-fuel interaction analysis (IBM360;UNIVAC1108; FORTRAN IV), 8:20661 (R:US)
SOLA-LOOP; two-phase flow network analysis (CDC7600,6600; FORTRAN IV), 8:21416 (R:US)
SOLA-VOF; transient fluid flow free boundaries (CDC7600,CYBER175; FORTRAN FTN5 compiler), 8:21420 (R:US)
SOLCEL2; simulation of photovoltaic systems (CDC6600,7600,CYBER175; SOLCEL2 is written primarily in ANSI FORTRAN.), 8:20031 (R:US)
SOLCOST3.0; solar heating & cooling design (CDC CYBER172,175; FORTRAN IV), 8:20081 (R:US)
SOR3; stress analysis of shells of revolution (CDC6600; FORTRAN IV), 8:21306 (R:US)
SORSDB; pressure vessel stress and fatigue (CDC6600; FORTRAN IV), 8:20567 (R:US)
SPAN4; a point-kernel shield evaluation code (CDC6600; FORTRAN IV and ASCENT), 8:22499 (R:US)
SPIRT; stress-strains from transient pressures (CDC CYBER76,175; FORTRAN IV), 8:20674 (R:US)
STEAM-67; 1967 ASME steam and water properties (IBM360,370,303x; FORTRAN IV), 8:21227 (R:US)
STEM; matrix generation for a system of beams (CDC6600; FORTRAN IV), 8:21315 (R:US)
STINT3; single-channel space-time synthesis (CDC6600; FORTRAN IV), 8:22481 (R:US)
STRAP; static & dynamic structural analysis (IBM360; FORTRAN IV), 8:21438 (R:US)
SUBDOSA; external dose airborne radionuclides (UNIVAC1100; FORTRAN), 8:21942 (R:US)
SUMOR;m0271; s-wave neutron cross section calculation (CDC6600; FORTRAN IV), 8:22483 (R:US)
SUPERENERGY2; steady-state LMFBR core analysis (CDC7600,CYBER175; FORTRAN IV), 8:20415 (R:US)
SUPERTOG; ENDF/B fine-group constants generation (IBM360; FORTRAN IV (ANSI FORTRAN)), 8:22492 (R:US)
SURGTANK; reactor steam surge tank dynamics (IBM360,370; FORTRAN IV), 8:20572 (R:US)
SWAAM1; LMFBR sodium-water reaction analysis (IBM370,3033; FORTRAN IV), 8:20414 (R:US)
TEMPEST2; thermal neutron spectrum cross sections (IBM360; FORTRAN IV), 8:22424 (R:US)
TROUT; mug multigroup cross section library maintenance (GE635;UNIVAC1108; FORTRAN IV), 8:20538 (R:US)
User's guide to SOLREL: a simulation of reliability and availability of photovoltaic systems, 8:20047 (R:US)
Users' manual for SNAP/D: seismic network assessment program for detection. Final report, 8:22036 (R:US)

T Codes

ENDF/B-THERMOS; 30-group ENDF/B scattering kernels (Auxiliary program written in FORTRAN IV), 8:22506 (R:US)
ENDRUN2; multigroup constants from ENDF/B data (GE635; FORTRAN IV), 8:20412 (R:US)
ETOT2; thermal libraries from ENDF/B data (CDC7600; FORTRAN IV), 8:20542 (R:US)

INSCAT; inelastic scattering method (CDC7600,CYBER175; FORTRAN IV), 8:22337 (R:US)
SYN; 2-dimensional synthesis multigroup diffusion and 1-group depletion (GE635; FORTRAN IV and GMAP), 8:20411 (R:US)
TAC2D; steady-state and transient temperature calculations (UNIVAC1108;IBM360,370,303x; FORTRAN V (UNIVAC1108), FORTRAN IV (IBM360)), 8:21410 (R:US)
TAC3D; transient three-dimensional heat transfer program (UNIVAC1108; FORTRAN V), 8:21411 (R:US)
TACASI; analysis of resonance measurements (UNIVAC1108; FORTRAN IV), 8:22487 (R:US)
TDELAY; scattering phase shifts & time delays (IBM370,303x;CDC7600,CYBER175; FORTRAN IV), 8:22336 (R:US)
TDIST3; community energy consumption analysis (IBM370; FORTRAN IV (G-level compiler)), 8:20963 (R:US)
TDOWN; spatial & composition-dependent cross sections (GE635; FORTRAN IV), 8:20541 (R:US)
TEMCO7; temperature coefficient calculation (UNIVAC1108; FORTRAN IV), 8:22456 (R:US)
TERZAGI; isothermal fluid flow & subsidence (CDC7600,CYBER175; FORTRAN IV), 8:20173 (R:US)
THERPP; thermodynamic properties hydrocarbons (CDC7600;IBM360,370,303x; FORTRAN IV), 8:21153 (R:US)
THETA1B; fuel rod thermal response loss of coolant accidents (IBM360/75; FORTRAN IV), 8:20323 (R:US)
THREDES; one-dimensional few group diffusion design system (IBM360; FORTRAN IV), 8:20501 (R:US)
THRES2; statistical model reaction cross-sections (CDC6600;IBM360; FORTRAN IV), 8:22355 (R:US)
TIDY-J; Fortran source code editing processor (IBM360,370,303x; FORTRAN IV), 8:22856 (R:US)
TIDY3;TIDY4; utility to edit fortran source programs (CDC CYBER74,175;UNIVAC1100; FORTRAN IV (TIDY3), FORTRAN ASCII (98%), Meta-Assembler (1%), and Assembler (1%) (TIDY4)), 8:22845 (R:US)
TIGIR2; modular document information system (CDC6600; FORTRAN and ASCENT), 8:22889 (R:US)
TOAD; processing of analyzer gamma-ray spectra (UNIVAC1108; FORTRAN IV and Assembly language), 8:22348 (R:US)
TOPS; transient thermodynamics of pressurizers (CDC6600; FORTRAN IV), 8:21317 (R:US)
TOR; thermal scattering for crystalline materials (CDC6600; FORTRAN IV), 8:22546 (R:US)
TRIFIDO; pulsed neutron source data analysis (IBM360; FORTRAN IV), 8:20633 (R:AR)
TROUT; mug multigroup cross section library maintenance (GE635;UNIVAC1108; FORTRAN IV), 8:20538 (R:US)
TSN; spatially-dependent reactor kinetics (IBM360; FORTRAN IV), 8:20508 (R:US)
TSOAK-M1; analysis of fusion detritiation data (IBM370,303x; FORTRAN IV), 8:22687 (R:US)
TUBE; u-tube heat exchanger stress analysis (CDC6600; FORTRAN IV), 8:21319 (R:US)
TWIGL;TWIGGLE; two-dimensional, two-group space-time diffusion feedback (CDC6600;IBM360; FORTRAN IV), 8:22458 (R:US)
TWOTRAN2; two-dimensional, multigroup transport in xy, rz, and r theta geometries (CDC7600,6600;IBM360/195; FORTRAN IV), 8:22466 (R:US)

U Codes
UPD; source deck maintenance utility routine (IBM360,370,303x;Amdahl470; FORTRAN IV (64%) and BAL (36%)), 8:22847 (R:US)
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)
UT200; DEC emulation of CDC 200 user terminal (DEC PDP-11; PAL PDP-11 assembly language), 8:22863 (R:US)

V Codes
VARI-QUIR; time-dependent, two-dimensional, multigroup diffusion (CDC6600;IBM360; FORTRAN IV), 8:22433 (R:US)
VELVET2; turbulent flow in LMFBR rod bundle (GE635; FORTRAN IV), 8:20409 (R:US)
VENUS2; 2-dimensional coupled neutronics-hydrodynamics (IBM360,370,303x;CDC7600; FORTRAN IV(H)), 8:20659 (R:US)
VIM1;VIM1X; Monte Carlo critical assembly analysis (CDC7600;IBM360; FORTRAN IV (CDC7600), FORTRAN IV and BAL (IBM360)), 8:20634 (R:US)
VMCON; nonlinearly constrained optimization (IBM370,303x; FORTRAN IV), 8:22865 (R:US)
VMOMS - A computer code for finding moment solutions to the Grad-Shafranov equation, 8:22661 (J:NL)
VUGRAPH; plots presentation-quality viewgraphs (HP9825A; HPL), 8:22854 (R:US)

W Codes
WAMPUM; fuel cycle costs performance study (CDC6600; FORTRAN IV), 8:20468 (R:US)
WASP2; water properties for safety analysis (CDC6600,7600; FORTRAN IV), 8:21152 (R:US)
WATER; steam tables at 14.5-14,500 psia and 32-472°F (CDC6600; FORTRAN IV), 8:21149 (R:US)
WECS; wind energy value to electric utilities (CDC7600,CYBER175; FORTRAN IV), 8:20206 (R:US)
WELBORE; transient wellbore fluid flow model (CDC7600,CYBER175; FORTRAN IV), 8:20174 (R:US)
WELWING; material buckling cylindrical fuel elements (IBM360; FORTRAN IV), 8:20603 (R:US)
WHAM6; liquid-filled piping system analysis (IBM360,370;CDC6600,7600; FORTRAN IV and BAL (IBM360), FORTRAN IV (CDC7600)), 8:20562 (R:US)
WHIP1; structural deflection due to blowdown (CDC6600,7600; FORTRAN IV), 8:21330 (R:US)
WIGL2; one-dimensional, two-group space-time diffusion (CDC6600;UNIVAC1108;IBM370; FORTRAN IV), 8:22443 (R:US)

X Codes
KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)
RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)

Y Codes
KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)
Users manual for YIELD: timber-yield forecasting and planning tool, Version 1.2, 8:21932 (R:US)

Z Codes
APRFX1; 99-group DLC-2B library group-collapsing (CDC6600; FORTRAN IV), 8:20530 (R:US)

COMPUTER GRAPHICS
BL47; drafting tool to plot plane structures (CDC6600; FORTRAN IV), 8:21318 (R:US)
DATATRAN2 RAD1 Geometry Modules; radial geometry modules for two-dimensional imput (CDC6600,7600; FORTRAN (90), COMPASS (5), DATATRAN2 (5)), 8:21325 (R:US)
FIGS; IBM360 and 2250 FORTRAN graphics subroutines (IBM360; FORTRAN IV and BAL), 8:22836 (R:US)
FLOCHT; computer drawn flow charts & diagrams (DEC PDP10 with IBM360,370 or 303x; FORTRAN IV (99%), Assembly language (1%)), 8:22870 (R:US)
GENED ENVIRONMENTAL ROUTINES; subroutine library (GE635; FORTRAN IV and GMAP), 8:22839 (R:US)
GRAIL; a device-independent graphics language (CDC6600,7600; FORTRAN IV (81%) and COMPASS (19%)), 8:22860 (R:US)
GWCORE; GSPC 79 core graphics routines package (DEC VAX11/780; The device-independent part of GWCORE is written solely in VAX11/780 FORTRAN IV-Plus. There is very limited use of FORTRAN 77 IF-THEN-ELSE control structures and CHARACTER data types. The Tektronix 4012 driver is written in FORTRAN. The Ramtek 9400 driver is written in C.), 8:22858 (R:US)
KAPLPLOT; KAPL CalComp plotting routines (CDC6600; FORTRAN IV and ASCENT), 8:22837 (R:US)

MAPPER; report-quality graphics on command (IBM360,370;DEC10; FORTRAN IV), 8:22869 (R:US)
PLOT-3D; 3-dimensional plots on IBM2280 or CalComp780 (IBM360/75 with an IBM2280 film recorder or a CalComp 780 plotter; FORTRAN IV), 8:20666 (R:US)
VUGRAPH; plots presentation-quality viewgraphs (HP9825A; HPL), 8:22854 (R:US)
Computer Codes
Interactive control charts using SAS82, 8:22879 (R:US)
COMPUTER LANGUAGES

COMPUTER PROGRAMS
See COMPUTER CODES
COMPUTERS
See also MICROPROCESSORS
Procurement
PAMA; preferred acquisition method analysis (CDC6600; COBOL), 8:22849 (R:US)
Reliability
Description of criteria and testing methods for the hardware and software of microcomputer systems in applications relating to the safeguarding of systems in accordance with safety regulations, 8:22884 (TG:GB)
Research Programs
Report for 1979-1980, 1980-1981 of the Division of Engineering and Applied Science at the California Institute of Technology (California Institute of Technology), 8:21303 (R:US)
Testing
Description of criteria and testing methods for the hardware and software of microcomputer systems in applications relating to the safeguarding of systems in accordance with safety regulations, 8:22884 (TG:GB)
CONCENTRATING COLLECTORS
Design
PKI collector, 8:20122 (RA:US)
Field Tests
PKI solar thermal plant evaluation at Capitol Concrete Products, Topeka, Kansas, 8:20089 (RA:US)
Fresnel Reflectors
PKI collector, 8:20122 (RA:US)
Manufacturing
PKI collector, 8:20122 (RA:US)
Performance
Development of a consensus standard for determining thermal performance of high-concentration-ratio solar collectors, 8:20135 (R:US)
Performance Testing
Verification testing of the PKI collector at Sandia National Laboratories, Albuquerque, New Mexico, 8:20124 (RA:US)
CONCENTRATIONS (RADIONUCLIDES)
See RADIOACTIVITY
CONCENTRATOR SOLAR CELLS
Prior to July, 1979 SOLAR CELLS or specific solar cells descriptors and SOLAR CONCENTRATORS were used to index this concept.
Economics
PV concentrator array power costs, 8:20046 (R:US)
CONCRETES
Dimensions, Volume 65, Number 3, 8:20131 (R:US)
Creep
SAFE-CRACK; viscoelastic analysis of concrete (UNIVAC1108; FORTRAN V), 8:21434 (R:US)
Damage
Air-pollution damage to man-made materials: physical and economic estimates. Final report, 8:20773 (R:US)
Elasticity
SAFE-CRACK; viscoelastic analysis of concrete (UNIVAC1108; FORTRAN V), 8:21434 (R:US)
SAFE-CREEP; viscoelastic analysis of concrete (UNIVAC1108; FORTRAN IV), 8:21151 (R:US)
Neutron Transport
Sensitivity study of neutron transport through standard and rebar concrete, 8:22529 (J:US)
Penetration Depth
Computer simulation of concrete penetration by shaped-charge jets, 8:21656 (R:US)
CONDENSATION NUCLEI
Aerosol Monitoring
Analysis of continuous flow condensation nuclei counters, 8:21786 (BA:DE)
Determination of condensation nuclei using a modified Aitken method, 8:21785 (BA:DE:In German)
CONDENSED AROMATICS

Operation of wastewater treatment PDU and PTPA 643 cooling tower simulation, 8:19471 (RA:US)
COPOLYMERS
Radiolysis
Poly(aryl ethers) and related polysiloxane copolymer molecular coatings: preparation and radiation degradation. Final report, 8:21284 (R:US)
COPPER
Catalytic Effects
Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
Charged-Particle Transport
Calorimetric measurement of electron stopping power of aluminum and copper between 11 and 127 keV, 8:22524 (J:US)
Low-temperature measurements of the fraction of re-emitted positronium from a Cu(111)+S surface, 8:22534 (J:GB)
Creep
Mechanisms of damage accumulation in time-dependent cyclic deformation. Progress report, January 1, 1982-December 31, 1982, 8:21068 (R:US)
Electronic Structure
Magnetic and electronic properties of Ni films, surfaces, and interfaces, 8:21095 (J:US)
Energy Beam Deposition Films
Ion beam sputter deposited diamond like films, 8:21163 (R:US)
Erosion
Deformation of microstructures due to low-velocity particulate erosion of ductile metals by spherical particles, 8:21072 (R:US)
Fatigue
Mechanisms of damage accumulation in time-dependent cyclic deformation. Progress report, January 1, 1982-December 31, 1982, 8:21068 (R:US)
Magnetic Properties
Magnetic and electronic properties of Ni films, surfaces, and interfaces, 8:21095 (J:US)
Materials Recovery
Introduction of sulfur into copper converter slags to produce copper matte. Report of investigations/1982, 8:20986 (R:US)
Specific Heat
H-Division quarterly report, July-September 1982, 8:22564 (R:US)
Superconductivity
Superconductivity in artificial Nb/Cu heterostructures, 8:21052 (R:US)
COPPER ALLOYS
See also COPPER BASE ALLOYS
MONEL
Physical Radiation Effects
Fusion-neutron effects on magnetoresistivity of copper stabilizer materials, 8:22744 (R:US)
Modifications of subsurface alloy composition during high-temperature sputtering, 8:21043 (R:US)
COPPER BASE ALLOYS
See also BRASS
Erosion
Deformation of microstructures due to low-velocity particulate erosion of ductile metals by spherical particles, 8:21072 (R:US)
Physical Radiation Effects
Ordered alloys reveal fundamental mechanisms of neutron-damage production (Ni_3Mn; Cu_3Au), 8:21046 (R:US)
COPPER CHLORIDES
Crystal Growth
Potential for high temperature superconductivity. Final report Apr 80-Oct 81, 8:21148 (R:US)
Magnetic Properties
Potential for high temperature superconductivity. Final report Apr 80-Oct 81, 8:21148 (R:US)
Superconductivity
Potential for high temperature superconductivity. Final report Apr 80-Oct 81, 8:21148 (R:US)
COPPER IONS
E1-Transitions
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
Oscillator Strengths
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
COPPER NITRATES
Chemical Reactions
Reaction between alcohol and nitric acid in the presence of metal nitrates, 8:21247 (TJ:DE:GE)
COPPER SULFIDE SOLAR CELLS
Production
Development of a process for an inexpensive production of thin film solar cells on an industrial scale. Final report, Jul. 1980, 8:19982 (R:DE:In several languages)
CORE CATCHERS
Combination pipe-rupture mitigator and in-vessel core catcher (Patent; LMFBR), 8:20445 (P:US)
CORES (REACTOR)
See REACTOR CORES
CORN STOVER
See AGRICULTURAL WASTES
CORONA (SOLAR)
See SOLAR CORONA
CORRELATION FUNCTIONS
Least Square Fit
ANGCOR; directional correlation coefficients (CDC6600,7600; FORTRAN IV), 8:22514 (R:US)
CORROSION
Meetings
Proceedings: support-structure corrosion in steam generators, 8:20356 (R:US)
CORROSION RESISTANT ALLOYS

Optical diagnostics for diesel-engine applications, 8:21011 (R:US)
Exhaust Gases
Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels, 8:21762 (R:US)
Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels. Final report Jun 80-Oct 81, 8:21763 (R:US)
Fuel economy and exhaust emissions characteristics of a diesel vehicle: results of the prototype Volkswagen 1.5-liter turbocharged rabbit tests. Final report, 8:21015 (R:US)
Identification of mutagenic compounds in extracts of diesel exhaust particulates. Paper 81.56.1, 8:19738 (J:US)
Potential health risks from increased use of diesel light duty vehicles, 8:22019 (BA:US)
Fuel Consumption
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R:US)
Fuel Economy
Fuel economy and exhaust emissions characteristics of a diesel vehicle: results of the prototype Volkswagen 1.5-liter turbocharged rabbit tests. Final report, 8:21015 (R:US)
Fuel Substitution
Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels, 8:21762 (R:US)
Characterization of diesel emissions from operation of a light-duty diesel vehicle on alternate source diesel fuels. Final report Jun 80-Oct 81, 8:21763 (R:US)
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)
Noise Pollution Abatement
Noise reduction retrofit for a 'new look' GMC transit bus: service bulletin. Final report Apr 80-Nov 81, 8:21020 (R:US)

Performance
Status of alcohol fuels utilization technology for highway transportation: a 1981 perspective. Volume II. Compression-ignition engines, 8:21012 (R:US)
Superchargers
Turbocharging of small internal combustion engine as a means of improving engine/application system fuel economy-further turbocharger improvements. Final report Oct 80-Feb 82, 8:21009 (R:US)
DIESEL FUELS
Combustion Products
Identification of mutagenic compounds in extracts of diesel exhaust particulates. Paper 81.56.1, 8:19738 (J:US)
Potential health risks from increased use of diesel light duty vehicles, 8:22019 (BA:US)
Prices
Monthly petroleum-product price report, 8:19697 (R:US)
Monthly petroleum-product price report (January 1981 through June 1982), 8:19696 (R:US)
Monthly petroleum product price report (January 1981-March 1982), 8:19694 (R:US)
Monthly petroleum product price report (January 1981-May 1982), 8:19695 (R:US)
Monthly petroleum product price report (January 1981-February 1982), 8:19693 (R:US)
Monthly petroleum product price report (January 1981-January 1982), 8:19692 (R:US)
Production
Production of liquid fuels out of plant biomass and refuse: Methods, cost, potential, 8:20003 (R:US:MIXED)
Yields
Catalyst and reactor development for a liquid-phase Fischer-Tropsch process. Quarterly technical progress report, 1 July 1982-30 September 1982, 8:19933 (R:US)
DIESEL OIL (FRACTION)
See DIESEL FUELS
DIET
Radioactivity
Cesium-137 in various Chicago foods: (collection month, April 1982), 8:21836 (RA:US)
DIFFERENTIAL EQUATIONS
See also NEUTRON DIFFUSION EQUATION
PARTIAL DIFFERENTIAL EQUATIONS
Numerical Solution
A_0-stable formulas of Adams type, 8:22882 (J:US)
FORSIM; solution of partial or ordinary differential equations (CDC6600; FORTRAN Extended), 8:22838 (R:US)
LIZARD4; nonlinear differential equations solution (CDC6600; FORTRAN IV and ASCENT), 8:22833 (R:US)
DIFFRACTION (NEUTRON)
See NEUTRON DIFFRACTION
DIFFUSE SOLAR RADIATION
Mathematical Models
Beer's-law-based, simple spectral model for direct normal and diffuse horizontal irradiance, 8:19970 (R:US)
Spectra
Studies on parameterization of global, diffuse and direct solar radiation, 8:19967 (R:XE)
DIFFUSERS
Fluid Flow
Flow-field development in MHD diffusers, 8:20872 (R:US)
DIGITIZERS
Electron Scanning
Fast transient digitizer (Patent), 8:21448 (P:US)
DIMETHYL KETONE
See ACETONE
DIMETHYLBENZENES
See XYLENES
2,2-DIMETHYLPROPANE
See 2-2-DIMETHYLPROPANE
2-2-DIMETHYLPROPANE
Desorption
Chip desorption and pore-structure effects in methane release from coal. Final report, 8:19764 (R:US)
DINING HALLS
See RESTAURANTS
DIODE TUBES
Breakdown
Field shaping to improve vacuum-diode voltage holdoff, 8:21443 (R:US)
Electric Fields
Field shaping to improve vacuum-diode voltage holdoff, 8:21443 (R:US)
DIOLS
See GLYCOLS
DIPOLES
Design
In-field processing and magnetotellurics with the EM-60 electromagnetic system, 8:20156 (RA:US)
DIRAC MONOPOLES
See MAGNETIC MONOPOLES
DIRECT SOLAR RADIATION
Mathematical Models
Beer's-law-based, simple spectral model for direct normal and diffuse horizontal irradiance, 8:19970 (R:US)
Spectra
Studies on parameterization of global, diffuse and direct solar radiation, 8:19967 (R:XE)
DISCHARGING (REACTOR)
See REACTOR FUELING
DISINFECTANTS
Comparative Evaluations
UV disinfection for onsite sand filter effluent, 8:21884 (R:US)
DISINTEGRATION (NUCLEAR)
See DECAY
DISKS (MAGNETIC)
See MAGNETIC DISKS
DISLOCATIONS
Energy
Energy and entropy of interacting dislocations, 8:22550 (J:US)
Entropy
Energy and entropy of interacting dislocations, 8:22550 (J:US)
Interactions
Energy and entropy of interacting dislocations, 8:22550 (J:US)
DISPLACEMENT GAGES
Performance Testing
Rod-type extensometers in long-term elevated temperature service, 8:19850 (RA:US)
Temperature Effects
Rod-type extensometers in long-term elevated temperature service, 8:19850 (RA:US)
DISPLAY DEVICES
VUGRAPH; plots presentation-quality viewgraphs (HP9825A; HPL), 8:22854 (R:US)
Cathode Ray Tubes
Predictor display concepts for use in nuclear-plant control, 8:20620 (R:US)
Specifications
Predictor display concepts for use in nuclear-plant control, 8:20620 (R:US)
DISSOLVED OXYGEN
See OXYGEN
DISSOLVERS
Criticality
Criticality safety of the ten-well insert for the pot dissolver, 8:21365 (J:US)
Criticality analysis of the ICPP zirconium dissolver using MONK, 8:21366 (J:US)
DISTILLATE FUEL
See HEATING OILS
DISTILLATE FUEL OIL
See HEATING OILS
DISTRIBUTED COLLECTOR POWER PLANTS
Demonstration Plants
Construction of a 100 kW solar thermal-electric experimental plant, 8:20054 (R:FR)
Experiment Planning
Small community solar thermal power experiment, 8:20057 (RA:US)
Meetings
Parabolic-dish solar-thermal power annual program review, 8:20056 (R:US)

Parabolic Dish Collectors
Configuration selection study for isolated loads using parabolic dish modules, 8:20067 (RA:US)
Parabolic-dish solar-thermal power annual program review, 8:20056 (R:US)
Rankine Cycle Power Systems
Organic Rankine power conversion subsystem development for the small community solar thermal power system, 8:20059 (RA:US)
Research Programs
Development status of the small community solar power system, 8:20058 (RA:US)
Stirling Engines
Dish Stirling system integration and test progress report, 8:20063 (RA:US)
Testing
Development status of the small community solar power system, 8:20058 (RA:US)
DISTRIBUTION FUNCTIONS
Computer Graphics
PDFPLOT; statistical distribution functions (CDC CYBER76;CDC7600; FORTRAN IV (88%) and COMPASS (12%)), 8:22846 (R:US)
DISTRICT COOLING
Energy Analysis
DESA; district energy system cost energy model (IBM370,303x; FORTRAN IV), 8:20994 (R:US)
DISTRICT HEATING
See also GEOTHERMAL DISTRICT HEATING
Air Pollution
Urban air-quality impacts of district-heating development, 8:20996 (R:US)
Economic Analysis
District heating/cogenertion application studies for the Minneapolis-St. Paul area. Building conversion costs and economics for the St. Paul hot water district heating market, 8:21004 (R:US)
District heating/cogeneration application studies for the Minneapolis-St. Paul area. Market assessment and economic analysis of the St. Paul district heating system, 8:21005 (R:US)
Energy Analysis
DESA; district energy system cost energy model (IBM370,303x; FORTRAN IV), 8:20994 (R:US)
Feasibility Studies
District heating/cogeneration application studies for the Minneapolis-St. Paul area. Summary of Twin Cities case study and the St. Paul Project, 8:21003 (R:US)
Marketing Research
District heating/cogeneration application studies for the Minneapolis-St. Paul area. Market assessment and economic analysis of the St. Paul district heating system, 8:21005 (R:US)
Sensible Heat Storage
Seasonal thermal storage: Swedish practice, developments and cost projections, 8:20738 (R:US)
Waste Heat Utilization
Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)
DISTRICT OF COLUMBIA
See WASHINGTON DC
DIVERTORS
See also BUNDLE DIVERTORS
PDX DEVICES
POLOIDAL DIVERTORS
PDX mechanical divertor experiments, 8:22786 (BA:DE)
Design
Mechanical divertors design considerations, 8:22784 (BA:DE)
Heat Sinks
Materials selection for the US INTOR divertor collector plate, 8:22689 (R:US)
Research Programs
Overview of the U.S. programme on particle control and divertors, 8:22772 (BA:DE)
DNA
Encapsulation
DNA packaging in vitro by an isolated bacteriophage T7 procapsid, 8:21927 (J:US)
DOCUMENT RETRIEVAL
See INFORMATION RETRIEVAL
DODECANE
Molecular Weight
Enthalpy measurement of coal-derived liquids. Technical progress report, November 1982-January 1983, 8:19559 (R:US)
Surface Tension
Interfacial tension in systems involving TBP in dodecane, nitric acid, uranyl nitrate and water, 8:21231 (R:DE)
DOLOMITE
Sorptive Properties
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents, 8:20242 (R:US)
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents. Addendum. Compilation of sorbent performance data from atmospheric fluidized-bed combustors, 8:19626 (R:US)
DOPED MATERIALS
Electric Conductivity
Coherent medium approach to hopping conduction, 8:22556 (J:DE)
DORMITORIES
See RESIDENTIAL BUILDINGS
DOSE RATES
Corrections
Field measurement and interpretation of beta doses and dose rates, 8:21971 (R:US)
DOSEMETERS
See also ALBEDO-NEUTRON DOSEMETERS
CHEMICAL DOSEMETERS
COLORIMETRIC DOSEMETERS
RITAC DOSEMETERS
Performance Testing
Performance testing of beta dosimeters used at Department of Energy facilities, 8:21588 (R:US)
DOSIMETERS
See DOSEMETERS
DOSIMETRY
See also BETA DOSIMETRY
GAMMA DOSIMETRY
NEUTRON DOSIMETRY
PERSONNEL DOSIMETRY
THERMOLUMINESCENT DOSIMETRY
Depth Dose Distributions
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
Dose-Response Relationships
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
Research Programs
Radiation protection: progress report. 1981, 8:21967 (R:US)
Standardization
Report on standardization of radiation dosimetry, 8:22542 (R:US)
DOUBLE ENVELOPE BUILDINGS
Air Flow
Buoyancy-induced flow studies in thermally stratified loop of a double-envelope building, 8:20894 (R:US)
DOUBLE GLAZING
Performance Testing
Field correlation of performance standards for organically sealed sinsulating glass, 8:20933 (R:US)
Seals
Field correlation of performance standards for organically sealed sinsulating glass, 8:20933 (R:US)
DOUBLE SHELL HOUSES
See DOUBLE ENVELOPE BUILDINGS
DOUBLE WALL HOUSES
See DOUBLE ENVELOPE BUILDINGS
DOUBLET 3 DEVICES
See DOUBLET REACTORS

DOUBLET REACTORS
Armor
Infrared monitoring of the Doublet III beam armor plate, 8:22791 (J:US)
Impurities
Suppression of impurity influx, remote radiative cooling and helium ash compression with poloidal divertor in Doublet 3, 8:22734 (RA:SU)
Plasma Diagnostics
Dye laser fluorescence spectroscopy on the Doublet III tokamak, 8:22653 (J:NL)
Infrared monitoring of the Doublet III beam armor plate, 8:22791 (J:US)
Poloidal Divertors
Expanded boundary divertor experiments in Doublet III, 8:22774 (BA:DE)
Remote radiative cooling and helium ash exhaustion with single-null poloidal divertor in Doublet III, 8:22775 (BA:DE)
Suppression of impurity influx, remote radiative cooling and helium ash compression with poloidal divertor in Doublet 3, 8:22734 (RA:SU)
DRAGON REACTOR
Chemistry
Operating experience in HTR-type reactor chemistry, 8:20401 (RA:DE:In German)
DRESDEN-1 REACTOR
Reactor Licensing
Systematic evaluation program. Status summary report, 8:20452 (R:US)
DRESDEN-2 REACTOR
Primary Coolant Circuits
Oxygen suppression in boiling water reactors. Phase 2. Annual report 1981, December 2, 1980-December 31, 1981, 8:20326 (R:US)
Reactor Licensing
Systematic evaluation program. Status summary report, 8:20452 (R:US)
Reactor Materials
Oxygen suppression in boiling water reactors. Phase 2. Annual report 1981, December 2, 1980-December 31, 1981, 8:20326 (R:US)
DRIFT (PLASMA)
See PLASMA DRIFT
DRILL PIPES
Corrosion
Effects of oxygen, salt, and pH level on corrosion rate of drill-stem steel, 8:20183 (R:US)
DRILL SHIPS
See SHIPS
DRILLING FLUIDS
Limited to materials used in well drilling.
Environmental Impacts
Results of an adaptive environmental assessment modeling workshop concerning potential impacts of drilling muds and cuttings on the marine environment. Workshop summary, 8:19734 (R:US)
Temperature Distribution
Temperature profiles and aquifer mass transfer in a circulating well, 8:20185 (J:US)
DRILLING MUD
See DRILLING FLUIDS
DRINKING WATER
Radioactivity
Environmental surveillance of the Palos Park Forest Preserve, 8:19889 (R:US)
Radiochemical Analysis
Environmental surveillance of the Palos Park Forest Preserve, 8:19889 (R:US)
DRY SCRUBBERS
Cost
Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
Demonstration Programs
Current status of dry flue gas desulfurization systems, 8:20287 (RA:US)
Economic Analysis
Preliminary evaluation of the Avco-Ebara FGT process. Final report, 8:19589 (R:US)
Economics
Current status of dry flue gas desulfurization systems, 8:20287 (RA:US)
Manufacturers
Current status of dry flue gas desulfurization systems, 8:20287 (RA:US)
Technology Assessment
Preliminary evaluation of the Avco-Ebara FGT process. Final report, 8:19589 (R:US)
DRYERS
Heat Recovery
Recovery of heat from exhaust air of spray driers in the dairy industry. Summary report (final), 8:20976 (R:US)
Waste Heat Utilization
Substituting power plant waste heat for on-farm heat requirements. Final report, 8:20977 (R:US)
DRY-TYPE COOLING TOWERS
See CLOSED-CYCLE COOLING SYSTEMS
COOLING TOWERS
DUAL-PURPOSE POWER PLANTS
Financing
Assessment of electric-utility ownership and operation of industrial-cogeneration facilities. Final report, 8:20815 (R:US)
Operation
Assessment of electric-utility ownership and operation of industrial-cogeneration facilities. Final report, 8:20815 (R:US)
Ownership
Assessment of electric-utility ownership and operation of industrial-cogeneration facilities. Final report, 8:20815 (R:US)
DUCKS
Radionuclide Kinetics
Four-year declines in radiocesium concentrations of American coots inhabiting a nuclear reactor cooling reservoir, 8:21875 (J:GB)
DUSTS
Air Pollution Control
Measurement and control of respirable dust in mines. Final report, 8:19665 (R:US)
Control
Ten ways to reduce longwall dust, 8:19614 (J:US)
Deposition
Electrostatic technology for control of dust and hydrocarbon vapors in high power laser systems. Final report, 8:21374 (R:US)
Mutagen Screening
Mutagenicity of potential effluents from an experimental low Btu coal gasifier, 8:22018 (J:DE)
Samplers
Evaluation of coal mine dust personal sampler performance. Final report, 8:19663 (R:US)
Sampling
Coal mine dust personal sampler (CMDPS). Final report, 8:19660 (R:US)
DWARF STARS
X-Ray Spectra
Continuum and line spectra of degenerate dwarf x-ray sources, 8:22109 (R:US)
DYE LASERS
Fluorescence Spectroscopy
Dye laser fluorescence spectroscopy on the Doublet III tokamak, 8:22653 (J:NL)
DYES
See also PHTHALOCYANINES
Chemical Radiation Effects
Radiochromic waveguides for sensitive neutron and gamma dosimetry, 8:21603 (RA:US)
Mass Spectroscopy
Use of mass spectrometry in analysis of organic dyes and dye intermediates, 8:21203 (RA:CS)

DYMAC SYSTEM
See NUCLEAR MATERIALS MANAGEMENT
PLUTONIUM
DYNAMIC MATERIALS ACCOUNTABILITY SYSTEM
See NUCLEAR MATERIALS MANAGEMENT
PLUTONIUM
DYNAMICS
Many-Dimensional Calculations
Chaotic attractors of an infinite-dimensional dynamical system, 8:22574 (J:NL)
DYSPROSIUM 153
Energy Levels
Shape transitions at high spin, 8:22375 (R:US)
High Spin States
Shape transitions at high spin, 8:22375 (R:US)
Nuclear Deformation
Shape transitions at high spin, 8:22375 (R:US)
DYSPROSIUM 154
Energy Levels
Nuclear shape transitions and some properties of aligned-particle configurations at high spin, 8:22374 (R:US)
Shape transitions at high spin, 8:22375 (R:US)
High Spin States
Shape transitions at high spin, 8:22375 (R:US)
Nuclear Deformation
Nuclear shape transitions and some properties of aligned-particle configurations at high spin, 8:22374 (R:US)
Shape transitions at high spin, 8:22375 (R:US)
DYSPROSIUM 155
Rotational States
Study of ^{155}Dy levels excited in ^{155}Ho decay, 8:22380 (RA:CS:In Czech)
DYSPROSIUM 161
Moessbauer Effect
Magnetic hyperfine fields in Dy/sub 1-x/Y/sub x/Al$_2$, 8:21054 (R:US)
DYSPROSIUM 162
Rotational States
Study of the rotational side-bands in ^{162}Dy, 8:22381 (J:NL)
DYSPROSIUM 162 TARGET
Deuteron Reactions
Calculation of the ^{162}Dy(d,d') angular distribution at 12 MeV, 8:22376 (RA:CS:In Czech)
DYSPROSIUM ALLOYS
Domain Structure
Magnetic hyperfine fields in Dy/sub 1-x/Y/sub x/Al$_2$, 8:21054 (R:US)

E

EARTH ATMOSPHERE
See also IONOSPHERE
MAGNETOSPHERE
STRATOSPHERE
TROPOSPHERE
Carbon Monoxide
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Chemical Reaction Kinetics
Structure and analysis of models for atmospheric reaction kinetics, 8:21727 (RA:DE:In German)
Chlorine Oxides
Diurnal variations of short-lived trace substances, 8:21725 (RA:DE:In German)
Hydrogen
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Ion-Molecule Collisions
Laboratory measurements of kinetical and thermodynamical data of atmospheric ion-molecule collisions, 8:21733 (RA:DE:In German)
Lyman Lines
Investigation on atmospheric h and d through the measurement of their lyman-alpha emissions, 8:21682 (R:US)
Mathematical Models
Simulating CO$_2$-induced climatic change with mathematical climate models: capabilities, limitations and prospects, 8:21680 (RA:US)
Nitrogen Oxides
Diurnal variations of short-lived trace substances, 8:21725 (RA:DE:In German)
Field measurements of N$_2$O emission rates from fertilized and non-fertilized soils, 8:21723 (RA:DE:In German)
Nitrous Oxide
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Organic Chlorine Compounds
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Organic Fluorine Compounds
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Organic Nitrogen Compounds
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Ozone
Measurements of the vertical ozone content of the free atmosphere above 20 km height over the Mount Hohenpeissenberg, 8:21721 (RA:DE:In German)
Peroxy Radicals
Diurnal variations of short-lived trace substances, 8:21725 (RA:DE:In German)
Radionuclide Migration
A two step method to treat variable winds in fallout smearing codes. Master's thesis, 8:21794 (R:US)
Wave Propagation
Multiple-scattering corrections to the Beer-Lambert law, 8:22563 (R:US)
EARTH PENETRATORS
Performance
Development of an ice-penetration model, 8:21464 (R:US)
EARTH-COVERED BUILDINGS
Design
Operational results of National Solar Demonstration Projects, 8:20084 (R:US)
Performance
Operational results of National Solar Demonstration Projects, 8:20084 (R:US)
EARTHQUAKES
See also MICROEARTHQUAKES
Seismic Detection
A statistical discrimination experiment for eurasian events using a twenty-seven-station network. Technical report, 8:21673 (R:US)
Users' manual for SNAP/D: seismic network assessment program for detection. Final report, 8:22036 (R:US)
EASTERN EUROPE

GERMAN DEMOCRATIC REPUBLIC
POLAND
USSR
Maps
Maps: Poland, Eastern Europe: major power facilities, 8:21848 (R:US)
Power Plants
Maps: Poland, Eastern Europe: major power facilities, 8:21848 (R:US)
EBD
See ENERGY BEAM DEPOSITION
EBR-2 REACTOR
Performance
Seventeen years of LMFBR experience: Experimental Breeder Reactor II (EBR-II), 8:20418 (R:US)
Reactor Experimental Facilities
Experimental Breeder Reactor II (EBR-II) Fuel-Performance Test Facility (FPTF), 8:20636 (R:US)
Reactor Operation
Seventeen years of LMFBR experience: Experimental Breeder Reactor II (EBR-II), 8:20418 (R:US)
Superheaters
EBR-II superheater-disassembly observations, 8:20649 (J:US)

Post-service examination of the EBR-II superheater duplex tubes, 8:20731 (J:US)

ECCS
MUCHA1;MUCHA2; multiple channel analysis emergency core cooling (CDC6400; FORTRAN IV), 8:20658 (R:US)
Heat Transfer
Liquid transfer and entrainment correlation for droplet-annular flow (PWR; BWR), 8:20683 (R:US)
Hydraulics
Liquid transfer and entrainment correlation for droplet-annular flow (PWR; BWR), 8:20683 (R:US)

ECONOMIC DEVELOPMENT
Social Impact
Goals, processes, and indicators of development: a project description, 8:20774 (R:JP)

ECONOMIC POLICY
Cost Benefit Analysis
Energy-pricing policies and their implications: a case study for a planned economy, 8:20770 (R:US)
Planning
Energy company development patterns in the postembargo era. An overview of financial performance, 1974-1980. Volume 2, statistical tables, 8:20772 (R:US)

ECONOMICS
The belt-shaped screw-pinch reactor, 8:22742 (R:NL)

ECR HEATING
Experiments on hot-electron ECRH in the Tandem Mirror Experiment-Upgrade, 8:22633 (R:US)
Microwave Equipment
Improbability of a resonance breakdown in quasi-optical ECRH beam systems for the Magnetic Fusion Test Facility and other mirror systems, 8:22743 (R:US)
Wall Effects
Finite temperature and wall effects on the absorption of electron cyclotron waves in an EBT plasma, 8:22663 (J:US)

EDDY CURRENT TESTING
Results of EDF/Framatome underclad crack-detection methods. Final report (PWR), 8:20371 (R:US)

EDS LIQUEFACTION
See EXXON LIQUEFACTION PROCESS

EFD WIND GENERATORS
Design
Analysis of the potential of the electrofluid dynamic wind-driven generator, 8:20238 (R:US)
Testing
Analysis of the potential of the electrofluid dynamic wind-driven generator, 8:20238 (R:US)

EFFECTIVE RANGE THEORY
Study of effective interactions and models in nuclei using the moment method, 8:22414 (BA:US)
Spectral Functions
Application of spectral distributions in effective interaction theory, 8:22589 (BA:US)

EFFLUENTS (CHEMICAL)
See CHEMICAL EFFLUENTS

EFFLUENTS (GASEOUS)
See GASEOUS WASTES

EFFLUENTS (RADIOACTIVE)
See RADIOACTIVE EFFLUENTS

EFFLUENTS (THERMAL)
See THERMAL EFFLUENTS

EGYPTIAN ARAB REPUBLIC
Economic Policy
Energy-pricing policies and their implications: a case study for a planned economy, 8:20770 (R:US)
Energy Policy
Energy-pricing policies and their implications: a case study for a planned economy, 8:20770 (R:US)

EHF RADIATION
See MICROWAVE RADIATION

EHV AC SYSTEMS
345-765 kV.
Transformers
A simplified system for calibration of CCVTS in the substation. Final report, 8:20313 (R:US)
Analysis of the calibration of metering CCVTS in a utility substation. Final report, 8:20312 (R:US)

EIGENFREQUENCY
Quantum Mechanics
Semiclassical theory of intensities of vibrational fundamentals, overtones, and combination bands, 8:21238 (J:US)
Semiclassical Approximation
Semiclassical theory of intensities of vibrational fundamentals, overtones, and combination bands, 8:21238 (J:US)

EIGENSTATES
Phase Space
Criteria for quantum chaos, 8:21239 (J:US)
Semiclassical Approximation
Criteria for quantum chaos, 8:21239 (J:US)

EIGENVALUES
Solving sparse symmetric definite quadratic λ-matrix problems, 8:22888 (J:DK)
One-Dimensional Calculations
QLEVEL; potential bound & quasibound levels (IBM370,303x; FORTRAN IV), 8:22866 (R:US)

EIGENVECTORS
Numerical Solution
LASO; block lanczos symmetric eigenvalue code (IBM360,370,303x (designed to be machine-independent); FORTRAN IV), 8:22864 (R:US)

EIKONAL APPROXIMATION
Eikonal theory of the transition to phase incoherence, 8:22625 (R:US)

EINSTEIN GRAVITATION THEORY
See GENERAL RELATIVITY THEORY

ELASTIC SCATTERING
Diffraction Models
BESFIT; diffraction model elastic scattering cross sections (CDC6600; FORTRAN IV), 8:22176 (R:US)
Phase Shift
TDELAY; scattering phase shifts & time delays (IBM370,303x;CDC7600,CYBER175; FORTRAN IV), 8:22336 (R:US)
Scattering Amplitudes
New expression for the Froissart bound on the scattering amplitude, 8:22285 (RA:CS:In Czech)

ELECTRIC ARCS
Experimental observations of toroidal discharges in Ringboog 2, 8:22609 (RA:SU)

ELECTRIC BATTERIES
Devices for production and/or storage of electrical energy from chemical reactions; excludes FUEL CELLS and RADIOISOTOPE BATTERIES.
See also LEAD-ACID BATTERIES
Comparative Evaluations
Electric vehicles: a strategy for reduced utilization of critical fuels in transportation, 8:21027 (R:US)
Electrodes
Energy storage systems for terrestrial solar generators. Final report, Dec. 1980, 8:20032 (R:DE:In several languages)
Technology Assessment
Assessment of battery buses and battery technology. Final report Aug 81-May 82, 8:21028 (R:US)
Test Facilities
Modeling and computerized characterization of lead-acid battery discharges. Battery Energy Storage Test (BEST) Facility, 8:20748 (R:US)
SCOPE: the BEST facility data analysis and reporting system. Battery Energy Storage Test (BEST) Facility, 8:20749 (R:US)
Uses
Electrochemical systems as energy source for electronic wrist watches, 8:20751 (R:DE:In German)

ELECTRIC CABLES
Electrical Insulation
Electric power for the island of Borkum, 8:20315 (TJ:US)
Installation
Electric power for the island of Borkum, 8:20315 (TJ:US)
Performance
Electric power for the island of Borkum, 8:20315 (TJ:US)

ELECTRIC CONDUCTIVITY
Measuring Instruments
An ultrahigh-sensitivity facility for electrical resistivity experiments in a liquid helium environment, 8:21638 (J:GB)
Measuring Methods
High-sensitivity resistivity technique for studies of defect behavior, 8:21446 (J:US)
ELECTRIC CONTACTS
Screen Printing
Development of an all-metal thick film cost affective metallization system for solar cells, 8:20010 (R:US)
Development of an all-metal thick film cost effective metallization system for solar cells, 8:20009 (R:US)
ELECTRIC FIELDS
Dynamics
Relation between the local field at large distances from a charge or dipole and the dielectric constant, 8:22581 (J:US)
ELECTRIC FUSES
Design
200 kj copper foil fuses. Final report, 8:21304 (R:US)
Performance
200 kj copper foil fuses. Final report, 8:21304 (R:US)
ELECTRIC GENERATORS
Rotating generators only; excludes DIRECT ENERGY CONVERTERS.
Control Systems
Investigation of doubly-fed machine in variable speed applications: control verification, 8:20241 (R:US)
ELECTRIC HEATING
Economic Analysis
New ways of heating and cooling buildings with electricity, 8:20897 (R:US)
ELECTRIC POWER
See also OFF-PEAK POWER
Consumption Rates
Energy use and customer welfare effects of residential time-of-use rates. Final report, 8:20838 (R:US)
Energy Accounting
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)
Energy Consumption
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Energy Demand
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Energy Policy
Clear federal-policy guidelines needed for future Canadian-power imports, 8:20840 (R:US)
Energy Supplies
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Environmental Impacts
Quantification of environmental costs and benefits study module VI. Final report, 8:21889 (R:US)
Legal Aspects
Developer handbook for Section 210 of PURPA for New Hampshire, 8:20830 (R:US)
Developer handbook for Section 210 of PURPA for Montana, 8:20827 (R:US)
Developer handbook for Section 210 of PURPA for Maine, 8:20833 (R:US)
Developer handbook for Section 210 of PURPA for Georgia, 8:20829 (R:US)
Market
A brief market study on electric power systems and energy conservation equipment in Thailand. Foreign market survey report (final), 8:20843 (R:US)
Marketing
Case studies in major bulk-power transactions, 8:20824 (R:US)
Prices
California energy prices, 1980-2000. Staff report (final), 8:19718 (R:US)
Electric Power Monthly (For September 1982), 8:20821 (R:US)
Electric Power Monthly (For March 1982), 8:20819 (R:US)
Electric Power Annual (For 1981), 8:20823 (R:US)
Electric power monthly (For January 1982), 8:20818 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Pricing Regulations
Developer handbook for Section 210 of PURPA for New Hampshire, 8:20830 (R:US)
Developer handbook for Section 210 of PURPA for Montana, 8:20827 (R:US)
Developer handbook for Section 210 of PURPA for Maine, 8:20833 (R:US)
Developer handbook for Section 210 of PURPA for Georgia, 8:20829 (R:US)
Public Utility Commission manual for Section 210 of PURPA for North Carolina, 8:20831 (R:US)
Public Utility Commission manual for Section 210 of PURPA for Colorado, 8:20832 (R:US)
Public Utility Commission manual for Section 210 of PURPA for Montana, 8:20834 (R:US)
Public Utility Commission manual for Section 210 PURPA for New york, 8:20828 (R:US)
Production
Monthly energy review, 8:19699 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Rate Structure
Analysis of state regulatory actions regarding rates for buyback electricity and back-up electric service for natural gas cogeneration. Final report, 8:20803 (R:US)
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)
Reliability
Reserve-reliability analysis study module V. Final report, 8:20849 (R:US)
Sales
Clear federal-policy guidelines needed for future Canadian-power imports, 8:20840 (R:US)
Electric power monthly (For August 1982), 8:20820 (R:US)
Electric Power Monthly (For March 1982), 8:20819 (R:US)
Electric Power Annual (For 1981), 8:20823 (R:US)
Supply Disruption
Reserve-reliability analysis study module V. Final report, 8:20849 (R:US)
Time-of-Use Pricing
Energy use and customer welfare effects of residential time-of-use rates. Final report, 8:20838 (R:US)
Trade
Survey of the Italian market on electric power systems and energy conservation equipment. Foreign market survey report, 8:20842 (R:US)
ELECTRIC POWER INDUSTRY
Use only for general papers that go beyond specific interests of the utility such as generation, transmission, rates, etc. and include one or more of the following: equipment manufacturers; educational or research activities; o
Economic Impact
Continuous-emission monitoring in the electric-utility industry. Final report, 8:20837 (R:US)
ELECTRIC POWER RESEARCH INSTITUTE
See EPRI
ELECTRIC POWER SYSTEMS
See POWER SYSTEMS
ELECTRIC RESISTIVITY
See ELECTRIC CONDUCTIVITY
ELECTRIC UTILITIES
Cross-subsidization and competition: a case study of gas and electric utility involvement in residential energy conservation. Final report, 8:20919 (R:US)

Accounting
Energy supplies and energy conservation. Pt.2, 8:20845 (R:DE:In German)
Boiler Fuels
Economics of utility oil and gas substitution: national and region-specific analysis, 8:19715 (R:US)
Decision Making
Information system for generation availability: executive summary. Final report, 8:20839 (R:US)
Deregulation
Assessment of electric-utility ownership and operation of industrial-cogeneration facilities. Final report, 8:20815 (R:US)
Case studies in major bulk-power transactions, 8:20824 (R:US)
Financing new electric-generating facilities in deregulated markets: insights from analogous industries, 8:20825 (R:US)
Energy Accounting
Economic assessment of residential retrofit electricity conservation measures: consumer and utility perspectives. Staff report, 8:20920 (R:US)
Financing
Delivering energy services: new challenges for California's electric utilities, 8:20853 (R:US)
Electric-utility financial database documentation, 8:20836 (R:US)
Impacts of financial constraints on the electric utility industry, 8:20248 (RA:US)
Fuel Substitution
Economics of utility oil and gas substitution: national and region-specific analysis, 8:19715 (R:US)
Income
Electric power monthly (For August 1982), 8:20820 (R:US)
Electric Power Monthly (For March 1982), 8:20819 (R:US)
Electric Power Annual (For 1981), 8:20823 (R:US)
Information Systems
Information system for generation availability: executive summary. Final report, 8:20839 (R:US)
Load Management
Rate design analysis study module IV. Final report, Phase II, 8:20851 (R:US)
Texas energy history, 8:20794 (R:US)
Off-Peak Energy Storage
Evaluation of superconducting magnetic energy storage systems. Final report, 8:20267 (R:US)
Operation
Assessment of electric-utility ownership and operation of industrial cogeneration facilities. Final report, 8:20816 (R:US)
Ownership
Assessment of electric-utility ownership and operation of industrial cogeneration facilities. Final report, 8:20816 (R:US)
Planning
Delivering energy services: new challenges for California's electric utilities, 8:20853 (R:US)
Information system for generation availability: executive summary. Final report, 8:20839 (R:US)
Power Demand
Utilities, 8:20791 (RA:US)
Power Distribution Systems
Effects on the utility feeder of utility-interactive inverters at the Northeast Residential Experiment Station, 8:20036 (R:US)
Pricing Regulations
Long-term consumer impacts of electricity-rate regulatory policies, 8:20826 (R:US)
Rate Structure
Long-term consumer impacts of electricity-rate regulatory policies, 8:20826 (R:US)
Rate design analysis study module IV. Final report, Phase II, 8:20851 (R:US)
Regulations
Developer handbook for Section 210 of PURPA for New Hampshire, 8:20830 (R:US)
Developer handbook for Section 210 of PURPA for Montana, 8:20827 (R:US)

Research Programs
Electric-utility solar-energy activities: 1982 survey update. Special report, 8:19965 (R:US)
Sales
Electric power monthly (For January 1982), 8:20818 (R:US)
Solar Energy
Electric-utility solar-energy activities: 1982 survey update. Special report, 8:19965 (R:US)
Wind Power
Electric-utility solar-energy activities: 1982 survey update. Special report, 8:19965 (R:US)

ELECTRICAL CONDUCTIVITY
See ELECTRIC CONDUCTIVITY

ELECTRICAL ENGINEERING
Research Programs
Report for 1979-1980, 1980-1981 of the Division of Engineering and Applied Science at the California Institute of Technology (California Institute of Technology), 8:21303 (R:US)

ELECTRICAL EQUIPMENT
See also ELECTRIC CONTACTS
ELECTRICAL INSULATORS
ELECTROMAGNETS
RECTIFIERS
TRANSFORMERS
Adhesives
Adhesive coated electrical apparatus having sublimable protective covering and an assembly method, 8:20314 (P:US)
Aging
Accelerated aging methods of electrical equipment at Electricite de France, 8:20576 (RA:US)
Aging of electrical equipment, 8:20593 (RA:US)
EPRI-sponsored correlation of age-sensitivity and seismic qualification, 8:20589 (RA:US)
Equipment aging: an overview of status and research needs, 8:20577 (RA:US)
Impact of pre-conditioning on the qualification of safety-related equipment, 8:20585 (RA:US)
Damage
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Electromagnetic Pulses
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Marketing Research
The market for power generation equipment in Turkey (1982-1986). Foreign market survey report, 8:20844 (R:US)
Protective Coatings
Adhesive coated electrical apparatus having sublimable protective covering and an assembly method, 8:20314 (P:US)
Quality Assurance
Impact of pre-conditioning on the qualification of safety-related equipment, 8:20585 (RA:US)
Sales
The market for power generation equipment in Turkey (1982-1986). Foreign market survey report, 8:20844 (R:US)
Seismic Effects
EPRI-sponsored correlation of age-sensitivity and seismic qualification, 8:20589 (RA:US)
Vulnerability
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)

Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
ELECTRICAL INSULATION
Aging
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)
Physical Radiation Effects
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)
Thermal Stresses
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)
ELECTRICAL INSULATORS
Flashover
Soft photon effects on vacuum power flow. Master's thesis, 8:21305 (R:US)
ELECTRICAL RESISTANCE
See ELECTRIC CONDUCTIVITY
ELECTRICAL RESISTIVITY

Binders
Study of the binding power of pitches for electrodes, 8:19542 (RA:XE:In French)
Electric Currents
Transient-current distributions in porous zinc electrodes in KOH electrolyte, 8:20746 (R:US)
ELECTROFLUID DYNAMIC WIND GENERATOR
See EFD WIND GENERATORS
ELECTROLYTES
See also SOLID ELECTROLYTES
Electrochemistry
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
ELECTROLYTIC CELLS
Construction
Design and construction of electrolyzers with solid electrolyte using Nafion membranes. Final report, 8:19913 (R:XE)
Design
Design and construction of electrolyzers with solid electrolyte using Nafion membranes. Final report, 8:19913 (R:XE)
Optimization
Gas bubble behaviour and ohmic potential drop during water electrolysis, 8:19911 (R:XE)
Solid Electrolytes
Novel oxides having high protonic conductivity as electrolyte for low temperature water vapour electrolysis, 8:19910 (R:XE)
ELECTROMAGNETIC LENSES
Engineering Drawings
Lens: two-gun injector (Engineering Materials) (Stanford 20-GeV linac), 8:21542 (E:US)
ELECTROMAGNETIC PULSES
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Data Acquisition Systems
Time-tying of EMP test data, 8:21355 (R:US)
Resonance
Pole extraction from real-frequency information, 8:22683 (J:US)
Simulation
Standing waves and notches in a parallel-plate type of EMP simulator and their reduction. Final report, 8:21659 (R:US)
Simulators
Time-tying of EMP test data, 8:21355 (R:US)
ELECTROMAGNETIC SURVEYS
See also MAGNETOTELLURIC SURVEYS
Data Processing
Electromagnetic modeling using a fast numerical Sommerfeld integral, 8:22048 (RA:US)
ELECTROMAGNETIC TRANSITIONS

Wires
Bonding wire for semiconductor-element use, 8:21447 (TG:US)
ELECTRON-ION COLLISIONS
Inelastic Scattering
H-Division quarterly report, July-September 1982, 8:22564 (R:US)
Ionization
Ionization and recombination coefficients for Fe XV—Fe XIX, 8:22215 (J:US)
Recombination
Ionization and recombination coefficients for Fe XV—Fe XIX, 8:22215 (J:US)
ELECTRON-POSITRON INTERACTIONS
Accelerators
Future of electron colliders, 8:21478 (R:US)
Annihilation
QCD Monte-Carlo models for $e^+ e^-$ annihilations and hadron-hadron collisions, 8:22283 (R:US)
Charmed Meson Resonances
Heavy-quark fragmentation fom $e^+ e^-$ annihilation and nu N scattering experiments, 8:22271 (R:US)
Jet Model
QCD Monte-Carlo models for $e^+ e^-$ annihilations and hadron-hadron collisions, 8:22283 (R:US)
Particle Production
Hunting for the selectron, 8:22308 (J:NL)
Particle searches in $e^+ e^-$ experiments at PEP and PETRA, 8:22274 (R:US)
Production of low mass dileptons in $e^+ e^-$ collisions, 8:22290 (RA:CS:In Slovak)
Research Programs
Review of $e^+ e^-$ physics at PEP - 1982, 8:22273 (R:US)
ELECTRON-PROTON INTERACTIONS
Deep Inelastic Scattering
Quark-parton model and deep inelastic ep scattering, 8:22291 (RA:CS:In Slovak)
Experiment Planning
eP physics at the CBA, 8:22251 (R:US)
P Invariance
Parity violation in pion electroproduction and photoproduction with a proton target, 8:22307 (J:US)
Weak Neutral Currents
Parity violation in pion electroproduction and photoproduction with a proton target, 8:22307 (J:US)
ELECTRONS
Membrane Transport
Photosensitized electron transport across lipid vesicle walls, 8:20001 (R:US)

Stopping Power
Calorimetric measurement of electron stopping power of aluminum and copper between 11 and 127 keV, 8:22524 (J:US)
ELECTROPLATING
Sample Preparation
Nonliquid surface preparation for electrodeposition (Nonconductive materials), 8:21077 (R:US)
ELECTROSTATIC ACCELERATORS
See also VAN DE GRAAFF ACCELERATORS
Uses
Industrial and medicine accelerators and prospects of their development in the 11 five year plan, 8:21473 (RA:SU:In Russian)
ELECTROSTATIC PRECIPITATORS
Design
Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
New instrument for isokinetic sampling in high temperature stacks and ducts, 8:19585 (RA:US)
Economic Analysis
Review of gas cleanup systems for fluidized-bed coal combustors, 8:20245 (R:US)
Efficiency
New instrument for isokinetic sampling in high temperature stacks and ducts, 8:19585 (RA:US)
Maintenance
Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
Manuals
Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
Operation
Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
Performance
Bipolar current probe and its application in electrostatic precipitators for diagnosis of back discharge severity, 8:21469 (BA:DE)
Impact of Nox selective catalytic reduction processes on flue gas cleaning systems. Final report Oct 80-Oct 81, 8:20304 (R:US)
New instrument for isokinetic sampling in high temperature stacks and ducts, 8:19585 (RA:US)
Review of gas cleanup systems for fluidized-bed coal combustors, 8:20245 (R:US)
Performance Testing
Development of a laboratory corona apparatus. Part 1, 8:19574 (R:AU)
Specifications
Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
ELECTROSTATIC SPECTROMETERS
Design
A particle spectrometer with a large geometric factor for the energy range 0.1 to 30 keV, 8:21577 (R:AT)
ELECTROSTATIC WAVES
See PLASMA WAVES
ELEMENTARY PARTICLES
See also HADRONS
LEPTONS
POSTULATED PARTICLES
Polarization
Relation between the local field at large distances from a charge or dipole and the dielectric constant, 8:22581 (J:US)
ELEMENTS
For chemical elements only.

SOLAR ENERGY
Information
Energy Information Directory. Fourth quarter 1982, 8:20753 (R:US)
Market
Annual report to Congress, 1979. Volume 3. Projections; energy programs/energy markets-overview; energy programs/energy markets-technical papers, 8:20790 (R:US)
Research Programs
Analysis of the energy research and development budget proposal process, 8:20782 (R:US)
Annual report to Congress, 1979. Volume 3. Projections; energy programs/energy markets-overview; energy programs/energy markets-technical papers, 8:20790 (R:US)

ENERGY ACCOUNTING
Manuals
User's manual for the bill comparison and usage modification programs. Rate-design analysis study module IV. Technical appendix to final report, 8:20850 (R:US)

ENERGY ANALYSIS
See also ENERGY ACCOUNTING
Energy analysis: as an economic tool, 8:20769 (B:XE)
Algorithms
Validation data for mechanical system algorithms used in building energy analysis programs. Final report, 8:20891 (R:US)
Computer Graphics
1981/82 nonresidential building standards development project: use of computerized graphics to optimizae building energy use in predesign and programing, 8:20915 (R:US)
Evaluation
Overview of the arc forecasts, 8:20758 (RA:US)
Hearings
Annual report to Congress, 1979. Volume 3. Projections; energy programs/energy markets-overview; energy programs/energy markets-technical papers, 8:20790 (R:US)
Research Programs
EPRI Research and Development Projects, 8:20268 (R:US)

ENERGY BEAM DEPOSITION
Mathematical Models
Energy deposition in molecules resulting from multiple infrared photon absorption, 8:22580 (J:US)

ENERGY CONSERVATION
Cost Benefit Analysis
Retrofit energy conservation in residential buildings in southern California, 8:20908 (R:US)
Demonstration Programs
Methods to deal with self-selection in estimating conservation-program energy savings: use of synthetic data to test alternative approaches, 8:20912 (R:US)
Economic Analysis
Economic assessment of residential retrofit electricity conservation measures: consumer and utility perspectives. Staff report, 8:20920 (R:US)
Government Policies
Federal energy conservation programs. Perspectives from the public and private sectors: Volume I. Summary of a public hearing, July 14 and 15, 1981, Washington, DC, 8:20786 (R:US)
Federal energy conservation programs. Perspectives from the public and private sectors: Volume II. Public hearing, July 14 and 15, 1981, Washington, DC, 8:20787 (R:US)
Implementation
Development of standards and program packages. Volume III. Appendices. Final report, Phase 2, 8:20802 (R:US)
Life-Cycle Cost
Retrofit energy conservation in residential buildings in southern California, 8:20908 (R:US)
Manuals
Energy conservation manual for multi-family dwellings, 8:20899 (R:US)
Program Management
Analysis of two allegations about the Tennessee Valley Authority's energy-conservation programs and their efficiency and effectiveness, 8:20785 (R:US)
Residential Conservation Service Program: summary of the second annual reports submitted to the US Department of Energy by states and non-regulated utilities. Final report, 8:20913 (R:US)
Public Opinion
Federal energy conservation programs. Perspectives from the public and private sectors: Volume I. Summary of a public hearing, July 14 and 15, 1981, Washington, DC, 8:20786 (R:US)
Retrofitting
Retrofit energy conservation in residential buildings in southern California, 8:20908 (R:US)
Subsidies
Cross-subsidization and competition: a case study of gas and electric utility involvement in residential energy conservation. Final report, 8:20919 (R:US)

ENERGY CONSUMPTION
Energy information report to Congress: quarterly report. First quarter, 1982, 8:19648 (R:US)
Energy information report to Congress: quarterly report. Fourth quarter, 1981, 8:19647 (R:US)
Monthly energy review, 8:20857 (R:US)
Monthly energy review. First half 1982 summary, 8:20858 (R:US)
Monthly energy review, 8:19698 (R:US)

Monthly Energy Review, 8:20855 (R:US)
Monthly energy review, 8:20859 (R:US)
Short-term energy outlook. Volume I. Quarterly projections, 8:19713 (R:US)
Bibliographies
National energy research and development program, 8:20800 (R:BE:FR)
Forecasting
Annual report to Congress, 1979. Volume 3. Projections; energy programs/energy markets-overview; energy programs/energy markets-technical papers, 8:20790 (R:US)
Mathematical Models
Energy forecasting models within the Department of the Navy. Master's thesis, 8:20756 (R:US)
Statistical Data
Monthly energy review, 8:19649 (R:US)

ENERGY CONVERSION
See also SOLAR ENERGY CONVERSION
Bibliographies
National energy research and development program, 8:20800 (R:BE:FR)

ENERGY COSTS
See ENERGY ACCOUNTING

ENERGY DEMAND
Monthly energy review, 8:19698 (R:US)
Short-term energy outlook. Volume I. Quarterly projections, 8:19713 (R:US)
Econometrics
Welcome and introduction to review of energy policy study, 8:20762 (RA:US)
Energy Models
Demand, 8:20761 (RA:US)
Forecasting
Annual report to Congress, 1979. Volume 3. Projections; energy programs/energy markets-overview; energy programs/energy markets-technical papers, 8:20790 (R:US)
Long-term alternative energy R and D strategies. Final report, 8:20768 (R:US)
Outlook for oil imports, 8:19714 (R:US)
Short-term energy outlook. Volume 1. Quarterly projections, 8:19711 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)

Short-term energy outlook. Volume II. Methodology, 8:20757 (R:US)
Mathematical Models
Energy models of European communities implementation and methodological tests in Italy. Final report, 8:20796 (R:US)
Trends in energy demand in Italy (energy demand model for Italy). Final report, 8:20797 (R:US)
Statistical Data
Monthly energy review, 8:19649 (R:US)
ENERGY DISTRIBUTION
See ENERGY SPECTRA
ENERGY FACILITIES
Fire Prevention
Computing minimum cost fire protection, 8:21353 (R:US)
Operating Cost
Energy company development patterns in the postembargo era. An overview of financial performance, 1974-1980. Volume 2, statistical tables, 8:20772 (R:US)
Safety
Computing minimum cost fire protection, 8:21353 (R:US)
Site Selection
Energy siting in Utah: a programming model, 8:20292 (R:US)
ENERGY MANAGEMENT
Millions can be saved through better energy management in federal hospitals, 8:20904 (R:US)
Mathematical Models
Energy forecasting models within the Department of the Navy. Master's thesis, 8:20756 (R:US)
Research Programs
EPRI Research and Development Projects, 8:20268 (R:US)
ENERGY MANAGEMENT SYSTEMS
Building services automation. Final report, 8:20901 (R:US)
Data Transmission
Signal transmission via the electrical house wiring system for a control system for energy conservation in households and small business, 8:20903 (R:XE:In German)
ENERGY MODELS
Energy-sector-model applications in energy assessments of industrializing and developing countries, 8:20788 (R:US)
Monthly energy review, 8:19698 (R:US)
Economics
Macroeconomic effects, 8:20760 (RA:US)
Energy Analysis
Macroeconomic effects, 8:20760 (RA:US)
Evaluation
Demand, 8:20761 (RA:US)
Oil and gas, 8:20759 (RA:US)
Forecasting
Energy policy in managing the transition, 8:20764 (RA:US)
Technology Assessment
Short-term energy outlook. Volume 1. Quarterly projections, 8:19711 (R:US)
ENERGY POLICY
Documentation of the reserve-related data inputs to the Resource Allocation and Mine Costing model, 8:19655 (R:US)
Environmental and socio-economic status of the Hampshire energy project, 8:21888 (R:US)
Federal role and activities in energy research and development 1946-1980: an historical summary, 8:21890 (R:US)
Review of FRS and complementary pipeline data, 8:19753 (R:US)
Economic Impact
Energy policy and other national concerns, 8:20765 (RA:US)
Environmental Effects
Energy policy and other national concerns, 8:20765 (RA:US)
Planning
Energy and education: planning for higher prices and potential shortages, 8:20776 (B:US)
Energy company development patterns in the postembargo era. An overview of financial performance, 1974-1980. Volume 2, statistical tables, 8:20772 (R:US)
Energy policy in managing the transition, 8:20764 (RA:US)
Political Aspects
Political and policy perspectives on the report's findings, 8:20763 (RA:US)
Program Management
Welcome and introduction to review of energy policy study, 8:20762 (RA:US)
Technology Assessment
Wrap-up session on energy policy study, 8:20798 (RA:US)
ENERGY SECURITY ACT
Synthetic fuels: a view of the Energy Security Act from the inside, 8:19669 (RA:US)
ENERGY SECURITY CORPORATION
See SYNTHETIC FUELS CORPORATION
ENERGY SHORTAGES
Economic Impact
Economic impacts of petroleum shortages and the implications for the freight-transportation industry, 8:20946 (R:US)
Reserve-reliability analysis study module V. Final report, 8:20849 (R:US)
Social Impact
Energy and education: planning for higher prices and potential shortages, 8:20776 (B:US)
ENERGY SOURCE DEVELOPMENT
Bibliographies
National energy research and development program, 8:20800 (R:BE:FR)
Economic Impact
Management of social effects in oil-shale boomtowns, 8:21885 (R:US)
Implementation
Development of standards and program packages. Volume III. Appendices. Final report, Phase 2, 8:20802 (R:US)
Indexes
Establishment of leading energy indicators. Final report, 8:20771 (R:US)
Indicators
Establishment of leading energy indicators. Final report, 8:20771 (R:US)
Information Needs
Offshore petroleum industry environmental data requirements: emphasis on remote sensing, 8:19724 (R:NO)
Research Programs
Federal role and activities in energy research and development 1946-1980: an historical summary, 8:21890 (R:US)
Social Impact
Goals, processes, and indicators of development: a project description, 8:20774 (R:JP)
ENERGY SOURCES
See also FOSSIL FUELS

FAST NEUTRONS
Dose Rates
SPAN4; a point-kernel shield evaluation code (CDC6600; FORTRAN IV and ASCENT), 8:22499 (R:US)
Particle Tracks
Background and neutron response of electrochemically etched CR-39, 8:21592 (RA:US)
Polarization
PMS1; fast neutron polarization experiment (IBM360; FORTRAN IV(H) and BAL), 8:22500 (R:US)
Slowing-Down
FORM; fast neutron spectrum cross section calculations (IBM370; FORTRAN IV), 8:22425 (R:US)
FAST REACTORS
See also FBR TYPE REACTORS
FFTF REACTOR
ZPPR REACTOR
ZPR-3 REACTOR
Excursions
FORE2; fast reactor excursion calculations (GE635;IBM360; FORTRAN IV), 8:20496 (R:US)
Fuel Elements
LIFE3; mixed-oxide fuel element performance (IBM370;CDC7600; FORTRAN IV), 8:20607 (R:US)
Neutron Dosimetry
DOS; neutron flux-dosimeter activity relation (GE625,635; FORTRAN IV), 8:20522 (R:US)
Neutron Flux
FARED; one-dimensional fast reactor design & survey study (CDC6600; FORTRAN IV and COMPASS), 8:20524 (R:US)
FCC4; fundamental mode fast reactor cross section calculations (UNIVAC1108; FORTRAN IV), 8:20243 (R:US)
Neutron Spectra
GAFGAR;p3t;PROC;TAPCOP; spectra and group-averaged cross section calculation (UNIVAC1108; FORTRAN IV), 8:20511 (R:US)
Reactor Core Disruption
FREADM1; fast reactor core accident analysis (GE635; FORTRAN IV), 8:20655 (R:US)
Reactor Kinetics
QX1; quasistatic spatial reactor kinetics code (IBM360/75; FORTRAN IV), 8:20533 (R:US)

Response matrix nodal methods for thermal and fast reactor applications, 8:20556 (RA:US)

Transients

SAS1A; fast reactor power and flow transients (CDC6600;IBM360/75; FORTRAN IV), 8:20519 (R:US)

FASTBUS SYSTEM

Introduction to FASTBUS, 8:21609 (R:US)

Control Systems

FASTBUS controller module using a multibus MPU, 8:21608 (R:US)

Logic Circuits

New developments in segment ancillary logic for FASTBUS, 8:21606 (R:US)

Specifications

Progress on the SLAC SNOOP diagnostic module for FASTBUS, 8:21607 (R:US)

FASTENERS

Failures

Threaded-fastener experience in nuclear power plants, 8:20331 (R:US)

FISH HATCHERIES
See FISHERIES
FISHERIES
Prior to August 1981, this concept was indexed to AQUACULTURE.
Capitalized Cost
Wynoochee Hydropower/Fish Hatchery: feasibility report and environmental impact statement. Final report, 8:19959 (R:US)
Feasibility Studies
Wynoochee Hydropower/Fish Hatchery: feasibility report and environmental impact statement. Final report, 8:19959 (R:US)
FISHES
Aquaculture
Optimization of biological recycling of plant nutrients in livestock waste by utilizing waste heat from cooling water, 8:21855 (R:US)
Behavior
Development and verification of a behavior test of fishes in flowing water for assessment of subacute and chronic toxicity, as well as study of influencing factors, 8:21999 (RA:DE:In German)
Biomass
Population dynamics and ecology of Tilapia rendalli in Lago Sauce (Peru), 8:21931 (R:DE:In German)
Population Dynamics
Assessment methodology for new cooling lakes. Volume 2. Development of empirical multivariate relationships for evaluating fish communities in new cooling lakes. Final report, 8:21853 (R:US)
Assessment methodology for new cooling lakes. Volume 1. Methodology to assess multiple uses for new cooling lakes. Final report, 8:20266 (R:US)
Population dynamics and ecology of Tilapia rendalli in Lago Sauce (Peru), 8:21931 (R:DE:In German)
FISSILE MATERIALS
Neutron Reactions
GRAMP; r-m parameters of unresolved resonances (CDC6600; FORTRAN IV), 8:22387 (R:US)
Nondestructive Analysis
Development and test of methods for the nondestructive assay of spent-fuel assemblies. Final report, 8:19807 (R:US)
FISSION CHAMBERS
Separate effects tests in support of BWR thermal/hydraulic monitoring, 8:20342 (RA:US)
FISSION FRAGMENTS
Beta-Minus Decay
Calculated beta-spectra from decay of fission products produced by thermal-neutron fission of ^{235}U, 8:22396 (J:NL)
FISSION PRODUCT RELEASE
Coordinate with descriptors for the area of release such as BIOSPHERE or COOLANTS, and for the specific fission products, if known.
FREVAP6; HTGR metallic fission product release (UNIVAC1108; FORTRAN IV), 8:20602 (R:US)
Volatile fission-product source term evaluation using the fastgrass comptuer code (PWR; BWR), 8:20681 (R:US)
Computer Calculations
AISITE2; parametric site requirement study (IBM360; FORTRAN IV), 8:20622 (R:US)
FISSION PRODUCTS
CINDER;M0102; point depletion fission product (CDC6600;IBM360; FORTRAN IV (CDC6600), FORTRAN IV and BAL (IBM360)), 8:20510 (R:US)
Activity Levels
Extended-burnup calculations for operating-reactor reload reviews (PWR; BWR), 8:20347 (R:US)
After-Heat
Calculating fission product decay energies and spectra using adjusted data, 8:20559 (J:US)
Beta Decay
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
Inventories
CURIE; fission product inventory decay history (IBM370; FORTRAN IV), 8:20498 (R:US)
Mass
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
Nuclear Structure
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
FISSIONABLE MATERIALS
See also FISSILE MATERIALS

Criticality
  Existing experimental criticality data applicable to nuclear-fuel-transportation systems, 8:21350 (R:US)
Least Square Fit
  DAFT1; least squares fit for fissile nuclide data (CDC6600; FORTRAN IV), 8:22386 (R:US)
Neutron Spectra
  DAFT1; least squares fit for fissile nuclide data (CDC6600; FORTRAN IV), 8:22386 (R:US)
Transport

Chemical Composition
  Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983, 8:21295 (R:US)
Research Programs
  Fundamental combustion and diagnostics research at Sandia. Progress report, October-December 1982, 8:21302 (R:US)
Temperature Measurement
  Application of CARS to obtain temperature in flame environments. Final report, 8:19773 (R:US)
  Temperature profile of a stoichiometric ch4/N2O flame from laser excited fluorescence measurements on OH, 8:21294 (R:US)
FLARING
Reporting Requirements
  Interior's report of shut-in or flaring wells unnecessary, but oversight should continue, 8:20807 (R:US)
FLASH HYDROPYROLYSIS PROCESS
Technology Assessment
  Flash pyrolysis of coal with reactive and nonreactive gases (Yields in various gases and conditions), 8:19453 (RA:US)
Thermal Efficiency
  Flash pyrolysis of coal with reactive and nonreactive gases (Yields in various gases and conditions), 8:19453 (RA:US)
Yields
  Flash pyrolysis of coal with reactive and nonreactive gases (Yields in various gases and conditions), 8:19453 (RA:US)
FLASHING
Mathematical Models
  Flash evaporation from turbulent water jets, 8:20078 (R:US)
FLASKS
  See CASKS
FLAT PLATE COLLECTORS
Performance Testing
  High efficient collector for small solar-powered facilities. final report, 8:20119 (R:DE:In several languages)
FLEXITIME
Evaluation
  Interim report to the President and the Congress, 8:22826 (R:US)
FLIBE
  Molten salt of fluorine, lithium, and beryllium.
Performance
  Preliminary conceptual design study of a suppressed-fission tokamak hybrid, 8:22745 (R:US)
FLOW (FLUID)
  See FLUID FLOW
FLOW MODELS
Turbulence
  Calculation of curved shear layers with two-equation turbulence models, 8:22233 (R:DE)
FLOW RATE
Bench-Scale Experiments
  Investigations of an airlift reactor with external circulation with respect to its application as a bioreactor, 8:21426 (R:DE:In German)
FLOW REGULATORS
  See also VALVES
  Combination pipe-rupture mitigator and in-vessel core catcher (Patent; LMFBR), 8:20445 (P:US)
FLOWMETERS
  Investigation of the axial void propagation velocity profile in BWR fuel bundles, 8:20341 (RA:US)
Comparative Evaluations
  Gas-solid transport flow regimes: design and measurement (From dilute phase regime, to dense phase regime to plugging or extrusion), 8:19617 (R:US)
Design
  Flowmeter for determining average rate of flow of liquid in a conduit (Patent), 8:19741 (P:US)
  Gas-solid transport flow regimes: design and measurement (From dilute phase regime, to dense phase regime to plugging or extrusion), 8:19617 (R:US)
Fission Chambers
  Separate effects tests in support of BWR thermal/hydraulic monitoring, 8:20342 (RA:US)
Performance Testing
  Use of conductance probe method to measure two phase flow pattens, 8:20378 (RA:US)
FLUE GAS
Air Pollution Control
  Electrostatic-precipitator reference manual. Final report, 8:19588 (R:US)
Air Samplers
  New particle sizing impactor for heavy grain loading, 8:19586 (RA:US)
Denitrification
  Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
Desulfurization
  Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
  Current status of dry flue gas desulfurization systems, 8:20287 (RA:US)
  Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
  EPA utility FGD survey: July-September 1981. Quarterly report, 8:20297 (R:US)
  EPA utility FGD survey, October-December 1981. Volume I. Categorical summaries of FGD systems. Volume II. Design and performance data for operational FGD system. Quarterly report, 8:20307 (R:US)
  Impact of Nox selective catalytic reduction processes on flue gas cleaning systems. Final report Oct 80-Oct 81, 8:20304 (R:US)
  Preliminary evaluation of the Avco-Ebara FGT process. Final report (Avco-Ebara proprietary process for simultaneous control of SO/sub x/ and NO/sub x/ in flue gases; technology assessment), 8:19589 (R:US)
  Process for removing sulfur oxides from gases with direct production of a usable finished reaction product. Final report, October 1980, 8:19575 (R:DE:In several languages)
  Recovery of calcium carbonate and sulfur from FGD scrubber waste. Final report Aug 77-Apr 78, 8:19592 (R:US)
  Studies of flue gas desulfurization at Louisville Gas and Electric's Paddy's Run Station: Volume I. Carbide and commercial lime testing. Final report Mar 75-Feb 1978, 8:20302 (R:US)
  Studies of flue gas desulfurization at Lousiville Gas and Electric's Paddy's Run Station: Volume II. Review and analysis of commercial operations. Final report Mar 75-Feb 1978, 8:20303 (R:US)
  Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)
  Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Heat Recovery
  Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - performance of the exhaust-gas heat exchangers, 8:20261 (R:US)

Monitoring
Field test results of eighteen industrial coal stoker fired boilers for emission control and improved efficiency. Paper 81.35.3, 8:19593 (J:US)
Sampling
Sampling for high-molecular-weight organic compounds in power plant stack gases. Final report, 8:20301 (R:US)

FLUID FLOW
See also *INCOMPRESSIBLE FLOW*
LAMINAR FLOW
MULTIPHASE FLOW
TWO-PHASE FLOW
Flow Models
Porous media equivalent for a network of discontinuous fractures, 8:22032 (RA:US)
Theoretical model of fluid flow through a deformable rock fracture, 8:22059 (RA:US)
Heat Transfer
Finite-element approach to analyzing coupled thermal-hydraulic problems, 8:21423 (R:US)
Hydrodynamics
DYNAM; dynamic analysis boiling flow steam (UNIVAC1108; FORTRAN), 8:21413 (R:US)
Numerical Solution
Development of a coupled thermal-hydraulic-mechanical finite-element model for saturated fractured porous media, 8:19839 (RA:US)
Pressure Gradients
Finite-element approach to analyzing coupled thermal-hydraulic problems, 8:21423 (R:US)
Temperature Gradients
Finite-element approach to analyzing coupled thermal-hydraulic problems, 8:21423 (R:US)
Two-Dimensional Calculations
APACHE; two-dimensional chemically reactive fluid flow code (CDC7600; FORTRAN IV), 8:21415 (R:US)
FLOW-MODEL; multi-channel two-dimensional, two-phase flow (IBM360;CDC CYBER73;CDC6600,7600; FORTRAN IV), 8:20318 (R:US)
SALE2D; general transient fluid flow algorithm (CDC7600,CYBER175; FORTRAN IV), 8:21418 (R:US)
SOLA-VOF; transient fluid flow free boundaries (CDC7600,CYBER175; FORTRAN FTN5 compiler), 8:21420 (R:US)

FLUIDIZATION
Information
PETC advanced research and technology development - surface gasification - high pressure fluidization cold model research, 8:21422 (RA:US)
Parametric Analysis
PETC advanced research and technology development - surface gasification - high pressure fluidization cold model research, 8:21422 (RA:US)
Pressure Dependence
PETC advanced research and technology development - surface gasification - high pressure fluidization cold model research, 8:21422 (RA:US)
Test Facilities
PETC advanced research and technology development - surface gasification - high pressure fluidization cold model research, 8:21422 (RA:US)

FLUIDIZED BED
Data Analysis
Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)
Fluctuations
Stochastic study of local fluctuations around the distributor in a fluidizd-bed gasifier, 8:19455 (RA:US)
Fluidization
Measurement of solids motion in gas-fluidized beds. Technical progress report, 1 October 1982-31 December 1982, 8:21335 (R:US)
Heat Transfer
Heat transfer to tubes in freeboard space of fluidized-bed combustors. Progress report, August 1, 1982-February 1, 1983, 8:20265 (R:US)
Mathematical Models
Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)
Particle Size
Measurement of solids motion in gas-fluidized beds. Technical progress report, 1 October 1982-31 December 1982, 8:21335 (R:US)
Technology Assessment
Hydrodynamical basis for scaling fluidization data on jet penetration and mixing relevant to fluidized-bed coal gasifiers, 8:19456 (RA:US)
Thermodynamics
Fluid bed consisting of fluid-bed units: a new fluidization method, 8:21190 (R:US)

FLUIDIZED BED BOILERS
Design
Atmospheric fluidized-bed combustor design whose performance will significantly exceed conventional FBC operation performance. Final report, 8:20264 (R:US)
Fluidized-bed boiler: an industrial application at Central Soya Company, Inc., Marion, Ohio, 8:19631 (R:US)
Engineering
New AFBC coal-fired steam generation facility for the Idaho Chemical Processing Plant, 8:19645 (J:US)
Performance
Atmospheric fluidized-bed combustor design whose performance will significantly exceed conventional FBC operation performance. Final report, 8:20264 (R:US)
Start-Up
Fluidized-bed boiler: an industrial application at Central Soya Company, Inc., Marion, Ohio, 8:19631 (R:US)
Technology Assessment
Fluidized-bed combustion technology overview. Final report Dec 79-Dec 80, 8:20276 (R:US)

FLUIDIZED BED HEAT EXCHANGERS
Heat Transfer
Parametric performance studies on fluizied-bed heat exchangers. Task 2. Experimental evaluation of multi-stage beds. Technical progress report, August 1, 1982-Decmber 31, 1982, 8:19636 (R:US)
Parametric Analysis
Parametric performance studies on fluizied-bed heat exchangers. Task 2. Experimental evaluation of multi-stage beds. Technical progress report, August 1, 1982-Decmber 31, 1982, 8:19636 (R:US)
Performance Testing
Parametric performance studies on fluizied-bed heat exchangers. Task 2. Experimental evaluation of multi-stage beds. Technical progress report, August 1, 1982-Decmber 31, 1982, 8:19636 (R:US)

FLUIDIZED BED REACTORS
Design
Combined fluidized-bed retort and combustor, 8:19783 (P:US)

FLUIDIZED-BED COMBUSTION
Economics
Fluidized bed combustion: an overview of design and operations (14 US manufacturers and their products are described briefly), 8:19628 (RA:US)
On-Line Measurement Systems
Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)
Process Control
Process-control instrumentation for advanced fossil-energy processes, 8:19419 (R:US)
Technology Assessment
Technology overview: circulating fluidized-bed combustion. Final report, 8:21463 (R:US)

FLUIDIZED-BED COMBUSTORS
Accidents
Fluidised-bed combustion: IEA Grimethorpe pressurized fluidized-bed test facility incident report - combustor water wall damage during operation on March 17, 1981, 8:20258 (R:US)

Adsorbents
  Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents, 8:20242 (R:US)
  Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents. Addendum. Compilation of sorbent performance data from atmospheric fluidized-bed combustors, 8:19626 (R:US)
Air Pollution Abatement
  Report to the IEA AFBC technical meeting at Petten, Netherlands, May 1982: TNO's environmental program on fluidized bed combustion, 8:19643 (B:NL)
Combustion Products
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 5 - results, 8:20262 (R:US)
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
Design
  Combined fluidized-bed retort and combustor, 8:19783 (P:US)
  Fluidized bed combustion for oil field steam generation and process heating applications, 8:19684 (J:US)
Efficiency
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 5 - results, 8:20262 (R:US)
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
  Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)
Flue Gas
  Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - performance of the exhaust-gas heat exchangers, 8:20261 (R:US)
Heat Exchangers
  Fluidised Bed Combustion Project, Grimethorpe Experimental Facility, 8:20259 (R:US)
Heat Transfer
  Alexandria fluidized-bed process-development unit. Hot-mode testing , 8:20256 (R:US)
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 5 - results, 8:20262 (R:US)
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
Hot Gas Cleanup
  Review of gas cleanup systems for fluidized-bed coal combustors, 8:20245 (R:US)
Manufacturers
  Fluidized bed combustion: an overview of design and operations (14 US manufacturers and their products are described briefly), 8:19628 (RA:US)
Market
  Fluidized bed combustion: an overview of design and operations (14 US manufacturers and their products are described briefly), 8:19628 (RA:US)
Monitoring
  Development of an in-situ real-time particulate monitoring system for application in hostile environments, 8:21708 (RA:US)
Performance
  Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)
Performance Testing
  Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
Seals
  Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - combustor water wall damage during operation on March 17, 1981, 8:20258 (R:US)
Technology Assessment
  Fluidized-bed combustion technology overview. Final report Dec 79-Dec 80, 8:20276 (R:US)
  Technology overview: circulating fluidized-bed combustion. Final report, 8:21463 (R:US)
Thermal Efficiency
  Alexandria fluidized-bed process-development unit. Hot-mode testing , 8:20256 (R:US)
Valves
  IEA Grimethorpe Pressurized Fluidised Bed Test Facility incident report: history of erosion on the primary and secondary quench vessel vent valves, 8:20257 (R:US)

FLUIDS

FRANCE
Nuclear Power Plants
Accelerated aging methods of electrical equipment at Electricite de France, 8:20576 (RA:US)

FREE ELECTRON LASERS
Design
Theory of pulse propagation and coherence in free electron lasers. Annual scientific report, 8:21372 (R:US)
Efficiency
Free electron lasers for transmission of energy in space. final report, 8:21397 (R:US)
Electron Beams
Design of the UCSB FEL electron beam system, 8:21377 (R:US)
Three dimensional radiation fields in free electron lasers using Lienard-Wiechert fields, 8:21378 (R:US)
Energy Conversion
Free electron lasers for transmission of energy in space. final report, 8:21397 (R:US)
Gain
Free electron lasers for transmission of energy in space. final report, 8:21397 (R:US)
Three dimensional radiation fields in free electron lasers using Lienard-Wiechert fields, 8:21378 (R:US)
Operation
Design of the UCSB FEL electron beam system, 8:21377 (R:US)
The UCSB free electron laser experimental program, 8:21376 (R:US)
Performance
High-efficiency free-electron laser results, 8:21388 (R:US)
Pulses
Theory of pulse propagation and coherence in free electron lasers. Annual scientific report, 8:21372 (R:US)
Research Programs
The UCSB free electron laser experimental program, 8:21376 (R:US)
Wiggler Magnets
Electron drift in a linear magnetic wiggler with an axial guide field. Memorandum report, 8:21375 (R:US)

FREE RADICALS
See RADICALS

FREONS
Breakdown
Role of electron attachment in the breakdown strength of gaseous dielectrics, 8:21189 (J:GB)
Radiolysis
Radiation chemistry of CF_2Cl_2 in the liquid phase, 8:21282 (RA:IL)

FREQUENCY (EIGEN)
See EIGENFREQUENCY

FRESH WATER ECOSYSTEMS
See AQUATIC ECOSYSTEMS

FRESNEL LENS
Design
Transmittance-optimized, point-focus fresnel lens solar concentrator, 8:20141 (RA:US)
Performance
Transmittance-optimized, point-focus fresnel lens solar concentrator, 8:20141 (RA:US)

FRICKE DOSEMETERS
See CHEMICAL DOSEMETERS

FTR REACTOR (RICHLAND)
See FFTF REACTOR

FUEL ASSEMBLIES
See also FUEL ELEMENT CLUSTERS
Accounting
Isotope correlations for safeguards surveillance and accountancy methods, 8:19895 (R:US)
Burnup
Extended-burnup calculations for operating-reactor reload reviews (PWR; BWR), 8:20347 (R:US)
Heat Transfer
Comparative study of water boiling in a vertical tube under temperature-controlled or heat-flux-controlled boundary conditions (LMFBR), 8:20725 (R:US)
Coolant mixing in LMFBR rod bundles and outlet plenum mixing transients. Progress report, September 1, 1981-November 30, 1981, 8:20423 (R:US)
Coolant mixing in LMFBR rod bundles and outlet-plenum mixing transients. Progress report, March 1, 1982-May 31, 1982, 8:20425 (R:US)
Wire-wrapped rod-bundle heat-transfer analysis for LMFBR, 8:20424 (R:US)
Hydraulics
Comparative study of water boiling in a vertical tube under temperature-controlled or heat-flux-controlled boundary conditions (LMFBR), 8:20725 (R:US)
Coolant mixing in LMFBR rod bundles and outlet plenum mixing transients. Progress report, September 1, 1981-November 30, 1981, 8:20423 (R:US)
Coolant mixing in LMFBR rod bundles and outlet-plenum mixing transients. Progress report, March 1, 1982-May 31, 1982, 8:20425 (R:US)
Wire-wrapped rod-bundle heat-transfer analysis for LMFBR, 8:20424 (R:US)
Materials Handling Equipment
Nuclear reactor fuel assembly duct-tube-to-handling-socket attachment system (Patent), 8:20613 (P:US)

FUEL BUNDLES
See FUEL ELEMENT CLUSTERS

FUEL CANS
Burnout
Experimental study on natural-convection boiling burnout in an annulus (PWR; BWR), 8:20684 (R:US)
Oxidation
Elevated temperature long-term air oxidation of Inconel alloy 625, 8:20616 (J:US)

FUEL CELLS
Cogeneration
High-efficiency residential fuel-cell energy systems. Final report, 8:20889 (R:US)
Configuration
Fuel cell stack arrangements, 8:20890 (P:US)
Design
Fuel cell stack arrangements, 8:20890 (P:US)
Feasibility Studies
High-efficiency residential fuel-cell energy systems. Final report, 8:20889 (R:US)
Research Programs
National fuel-cell program, 8:20886 (R:US)

FUEL COOLING INSTALLATIONS
See SPENT FUEL STORAGE

FUEL CYCLE
See also THORIUM CYCLE
HTGR steam-cycle/cogeneration technology development plan for Nuclear Steam Supply System. Volume III. Technology development plan, 8:20482 (R:US)
Uranium recycle in PWRs, 8:20376 (RA:US)
Accounting
Isotope correlations for safeguards surveillance and accountancy methods, 8:19895 (R:US)
Cost
NPRFCCP; fuel cycle costs performance data (CDC6600;IBM360,370/195; FORTRAN IV), 8:20466 (R:US)

PWCOST; reactor fuel cycle cost calculation (UNIVAC1108; FORTRAN IV), 8:20473 (R:US)
REFCO8; discounted cash flow fuel cycle cost (IBM360,370; FORTRAN IV), 8:20476 (R:US)

Economics
CINCAS; nuclear fuel cycle cost and economics (IBM360;CDC6600; FORTRAN IV), 8:20472 (R:US)
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
LMFBR core design for low capital cost and low sodium void, 8:20443 (J:US)
RAPFU; fuel cycle parameters for fast breeders (GE635; FORTRAN IV), 8:20407 (R:US)
WAMPUM; fuel cycle costs performance study (CDC6600; FORTRAN IV), 8:20468 (R:US)

Multigroup Theory
GAFFE; equilibrium fuel cycle calculation (UNIVAC1108; FORTRAN IV), 8:20470 (R:US)

One-Dimensional Calculations
RELOAD FEVER; one-dimensional, few-group diffusion depletion (CDC CYBER73,175; FORTRAN IV), 8:20467 (R:US)

Research Programs
FY1983 HTGR summary level program plan, 8:20481 (R:US)

FUEL ELEMENT CLUSTERS

Heat Transfer
VELVET2; turbulent flow in LMFBR rod bundle (GE635; FORTRAN IV), 8:20409 (R:US)

Neutron Flux
CLUP77; square cell collision probability calculations (FACOM230-60;IBM360; FORTRAN IV), 8:20546 (R:US)

FUEL ELEMENT FAILURE
LMFBR operational and experimental in-core local-fault experience, primarily with oxide fuel elements, 8:20676 (R:US)
Time-resolved and time-integrated radiography of fast reactor fuel elements, 8:20677 (R:US)

FUEL ELEMENTS
See also *FUEL PINS*
FUEL RODS
FUEL SPHERES
SPENT FUEL ELEMENTS

Buckling
WELWING; material buckling cylindrical fuel elements (IBM360; FORTRAN IV), 8:20603 (R:US)

Corrosion Protection
Corrosion-resistant fuel cladding allow for liquid metal fast breeder reactors (Patent), 8:20440 (P:US)

Fission Product Release
Behaviour of fission products in fuel elements of the AVR-core, 8:20398 (RA:DE:In German)
BUBL1; fuel swelling & gas release simulation (CDC6600; FORTRAN IV), 8:20608 (R:US)
FREVAP6; HTGR metallic fission product release (UNIVAC1108; FORTRAN IV), 8:20602 (R:US)

Heat Transfer
MANTA; steady-state thermal-hydraulic analysis (GE635;CDC6600,7600; FORTRAN IV), 8:20597 (R:US)

Performance
LIFE3; mixed-oxide fuel element performance (IBM370;CDC7600; FORTRAN IV), 8:20607 (R:US)

Stress Analysis
CYGRO2; stress analysis of cylindrical fuel element (CDC6600; FORTRAN IV), 8:20599 (R:US)

Swelling
BUBL1; fuel swelling & gas release simulation (CDC6600; FORTRAN IV), 8:20608 (R:US)
FIGRO; LWBR fuel swelling temperature study (CDC6600; FORTRAN IV), 8:20600 (R:US)

Transients
GLUB1; water-logged fuel element analysis (CDC6600; FORTRAN IV), 8:20604 (R:US)
ORTHIS;ORTHAT; 2-dimensional heat conduction (IBM360; FORTRAN IV and BAL), 8:20662 (R:US)

FUEL FABRICATION PLANTS
See also *MIXED OXIDE FUEL FABRICATION PLANTS*

Air Pollution Control
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Chemical Effluents
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Gaseous Wastes
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Liquid Wastes
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Material Unaccounted For
Licensed fuel facility status report. Inventory difference data, January-June 1982, 8:19896 (R:US)

Radioactive Effluents
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Solid Wastes
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

Water Pollution Control
Evaluation of environmental control technologies for commercial uranium nuclear fuel fabrication facilities, 8:19881 (R:US)

FUEL GAS

NATURAL GAS

Calorific Value
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)

Chemical Composition
Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)
Hydrocarbon content of the vapor phase and light-oil fraction in the output stream of the METC gasifier, 8:19472 (R:US)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Tri-State Synfuels Project Coal Sampling and Testing Program: Volume 1. Sampling and results (Proposed Henderson, Kentucky coal to gasoline plant; sampling and testing other potential coal reserves for Lurgi gasification), 8:19550 (R:US)

Comparative Evaluations
Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)

Cost
Coal-gasification-process concepts (Dependence on gasifier pressure), 8:19424 (R:US)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)

Hot Gas Cleanup
Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)

On-Line Measurement Systems
Hydrocarbon content of the vapor phase and light-oil fraction in the output stream of the METC gasifier, 8:19472 (R:US)

Purification
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)
Advanced gasification projects, 8:19435 (R:US)

Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Pollution control in coal gasification, 8:19470 (RA:US)

FUEL LOADING
See REACTOR FUELING

FUEL MANAGEMENT
Development and validation of core physics methods for in-core fuel management, 8:20375 (RA:US)
Extended-burnup calculations for operating-reactor reload reviews (PWR; BWR), 8:20347 (R:US)
Recent BWR fuel management reactor physics advances, 8:20338 (RA:US)

FUEL MOTION DETECTION
In-situ material-motion diagnostics and fuel radiography in experimental reactors, 8:20637 (R:US)

FUEL OILS
See also HEATING OILS
RESIDUAL FUELS

Cocombustion
Co-fired oil and tire-derived fuel: waste-tire energy-reclamation project, 8:20969 (R:US)

Consumption Rates
Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
Cost and quality of fuels for electric utility plants (For August 1982), 8:20253 (R:US)

Cost
Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
Electric Power Annual (For 1981), 8:20823 (R:US)

Prices
Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
Cost and quality of fuels for electric utility plants (For March 1982), 8:20250 (R:US)
Monthly petroleum-product price report, 8:19697 (R:US)
Monthly petroleum-product price report (January 1981 through June 1982), 8:19696 (R:US)
Monthly petroleum product price report (January 1981-March 1982), 8:19694 (R:US)
Monthly petroleum product price report (January 1981-May 1982), 8:19695 (R:US)
Monthly petroleum product price report (January 1981-January 1982), 8:19692 (R:US)

Viscosity
Settling characteristics of coal-oil mixtures and some model systems, 8:19633 (R:US)

FUEL PENCILS
See FUEL PINS

FUEL PINS

Cracking
DSTRESS; transient fuel model for clad strain (CDC6600,CYBER175; FORTRAN IV), 8:20672 (R:US)

Failures
PECS3; probabilistic evaluation cladding life (CDC7600; FORTRAN IV), 8:20413 (R:US)

Nondestructive Analysis
HEDL shielded materials facility remote examination of breeder reactor fuel pins, 8:20441 (J:US)

Performance Testing
Examination of fast-reactor fuels and FBR analytical quality-assurance standards and methods. Progress report, July 1-September 30, 1982, 8:20429 (R:US)

Retrieval Systems
Retrievable fuel pin end member for a nuclear reactor (Patent), 8:20614 (P:US)

FUEL REPROCESSING PLANTS

IDAHO CHEMICAL PROCESSING PLANT

Aerosol Monitoring
Aerosol generation from Kerosene fires, 8:19805 (BA:DE:In German)

Air Quality
Plutonium aerosols size distribution in a reprocessing plant, 8:19804 (BA:DE)

Criticality
Definition of experimental procedures to assure quality in a program of mixed-oxide critical experiments, 8:20561 (J:US)

Dissolvers
Criticality safety of the ten-well insert for the pot dissolver, 8:21365 (J:US)

Environmental Impacts
Plutonium aerosols size distribution in a reprocessing plant, 8:19804 (BA:DE)

Fires
Aerosol generation from Kerosene fires, 8:19805 (BA:DE:In German)

Sampling
Plutonium aerosols size distribution in a reprocessing plant, 8:19804 (BA:DE)

FUEL RODS

Cooling
Finite-element approach to analyzing coupled thermal-hydraulic problems, 8:21423 (R:US)

Critical Heat Flux
ERREST; loss of coolant rod bundle critical heat flux data analysis (IBM360; FORTRAN IV), 8:20660 (R:US)

Deformation
BUSHL; cylindrical shell buckling collapse analysis (CDC6600; FORTRAN IV), 8:20609 (R:US)
CYGRO3; oxide fuel rod stress & deformation (CDC6600;IBM360,370; FORTRAN IV (CDC6600), FORTRAN IV and Assembly language (IBM360)), 8:20606 (R:US)

Failures
Results of simulated abnormal heating events for full-length nuclear fuel rods, 8:19813 (R:US)

Fastening
Nuclear reactor fuel rod attachment system (Patent), 8:20615 (P:US)

Fluid Flow
SCORE-EVET; three-dimensional hydraulic reactor core analysis (CDC7600,CYBER175; FORTRAN IV), 8:20610 (R:US)

Neutron Reactions
REAX; resolved resonance epithermal cros sectionss (GE635; FORTRAN IV), 8:20598 (R:US)

Performance Testing
Fuel-cladding mechanical interaction in PCI-resistant LWR fuel designs during normal operation and power-ramping. Fuel-Performance Improvement Program, 8:20327 (R:US)

Physical Radiation Effects
Correlation between fuel structure and mechanical properties of UO_2, 8:20611 (R:US)

Retrieval Systems
Nuclear reactor fuel rod attachment system (Patent), 8:20615 (P:US)

Supports
Nuclear reactor fuel rod attachment system (Patent), 8:20615 (P:US)

Temperature Effects
Results of simulated abnormal heating events for full-length nuclear fuel rods, 8:19813 (R:US)

Thermal Stresses
CYGRO3; oxide fuel rod stress & deformation (CDC6600;IBM360,370; FORTRAN IV (CDC6600), FORTRAN IV and Assembly language (IBM360)), 8:20606 (R:US)
Westinghouse FREY calculations: excessive load increase, boron dilution, and rod withdrawal at power. Final report (PWR), 8:20690 (R:US)

Thermodynamic Properties
ECCSA4; loss-of-coolant & emergency cooling (CDC6400; FORTRAN IV), 8:20566 (R:US)
Transients
MUCHA1;MUCHA2; multiple channel analysis emergency core cooling (CDC6400; FORTRAN IV), 8:20658 (R:US)
THETA1B; fuel rod thermal response loss of coolant accidents (IBM360/75; FORTRAN IV), 8:20323 (R:US)

FUEL SHEATHS
See FUEL CANS

FUEL SLUGS
See FUEL RODS

FUEL SLURRIES
Coal
Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)
Combustion
Development of coal-water slurries as boiler fuel, 8:19644 (J:US)
Combustion Properties
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Combustion of coal-oil mixtures in a 700-HP watertube boiler, 8:19634 (R:US)
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Demonstration Programs
Operating Florida Power and Light Company's Sanford Plant on coal-oil mixture, 8:19630 (RA:US)
Preliminary results from the DOE coal-oil mixture demonstration at Salem Harbor, 8:19629 (RA:US)
Environmental Effects
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Fluidized-Bed Combustion
Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)
Fuel Substitution
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Development of coal-water slurries as boiler fuel, 8:19644 (J:US)
Performance Testing
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Recommendations
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Reviews
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Rheology
Development of coal-water slurries as boiler fuel, 8:19644 (J:US)
Stability
Preliminary results from the DOE coal-oil mixture demonstration at Salem Harbor, 8:19629 (RA:US)
Settling characteristics of coal-oil mixtures and some model systems, 8:19633 (R:US)
Storage
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Viscosity
Coal-oil mixtures: an alternative fuel for the commercial sector. Annual report, fiscal year 1981, 8:19627 (R:US)
Combustion of coal-oil mixtures in a 700-HP watertube boiler, 8:19634 (R:US)

FUEL SPHERES
Corrosion
Graphite corrosion due to water vapour, 8:19800 (RA:DE:In German)

FUEL SUBSTITUTION
Demonstration Programs
Preliminary results from the DOE coal-oil mixture demonstration at Salem Harbor, 8:19629 (RA:US)
Economic Analysis
Economics of utility oil and gas substitution: national and region-specific analysis, 8:19715 (R:US)
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)
Technology and economics of close-coupled gasifiers for retrofitting gas/oil combustion units to biomass feedstock, 8:19956 (R:US)
Feasibility Studies
Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)

FUEL SUPPLIES
Comparative Evaluations
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Planning
Preparing for possible motor-fuel shortages: a community planning guide, Taos, New Mexico, 8:20955 (R:US)
Preparing for possible motor-fuel shortages: a community planning guide, Grants, New Mexico, 8:20954 (R:US)
Testing
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 1. Selection of camp 1 coal (Proposed Henderson, Kentucky coal to gasoline plant; selection and testing of coal supplies), 8:19549 (R:US)

FUEL SUSPENSIONS

DISTRIBUTION FUNCTIONS
POLYNOMIALS
SPECTRAL FUNCTIONS
STRENGTH FUNCTIONS
TRANSFER FUNCTIONS
Numerical Solution
Period doubling for trapezoid function iteration: metric theory, 8:22886 (J:US)
FUNDAMENTAL PARTICLES
See ELEMENTARY PARTICLES
FURNACE OIL
See HEATING OILS
FURNACES
See also GAS FURNACES
OIL FURNACES
WOOD BURNING FURNACES
Combustion Control
Combustion modification controls for residential and commercial heating systems. Volume I: environmental assessment. Final task report Jun 78-Sep 79, 8:20921 (R:US)
Gas Burners
Individual burner fuel/air ratio control optical adaptive feedback control system. Final report, 8:21456 (R:US)
Oil Burners
Individual burner fuel/air ratio control optical adaptive feedback control system. Final report, 8:21456 (R:US)
FURNITURE INDUSTRY
Environmental Impact Statements
Surface coating of metal furniture - background information for promulgated standards, 8:21817 (R:US)
FUSES (ELECTRIC)
See ELECTRIC FUSES
FUSION REACTORS
See THERMONUCLEAR REACTORS

G

GADOLINIUM 147
High Spin States
Nuclear shape transitions and some properties of aligned-particle configurations at high spin, 8:22374 (R:US)
GADOLINIUM 152
Energy-Level Transitions
Gamma transition mixing ratios in ^{152}Gd, 8:22378 (RA:CS:In Czech)
GADOLINIUM 153
Energy-Level Transitions
Study of ^{153}Tb decay oriented in a Gd matrix, 8:22377 (RA:CS:In Czech)
GADOLINIUM BASE ALLOYS
Magnetization
Effect of the sample preparation technique on gamma-ray asymmetry of Tb isotopes in a gadolinium matrix, 8:21071 (RA:CS:In Czech)
GADOLINIUM IONS
E1-Transitions
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
Oscillator Strengths
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
GALAXIES
See also RADIO GALAXIES
SEYFERT GALAXIES
X-RAY GALAXIES
Cosmic Gamma Sources
The interstellar medium and galactic structure, 8:22086 (R:US)
Radio Noise
Neutral hydrogen in elliptical galaxies with nuclear radio sources and optical emission lines, 8:22146 (R:US)
GALAXY CLUSTERS
X-Ray Spectra
Complete x-ray sample of the high latitude sky from HEAO-1 A-2: log N log S and luminosity functions, 8:22139 (R:US)
GALAXY NUCLEI
Central part of galaxies.
Galactic Evolution
Spectral evolution of active galactic nuclei: a unified description of the x-ray and gamma, 8:22150 (R:US)
X Radiation
X-rays from quasars and active galaxies, 8:22113 (R:US)
X-Ray Spectra
Complete x-ray sample of the high latitude sky from HEAO-1 A-2: log N log S and luminosity functions, 8:22139 (R:US)
GALLIUM 69 TARGET
Neutron Reactions
(n,α) and (n,p) reactions with 3 MeV neutrons, 8:22359 (RA:CS:In Slovak)
GALLIUM ARSENIDES
Doped Materials
Laser-controlled etching of chromium-doped <100> GaAs, 8:21171 (J:US)
Etching
Laser-controlled etching of chromium-doped <100> GaAs, 8:21171 (J:US)
Laser-Radiation Heating
Melt depth and regrowth kinetics in pulsed laser annealing of silicon and gallium arsenide, 8:21167 (R:US)
Refractivity
Dispersion of the refractive index near the absorption edge in compound semiconductors, 8:21161 (R:US)
Superlattices
Electronic properties of superlattices, 8:21166 (R:US)
GAMMA ASTRONOMY
For photon energies above 100 KeV.
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Detectors for energies greater than 10 MeV, 8:22093 (R:US)
Gamma ray interaction processes, 8:22091 (R:US)
Gamma Spectra
Analysis of observational spectra, 8:22094 (R:US)
Telescopes
Focusing and imaging sharp line x-ray and gamma-ray sources using variable-metric diffraction crystals, 8:21625 (R:US)
GAMMA CAMERAS
Photomultipliers
Cathode uniformity of new square photomultiplier tubes, 8:21569 (R:US)
GAMMA DETECTION
Cherenkov Counters
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Photomultipliers
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Scintillation Counters
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Telescopes
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Detectors for energies greater than 10 MeV, 8:22093 (R:US)
GAMMA DOSIMETRY
Calculation and interpretation of In-Situ measurements of initial radiations at Hiroshima and Nagasaki, 8:21935 (R:US)
GAMMA LOGGING
Computer Codes
Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
GAMMA RADIATION
Buildup
Gamma-ray dose at shield-tissue interfaces and buildup factor implications, 8:22528 (J:US)
Detection
Gamma ray interaction processes, 8:22091 (R:US)
Dose Rates
CLOUD; gamma-ray dose rate from a cloud (IBM360; FORTRAN IV), 8:21795 (R:US)
Focusing
A new method for focusing and imaging x-rays and gamma-rays with diffraction crystals, 8:22122 (R:US)
Focusing and imaging sharp line x-ray and gamma-ray sources using variable-metric diffraction crystals, 8:21625 (R:US)

Kerma
Air-over-ground calculations of the neutron, prompt, and secondary gamma free-in-air tissue kerma from the Hiroshima and Nagaski devices, 8:21671 (J:US)
Transport Theory
M0756;LETO; one-dimensional slab gamma-ray transport (CDC6600; FORTRAN IV), 8:22462 (R:US)
GAMMA SPECTRA
QLN1; quantitative gamma-ray spectra analysis (UNIVAC1108,1100; FORTRAN V), 8:21567 (R:US)
Data Processing
CORGAM; unfolding of complex gamma-ray spectra (IBM360/50; FORTRAN IV Level G), 8:22559 (R:US)
GASPAN; complex gamma-ray spectra analysis (CDC6600; FORTRAN IV), 8:21566 (R:US)
TOAD; processing of analyzer gamma-ray spectra (UNIVAC1108; FORTRAN IV and Assembly language), 8:22348 (R:US)
Least Square Fit
ALPHA-M; resolution of gamma-ray spectra (IBM360; FORTRAN IV), 8:22538 (R:US)
GAMMA SPECTROMETERS
Solid Scintillation Detectors
BGO in several satellite-borne applications (Bismuth germanate scintillator), 8:21580 (R:US)
GAMMA TRANSMISSION SCANNING
See PHOTON TRANSMISSION SCANNING
GAMMA-GAMMA LOGGING
Computer Codes
Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
GAMMA-RAY LASERS
See GASERS
GAS APPLIANCES
Performance
Effect of building characteristics on gas-appliance performance and end-use efficiency. Final report 1 Dec 80-31 Oct 81, 8:20917 (R:US)
Retrofitting
Effect of building characteristics on gas-appliance performance and end-use efficiency. Final report 1 Dec 80-31 Oct 81, 8:20917 (R:US)
GAS BURNERS
Combustion Control
Individual burner fuel/air ratio control optical adaptive feedback control system. Final report, 8:21456 (R:US)
Modifications
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Performance
Emissions from refinery process heaters equipped with low-Nox burners. Final report Oct 80-Jan 81, 8:19720 (R:US)
Performance Testing
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Retrofitting
Technology and economics of close-coupled gasifiers for retrofitting gas/oil combustion units to biomass feedstock, 8:19956 (R:US)
GAS COOLANTS
See GASES
GAS ENGINES
See INTERNAL COMBUSTION ENGINES
GAS FURNACES
Air Pollution Control
Experimental evaluation of NO/sub x/ control using a glass tank simulator, 8:21695 (R:US)
Design
High-efficiency, gas-fired heat-pipe, warm-air heating system. Final report on phase 1, Jun 79-Jun 81, 8:20918 (R:US)
Performance Testing
High-efficiency, gas-fired heat-pipe, warm-air heating system. Final report on phase 1, Jun 79-Jun 81, 8:20918 (R:US)
GAS LASERS
See also HELIUM-NEON LASERS
METAL VAPOR LASERS
Design
Optically pumped submillimeter-waves and applications. Final report, 8:21346 (R:US)
Electron Beam Pumping
KrF laser pumping by electron beam discharge, 8:21389 (R:FR)
Optical Pumping
Advanced solar energy conversion, 8:20011 (R:US)
Performance
Development of optically pumped molecular dimer lasers at NPL, 8:21401 (R:GB)
Population Inversion
Energetics and radiative properties of excimer lasers. Final report, 8:21371 (R:US)
GAS SATURATION
Gas saturation in formation waters: Volume 1. Annual report Apr 80-Mar 81, 8:19751 (R:US)
Gas saturation in formation waters: Volume 2. Annual report Apr 80-Mar 81, 8:19752 (R:US)
GAS SCINTILLATION DETECTORS
Design
An imaging gas scintillation proportional counter for the detection of subkiloelectron-volt x-rays, 8:21581 (R:US)
Images
An imaging gas scintillation proportional counter for the detection of subkiloelectron-volt x-rays, 8:21581 (R:US)
Proportional Counters
An imaging gas scintillation proportional counter for the detection of subkiloelectron-volt x-rays, 8:21581 (R:US)
Spatial Resolution
An imaging gas scintillation proportional counter for the detection of subkiloelectron-volt x-rays, 8:21581 (R:US)
GAS SPILLS
Boiling and spreading rates of instantaneous spills of liquid methane on water. Final report Sep 80-Aug 81, 8:19762 (R:US)
Diffusion
Formation and spreading of explosive and toxic gas clouds. A study of the literature, 8:19761 (R:SE:In several languages)
GAS STATIONS
See GASOLINE SERVICE STATIONS
GAS TURBINE ENGINES
Efficiency
Efficiency improved turboprop. Technical memo, 8:21010 (R:US)
Exhaust Gases
Determination of effects of ambient conditions on aircraft engine emissions: data analysis and correction factor generation, 8:21760 (R:US)
Fuel Consumption
Efficiency improved turboprop. Technical memo, 8:21010 (R:US)
Fuel Economy
Support and power-plant documentation for the gas-turbine-powered-bus demonstration program. Final report, 1 January 1980-30 September 1981, 8:21013 (R:US)
Performance
Support and power-plant documentation for the gas-turbine-powered-bus demonstration program. Final report, 1 January 1980-30 September 1981, 8:21013 (R:US)
GAS TURBINES
Combustors
Investigations of flowfields found in typical combustor geometries, 8:21453 (R:US)
Design
Combustion modification controls for stationary gas turbine. Volume I: environmental assessment. Final report Feb 78-Jun 80, 8:21756 (R:US)
Garrett solar Brayton engine/generator status, 8:20065 (RA:US)

Performance Testing
Garrett solar Brayton engine/generator status, 8:20065 (RA:US)

GAS UTILITIES
Cross-subsidization and competition: a case study of gas and electric utility involvement in residential energy conservation. Final report, 8:20919 (R:US)

Accounting
Report of the business year 1980 from 1st January until 31st December 1980, 8:20811 (R:DE:In German)

Financing
Delivering energy services: new challenges for California's electric utilities, 8:20853 (R:US)

Planning
Delivering energy services: new challenges for California's electric utilities, 8:20853 (R:US)

GAS WELLS
See NATURAL GAS WELLS

GASEOUS EFFLUENTS
See GASEOUS WASTES

GASEOUS WASTES
See also EXHAUST GASES
FLUE GAS

Chemical Composition
Physical and chemical characterization of fine particle in off-gases from coal combustion and oil shale retorting, 8:21707 (RA:US)

Environmental Impacts
Baseline flare system design for the SRC-I demonstration plant, 8:19478 (RA:US)

Flaring
Baseline flare system design for the SRC-I demonstration plant, 8:19478 (RA:US)

Physical Properties
Physical and chemical characterization of fine particle in off-gases from coal combustion and oil shale retorting, 8:21707 (RA:US)

GASERS
Gamma-ray Amplification by Stimulated Emission of Radiation.

Operation
On the theory of gamma ray amplification through stimulated annihilation radiation (grasar), 8:21398 (R:US)

GASES
See also ELECTRON GAS and FERMI GAS.
See also AIR
COAL GAS
EXHAUST GASES
FUEL GAS
RARE GASES
SYNTHESIS GAS

Containment
Control and dispersion of hazardous gas clouds with water sprays, 8:21440 (R:NL)

Diffusion
Control and dispersion of hazardous gas clouds with water sprays, 8:21440 (R:NL)

Entrainment
Control and dispersion of hazardous gas clouds with water sprays, 8:21440 (R:NL)

Mass Spectroscopy
Measurement of ions, trace gases and precondensation nuclei in the stratosphere by mass spectroscopy, 8:21714 (RA:DE:In German)

GASOHOL
Previous to August, 1979 this concept was indexed as gasoline AND mixtures AND ethanol or methanol.

Combustion Properties
Evaluation of plasma jet ignition for improved performance of alternate fuels. Final report Feb-Aug 82, 8:19946 (R:US)

Fire Extinguishers
Fire extinguishing tests -80 with methyl alcohol gasoline, 8:19935 (R:US:MIXED)

GASOLINE

Availability
Petroleum supply monthly, 8:19702 (R:US)

Energy Consumption
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Energy Supplies
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Fire Extinguishers
Fire extinguishing tests -80 with methyl alcohol gasoline, 8:19935 (R:US:MIXED)

Fractionation
Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)

Materials Recovery
Test evaluation of gasoline transfer vapor recovery systems, 8:20979 (R:US)

Prices
California energy prices, 1980-2000. Staff report (final), 8:19718 (R:US)
Monthly petroleum-product price report, 8:19697 (R:US)
Monthly petroleum-product price report (January 1981 through June 1982), 8:19696 (R:US)
Monthly petroleum product price report (January 1981-March 1982), 8:19694 (R:US)
Monthly petroleum product price report (January 1981-May 1982), 8:19695 (R:US)
Monthly petroleum product price report (January 1981-February 1982), 8:19693 (R:US)
Monthly petroleum product price report (January 1981-January 1982), 8:19692 (R:US)

Temperature Effects
Thermal impact of waste emplacement and surface cooling associated with geologic disposal of nuclear waste, 8:19837 (RA:US)
Thermography
Application of hcmm data to regional geologic analysis for mineral and energy resource evaluation, 8:22039 (R:US)
Geological and geothermal investigations for HCMM-derived data. Final report, June 1977 - June 1981, 8:22042 (R:US)
GEOMAGNETIC FIELD
Disturbances
Investigation of the effects of external current systems on the MAGSAT data utilizing grid cell modeling techniques, 8:22043 (R:US)
Magnetic Surveys
Investigation from Japanese MAGSAT team. Part a. crustal structure near Japan and in antarctic station. Part b. electric currents and hydromagnetic waves in the ionosphere and the magnetosphere, 8:22041 (R:JP)
GEOPHONES
See SEISMIC DETECTORS
GEOPHYSICS
Mathematical Models
Constitutive laws, tensorial invariance and chocolate cake, 8:22055 (J:NL)
Research Programs
Earth Sciences Division annual report 1981 (Lead abstract), 8:22031 (R:US)
GEOPRESSURED SYSTEMS
Geothermal Exploration
Subsidence modeling of the Pleasant Bayou geothermal geopressured region, 8:20161 (RA:US)
Stratigraphy
Subsidence modeling of the Pleasant Bayou geothermal geopressured region, 8:20161 (RA:US)
GEORGIA
Electric Utilities
Developer handbook for Section 210 of PURPA for Georgia, 8:20829 (R:US)
GEOS SATELLITES
Measuring Instruments
Measurement of plasma drifts in planetary magnetospheres, 8:22172 (R:NL)
GEOTHERMAL AREAS
See GEOTHERMAL FIELDS
GEOTHERMAL DISTRICT HEATING
Economics
Appendices of an appraisal for the use of geothermal energy in state-owned buildings in Colorado. Section E. Glenwood Springs, 8:20188 (R:US)
GEOTHERMAL ENERGY
Legal Aspects
Geothermal guidebook, 8:20164 (R:US)
Legislation
Geothermal guidebook, 8:20164 (R:US)
National Conference of State Legislators Geothermal Project. Final report, February 1978-September 1982, 8:20165 (R:US)
Research Programs
The evaluation of the Communities' geothermal energy, production and utilization of hydrogen, and systems analysis: development of models R and D sub-programmes. Research evaluation report no. 2, 8:20143 (R:US)

GEOTHERMAL FIELDS

HYDROTHERMAL SYSTEMS
MAGMA SYSTEMS
Fluid Flow
CCC; one-phase conduction convection compaction (CDC7600; FORTRAN IV), 8:20171 (R:US)
Modeling of fracture reservoirs, 8:20150 (RA:US)
TERZAGI; isothermal fluid flow & subsidence (CDC7600,CYBER175; FORTRAN IV), 8:20173 (R:US)
Heat Flow
CCC; one-phase conduction convection compaction (CDC7600; FORTRAN IV), 8:20171 (R:US)
Modeling of fracture reservoirs, 8:20150 (RA:US)
Structural Models
Generic studies of geothermal reservoir behavior, 8:20176 (RA:US)
Two-Dimensional Calculations
Heat and mass transfer in a fault-controlled geothermal reservoir charged at constant pressure, 8:20201 (J:US)
Two-Phase Flow
SHAFT79; two-phase geothermal reservoir model (CDC7600; FORTRAN IV), 8:20172 (R:US)
GEOTHERMAL WELLS
Capacity
Reservoir engineering studies of the Cerro Prieto Geothermal Field, 8:20181 (RA:US)
Fluid Flow
ANALYZE; hydrothermal reservoir test analysis (CDC7600; FORTRAN IV (99%) and COMPASS (1%)), 8:20170 (R:US)
WELBORE; transient wellbore fluid flow model (CDC7600,CYBER175; FORTRAN IV), 8:20174 (R:US)
Hydraulic Fracturing
Relationship between microseismicity and high pore pressures during hydraulic stimulation experiments in low permeability granitic rocks, 8:22056 (J:US)
Research Programs
USA program in geothermal drilling and completion research and development, 8:20182 (R:US)
Reservoir Engineering
Advances in transient well-testing methodology, 8:20159 (RA:US)
Two-Phase Flow
WELBORE; transient wellbore fluid flow model (CDC7600,CYBER175; FORTRAN IV), 8:20174 (R:US)
Well Completion
USA program in geothermal drilling and completion research and development, 8:20182 (R:US)
Well Drilling
Geothermal versus conventional drilling, 8:20184 (R:US)
USA program in geothermal drilling and completion research and development, 8:20182 (R:US)
Well Logging
Advances in transient well-testing methodology, 8:20159 (RA:US)
GERMAN DEMOCRATIC REPUBLIC
Coal Gasification
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
GERMAN FEDERAL REPUBLIC
See FEDERAL REPUBLIC OF GERMANY
GERMANIUM
Biological Fouling
Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
Crystal Structure
Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
Crystal-Phase Transformations
Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
Stability
Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
GERMANIUM CHLORIDES
Fine Structure
Extended x-ray absorption fine structure (EXAFS): a novel probe for local structure of glassy solids, 8:22231 (J:US)

GERMANIUM FLUORIDES
  Equilibrium
    Fluorogermanium(IV) salts of graphite. A system in equilibrium with elemental fluorine, 8:21261 (J:GB)
GERMANIUM OXIDES
  Fine Structure
    Extended x-ray absorption fine structure (EXAFS): a novel probe for local structure of glassy solids, 8:22231 (J:US)
GERMANY (DEMOCRATIC REPUBLIC)

GERMANY (FEDERAL REPUBLIC)
  See FEDERAL REPUBLIC OF GERMANY
GERMINATION
  Inhibition
    Germination and growth effects of hexavalent chromium in Orocol TL (a corrosion inhibitor) on Phaseolus vulgaris, 8:22013 (J:GB)
GERMS (MICROORGANISMS)
  See MICROORGANISMS
GETTERS
  Materials used for the purification of vacuum atmospheres; see also the specific materials.
  Performance Testing
    Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)
  Sorptive Properties
    Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)
GIANT CELLS
  See TUMOR CELLS
GIANT RESONANCE
    Sum-rules, strength distributions and giant resonances, 8:22418 (BA:US)
  Random Phase Approximation
    Theory of giant resonances, 8:22405 (J:US)
GINNA-1 REACTOR
  Reactor Licensing
    Systematic evaluation program. Status summary report, 8:20452 (R:US)
GKT PROCESS
  Fuel Supplies
    Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
GLASS
  See also BOROSILICATE GLASS
    PHOSPHATE GLASS
  Biological Fouling
    Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
  Fracture Properties
    Mechanical stability of a Cm-doped celsian glass-ceramic, 8:21156 (R:XE)
  Leaching
    Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
  Physical Properties
    Laser phosphate glasses, 8:21176 (TG:US)
  Physical Radiation Effects
    Mechanical stability of a Cm-doped celsian glass-ceramic, 8:21156 (R:XE)
  Production
    Conversion of shale and slate wastes to glass and glass-ceramic products. Open file report 20 Oct 76-19 Sep 79, 8:20980 (R:US)
    Development of substitutes for asbestos. Open file report 28 Sep 79-1 Apr 81, 8:20981 (R:US)
    Relationships between the sol-to-gel and gel-to-glass conversions, 8:21168 (R:US)
GLAUBER'S SALT
  See SODIUM SULFATES
GLOVEBOXES
    Chemical systems engineering progress report, January-December 1981, 8:19802 (R:US)
GLUEBALLS
  Meson Spectroscopy
    New-particle spectroscopy, quarkonium and gluonic mesons, 8:22275 (R:US)
  Particle Production
    Reaction πp p→phiphin and evidence for glueballs, 8:22279 (J:US)
GLUONIUM

GLUONS
  Bound State
    Finite size scaling and low mass glueballs, 8:22309 (J:NL)
GLYCIDES
  See SACCHARIDES
GLYCINE HISPIDA
  Productivity
    Radiological and environmental research 1980: ecology, 8:21993 (R:US)
GLYCOLS
  Vapor Generators
    Generation and characterization of ethylene glycol vapors and aerosols, 8:21260 (J:US)
GLYOXAL
  Photolysis
    Molecular-beam studies of primary photochemical processes (Photodissociation of formaldehyde, glyoxal, methylene radicals), 8:21271 (R:US)
GOLD
  Absorption Spectroscopy
    Development of an on-line gold analyser, 8:21217 (R:ZA)
  Charged-Particle Transport
    Stopping power of some lightly ionized gold ions for protons, 8:22527 (J:US)
    Subshell stopping power of the elements for protons in the Born approximation, 8:22526 (J:US)
  X-Ray Diffraction
    Optimization of planar metallic nonrefracting transmission-grating profiles for mth-order intensity maximization in the soft-x-ray range, 8:22569 (J:US)
GOLD 197 TARGET
  Alpha Reactions
    Nuclear-breakup mechanisms in the interaction of relativistic projectiles with heavy targets, 8:22383 (R:US)
  Neon 20 Reactions
    Nuclear-breakup mechanisms in the interaction of relativistic projectiles with heavy targets, 8:22383 (R:US)
  Proton Reactions
    Nuclear-breakup mechanisms in the interaction of relativistic projectiles with heavy targets, 8:22383 (R:US)
GOLD ALLOYS
  Energy Beam Deposition
    Pulsed laser mixing of Ni-Au surface films on nickel substrates, 8:21114 (BA:NL)
  Physical Radiation Effects
    Ordered alloys reveal fundamental mechanisms of neutron-damage production (Ni_3Mn; Cu_3Au), 8:21046 (R:US)
  Raman Effect
    Role of electron scattering in the surface enhanced Raman effect on Ag-Au alloys, 8:21112 (J:GB)
GOLD ORES
  Ore Processing
    Development of an on-line gold analyser, 8:21217 (R:ZA)
GRAIN ALCOHOL
  See ETHANOL
GRAIN BOUNDARIES
  Diffusion
    Diffusion mechanisms in grain boundaries in solids, 8:21035 (R:US)
    Diffusion mechanisms in grain boundaries in metals, 8:21064 (R:US)
  Segregation
    Atomistic studies of grain boundaries with segregated impurities. Progress report, Jul 1, 1982-Jun 30, 1983, 8:21066 (R:US)

GRANITES
- **Fluid Flow**
  - Geophysical borehole measurements in low-permeability rock, 8:22047 (RA:US)
- **Fracture Mechanics**
  - Theoretical model of fluid flow through a deformable rock fracture, 8:22059 (RA:US)
- **Geochemistry**
  - Research on nuclear waste isolation at Stripa: an overview, 8:19846 (RA:US)
- **Hydraulic Fractures**
  - Determination of the state of stress at the Stripa mine, Sweden, 8:19851 (RA:US)
- **Hydrology**
  - Research on nuclear waste isolation at Stripa: an overview, 8:19846 (RA:US)
- **Isotope Dating**
  - Radiogeologic assessment for nuclear waste isolation: studies of the Stripa pluton, 8:19847 (RA:US)
- **Mechanical Properties**
  - Mechanical and transport properties of rocks at high temperatures and pressures. Task III. Technical progress report Number 3, 1 March 1982-30 October 1982, 8:22057 (R:US)
- **Permeability**
  - Determining size and interconnection of fractures from constant-head well tests, 8:22033 (RA:US)
  - Geophysical borehole measurements in low-permeability rock, 8:22047 (RA:US)
  - Measurement of low rates of water inflow by monitored evaporation in the large-scale permeability experiment at Stripa, 8:22061 (RA:US)
- **Temperature Effects**
  - Analysis of temperature data from the full-scale heater experiments at Stripa, 8:19849 (RA:US)
  - Rod-type extensometers in long-term elevated temperature service, 8:19850 (RA:US)
- **Thermal Stresses**
  - Determination of the state of stress at the Stripa mine, Sweden, 8:19851 (RA:US)
- **Thermodynamic Properties**
  - Analysis of temperature data from the full-scale heater experiments at Stripa, 8:19849 (RA:US)
  - Coupled hydrologic-thermomechanical experiments for radioactive waste isolation, 8:19836 (RA:US)
  - Thermomechanical properties of Stripa granite, 8:19848 (RA:US)
- **Well Logging**
  - Geophysical borehole measurements in low-permeability rock, 8:22047 (RA:US)

GRANULAR MATERIALS

For unspecified materials having a granular texture.
- **Mass Transfer**
  - Particle-dynamics calculations of shear flow, 8:22234 (R:US)
- **Shear Properties**
  - Explicit particle-dynamics model for granular materials, 8:21685 (R:US)

GRAPHITE
- **Absorptivity**
  - Carbon particles in the Arctic, 8:21739 (RA:US)
- **Aerosols**
  - Theoretical studies of the thermal decomposition of carbonaceous aerosol particulates, 8:21741 (RA:US)
- **Compression Strength**
  - Feasibility of monitoring the strength of HTGR core support graphite: Part III, 8:20403 (R:US)
- **Corrosion**
  - Graphite corrosion due to water vapour, 8:19800 (RA:DE:In German)
  - Graphite corrosion in the HTR-type pebble bed reactor during accidents with air leakage and effects of air leakage combined with water ingress, 8:20694 (RA:DE:In German)
- **Equilibrium**
  - Fluorogermanium(IV) salts of graphite. A system in equilibrium with elemental fluorine, 8:21261 (J:GB)
- **Hydrogenation**
  - Study of the behaviour of pyrite during hydrogenation of graphite, 8:19520 (RA:XE:In French)
- **Neutron Spectroscopy**
  - Neutron scattering investigation of layer-bending modes in alkali-metal—graphite intercalation compounds, 8:21130 (J:US)
- **Phonons**
  - Neutron scattering investigation of layer-bending modes in alkali-metal—graphite intercalation compounds, 8:21130 (J:US)
- **Physical Radiation Effects**
  - Preliminary analysis of accelerated space flight ionizing radiation testing, 8:21142 (R:US)

    Hard x-ray astrophysics, 8:22125 (R:US)
  Image Processing
    Hard x-ray imaging from explorer, 8:22117 (R:US)
HAWAII
  Research Programs
    Annual report, July 1981-June 1982, 8:20012 (R:US)
HAZARDOUS MATERIALS
  Not for radioactive materials.
  Chronic Exposure
    Industrial hygiene study of TVA workers in coal-fired power plants, 8:19666 (R:US)
  Toxicity
    Industrial hygiene study of TVA workers in coal-fired power plants, 8:19666 (R:US)
  Waste Disposal
    Tri-State Synfuels Project Review: Volume 7. Permitting, environmental impact statement and related environmental information (Proposed Henderson, Kentucky coal to gasoline plant), 8:19503 (R:US)
  Waste Storage
    Notification of hazardous waste sites required under Section 103(c) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980: EPA region 2, 8:21844 (R:US)
    Notification of hazardous waste sites required under Section 103(c) of the CompRehensive Environmental response, Compensation and Liability Act (CERCLA) of 1980: EPA region 3, 8:21845 (R:US)
    Notification of hazardous waste sites required under Section 103(c) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980: EPA region 5, 8:21846 (R:US)
    Notification of hazardous waste sites required under Section 103(c) of the CompRehensive Environmental response, Compensation and Liability Act (CERCLA) of 1980: EPA region 7, 8:21847 (R:US)
HAZARDOUS MATERIALS SPILLS
  Air Pollution Control
    Evaluation of foams for mitigating air pollution from hazardous spills. Final report 29 Oct 76-31 Jul 80, 8:21758 (R:US)
HCDA
  See REACTOR CORE DISRUPTION
H-COAL PROCESS
  By-Products
    Current status of H-Coal commercialization, 8:19404 (RA:US)
  Catalysis
    Current status of H-Coal commercialization, 8:19404 (RA:US)
  Environmental Effects
    H-Coal Pilot Plant: surface- and ground-water monitoring program for H-Coal solid-waste storage and disposal site, E and H-11, 8:19596 (R:US)
  Industrial Medicine
    H-Coal Pilot Plant: worker health-protection training program at the H-Coal Pilot Plant, E and H-3, 8:19427 (R:US)
  Oil Yields
    Current status of H-Coal commercialization, 8:19404 (RA:US)
  Organic Solvents
    Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
  Pilot Plants
    H-Coal Pilot Plant: worker health-protection training program at the H-Coal Pilot Plant, E and H-3, 8:19427 (R:US)
    H-Coal Pilot Plant: surface- and ground-water monitoring program for H-Coal solid-waste storage and disposal site, E and H-11, 8:19596 (R:US)
    H-Coal Pilot Plant: radiation safety, 8:19428 (R:US)
    SRC-I high-pressure slurry letdown system study, 8:19479 (RA:US)
  Radiometric Gages
    H-Coal Pilot Plant: radiation safety, 8:19428 (R:US)

  Biological Fouling
    Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
  Caking
    Recovery of heat from exhaust air of spray driers in the dairy industry. Summary report (final), 8:20976 (R:US)

Cooling
Fluidised Bed Combustion Project, Grimethorpe Experimental Facility, 8:20259 (R:US)
Corrosion
Simulated heat-exchanger tubes: DOE Geothermal Test Facility, East Mesa, California. Corrosion test report, 8:20175 (R:US)
Design
Evaluation of the Argonne multi-tube hydride heat exchanger, 8:21332 (R:US)
Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - performance of the exhaust-gas heat exchangers, 8:20261 (R:US)
Failures
Fluidised Bed Combustion Project, Grimethorpe Experimental Facility, 8:20259 (R:US)
Fouling
Recovery of heat from exhaust air of spray driers in the dairy industry. Summary report (final), 8:20976 (R:US)
Heat Transfer
Heat transfer from combustion gases to a single row of closely spaced tubes in a swirl crossflow Stirling engine heater, 8:20070 (J:US)
Instability
Fluidelastic instability in shell and tube heat exchangers: a framework for a prediction method, 8:20961 (R:US)
Performance
Evaluation of the Argonne multi-tube hydride heat exchanger, 8:21332 (R:US)
Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - performance of the exhaust-gas heat exchangers, 8:20261 (R:US)
Specifications
Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)
Stress Analysis
TUBE; u-tube heat exchanger stress analysis (CDC6600; FORTRAN IV), 8:21319 (R:US)
Stress Corrosion
Fluidised Bed Combustion Project, Grimethorpe Experimental Facility, 8:20259 (R:US)

HEAT PIPES
Performance Testing
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)
Specifications
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)
Test Facilities
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)

HEAT PUMPS
See also SOLAR-ASSISTED HEAT PUMPS
WATER SOURCE HEAT PUMPS
Coefficient of Performance
Analysis of the factors which determine the COP of a heat pump and a feasibility study on ways and means of increasing same, 8:20902 (R:XE)
Construction
Design, construction and testing of a gas engine driven high temperature industrial heat pump, 8:20973 (R:XE)
Design
Design, construction and testing of a gas engine driven high temperature industrial heat pump, 8:20973 (R:XE)
Internal Combustion Engines
Design, construction and testing of a gas engine driven high temperature industrial heat pump, 8:20973 (R:XE)
Performance
Evaluation of the Vuilleumier heat pump for heating applications. Vtt research report, 8:20916 (R:US)
Research Programs
Analysis of the factors which determine the COP of a heat pump and a feasibility study on ways and means of increasing same, 8:20902 (R:XE)
Technology Assessment
An assessment of vapor compression heat pump technology and applications for industrial processes. Final report Nov 80-Feb 82, 8:20975 (R:US)
Testing
Design, construction and testing of a gas engine driven high temperature industrial heat pump, 8:20973 (R:XE)
Vapor Compression Refrigeration Cycle
An assessment of vapor compression heat pump technology and applications for industrial processes. Final report Nov 80-Feb 82, 8:20975 (R:US)
Waste Heat Utilization
Heat pumps for air conditioning in animal shelters and for heating of buildings, 8:20974 (R:DE:In German)

HEAT RECOVERY
Computerized Simulation
Generic studies of geothermal reservoir behavior, 8:20176 (RA:US)

HEAT RECOVERY EQUIPMENT
Design of heat-recovery and seed-recovery units in MHD power generation, 8:20878 (R:US)
Elastomers
Energy production from waste heat by means of elastomers or memory metals, 8:20993 (TG:US)
Ferromagnetic Materials
Energy production from waste heat by means of elastomers or memory metals, 8:20993 (TG:US)
Fouling
Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)
Performance Testing
Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)
Shape Memory Effect
Energy production from waste heat by means of elastomers or memory metals, 8:20993 (TG:US)

HEAT RESISTING ALLOYS

HELIUM
Atom-Molecule Collisions
Vibrational-rotational energy transfer in collisions of HF ($v = 4$, $J = 20$) with rare gases, 8:22207 (J:US)
Backscattering
Energy and angle correlations of low energy backscattered light atoms, 8:22211 (J:NL)
Collisions
Application of the semiclassical perturbation (SCP) approximation to diffraction and rotationally inelastic scattering of atoms and molecules from surfaces, 8:22208 (J:US)
Compatibility
Compatibility studies of structural alloys with solid breeder materials, 8:22723 (RA:US)
Electron-Atom Collisions
The multiple scattering optical potential for scattering of electrons on he atom, 8:22204 (R:US)
Energy-Level Transitions
Doubly excited states in some light atoms, 8:22180 (R:US)
Impurities
Helium impurities in a PNP-primary coolant circuit, 8:20397 (RA:DE:In German)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Muonic Atoms
Theoretical hyperfine structure of the muonic ^{3}He and ^{4}He atoms, 8:22210 (J:US)
Phase Transformations
The metallization of some simple systems, 8:22554 (BA:NL)
Photon-Atom Collisions
Stieltjes-Tchebycheff moment-theory approach to photoeffect studies in Hilbert space, 8:22230 (BA:US)
Potentials
Stochastic calculation of interaction energies, 8:22218 (J:US)
HELIUM 3 TARGET
Kaon Minus Reactions
(K^-,K^+) reaction and the dibaryon H, 8:22304 (J:US)
HELIUM 4 REACTIONS
See ALPHA REACTIONS
HELIUM DILUTION REFRIGERATORS
Design
A study of design principles for refrigerators for low-power cryoelectronic devices, 8:21348 (R:US)
HELIUM IONS
Electron-Ion Collisions
H-Division quarterly report, July-September 1982, 8:22564 (R:US)
Velocity
Helium, hydrogen, and oxygen velocities observed on isee-3, 8:22158 (R:US)
HELIUM-NEON LASERS
Frequency Control
Frequency dependence of a 633-nm He-Ne laser stabilized bby $^{127}I_2$, upon iodine pressure, modulation amplitude, and wall temperature, 8:21400 (R:GB)
Performance
Power shifts of a 633-nm $^{127}I_2$ stabilized He-Ne laser, for various mirror curvatures, 8:21406 (B:GB)

HELMHOLTZ THEOREM
  Boundary Conditions
    Boundary conditions for the numerical solution of elliptic equations in exterior regions, 8:22591 (J:US)
HEMATOPOIETIC SYSTEM
  Biological Radiation Effects
    Health effects from internally deposited radionuclides released in nuclear disasters, 8:21984 (BA:US)
HEMICELLULOSE
  Hydrolysis
    Autohydrolysis of organic residue to increase biodegradability to methane, 8:19938 (RA:US)
HERMITIAN MATRIX
  Eigenvalues
    Solving symmetric-definite quadratic λ-matrix problems without factorization, 8:22592 (J:US)
  Eigenvectors
    Solving symmetric-definite quadratic λ-matrix problems without factorization, 8:22592 (J:US)
HETEROCYCLIC COMPOUNDS
  See also PHTHALOCYANINES
  THIOPHENE
  Electronic Structure
    Bechgaard salts: magnetotransport, dimensionality, spin-density waves, and the threshold field (2:1 salts of tetramethyltetraselenafulvalenium), 8:22558 (R:US)
  Photolysis
    Gas-phase radiolysis and vacuum-ultraviolet photolysis of heterocyclic organic compounds, 8:21265 (R:US)
HETEROJUNCTIONS
  Prior to July 1981, this concept was indexed to SEMICONDUCTOR JUNCTIONS.
  Electrical Properties
    Investigation of deep level defects in epitaxial semiconducting. Progress report, June 15, 1982-June 14, 1983 (N-n ZnSe/GaAs), 8:21158 (R:US)
HEXAGONAL LATTICES
  Neutron Reactions
    HEXSCAT; elastic scattering cross sections hexagonal lattice (UNIVAC1108; FORTRAN IV), 8:22449 (R:US)
  Resonance Escape Probability
    RESQ2;RESQ0;DBFL; resonance integral for a hexagonal cell (CDC6600; FORTRAN IV (98%) and ASCENT (2%)), 8:20601 (R:US)
HEXANE
  Catalytic Reforming
    Steam reforming of n-hexane on pellet and monolithic catalyst beds. A comparative study on improvements due to heat transfer, 8:19781 (R:US)
  Molecular Weight
    Enthalpy measurement of coal-derived liquids. Technical progress report, November 1982-January 1983, 8:19559 (R:US)
HFIR REACTOR
  Reactor Operation
    High flux isotope reactor quarterly report, October through December, 1982, 8:20650 (R:US)
HGI2 SEMICONDUCTOR DETECTORS
  Fabrication
    Review of mercuric iodide development program in Santa Barbara, 8:21572 (R:US)
  Reviews
    Introduction to fifth international workshop on mercuric iodide nuclear radiation detectors, 8:21570 (R:US)
HIGH ALTITUDE (STRATOSPHERE)
  See STRATOSPHERE
HIGH BTU GAS
  Over 900 Btu/ft³.
  Prices
    Commercialization of coal gasification in the US: Great Plains Gasification Associates, 8:19413 (RA:US)
HIGH ENERGY PHYSICS
  Use only for articles of a very broad nature such as an annual research program, etc.
  Accelerators
    Future accelerators and their contributions, 8:22246 (R:US)
    Remarks on future accelerators and future physics, 8:21474 (R:US)
  Calorimetry
    Calorimetry in high-energy physics, 8:21612 (J:US)
  Experiment Planning
    Low energy frontier, 8:22247 (RA:US)
  Meetings
    Proceedings of Summer Institute of Particle Physics, July 27-August 7, 1981: the strong interactions, 8:22301 (R:US)
  Research Programs
    Experimental medium-energy physics at Carnegie-Mellon University, 1968-1983, 8:22252 (R:US)
    High-energy physics at Tufts University. Final report, 8:22244 (R:US)
    Research program in elementary particle theory. Progress report for the period ending June 30, 1983, 8:22245 (R:US)

HIGH-LEVEL RADIOACTIVE WASTES
  Diffusion
    Sorptive diffusion in clay gels, 8:19844 (RA:US)
HIGHLY ENRICHED URANIUM
  80 - 100 per cent.
  Nuclear Materials Management
    Examples of MC and A systems to meet prompt accountability specifications, 8:19897 (R:US)
  Nuclear Reaction Analysis
    Model for absorption-modified multiplication effects in the assay of HEU-containing powders in a random driver, 8:19898 (J:US)
HIGHWAYS
  See ROADS
HIROSHIMA
  A-Bomb Survivors
    Mortality among atomic bomb survivors, October 1945-September 1964. ABCC Technical Report 6-69, 8:21667 (R:US:In English and Japanese)
HODOSCOPES
    In-situ material-motion diagnostics and fuel radiography in experimental reactors, 8:20637 (R:US)

Fuel Motion Detection
Time-resolved and time-integrated radiography of fast reactor fuel elements, 8:20677 (R:US)

HOG FUEL
See WOOD WASTES

HOLMIUM ISOTOPES
Energy Levels
Low lying 1^+ and 2^- states in doubly-odd terbium, holmium, and thulium nuclei, 8:22382 (J:NL)

HOSPITALS
Energy Management
Millions can be saved through better energy management in federal hospitals, 8:20904 (R:US)
Photovoltaic Power Supplies
Photovoltaic concentrator application experiment. Final report, 8:20033 (R:US)

HOT CELLS
Decontamination
Radioactive hot cell access hole decontamination machine (Patent), 8:21359 (P:US)

HOT GAS CLEANUP
Equipment
Review of gas cleanup systems for fluidized-bed coal combustors, 8:20245 (R:US)
Feasibility Studies
Development of a process for the simultaneous high-temperature removal of alkali and particulates in pressurized gasification systems, 8:19462 (RA:US)

HOT PLASMA
Interstellar, intracluster and supercluster gas, 8:22112 (R:US)

HOT-DRY-ROCK SYSTEMS
Hydraulic Fracturing
Relationship between microseismicity and high pore pressures during hydraulic stimulation experiments in low permeability granitic rocks, 8:22056 (J:US)
Inventories
Candidate sites for future hot-dry-rock development in the United States, 8:20149 (R:US)

HOUSES
Energy Conservation
SBI low energy house model 79 - with a 410 mm cavity brick wall, 8:20937 (R:DK:In Danish)
Fuel Cells
High-efficiency residential fuel-cell energy systems. Final report, 8:20889 (R:US)
Photovoltaic Power Supplies
ARCO Solar final report: fabrication of a prototype system for residences in the Southwest, 8:20038 (R:US)
Photovoltaic-system evaluation at the Northeast Residential Experiment Station. Final report, November 1980-May 1982, 8:20035 (R:US)
Solarex final report: design and fabrication of a prototype system for a photovoltaic residence in the Southwest, 8:20037 (R:US)
The U.S. National Photovoltaic Program, 8:20049 (J:US)
Solar-Assisted Heat Pumps
Analysis of the factors which determine the COP of a heat pump and a feasibility study on ways and means of increasing same, 8:20902 (R:XE)
Sun Shades
Heat transfer through transparent and non-transparent outer walls with a curtain of adjustable light shades, 8:20910 (R:DE:In German)

HPDE

Neutron Diffusion Equation
FEVER; one-dimensional, few-group diffusion depletion program (CDC CYBER73,175;CDC7600; FORTRAN IV), 8:20390 (R:US)
Neutron Reflectors
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
Planning
High Temperature Gas-Cooled Reactor Steam Cycle/Cogeneration Lead Project Decision Package: executive summary, 8:20487 (R:US)
HTGR Steam Cycle/Cogeneration Design Development Plan for Nuclear Steam Supply System. Volume II. Design development plan, 8:20483 (R:US)
Power Distribution
Development of a three-dimensional computer code for reconstructing power distributions by means of side reflector instrumentation and determination of the capabilities and limitations of this method, 8:20393 (R:DE:In German)
Pressure Vessels
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)

Primary Coolant Circuits
Basic aspects of HTR chemistry, 8:20396 (RA:DE:In German)
Behaviour of fission- and activation products in the cooling circuit, 8:20399 (RA:DE:In German)
Helium impurities in a PNP-primary coolant circuit, 8:20397 (RA:DE:In German)
High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)
HTGR steam-cycle/cogeneration lead plant design and cost report. Volume II. Nuclear Steam Supply System, 8:20484 (R:US)
Tritium-balance in the HTR-type reactor, 8:20400 (RA:DE:In German)
Process Heat
Development trends of the high-temperature reactor, 8:20395 (RA:DE:In German)
Radioactivity
GADOSE;DOSET; HTGR accident analysis dose calculations (UNIVAC1108; FORTRAN IV), 8:20391 (R:US)
Reactor Accidents
Application of the lines-of-protection concept to the HTGR-SC/C, 8:20688 (R:US)
Graphite corrosion in the HTR-type pebble bed reactor during accidents with air leakage and effects of air leakage combined with water ingress, 8:20694 (RA:DE:In German)
HEXEREI2; HTGR thermal-hydraulic analysis (IBM360; FORTRAN IV (99%) and BAL (1%)), 8:20667 (R:US)
Reactor Components
HTGR steam-cycle/cogeneration technology development plan for Nuclear Steam Supply System. Volume III. Technology development plan, 8:20482 (R:US)
Reactor Control Systems
High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)
Reactor Cores
Feasibility of monitoring the strength of HTGR core support graphite: Part III, 8:20403 (R:US)
Reactor Internals
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
Reactor Materials
FY1983 HTGR summary level program plan, 8:20481 (R:US)
HTGR steam-cycle/cogeneration technology development plan for Nuclear Steam Supply System. Volume III. Technology development plan, 8:20482 (R:US)
Reactor Operation
Licensed operating reactors. Status summary report, 8:20450 (R:US)
Licensee Event Report (LER) compilation for month of January 1983, 8:20463 (R:US)
Reactor Protection Systems
Application of the lines-of-protection concept to the HTGR-SC/C, 8:20688 (R:US)
Specifications
Modular HTGR systems design and cost summary, 8:20480 (R:US)
Monolithic HTGR - reformer design and cost summary: thermochemical pipeline application, 8:20479 (R:US)
Steam Generators
Program module simulating a gas-heated steam generator with steam condensation in the primary flow channel, 8:20402 (R:DE)
Steam Systems
High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)
HTGR steam-cycle/cogeneration lead plant design and cost report. Volume II. Nuclear Steam Supply System, 8:20484 (R:US)
Temperature Distribution
FLAC; steady-state flow, pressure distribution (UNIVAC1108;IBM370;CDC6600; FORTRAN V (UNIVAC1108) and FORTRAN IV (IBM370 and CDC6600)), 8:20568 (R:US)
Thermal Insulation
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)

HUGENHOLTZ-PINES THEORY
See HYDROGEN

HUMAN POPULATIONS
See also A-BOMB SURVIVORS
Body Burden
History of population exposure due to radioactive fallout. I. History of ^{90}Sr content in bones of population of the CSR, 8:21957 (RA:CS:In Czech)
Contamination
History of population exposure due to radioactive fallout. II. History of daily dietary ^{90}Sr intake of population, 8:21958 (RA:CS:In Czech)
Delayed Radiation Effects
Selection of statistical tests in epidemiological study of delayed radiation effects, 8:21953 (RA:CS:In Czech)
Some methodological aspects of epidemiological study into delayed radiation effects, 8:21952 (RA:CS:In Czech)
Mortality
Some methodological aspects of epidemiological study into delayed radiation effects, 8:21952 (RA:CS:In Czech)
Radiation Doses
ARRRG;FOOD; aquatic & terrestrial radiation (UNIVAC1100; FORTRAN), 8:21943 (R:US)
HERMES; regional radiological effects analysis (UNIVAC1108; FORTRAN IV and SLEUTH), 8:20663 (R:US)
PABLM; accumulated environment radiation dose (UNIVAC1100; FORTRAN), 8:21944 (R:US)
Problems of assessing increased radon level in drinking water, 8:21872 (RA:CS:In Czech)
RSAC; radiological safety analysis program (IBM360; FORTRAN IV and Assembly language), 8:20652 (R:US)
Study of natural gamma background from geological ground rock in Central Slovakian Region, 8:21837 (RA:CS:In Slovak)
Summary of annual environmental reports for CY 1981: Department of Energy nuclear sites, 8:21831 (R:US)
Sociology
Goals, processes, and indicators of development: a project description, 8:20774 (R:JP)

HUMANS
See HUMAN POPULATIONS

HVAC SYSTEMS
For heating, ventilating, and air conditioning systems, see SPACE HVAC SYSTEMS.
Voltage Regulators
High-voltage-gradient zinc oxide varistors: fabrication and properties, 8:20310 (R:US)

HVDC SYSTEMS
69 to 230 kV.
Control Systems
Characteristics of an equidistant firing system in 12-pulse converter bridges for HVDC, 8:20311 (R:US)
Rectifiers
Advanced power-conversion concepts for HVDC transmission systems, 8:20309 (R:US)

HYBRID ELECTRIC-POWERED VEHICLES
Institutional Factors
Social, institutional, and public-safety impacts of electric and hybrid vehicles, 8:21026 (R:US)
Safety
Social, institutional, and public-safety impacts of electric and hybrid vehicles, 8:21026 (R:US)
Socio-Economic Factors
Social, institutional, and public-safety impacts of electric and hybrid vehicles, 8:21026 (R:US)
Technology Assessment
Synthetic fuels for transportation. Background Paper Number 1: the future potential of electric and hybrid vehicles, 8:21029 (R:US)

HYBRID REACTORS
Breeding Blankets
Hybrid reactors, 8:22770 (BA:DE)
Design
Preliminary conceptual design study of a suppressed-fission tokamak hybrid, 8:22745 (R:US)
Thermonuclear Fuels
Tritium-assisted deuterium-based fusion breeders, 8:22702 (R:US)
HYDRATES
For chemical compounds or minerals.
Quantity Ratio
Hydroscopic and hydrate water in aerosols and their effect on fine-particle mass and on atmospheric extinction, 8:21697 (R:US)
HYDRAULIC FRACTURES
Crack Propagation
In-situ stress variations and hydraulic-fracture containment in layered rock: observations from a mineback experiment, 8:19767 (R:US)
Mathematical Models
Study on the propagation of hydraulic fractures in rocks (etude sur la propagation des fractures hydrauliques dans les roches). Final report, 8:19766 (R:US)
HYDRAULIC FRACTURING
Field Tests
Study on the propagation of hydraulic fractures in rocks (etude sur la propagation des fractures hydrauliques dans les roches). Final report, 8:19766 (R:US)
HYDRAULIC RAMS
See PUMPS
HYDRAZINE
Production
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)
HYDROCARBON LOGGING
See WELL LOGGING
HYDROCARBONS

PHENANTHRENE
POLYCYCLIC AROMATIC HYDROCARBONS
PYRENE
TETRALIN
TOLUENE
XYLENES
Adsorption
Hydrocarbon content of the vapor phase and light-oil fraction in the output stream of the METC gasifier (Tenax GC for adsorption of higher molecular weight hydrocarbons), 8:19472 (R:US)
Air Pollution
Evaluation of system variables in stage II refueling operations. Final report, 8:21766 (R:US)
Air Pollution Abatement
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Chemical Analysis
Extractable organic matter in municipal wastewaters. 2. Hydrocarbons: molecular characterization, 8:21258 (J:US)
Chemical Reaction Kinetics
Smog chamber experiments to test oxidant related control strategy issues. Final report 1978-81, 8:21759 (R:US)
Chemisorption
Experimental studies of the geometric and electronic structure of chemisorption binding. Final report Feb 80-Jan 81, 8:21219 (R:US)
Deposition
Electrostatic technology for control of dust and hydrocarbon vapors in high power laser systems. Final report, 8:21374 (R:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Materials Recovery
Evaluation of system variables in stage II refueling operations. Final report, 8:21766 (R:US)
Shear Properties
Shear modulus measurements on classical monolayer systems, 8:21180 (J:US)
Storage
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Thermodynamic Properties
THERPP; thermodynamic properties hydrocarbons (CDC7600;IBM360,370,303x; FORTRAN IV), 8:21153 (R:US)
Toxicity
Megration of low molecular weight additives in poluolefins and copolumers. Final report, 8:22004 (R:US)
HYDROCHLORIC ACID
Ecological Concentration
Determination of traces of HCl in the troposphere and stratosphere, 8:21724 (RA:DE:In German)
Solvent Properties
Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
HYDROCYCLONES
See CYCLONE SEPARATORS
HYDROELECTRIC POWER PLANTS

SMALL-SCALE HYDROELECTRIC POWER PLANTS
Appropriate Technology
Appropriate technology for planning hydroelectic power projects in Nepal: the need for assumption analysis. Technical report, 8:19962 (R:US)
Capacity
Age and capacity profile of electric-generation plants in the United States, 8:20852 (R:US)
Capitalized Cost
Wynoochee Hydropower/Fish Hatchery: feasibility report and environmental impact statement. Final report, 8:19959 (R:US)
Environmental Impacts
Black Bear Lake project, FERC No. 5715 - Alaska. Draft Environmental Impact Statement, 8:19963 (R:US)
Feasibility Studies
Wynoochee Hydropower/Fish Hatchery: feasibility report and environmental impact statement. Final report, 8:19959 (R:US)
Planning
Appropriate technology for planning hydroelectic power projects in Nepal: the need for assumption analysis. Technical report, 8:19962 (R:US)
Power Generation
Electric Power Monthly (For September 1982), 8:20821 (R:US)
Electric power monthly (For January 1982), 8:20818 (R:US)
Service Life
Age and capacity profile of electric-generation plants in the United States, 8:20852 (R:US)
HYDROFLUORIC ACID
Atom-Molecule Collisions
Vibrational-rotational energy transfer in collisions of HF ($v = 4, J = 20$) with rare gases, 8:22207 (J:US)
Infrared Spectra
Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)
Vibrational States
Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)
HYDROGEN
Absorption Spectra
H_2 and HD spectroscopic status, 8:22130 (R:US)

Adsorption Isotherms
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)
Air Pollution
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Atom-Molecule Collisions
Incorporation of collinear exact quantum reaction probabilities into three-dimensional transition-state theory, 8:21236 (J:US)
Backscattering
Energy and angle correlations of low energy backscattered light atoms, 8:22211 (J:NL)
Collisions
Application of the semiclassical perturbation (SCP) approximation to diffraction and rotationally inelastic scattering of atoms and molecules from surfaces, 8:22208 (J:US)
Combustion
Application of CARS to obtain temperature in flame environments. Final report, 8:19773 (R:US)
Fundamental combustion and diagnostics research at Sandia. Progress report, October-December 1982, 8:21302 (R:US)
Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983, 8:21295 (R:US)
Consumption Rates
LC-Finer catalyst testing, 8:19485 (RA:US)
Desorption
Surface chemical information from electron- and photon-stimulated desorption, 8:21273 (R:US)
Economics
Energy LP modelling prospects for NDF hydrogen. Final report, 8:19931 (R:GB)
Energy Policy
Energy LP modelling prospects for NDF hydrogen. Final report, 8:19931 (R:GB)
Fluorescence Spectroscopy
Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983, 8:21295 (R:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Ion-Atom Collisions
Electron capture in low-energy collisions of C/sup q/+ and O/sup q/+ with H and H_2, 8:22212 (J:US)
Ion-Molecule Collisions
Electron capture in low-energy collisions of C/sup q/+ and O/sup q/+ with H and H_2, 8:22212 (J:US)
Meetings
Miami international symposium on metal-hydrogen systems, 8:19929 (R:US)
Nuclear Reaction Analysis
Applications of nuclear reaction analysis for determining hydrogen and deuterium distribution in metals, 8:21195 (R:US)
Phase Transformations
The metallization of some simple systems, 8:22554 (BA:NL)
Photon-Atom Collisions
Moment techniques in atomic and molecular scattering theory, 8:22229 (BA:US)
Stieltjes-Tchebycheff moment-theory approach to photoeffect studies in Hilbert space, 8:22230 (BA:US)
Potentials
Stochastic calculation of interaction energies, 8:22218 (J:US)
Purification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Recycling
Recycling studies in the ISX-B by monitoring the hydrogen alpha emission, 8:22759 (J:NL)
Separation Processes
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)
Superconductivity
Critical fields of liquid superconducting metallic hydrogen, 8:22557 (R:US)
Thermalization
Electron thermalization in gases. V. Diatomic molecules H_2, N_2, and CO, 8:22522 (J:US)
Ultraviolet Spectra
H_2 and HD spectroscopic status, 8:22130 (R:US)

HYDROGEN 2
See DEUTERIUM

HYDROGEN 3

HYDROGEN IONS 1 PLUS
Velocity
Helium, hydrogen, and oxygen velocities observed on isee-3, 8:22158 (R:US)

HYDROGEN IONS 1 MINUS
For H_1^- ions.
Ion Sources
Improved Cs^0 source for the production of polarized H^- ions, 8:22192 (R:US)
Photon-Ion Collisions
Moment techniques in atomic and molecular scattering theory, 8:22229 (BA:US)
Stieltjes-Tchebycheff moment-theory approach to photoeffect studies in Hilbert space, 8:22230 (BA:US)
Polarized Beams
Improved Cs^0 source for the production of polarized H^- ions, 8:22192 (R:US)
Positron-Atom Collisions
Moment techniques in atomic and molecular scattering theory, 8:22229 (BA:US)

HYDROGEN IONS 1 PLUS
For H_1^+ ions.
Collisions
Angular distribution of Pb L x-rays excited by 3 MeV protons, 8:22224 (J:US)

HYDROGEN ISOTOPES
See also DEUTERIUM
TRITIUM
Infrared Spectra
Collision induced sharp features in the infrared spectrum of HD, 8:22131 (R:US)

HYDROGEN LOGS
See NEUTRON LOGGING
NEUTRON-GAMMA LOGGING
NEUTRON-NEUTRON LOGGING

HYDROGEN NITRATES
See NITRIC ACID

HYDROGEN PRODUCTION
Autothermal Reformer Processes
Autothermal reforming of sulfur-free and sulfur-containing hydrocarbon liquids, 8:19914 (R:US)
Biophotolysis
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)

Biochemical approach to solar hydrogen production, 8:19926 (RA:US)
Enhancement of H_2 production by photosynthetic bacteria, 8:19921 (RA:US)
Oxygen-evolution patterns from oxygen-evolving photosystem II particles, 8:19920 (RA:US)
Photo/biological hydrogen program progress reports, 8:19919 (R:US)
Studies on algal hydrogenase and hydrogen metabolism, 8:19922 (RA:US)
Study of hydrogen production by tropical marine photosynthetic bacteria for applied systems: the second year study, 8:19923 (RA:US)

Biosynthesis
Biochemical genetics and regulation of hydrogenase in Escherichia coli and Anabaena variabilis, 8:19925 (RA:US)
Photoproduction of H_2 from cellulose by an anaerobic bacterial coculture, 8:19924 (RA:US)
Use of immobilized hydrogenase for hydrogen production-final report, 8:19918 (R:US)

Electrolysis
Design and construction of electrolyzers with solid electrolyte using Nafion membranes. Final report, 8:19913 (R:XE)
Effect of surface roughness on the hydrogen evolution reaction kinetics with mild steel and nickel cathodes, 8:19927 (J:GB)
Gas bubble behaviour and ohmic potential drop during water electrolysis, 8:19911 (R:XE)
Photoassisted electrolysis applied to coal gasification, 8:19450 (RA:US)
Thermodynamic and engineering assessment of hybrid processes for the production of hydrogen with specific application to the Mark 13 process, 8:19908 (R:XE)

Photochemical Reactions
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)

Photoelectrolysis
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)
Photo-Kolbe reaction in biomass wastestreams, 8:20814 (RA:US)
Solar-assisted hydrogen generation by photoelectrocatalysis. Annual report mar 80-feb 81, 8:19915 (R:US)

Photolysis
Formation of fuel via photochemical electron transfer. Progress report, February 1, 1982-January 31, 1983, 8:21266 (R:US)
Investigation of the potential of polymer-bound co-ordination compounds as catalysts for the photolytic production of hydrogen from water, 8:19928 (B:XE)
Photolysis of water for production of fuel gases. Annual report Jan-Dec 80, 8:19916 (R:US)
Properties and electron transfer reactivity of coordination compounds for the photochemical splitting of water, 8:19912 (R:XE)

Radiolysis
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)

Research Programs
Photo/biological hydrogen program progress reports, 8:19919 (R:US)

Thermochemical Processes
Basic research opportunities for lasting fuel gas supplies from inorganic resources. Final report 15 Feb 81-28 Feb 82, 8:19917 (R:US)
Thermodynamic and engineering assessment of hybrid processes for the production of hydrogen with specific application to the Mark 13 process, 8:19908 (R:XE)

HYDROGEN STORAGE
Miami international symposium on metal-hydrogen systems, 8:19929 (R:US)

Cobalt Hydrides
Solid state hydrogen pumping and storage material, 8:19930 (P:US)

Iron Hydrides
Solid state hydrogen pumping and storage material, 8:19930 (P:US)

Lanthanum Hydrides
Solid state hydrogen pumping and storage material, 8:19930 (P:US)

Nickel Hydrides
Solid state hydrogen pumping and storage material, 8:19930 (P:US)

Palladium Hydrides
Solid state hydrogen pumping and storage material, 8:19930 (P:US)

HYDROGEN SULFATES
See SULFURIC ACID

HYDROGEN SULFIDES

Absorption Spectra
Infrared absorption of sulfur bearing compounds, 8:22099 (R:US)

Adsorption Isotherms
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)

Catalytic Effects
Homogeneous catalysis of lignite liquefaction with hydrogen sulfide, 8:19431 (R:US)

Chemical Reaction Kinetics
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)

Ecological Concentration
Preliminary air pollution survey of hydrogen sulfide: a literature review, 8:21768 (R:US)

Removal
Acid gas removal process (Proprietary process for removing H_2S, CO_2, sulfur compounds and trace elements from fuel gas), 8:19466 (RA:US)
Calcium silicate cement sorbent for H_2S removal and improved coal gasification processes, 8:19465 (RA:US)

Separation Processes
Partitioning of hydrogen sulfide in the condensers of Geysers Unit 15, 8:20169 (RA:US)

HYDROGENASE
See HYDROGENASES

HYDROGENASES
Code number 1.12

Biochemistry
Biochemical genetics and regulation of hydrogenase in Escherichia coli and Anabaena variabilis, 8:19925 (RA:US)

Enzyme Activity
Biochemical genetics and regulation of hydrogenase in Escherichia coli and Anabaena variabilis, 8:19925 (RA:US)

Purification
Studies on algal hydrogenase and hydrogen metabolism, 8:19922 (RA:US)

HYDROGENATION

Catalysis
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)

Catalysts
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)

Chemical Reactors
Short residence time hydropyrolysis, 8:19438 (RA:US)

HYDROTHERMAL CONVECTIVE SYSTEMS

Operating principles of optico-electronic instruments, 8:21626 (R:US)
Programming
Electronics Engineering Department Computer Program Newsletter No. 8: image-processing computer codes, 8:22878 (R:US)
Research Programs
Electronics Engineering Department quarterly report No. 2, 1982, 8:21445 (R:US)

IMIDAZOLES
Chemical Properties
Synthesis of benzyl and benzyloxycarbonyl base-blocked 2'-deoxyribonucleosides, 8:21254 (J:US)

IMMOBILIZED CELLS
Technology Assessment
Ethanol production using microbial cells trapped in polyacrylamidegels (Saccharomyces cerevisiae), 8:19986 (R:US)

IMPERMEABLE DRY ROCK
See HOT-DRY-ROCK SYSTEMS

IMPURITIES
Unwanted constituents, not for TRACE AMOUNTS, INTERFERING ELEMENTS, or metal and nonmetal additions.
Evaluation
Effects of additives and impurities on the properties of CR-39 neutron dosimeters, 8:21595 (RA:US)
Ionization
Semi-empirical studies of atomic structure. Progress report, 1 July 1982-1 February 1983, 8:22599 (R:US)

IN CORE INSTRUMENTS
See also specific instruments plus FUEL ASSEMBLIES or REACTOR CORES.

Flowmeters
Investigation of the axial void propagation velocity profile in BWR fuel bundles, 8:20341 (RA:US)
Separate effects tests in support of BWR thermal/hydraulic monitoring, 8:20342 (RA:US)
Level Indicators
Monitoring PWR reactor vessel liquid level with SPNDs during LOCAs, 8:20708 (RA:US)
Radiation Detectors
Accuracy of power peaking monitoring using fixed incore detector systems, 8:20379 (RA:US)

IN UTERO IRRADIATION

INCINERATION
See COMBUSTION

INCLUSION COMPLEXES
See CLATHRATES

INCLUSIONS
Chemical Composition
Depth to and concentrations of water in large bodies of silicic magma. Progress report, July 1, 1982-June 30, 1983, 8:20147 (R:US)

INCLUSIVE DISTRIBUTION
See INCLUSIVE INTERACTIONS

INCLUSIVE INTERACTIONS
Quantum Chromodynamics
Breakdown of QCD factorization theorems for inclusive reactions, 8:22320 (R:US)

INCOLOY 800
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Measuring corrosion rates in crevices with a computer-controlled flow loop, 8:20361 (RA:US)

INCOLOY ALLOYS
See also INCOLOY 800
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)

INCOMPRESSIBLE FLOW
Finite Element Method
PELE-IC; fluid-structure interaction analysis (CDC7600; FORTRAN IV), 8:21417 (R:US)
Navier-Stokes Equations
Two models of truncated Navier—Stokes equations on a two-dimensional torus, 8:22237 (J:US)
Turbulence
Two models of truncated Navier—Stokes equations on a two-dimensional torus, 8:22237 (J:US)

INCONEL 600
Corrosion
Examinations of support plate samples from steam generators, 8:20362 (RA:US)
Modeling of salt concentrations in crevices, 8:20368 (RA:US)
Preliminary corrosion results on alternative support materials from two model steam generator tests, 8:20359 (RA:US)
Stress Corrosion
Examination of bimetallic Inconel 600/316 stainless steel sodium-heated steam generator, 8:20444 (J:US)

INCONEL 625
Oxidation
Elevated temperature long-term air oxidation of Inconel alloy 625, 8:20616 (J:US)

INCONEL ALLOYS
See also INCONEL 600
INCONEL 625
Corrosion
Characterization of model boiler specimens, 8:20366 (RA:US)
Recent Westinghouse experience with tube support plate materials corrosion studies, 8:20357 (RA:US)
Summary of results, Millstone 2 tube support plate examination, 8:20363 (RA:US)
Deposition
Corrosion and high temperature resistant coatings for molybdenum, made out of iron and nickel alloys and applied by explosive welding, 8:21087 (R:DE:In German)

IN-CORE FUEL MANAGEMENT

Boiler Fuels
- Prospects for increasing the direct use of coal in industrial boilers. Final task report Nov 79-Nov 80, 8:19641 (R:US)

Boilers
- Environmental assessment of stationary source Nox control technologies. Final report Jun 76-Sep 79, 8:20305 (R:US)
- Field test results of eighteen industrial coal stoker fired boilers for emission control and improved efficiency. Paper 81.35.3, 8:19593 (J:US)
- Industrial boiler combustion modification Nox controls. Volume I: environmental assessment. Final report Jan 78-Jul 79, 8:21460 (R:US)
- Industrial boiler combustion modification Nox controls. Volume II: stoker-coal-fired boiler field test - Site A. Final report Jul 78-Jul 79, 8:21461 (R:US)
- Industrial boiler combustion modification Nox controls. Volume III: stoker-coal-fired boiler field test - Site B. Final report Jul 78-Jul 79, 8:21462 (R:US)
- Industrial firing of coal-oil mixtures (Fuel oils to coal or to COM; dependence on original boiler design), 8:19632 (R:US)

Capitalized Cost
- Regulatory impact analysis of the national ambient air quality standards for carbon monoxide. Final report, 8:21466 (R:US)

Cogeneration
- An assessment of central-station congeneration systems for industrial complexes. Final report Mar 76-Mar 78, 8:20277 (R:US)
- Assessment of electric-utility ownership and operation of industrial-cogeneration facilities. Final report, 8:20815 (R:US)

Combustors
- Wood-fuel use in Papua New Guinea: an assessment of industrial combustion equipment, 8:20900 (R:US)

Computer-Aided Design
- General-purpose transportation and storage simulator for the SRC-I Demonstration Plant (Fuel supplies, product and by-product storage; materials handling and transport and terminal facilities and equipment), 8:19475 (RA:US)

Energy Management
- Conceptual study: potential energy savings based on reduction of pressure in the ANL-east central heating system, 8:20962 (R:US)

Flue Gas
- Environmental assessment of stationary source Nox control technologies. Final report Jun 76-Sep 79, 8:20305 (R:US)
- Field test results of eighteen industrial coal stoker fired boilers for emission control and improved efficiency. Paper 81.35.3, 8:19593 (J:US)
- Industrial boiler combustion modification Nox controls. Volume II: stoker-coal-fired boiler field test - Site A. Final report Jul 78-Jul 79, 8:21461 (R:US)
- Industrial boiler combustion modification Nox controls. Volume III: stoker-coal-fired boiler field test - Site B. Final report Jul 78-Jul 79, 8:21462 (R:US)
- Regulatory impact analysis of the national ambient air quality standards for carbon monoxide. Final report, 8:21466 (R:US)

Fluidized Bed Boilers
- Fluidized-bed boiler: an industrial application at Central Soya Company, Inc., Marion, Ohio, 8:19631 (R:US)

Heat Recovery Equipment
- Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)

Operating Cost
- Regulatory impact analysis of the national ambient air quality standards for carbon monoxide. Final report, 8:21466 (R:US)

Process Control
- Multivariable process control: a survey (396 references), 8:19685 (R:US)

Risk Assessment
- Technical risks and Constitutional Law, 8:22895 (RA:DE:In German)

Solar Drying
- Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)

Solar Process Heat
- Capitol Concrete Solar Industrial Process Heat Experiment. Final technical report, May 30-November 24, 1982, 8:20086 (R:US)
- Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)

Solar Space Heating
- Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)

Solar Water Heating
- Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)

Waste Heat
- Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)

INDUSTRIAL RADIOGRAPHY

See also BIOMEDICAL RADIOGRAPHY.

Technology Assessment
- Determination of material properties by limited scan x-ray tomography. Final technical report Sep 79-Jan 81, 8:21911 (R:US)

Tomography
- Determination of material properties by limited scan x-ray tomography. Final technical report Sep 79-Jan 81, 8:21911 (R:US)

X-Ray Sources
- Portable linear accelerator development. Final report (PWR; BWR), 8:20328 (R:US)

INDUSTRIAL SECTOR

Electron Transfer
Properties and electron transfer reactivity of coordination compounds for the photochemical splitting of water, 8:19912 (R:XE)
IRON
Catalytic Effects
Study of hydroliquefaction of a Lorraine coal, 8:19521 (RA:XE:In French)
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Health Hazards
Industrial hygiene survey of the General Electric Company, Hudson Falls, New York, Fort Edward, New York. Report for Jun 76-Apr 77, 8:22007 (R:US)
Materials Recovery
Introduction of sulfur into copper converter slags to produce copper matte. Report of investigations/1982, 8:20986 (R:US)
Photoemission
Studies of magnetism and exchange scattering in solids using synchroton radiation and spin-polarized photoemission. Progress report, June 1, 1982-May 31, 1983, 8:22191 (R:US)
Solvent Extraction
Role of phosphorus in lunar samples: a chemical study, 8:21197 (R:US)
Selective metal-ion extraction for multiple metal-ion liquid-liquid exchange reactions. Progress report, February 1, 1982-January 31, 1983, 8:21198 (R:US)
IRON 54
Energy-Level Transitions
Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
IRON 54 TARGET
Pion Reactions
Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
IRON 57
Moessbauer Effect
Theory of Moessbauer line broadening due to diffusion, 8:22548 (R:US)
IRON ALLOYS
See also *INCONEL 600*
INCONEL 625
IRON BASE ALLOYS
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media

and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)

Molecular Structure

Iron-nickel alloys as canister material for radioactive waste disposal in underground repositories, 8:19835 (RA:US)

Thermodynamic Properties

Iron-nickel alloys as canister material for radioactive waste disposal in underground repositories, 8:19835 (RA:US)

IRON BASE ALLOYS

See also INCOLOY ALLOYS
STEELS

Corrosion

Corrosion of path A PCA, type 316 stainless steel and Fe-12 Cr-1 MoVW steel in flowing lithium, 8:22720 (RA:US)

Crack Propagation

Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV, 8:21067 (R:US)

Ductility

Ductility behavior of irradiated path B alloys, 8:22712 (RA:US)

Fatigue

Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV, 8:21067 (R:US)

Mechanical Properties

Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)

Microstructure

Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)

Microstructure of welds in an iron-base long-range-ordered alloy, 8:22714 (RA:US)

Oxidation

Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)

Physical Radiation Effects

Compositional changes in Fe-Cr-Ni alloys under proton bombardment at elevated temperatures, 8:21058 (R:US)

Tensile Properties

Tensile properties of unirradiated path A PCA, 8:22709 (RA:US)

IRON CARBIDES

Catalytic Effects

Pollution control in coal gasification, 8:19470 (RA:US)

IRON CHLORIDES

Cost

Study to establish cost predictions for the production of Redox chemicals, 8:20888 (R:US)

Ferromagnetism

Neutron scattering study of the soft mode in the strongly anisotropic antiferromagnet $RbFeCl_3$, 8:21188 (J:GB)

Production

Study to establish cost predictions for the production of Redox chemicals, 8:20888 (R:US)

IRON COMPLEXES

Electronic Structure

Electronic structure of iron phthalocyanine and its analogs: a theoretical study, 8:21249 (R:US)

IRON COMPOUNDS

See also IRON CARBIDES
IRON CHLORIDES
IRON OXIDES
IRON SULFATES
IRON SULFIDES

Catalytic Effects

Catalytic effects in coal gasification, 8:19447 (RA:US)

IRON IONS

E1-Transitions

Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)

Electron-Ion Collisions

Ionization and recombination coefficients for Fe XV—Fe XIX, 8:22215 (J:US)

Oscillator Strengths

Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)

IRON METEORITES

Activation Analysis

Investigation of the chemical composition of iron meteorites by neutron-activation analysis, 8:21201 (RA:CS)

IRON OXIDES

Atom Transport

Impurity diffusion in transition-metal oxides, 8:21121 (R:US)

Catalytic Effects

Oxygen on iron oxide: effect on the selective oxidation of butane, 8:21235 (J:US)

IRON SULFATES

Oxidation

Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)

Removal

Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)

IRON SULFIDES

See also MARCASITE
PYRITE

Expansion

In-situ determination of dimensional changes of electrodes in LiAl/FeS cells during cycling, 8:20744 (R:US)

IRON-NICKEL BATTERIES

Electrodes

Development of gas phase metallized plaques for electrodes of storage batteries, in particular for nickel oxide electrodes. Final Report, Jul. 1979, 8:20742 (R:DE:In several languages)

Optimization

Nickel-iron battery of high energy density. Final Report, Jul. 1980, 8:20743 (R:DE:In several languages)

IRRADIATION REACTORS

For isotope production and irradiation purposes; for producing fissile materials see PRODUCTION REACTORS.

See also MATERIALS TESTING REACTORS

Isotope Production

ISOTOPES; maximum yield from reaction or decay (UNIVAC1100; FORTRAN V), 8:19902 (R:US)

ISABELLE

See ISABELLE STORAGE RINGS

ISABELLE STORAGE RINGS

Muon Detection

Superconducting toroidal particle detector for high-energy physics research, 8:21614 (J:US)

Superconducting Magnets

Status reports on ISABELLE magnets, 8:21500 (R:US)

ISING MODEL

Lee-Yang Theory

Ferromagnetic Ising model in noninteger spatial dimension, 8:22325 (J:US)

Spectral Functions

Spectral methods applied to Ising models, 8:22587 (BA:US)

ISOAMYLASE

See ISOENZYMES

ISOENZYMES

Liquid Column Chromatography

New developments in on-line isoenzyme monitoring for use in clinical diagnostics, 8:21901 (BA:US)

ISOTOPE ANALYSIS (QUANTITATIVE)

See ISOTOPE RATIO

ISOTOPE COMPOSITION (QUANTITATIVE)

See ISOTOPE RATIO

ISOTOPE ENRICHMENT

See ISOTOPE SEPARATION

ISOTOPE PRODUCTION

SANDIA-ORIGEN; isotope generation & depletion (CDC7600,6600,6400; FORTRAN IV (FTN4.6(439) FORTRAN compiler, optimization level 2)), 8:19901 (R:US)

Computer Calculations

ISOTOPES; maximum yield from reaction or decay (UNIVAC1100; FORTRAN V), 8:19902 (R:US)

Cross Sections
ISOSEARCH; isotope production flux, cross section calculations (IBM360; FORTRAN IV and BAL), 8:21290 (R:US)
Least Square Fit
FRANTIC; least squares fit sum of exponentials (IBM370; FORTRAN IV), 8:21291 (R:US)
ISOTOPE RATIO
Mass Spectroscopy
Determination of isotopic and gravimetric content of uranium and plutonium by mass spectrometry in nitric acid extraction solutions, 8:20386 (TG:US)
ISOTOPE SEPARATION
For separation of isotopes of the same element only.
See also LASER ISOTOPE SEPARATION
Thermal Diffusion
COLCO; thermal diffusion column coefficients (IBM360,303x;CDC6600,CYBER175; FORTRAN IV), 8:19903 (R:US)
ISOTOPES
See also DAUGHTER PRODUCTS
FISSION PRODUCTS
HYDROGEN ISOTOPES
RADIOISOTOPES
RADON ISOTOPES
Decay
CHAINS; analysis of radioactive decay chains (GE625,635; FORTRAN IV), 8:22539 (R:US)
ISOTOPIC ANALYSIS (QUANTITATIVE)
See ISOTOPE RATIO
ISOTOPIC COMPOSITION (QUANTITATIVE)
See ISOTOPE RATIO
ISOTOPIC SEPARATION

ISRAEL
Hydrothermal Systems
Evaluation of the hydrothermal potential of the Ashdod Area, Israel, 8:20146 (RA:US)
ISX TOKAMAK
Bundle Divertors
ISX divertor program, 8:22782 (BA:DE)
Data Acquisition Systems
Computer data-acquisition and control system for Thomson-scattering measurements, 8:22628 (R:US)
Electron-Ion Collisions
Ionization and recombination coefficients for Fe XV—Fe XIX, 8:22215 (J:US)
Impurities
Impurity transport in the ISX-B tokamak, 8:22666 (BA:DE)
Limiters
Pumped limiter development on ISX, 8:22785 (BA:DE)
Neutral Atom Beam Injection
Rotation and island effects in tokamaks with high-power neutral beam heating, 8:22611 (RA:SU)
Plasma Diagnostics
Computer data-acquisition and control system for Thomson-scattering measurements, 8:22628 (R:US)
Plasma Microinstabilities
Proposed experimental study of fast ion driven electromagnetic instabilities at low thresholds, 8:22682 (J:US)
Thermonuclear Fuels
Recycling studies in the ISX-B by monitoring the hydrogen alpha emission, 8:22759 (J:NL)
ITALY
Aquatic Ecosystems
Proposed classification of biotapological marine ecosystems off the coast of Italy. Part I, 8:21877 (R:IT:IT)
Climates
Annual meteorological data at Trisaia, 1976, 8:21675 (R:IT:IT)
Annual meteorological data for CRN Della Trisaia, 1977, 8:21676 (R:IT:IT)
Annual meteorological data at CRN Trisaia, 1978, 8:21677 (R:IT:IT)
Annual meteorological data for CRN Della Trisaia, 1979, 8:21678 (R:IT:IT)
Computer Networks
Management and control of the IBM 370-168 system with the AG02 system, 8:22871 (R:IT:IT)
Electric Power
Survey of the Italian market on electric power systems and energy conservation equipment. Foreign market survey report, 8:20842 (R:US)
Energy Conservation
Survey of the Italian market on electric power systems and energy conservation equipment. Foreign market survey report, 8:20842 (R:US)
Energy Demand
Energy models of European communities implementation and methodological tests in Italy. Final report, 8:20796 (R:US)
Trends in energy demand in Italy (energy demand model for Italy). Final report, 8:20797 (R:US)
Seismic Events
Seismic data summary for the colli albani area, 8:22037 (R:IT:IT)
ITEP SYNCHROTRON
Institute of Theoretical and Experimental Physics Synchrotron.
Control Systems
Results of modernization of the control and smoothing system of ITEP proton synchrotron magnetic field pulsations, 8:21509 (RA:SU:In Russian)

Multiple-scattering corrections to the Beer-Lambert law, 8:22563 (R:US)
LASER SPECTROSCOPY
Optically pumped submillimeter-waves and applications. Final report, 8:21346 (R:US)
Raman Spectra
A survey of some recent developments in laser Raman spectroscopy, 8:21392 (R:US)
Technology Assessment
A survey of some recent developments in laser Raman spectroscopy, 8:21392 (R:US)
LASER TARGETS
Diagnostic Techniques
Fusion-product energy-loss measurements from laser-imploded micro-balloons, 8:22790 (J:US)
Fabrication
Low density, microcellular foams, preparation, and articles, 8:19900 (P:US)
Production
Solid evacuated microspheres of hydrogen (Patent), 8:22753 (P:US)
LASER WELDING
Neodymium Lasers
Laser tool: pulsed solid state laser for welding and ablation of material. Final report, September 1979, 8:21383 (R:US:In several languages)
LASER-PRODUCED PLASMA
Ablation
Laser-wavelength dependence of mass-ablation rate and heat-flux inhibition in laser-produced plasmas, 8:22660 (J:US)
Brillouin Effect
Wavelength scaling of the two-plasmon decay and stimulated Raman-scattering instabilities. Annual progress report, September 10, 1981-September 9, 1982, 8:22703 (R:US)
Electron-Atom Collisions
Atomic processes in high-density plasmas, 8:22748 (R:US)
Energy Transfer
One dimensional analysis of inertially confined plasmas. Master's thesis, 8:22684 (R:US)
Energy Transport
Experimental evidence for self-generated magnetic fields and remote energy deposition in Laser-irradiated targets, 8:22754 (J:US)
Heat Flux
Laser-wavelength dependence of mass-ablation rate and heat-flux inhibition in laser-produced plasmas, 8:22660 (J:US)
Hydrodynamics
One dimensional analysis of inertially confined plasmas. Master's thesis, 8:22684 (R:US)
Magnetic Fields
Experimental evidence for self-generated magnetic fields and remote energy deposition in Laser-irradiated targets, 8:22754 (J:US)
Plasma Diagnostics
New measurement techniques using tracers within laser-produced plasmas, 8:22741 (R:US)
Raman Effect
Time-resolved observations of stimulated Raman scattering from laser-produced plasmas, 8:22647 (J:US)
Wavelength scaling of the two-plasmon decay and stimulated Raman-scattering instabilities. Annual progress report, September 10, 1981-September 9, 1982, 8:22703 (R:US)
Tracer Techniques
New measurement techniques using tracers within laser-produced plasmas, 8:22741 (R:US)
LASERS
Light Amplification by Stimulated Emission of Radiation.

LAWRENCE LIVERMORE LABORATORY
Engineering
Electronics Engineering Department quarterly report No. 2, 1982, 8:21445 (R:US)
Geodetic Surveys
Precision-leveling surveys near the Lawrence Livermore National Laboratory site (1969 through 1980), 8:21849 (R:US)
Ground Motion
Precision-leveling surveys near the Lawrence Livermore National Laboratory site (1969 through 1980), 8:21849 (R:US)
Site Surveys
Precision-leveling surveys near the Lawrence Livermore National Laboratory site (1969 through 1980), 8:21849 (R:US)
LC-FINING
Catalysts
LC-Finer catalyst testing, 8:19485 (RA:US)
Process Development Units
LC-Finer catalyst testing, 8:19485 (RA:US)
LEACHATES
Chemical Composition
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 6A. Export sample program/wastewater treatability study summary report (Proposed Henderson, Kentucky coal to gasoline plant; waste water from Lugri Mark IV test at Sasol), 8:19502 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 2B. Collection and shipment analytical testwork (Proposed Henderson, Kentucky coal to gasoline plant; West Kentucky No. 9 seam coal characterization and testing), 8:19493 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 5. Kentucky stockpile tests (Proposed Henderson, Kentucky coal to gasoline plant; coal stockpile study), 8:19500 (R:US)
Tri-State Synfuels Project Review: Volume 4B. Design engineering (Proposed Henderson, Kentucky coal to gasoline plant; pollution control and general mechanical engineering), 8:19499 (R:US)
LEAD
Adsorption
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Compatibility
Corrosion of ferrous alloys in static Pb and Pb-17 at. % Li, 8:22722 (RA:US)
Ecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
Study of endogenous and exogenous influence on lead (Pb) and cadmium (Cd) content in muscles and organs of deer (Capreolus capreolus L.) and wild rabbit (Lepus cuniculus L.), 8:21828 (R:DE:In German)
Ion Collisions
Angular distribution of Pb L x-rays excited by 3 MeV protons, 8:22224 (J:US)
Tissue Distribution
Study of endogenous and exogenous influence on lead (Pb) and cadmium (Cd) content in muscles and organs of deer (Capreolus capreolus L.) and wild rabbit (Lepus cuniculus L.), 8:21828 (R:DE:In German)
X-Ray Spectra
Study of the level schemes of ^{75}Se, ^{76}Se, and ^{77}Se by capture of thermal neutrons, 8:22364 (R:DE:In German)
LEAD 210
Radiochemical Analysis
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)
LEAD ALLOYS
Compatibility
Corrosion of ferrous alloys in static Pb and Pb-17 at. % Li, 8:22722 (RA:US)
LEAD IONS
E1-Transitions
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
Oscillator Strengths
Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
LEAD OXIDES
Chemical Activation
Shock-induced reactivity enhancement of zirconia powders, 8:21132 (J:GB)
LEAD-ACID BATTERIES
Performance
Modeling and computerized characterization of lead-acid battery discharges. Battery Energy Storage Test (BEST) Facility, 8:20748 (R:US)
Test Facilities
Modeling and computerized characterization of lead-acid battery discharges. Battery Energy Storage Test (BEST) Facility, 8:20748 (R:US)
LEASES
Government Policies
Effects of lease size on yields from oil-shale surface mines, 8:19788 (R:US)
LEASING
Environmental Impact Statements
Proposed 1983 outer continental shelf oil and gas lease sale offshore the Mid-Atlantic states. Final environmental impact statement, 8:19730 (R:US)
LEAVES
Morphological Changes
Investigations on the influence of increased UV-B-radiation on the development, composition, structure and function of plants, 8:21947 (RA:DE:In German)
Orientation
Orientations of terminal cladodes of Platyopuntias, 8:21928 (J:YU)
LEGUMINOSAE
See also GLYCINE HISPIDA
Cultivation Techniques
Effect of seeding and site-preparation practices on the establishment of sericea (Lespedeza cuneata). Annual report, September 1, 1981-December 31, 1982, 8:21930 (R:US)
Nitrogen Fixation
Carbon metabolism in legume nodules. Progress report, June 1, 1982-January 30, 1983, 8:21910 (R:US)
LEPTON-DEUTERON INTERACTIONS
See DEUTERIUM TARGET
LEPTONS
See also ELECTRONS
NEUTRINOS
Composite Models
Composite models of quarks and leptons and strong-coupling lattice gauge theories, 8:22319 (J:US)

Conservation Laws
Lepton flavor nonconservation, 8:22316 (RA:US)
Flavor
Lepton flavor nonconservation, 8:22316 (RA:US)
Pair Production
Perturbative QCD and weak asymmetries in lepton pair production, 8:22305 (J:US)
Particle Production
Production of low mass dileptons in e^+e^- collisions, 8:22290 (RA:CS:In Slovak)
LEUKEMIA
Radioinduction
Associations between tumor types in irradiated BALB/c female mice, 8:21975 (J:US)
Reevaluation of the Hiroshima-Nagasaki radiation doses, 8:21970 (RA:US)
LEVEL INDICATORS
Comparative Evaluations
Review of proposed instrumentation for measurement of inadequate core cooling in LWRs, 8:20377 (RA:US)
Self-Powered Neutron Detectors
Monitoring PWR reactor vessel liquid level with SPNDs during LOCAs, 8:20708 (RA:US)
LI-DRIFTED GE DETECTORS
Gamma Spectra
QLN1; quantitative gamma-ray spectra analysis (UNIVAC1108,1100; FORTRAN V), 8:21567 (R:US)
LIE GROUPS
Lectures
Lie algebras and flexible Lie-admissible algebras. Hadronic press monographs in mathematics Number 1, 8:22590 (R:US)
LIFE-CYCLE COST
Computer Codes
Wind systems life cycle cost analysis: a description and users manual (LIFECC), 8:20209 (R:US)
LIGHT GUIDES
See OPTICAL FIBERS
LIGHT WATER COOLED REACTORS
See WATER COOLED REACTORS
LIGHTING SYSTEMS
Energy Analysis
Study of lighting-system retrofits for energy conservation at ANL-East. In-house Energy Management Surveys and Studies, 8:20893 (R:US)
Energy Conservation
Study of lighting-system retrofits for energy conservation at ANL-East. In-house Energy Management Surveys and Studies, 8:20893 (R:US)
Retrofitting
Study of lighting-system retrofits for energy conservation at ANL-East. In-house Energy Management Surveys and Studies, 8:20893 (R:US)
LIGNITE
Briquetting
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Carbonization
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Chemical Composition
Homogeneous catalysis of lignite liquefaction with hydrogen sulfide, 8:19431 (R:US)
Chemical Properties
Relationships between petrographic and chemical properties of Rhenish lignite, 8:19567 (RA:XE:In German)
Coking
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Fluidized-Bed Combustion
Fluidized bed combustion for oil field steam generation and process heating applications, 8:19684 (J:US)
Petrology
Relationships between petrographic and chemical properties of Rhenish lignite, 8:19567 (RA:XE:In German)
Sorptive Properties
Low energy process for separating hydrogen and methane in advanced coal gasification processes, 8:19464 (RA:US)
LIME-LIMESTONE WET SCRUBBING PROCESSES
Cost
Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
LIMERICK-1 REACTOR
Reactor Safety
Review of the Limerick Generating Station Probabilistic Risk Assessment, 8:20721 (R:US)
Risk Assessment
Review of the Limerick Generating Station Probabilistic Risk Assessment, 8:20721 (R:US)
LIMERICK-2 REACTOR
Reactor Safety
Review of the Limerick Generating Station Probabilistic Risk Assessment, 8:20721 (R:US)
Risk Assessment
Review of the Limerick Generating Station Probabilistic Risk Assessment, 8:20721 (R:US)
LIMESTONE
Pneumatic Transport
Fluidised-bed combustion: IEA Grimethorpe pressurized fluidised-bed test facility incident report - booster-compresser failure, 8:20260 (R:US)
Sorptive Properties
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents, 8:20242 (R:US)
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents. Addendum. Compilation of sorbent performance data from atmospheric fluidized-bed combustors, 8:19626 (R:US)
LIMITERS
Pumped limiter development on ISX, 8:22785 (BA:DE)
Erosion
Analysis of graphite limiter after operation in T-10, 8:22735 (RA:SU)
Can wall and limiter erosion be eliminated in fusion reactors, 8:22695 (R:US)
Sputtering
Redeposition of the sputtered surface in limiters, 8:22691 (R:US)
Surface Coating
Redeposition of the sputtered surface in limiters, 8:22691 (R:US)
Self-sustaining erosion-resistant low-Z coatings for first wall and limiter applications. I. Theory, 8:22693 (R:US)
LIMNOLOGY
Regression Analysis
Assessment methodology for new cooling lakes. Volume 2. Development of empirical multivariate relationships for evaluating fish communities in new cooling lakes. Final report, 8:21853 (R:US)
LINACS
See LINEAR ACCELERATORS
LINE BROADENING
Pressure Dependence
New theoretical and experimental methods for pessure broadened linewidths and their interpretation, 8:22201 (R:US)
LINEAR ACCELERATORS
See also FMIT LINAC
LAMPF LINAC
QUADRUPOLE LINACS
STANFORD 20-GEV LINAC
Beam Dynamics
Self-consistent theory of intense beam acceleration in beam bunching sections, 8:21488 (RA:SU:In Russian)
Beam Injection
Alpha magnet assembly (Engineering Materials), 8:21550 (E:US)
Colliding Beams
Future of electron-positron colliders, 8:21479 (R:US)
Feasibility Studies
Laser-driven grating linac, 8:21472 (R:US)

Free Electron Lasers
Final report of work in support of the Nrl Fel program. Final report 14 Mar-15 Sep 82, 8:21381 (R:US)
Positron Beams
Dynamics of positron beam from a convertor target while beam additional accelerating in a travelling wave electron linac, 8:21489 (RA:SU:In Russian)
Superconducting Cavity Resonators
Cooling the ANL SC heavy-ion linac with two refrigerators in parallel. Preprint Paper G-26, 8:21502 (R:US)
TeV Range
Laser-driven grating linac, 8:21472 (R:US)
Uses
Industrial and medicine accelerators and prospects of their development in the 11 five year plan, 8:21473 (RA:SU:In Russian)
LINEAR PROGRAMMING
Computer Codes
Documentation for the QMC generic LP modelling system. Final report, 8:22874 (R:XE)
LINERS
Structural Models
Nonlinear structural and life analyses of a combustor liner, 8:21455 (R:US)
LINUS REACTORS
Research Programs
Perform experiments on LINUS-O and LTX imploding liquid liner fusion systems. Final report 8 Sep 80-30 Sep 81, 8:22685 (R:US)
LIOUVILLE EQUATION
See BOLTZMANN-VLASOV EQUATION
LIPIDS
Configuration Interaction
Lateral diffusion in an archipelago - effects of impermeable patches on diffusion in a cell membrane, 8:21907 (J:US)
LIPOSOMES
Membrane Transport
Photosensitized electron transport across lipid vesicle walls, 8:20001 (R:US)
LIQUEFACTION

LIQUID SCINTILLATION DETECTORS
Optimization
High resolution alpha spectroscopy by liquid scintillation techniques. Master's thesis, 8:21584 (R:US)
LIQUID-METAL MHD GENERATORS
Retrofit of a coal-fired open-cycle liquid-metal MHD to steam power plants, 8:20870 (R:US)
LIQUIDS
See also COAL LIQUIDS
LIQUID CRYSTALS
LIQUID METALS
NATURAL GAS LIQUIDS
Absorption Spectra
Dielectric effects on the spectra of condensed phases, 8:22235 (J:US)
Dielectric Properties
Dielectric effects on the spectra of condensed phases, 8:22235 (J:US)
Many-Body Problem
Many-body theory in condensed matter physics, 8:22566 (J:US)
LITHIUM
Compatibility
Environmental effects on properties of structural alloys, 8:22721 (RA:US)
Corrosion
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
Corrosive Effects
Corrosion of path A PCA, type 316 stainless steel and Fe-12 Cr-1 MoVW steel in flowing lithium, 8:22720 (RA:US)
Environmental effects on properties of structural alloys, 8:22721 (RA:US)
Energy-Level Transitions
Doubly excited states in some light atoms, 8:22180 (R:US)
Measuring Methods
Facility for in-vivo measurement of lithium, 8:21896 (R:US)
Potentials
Stochastic calculation of interaction energies, 8:22218 (J:US)
LITHIUM 6 REACTIONS
Alpha-Transfer Reactions
Alpha-transfer reactions, 8:22368 (R:US)
LITHIUM 7 REACTIONS
Fusion Reactions
Method for the preparation of radon-211 (Patent), 8:21293 (P:US)
LITHIUM ALLOYS
Compatibility
Corrosion of ferrous alloys in static Pb and Pb-17 at. % Li, 8:22722 (RA:US)
Expansion
In-situ determination of dimensional changes of electrodes in LiAl/FeS cells during cycling, 8:20744 (R:US)

LITHIUM CARBONATES
Evaporation
Electrolyte vaporization losses from molten-carbonate fuel cells, 8:20885 (R:US)
LITHIUM COMPOUNDS
See also LITHIUM CARBONATES
LITHIUM OXIDES
Magnetic Properties
Spin dynamics of a model singlet ground-state system, 8:21178 (J:US)
Spin
Spin dynamics of a model singlet ground-state system, 8:21178 (J:US)
LITHIUM FLUORIDES
Atom Collisions
Application of the semiclassical perturbation (SCP) approximation to diffraction and rotationally inelastic scattering of atoms and molecules from surfaces, 8:22208 (J:US)
Molecule Collisions
Application of the semiclassical perturbation (SCP) approximation to diffraction and rotationally inelastic scattering of atoms and molecules from surfaces, 8:22208 (J:US)
LITHIUM IONS
Energy-Level Transitions
Doubly excited states in some light atoms, 8:22180 (R:US)
Ion-Atom Collisions
Rainbow scattering of low energy Li ions on W single crystal surfaces, with special regard to the azimuthal dependence, 8:22198 (R:DE:German)
Scattering
Rainbow scattering of low energy Li ions on W single crystal surfaces, with special regard to the azimuthal dependence, 8:22198 (R:DE:German)
LITHIUM OXIDES
Compatibility
Compatibility studies of structural alloys with solid breeder materials, 8:22723 (RA:US)
Fabrication
High-temperature fuel-cell research and development. Final technical progress report, 1 Oct 1980-30 Sep 1981, 8:20887 (R:US)
LITHIUM-SULFUR BATTERIES
Cathodes
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
Electrodes
In-situ determination of dimensional changes of electrodes in LiAl/FeS cells during cycling, 8:20744 (R:US)
Electrolytes
Studies leading to the development of high-rate lithium sulfuryl chloride battery technology. Quarterly report No. 1, 1 Sep-31 Dec 81, 8:20741 (R:US)
Performance
Electric vehicles: a strategy for reduced utilization of critical fuels in transportation, 8:21027 (R:US)
Reliability
Electric vehicles: a strategy for reduced utilization of critical fuels in transportation, 8:21027 (R:US)
LIVER
Biological Radiation Effects
Health effects from internally deposited radionuclides released in nuclear disasters, 8:21984 (BA:US)
Radiation Doses
Radium-224 retention, distribution, and dosimetry in beagles, 8:21977 (J:US)
Radionuclide Kinetics
Plutonium burdens in people living around the Rocky Flats plant. Final report 1976-79, 8:21968 (R:US)
LIZARDS
Population Density
A population model of the lizard Uta stansburiana in southern Nevada, 8:21895 (J:US)
Population Dynamics
A population model of the lizard Uta stansburiana in southern Nevada, 8:21895 (J:US)
Reproduction
A population model of the lizard Uta stansburiana in southern Nevada, 8:21895 (J:US)
Survival Time
A population model of the lizard Uta stansburiana in southern Nevada, 8:21895 (J:US)
LMFBR TYPE REACTORS
See also CLINCH RIVER BREEDER REACTOR
EBR-2 REACTOR
After-Heat Removal
Transition from forced to natural convective flow in an LMFBR under adverse thermal conditions, 8:20687 (R:US)
Control Rod Worths
Control-rod parametrical studies in the framework of the PRE-RACINE and RACINE programs, 8:20618 (RA:US)
Control-rod calculation methods and uncertainties for a power LMFBR design, 8:20619 (RA:US)
Core Catchers
Combination pipe-rupture mitigator and in-vessel core catcher (Patent; LMFBR), 8:20445 (P:US)
Flow Regulators
Combination pipe-rupture mitigator and in-vessel core catcher (Patent; LMFBR), 8:20445 (P:US)
Fuel Assemblies
Comparative study of water boiling in a vertical tube under temperature-controlled or heat-flux-controlled boundary conditions, 8:20725 (R:US)
Coolant mixing in LMFBR rod bundles and outlet plenum mixing transients. Progress report, September 1, 1981-November 30, 1981, 8:20423 (R:US)
Coolant mixing in LMFBR rod bundles and outlet-plenum mixing transients. Progress report, March 1, 1982-May 31, 1982, 8:20425 (R:US)
Wire-wrapped rod-bundle heat-transfer analysis for LMFBR, 8:20424 (R:US)
Fuel Cycle
LMFBR core design for low capital cost and low sodium void, 8:20443 (J:US)
Fuel Element Clusters
VELVET2; turbulent flow in LMFBR rod bundle (GE635; FORTRAN IV), 8:20409 (R:US)
Fuel Element Failure
LMFBR operational and experimental in-core local-fault experience, primarily with oxide fuel elements, 8:20676 (R:US)
Fuel Pins
HEDL shielded materials facility remote examination of breeder reactor fuel pins, 8:20441 (J:US)
PECS3; probabilistic evaluation cladding life (CDC7600; FORTRAN IV), 8:20413 (R:US)
Fuel-Cladding Interactions
Corrosion-resistant fuel cladding allow for liquid metal fast breeder reactors (Patent), 8:20440 (P:US)
Fuel-Coolant Interactions
SOCOOL2; sodium-fuel interaction analysis (IBM360;UNIVAC1108; FORTRAN IV), 8:20661 (R:US)
Hydraulics
SUPERENERGY2; steady-state LMFBR core analysis (CDC7600,CYBER175; FORTRAN IV), 8:20415 (R:US)
Loss of Flow
Comparative study of water boiling in a vertical tube under temperature-controlled or heat-flux-controlled boundary conditions, 8:20725 (R:US)
Investigation of flow recirculation in a rod bundle during natural-convection flow and power transients, 8:20726 (R:US)
Transition from forced to natural convective flow in an LMFBR under adverse thermal conditions, 8:20687 (R:US)
Meltdown
Technical feasibility of transition phase tests in TREAT, 8:20678 (R:US)
Molten Metal-Water Reactions
SWAAM1; LMFBR sodium-water reaction analysis (IBM370,3033; FORTRAN IV), 8:20414 (R:US)

Nuclear Materials Management
  Diversion analysis and safeguards measures for liquid-metal fast-breeder reactors. Paper IAEA-SM-260/6, 8:20421 (R:US)
Pumps
  Analysis of characteristic curves of the PC.1 and PC.2 centrifugal pumps of the CPC-1 system, 8:20417 (R:DE:IT)
Reaction Kinetics
  Assessment of physical characteristics of heterogeneous configurations with variable fertile volume, 8:20435 (RA:US)
Reactivity
  PAD; one-dimensional coupled Sn neutronics & hydrodynamics (CDC7600,6600,6400; FORTRAN IV (RUN compiler)), 8:20671 (R:US)
Reactor Accidents
  Aerosol Release and Transport Program. Quarterly progress report, July-September 1982, 8:20719 (R:US)
  HAA3B; aerosol behavior lognormal model (IBM370; FORTRAN IV (H)), 8:20653 (R:US)
  PAD; one-dimensional coupled Sn neutronics & hydrodynamics (CDC7600,6600,6400; FORTRAN IV (RUN compiler)), 8:20671 (R:US)
  Post accident debris cooling, 8:20730 (B:DE)
Reactor Core Disruption
  A theoretical study on the growth of large sodium vapour bubbles in liquid sodium, 8:20692 (R:US)
  Neutronic analysis of simulated LMFBR fuel slump experiments, 8:20706 (RA:US)
  SOCOOL2; sodium-fuel interaction analysis (IBM360;UNIVAC1108; FORTRAN IV), 8:20661 (R:US)
  Technical feasibility of transition phase tests in TREAT, 8:20678 (R:US)
  VENUS2; 2-dimensional coupled neutronics-hydrodynamics (IBM360,370,303x;CDC7600; FORTRAN IV(H)), 8:20659 (R:US)
Reactor Cores
  Analysis of neutronic space-time effects in large LMFBR's with thermal-hydraulic feedback using FX2-TH nuclear reactor kinetics code and mode expansion of the neutron flux shape function, 8:20438 (RA:US)
  Assessment of physical characteristics of heterogeneous configurations with variable fertile volume, 8:20435 (RA:US)
  Calculated and measured reactivities in the U9 critical assemblies, 8:20433 (RA:US)
  Control-rod parametrical studies in the framework of the PRE-RACINE and RACINE programs, 8:20618 (RA:US)

Gasification
  Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Market
  Conoco's program for production of methanol from coal, 8:19414 (RA:US)
Production
  Coal-based ammonia and methanol manufacture using Koppers-Totzek gasification, 8:19408 (RA:US)
  District gasification in New Jersey, 8:19538 (J:US)
  Dunn-Nokota Methanol Project, Dunn County, North Dakota. Volume IV. Product transportation analysis (Proposed methanol project near Dunn Center, North Dakota), 8:19949 (R:US)
Radiolysis
  EPR and NMR detection of transient radicals and reaction products (Radiolysis of methanol and aqueous potassium acetate), 8:21279 (R:US)
  Structure and dynamics of paramagnetic transients by pulsed EPR and NMR detection of nuclear resonance (Pulse radiolysis of methanol in D_2O), 8:21278 (R:US)
Solvent Properties
  Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
Synthesis
  Liquid-phase-methanol process-development unit: installation, operation, and support studies. Technical progress report No. 5, 1 October 1982-31 December 1982, 8:19947 (R:US)
  Methanol from landfill gas: technology and economics. Final report, 8:21002 (R:US)
  Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)
  Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Transport
  Dunn-Nokota Methanol Project, Dunn County, North Dakota. Volume IV. Product transportation analysis (Proposed methanol project near Dunn Center, North Dakota), 8:19949 (R:US)
METHANOL FUELS
  Pure methanol, methanol-water mixtures, or methanol with additives; for methanol-gasoline mixtures, use GASOHOL.
Chemical Composition
  Alcohol-based fuels from syngases, 8:19952 (J:US)
Combustion Properties
  Alcohol-based fuels from syngases, 8:19952 (J:US)
  Evaluation of plasma jet ignition for improved performance of alternate fuels. Final report Feb-Aug 82, 8:19946 (R:US)
Economics
  Alcohol-based fuels from syngases, 8:19952 (J:US)
Feasibility Studies
  Assessment/review of methanol technology and utilization as a fuel. Interim report Oct 81-Sep 82, 8:19945 (R:US)
Net Energy
  Net energy analysis of methanol and ethanol production, 8:20028 (J:GB)
Production
  Alcohol-based fuels from syngases, 8:19952 (J:US)
  Development of alcohol-based synthetic transportation fuels from coal-derived synthesis gases. Final technical report, September 1979-July 1982 (ALKANOL), 8:19541 (R:US)
Testing
  Alcohol-based fuels from syngases, 8:19952 (J:US)
Uses
  Assessment/review of methanol technology and utilization as a fuel. Interim report Oct 81-Sep 82, 8:19945 (R:US)
METHANOL PLANTS
Economic Analysis
  Dunn-Nokota Methanol project, Dunn County, North Dakota. Volume I. Executive summary, 8:19948 (R:US)

Dunn-Nokota Methanol Project, Dunn County, North Dakota. Volume IV. Product transportation analysis (Proposed methanol project near Dunn Center, North Dakota), 8:19949 (R:US)
Dunn-Nokota Methanol project, Dunn County, North Dakota. Volume I. Executive summary, 8:19948 (R:US)
Liquid-phase-methanol process-development unit: installation, operation, and support studies. Technical progress report No. 5, 1 October 1982-31 December 1982, 8:19947 (R:US)
Process Development Units
Liquid-phase-methanol process-development unit: installation, operation, and support studies. Technical progress report No. 5, 1 October 1982-31 December 1982, 8:19947 (R:US)
METHYL ALCOHOL
See METHANOL
METHYL VIOLOGEN
See BIPYRIDINES
METHYLBENZENE
See TOLUENE
METHYLENE CHLORIDE
Solvent Properties
Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
METHYLENE RADICALS
Photolysis
Molecular-beam studies of primary photochemical processes (Photodissociation of formaldehyde, glyoxal, methylene radicals), 8:21271 (R:US)
METHYL-FUEL
See ALCOHOLS
METHANOL
METHYLIDENE RADICALS
See METHYLENE RADICALS
METROPOLITAN AREAS
See URBAN AREAS
MFTF DEVICES
Prior to October 1977, MX DEVICES was used to index this concept.
ECR Heating
Improbability of a resonance breakdown in quasi-optical ECRH beam systems for the Magnetic Fusion Test Facility and other mirror systems, 8:22743 (R:US)
Quality Assurance
Designing quality into software, 8:22799 (J:US)
MHD CHANNELS
Electric Currents
Three-dimensional analysis of MHD generators: development of electrical solution, 8:20866 (R:US)
Electric Fields
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
Three-dimensional analysis of MHD generators: development of electrical solution, 8:20866 (R:US)
Flow Models
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
Secondary-flow effects in diagonal MHD channels, 8:20868 (R:US)
Inhomogeneous Plasma
Effects of core nonuniformities on the performance of MHD generators. HTGL report No. 234, 8:20875 (R:US)
Temperature Distribution
Effects of core nonuniformities on the performance of MHD generators. HTGL report No. 234, 8:20875 (R:US)
Turbulent Flow
Suppression of turbulence in combustion-driven magnetohydrodynamic flows, 8:20876 (R:US)
MHD GENERATOR AEDC
Electric Fields
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
Flow Models
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
MHD GENERATOR ETF
Engineering Test Facility. DOE coal-fired combined-cycle MHD/steam demonstration plant.
Superconducting Magnets
Conceptual design of superconducting magnet system for magnetohydrodynamic (MHD) Engineering Test Facility (ETF) 200 MWE power plant. Final report, 8:20881 (R:US)
MHD GENERATORS
See also COAL-FIRED MHD GENERATORS
LIQUID-METAL MHD GENERATORS
MHD GENERATOR AEDC
OPEN-CYCLE MHD GENERATORS
Air Heaters
MHD oxidant intermediate temperature ceramic heater study. Final report, 8:20882 (R:US)
Diffusers
Flow-field development in MHD diffusers, 8:20872 (R:US)
Electric Fields
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
Flow Models
Coupled three-dimensional flow and electrical calculations for Faraday MHD generators, 8:20869 (R:US)
Secondary-flow effects in diagonal MHD channels, 8:20868 (R:US)
Fluctuations
Suppression of turbulence in combustion-driven magnetohydrodynamic flows, 8:20876 (R:US)
Fluid Mechanics
Suppression of turbulence in combustion-driven magnetohydrodynamic flows, 8:20876 (R:US)
System Failure Analysis
Axial field limitations in MHD generators. Part 2: Analytical investigation and comparison with experiments, 8:20880 (R:US)
MHD HIGH PERFORMANCE DEMONSTRATION EXPERI
See MHD GENERATOR AEDC
MHD POWER PLANTS
See also MHD GENERATOR ETF
Cogeneration
Integration of open-cycle MHD with various chemical and metallurgical processes, 8:20874 (R:US)
Feasibility Studies
Retrofit of a coal-fired open-cycle liquid-metal MHD to steam power plants, 8:20870 (R:US)
MICE
Delayed Radiation Effects
Associations between tumor types in irradiated BALB/c female mice, 8:21975 (J:US)
MICROBIAL FLORA
See MICROORGANISMS
MICROBIAL PROCESSES
See ANAEROBIC DIGESTION
BIODEGRADATION
MICROCHANNEL ELECTRON MULTIPLIERS
Design
A particle spectrometer with a large geometric factor for the energy range 0.1 to 30 keV, 8:21577 (R:AT)
MICROCOMPUTERS
See MICROPROCESSORS
MICROEARTHQUAKES
Acoustic Monitoring
Relationship between microseismicity and high pore pressures during hydraulic stimulation experiments in low permeability granitic rocks, 8:22056 (J:US)
MICROFLORA
See MICROORGANISMS
MICROHARDNESS
MICHRD; microhardness measurement analysis (GE625,635; FORTRAN IV), 8:21039 (R:US)
MICROORGANISMS
Population Dynamics
Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
MICROPROCESSORS
Design
Application of ASP: an Automated Seismic Processor, 8:22049 (RA:US)

Reliability
Description of criteria and testing methods for the hardware and software of microcomputer systems in applications relating to the safeguarding of systems in accordance with safety regulations, 8:22884 (TG:GB)
Testing
Description of criteria and testing methods for the hardware and software of microcomputer systems in applications relating to the safeguarding of systems in accordance with safety regulations, 8:22884 (TG:GB)
MICROSCOPES
See also ELECTRON MICROSCOPES
SSAM: solid-state automated microscope, 8:21894 (J:US)
MICROWAVE AMPLIFIERS
Electron Beams
Ka-band microwave generation using the Smith-Purcell effect, 8:21444 (R:US)
Microwave generator experiment at LLNL, 8:21495 (R:US)
MICROWAVE DISCHARGES
See HIGH-FREQUENCY DISCHARGES
MICROWAVE RADIATION
Biological Effects
Responses of airborne biota to microwave transmission from satellite power system. Final report, 8:22023 (R:US)
Synergism
Dosimetric and behavioral analysis of microwave-drug synergistic effects on operant behavior in the rat. Final report Sep 79-Dec 81, 8:22022 (R:US)
MIDLAND-1 REACTOR
Anchors
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R:US)
Pressure Vessels
Continued investigation of the failure of Midland Unit 1 RPV anchor studs analysis report, 8:20384 (R:US)
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R:US)
Reactor Materials
Continued investigation of the failure of Midland Unit 1 RPV anchor studs analysis report, 8:20384 (R:US)
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R:US)
MIGRATION (RADIONUCLIDE)
See RADIONUCLIDE MIGRATION
MILITARY EQUIPMENT
Blast Effects
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)
Radiation Effects
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)
MILITARY FACILITIES
Damage
Shock, vibration and associated environments. Part III, 8:21657 (R:US)
Energy Analysis
Energy-conservation study for the US Air Force Academy, 8:20905 (R:US)
Photovoltaic Power Supplies
Solar power systems smaller than 500 W for military use, 8:20045 (R:NL:In several languages)
Solar Drying
Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)
Solar Process Heat
Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)
Solar Space Heating
Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)
Solar Water Heating
Solar energy applications at Army Ammunition Plants. Technical report, 8:20079 (R:US)
MILITARY PERSONNEL
Blast Effects
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)
Radiation Effects
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)
MILK
Decontamination
Separation of radiostrontium from radionuclide mixes in milk using cobalt dicarbolide, 8:21200 (RA:CS:In Slovak)
Radioactivity
Radiostrontium in milk and tap water, 8:21835 (RA:US)
MILL TAILINGS
Research Programs
Uranium Mill Tailings Remedial Action Program. Annual status report, 8:19827 (R:US)
MILLSTONE-1 REACTOR
Reactor Licensing
Systematic evaluation program. Status summary report, 8:20452 (R:US)
MILLSTONE-2 REACTOR
Reactor Materials
Summary of results, Millstone 2 tube support plate examination, 8:20363 (RA:US)
Steam Generators
Summary of results, Millstone 2 tube support plate examination, 8:20363 (RA:US)
MINE HAULAGE
Safety
Haulage accident prevention, 8:19659 (R:US)
MINE-MOUTH GENERATING PLANTS
See COAL MINES
FOSSIL-FUEL POWER PLANTS
MINERAL RESOURCES
See also COAL DEPOSITS
NATURAL GAS DEPOSITS
OIL SHALE DEPOSITS
PETROLEUM DEPOSITS
URANIUM DEPOSITS
Thermography
Application of hcmm data to regional geologic analysis for mineral and energy resource evaluation, 8:22039 (R:US)
MINERAL WASTES
Waste Disposal
Disposal of excess spoil from coal mining and the Surface Mining Control and Reclamation Act of 1977: a study of regulatory requirements, engineering practices, and environmental protection objectives, 8:19591 (R:US)
MINERALS
See also SILICATE MINERALS
ZEOLITES
Catalytic Effects
Thermal and catalytic cracking of tars and tar constituents from coal gasification processes, 8:19469 (RA:US)
Geochemistry
Geoanalytical and chemical bonding studies using modern surface techniques, 8:22067 (RA:US)
Surface Properties
Geoanalytical and chemical bonding studies using modern surface techniques, 8:22067 (RA:US)
Thermochemical Processes
Application of complex equilibrium calculations to the study of mineral matter during coal combustion, 8:19642 (R:US)
Variations
Estimation of material variation in powdered materials. Report No. 2115, 8:21037 (R:ZA)
MINERS
See also COAL MINERS
Chromosomal Aberrations
Long-term follow-up of chromosomal aberrations in relation to radon daughters intake in non-uranium ore miners, 8:21963 (RA:CS:In Czech)
Mortality
Morbidity and mortality in group of chronically exposed uranium mine personnel, 8:21955 (RA:CS:In Czech)
Radiation Hazards
Risks of radiation: induced lung cancer, 8:21985 (BA:US)
MINES

URANIUM MINES
Pressure Gradients
EVENT user's manual: a computer code for analyzing explosion-induced gas-dynamic transients in flow networks, 8:21439 (R:US)

Thermal Stresses
Determination of the state of stress at the Stripa mine, Sweden, 8:19851 (RA:US)
MINING
See also *COAL MINING*
OIL SHALE MINING
SURFACE MINING
UNDERGROUND MINING
Safety
Benefit-cost analysis of health and safety research and development projects in coal, metal and non-metal mining. Open file report Oct 79-Jun 81, 8:19662 (R:US)
MINI-SERVE STATIONS
See *GASOLINE SERVICE STATIONS*
MIRROR FUSION TEST FACILITY
See *MFTF DEVICES*
MIRRORS
Ballooning Instability
Rigid ballooning modes in tandem mirrors, 8:22637 (J:US)
Cleaning
Electrostatic technology for control of dust and hydrocarbon vapors in high power laser systems. Final report, 8:21374 (R:US)
Energy Losses
Anomalous reflectivity losses of coated mirrors used in the infrared, 8:21086 (R:GB)
Reflective Coatings
Anomalous reflectivity losses of coated mirrors used in the infrared, 8:21086 (R:GB)
MIRRORS (MAGNETIC)
See *MAGNETIC MIRRORS*
MIS SOLAR CELLS
Performance
Development of a cadmium selenide thin film solar cell. Final report, Mar. 1980, 8:19981 (R:DE:In several languages)
MISGURNUS
See *FISHES*
MISSILE PROTECTION
Scale-model turbine-missile-casing impact tests. Final report (PWR; BWR), 8:20691 (R:US)
MISSILE SILOS
Distributed Collector Power Plants
Configuration selection study for isolated loads using parabolic dish modules, 8:20067 (RA:US)
MISSILES
Damage
Shock, vibration and associated environments. Part III, 8:21657 (R:US)
MISSISSIPPI
Hydrology
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Salt Deposits
Permeability of selected sediments in the vicinity of five salt domes in the Gulf Interior Region, 8:22034 (R:US)
MIXED OXIDE FUEL FABRICATION PLANTS
Nuclear Materials Management
Examples of MC and A systems to meet prompt accountability specifications, 8:19897 (R:US)
MIXED OXIDE FUELS
Uranium dioxide mixed with other oxides.
Criticality
Definition of experimental procedures to assure quality in a program of mixed-oxide critical experiments, 8:20561 (J:US)
Nuclear criticality of heterogeneous mixed-oxide systems, 8:21361 (J:US)
MIXED-FUNCTION OXIDASE SYSTEMS
See *MIXED-FUNCTION OXIDASES*
MIXED-FUNCTION OXIDASES
Enzyme Inhibitors
Inhibition of rat nasal cytochrome P-450-dependent monooxygenase by the essence heliotropin (piperonal), 8:22016 (J:US)
MOBIL M-GASOLINE PROCESS
Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)
Catalysts
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Storage
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

MODERATORS
See also descriptors for specific moderator materials.
Neutron Flux
AILMOE; cross section calculation of elastic scattering resonancess (IBM360; FORTRAN IV (H)), 8:22428 (R:US)
Neutron Reactions
FLANGE1; scattering law cross section calculation (UNIVAC1108; FORTRAN V), 8:22437 (R:US)
GAKER; inelastic scattering cross section calculations for moderators (UNIVAC1108; FORTRAN IV), 8:22448 (R:US)
GASKET; thermal scattering law calculation (UNIVAC1108; FORTRAN IV), 8:22440 (R:US)
MOESSBAUER EFFECT
Line Broadening
Theory of Moessbauer line broadening due to diffusion, 8:22548 (R:US)
MOLASSES
Fermentation
Fermentative production of butanol from sorghum molasses as a potential agricultural fuel. Final report, June 26, 1981-September 25, 1982, 8:19990 (R:US)
MOLECULAR BEAMS
Beam Production
Generation of beams of refractory-metal clusters, 8:22185 (R:US)
MOLECULAR IONS
Coordinate the above descriptor with a descriptor for the specific ion.
Collisions
Collisional effects in the passage of fast molecular ions through thin foils, 8:22178 (R:US)
MOLECULAR MODELS
Selective excitation, relaxation, and energy channeling in molecular systems. Progress report, December 1, 1981-November 30, 1982, 8:22193 (R:US)
MOLECULAR ORBITAL MODEL
See *MOLECULES*
MOLECULE COLLISIONS
See also *PHOTON-MOLECULE COLLISIONS*
Ionization
Heavy particle collisions, 8:22175 (R:US)
Scattering
Moment techniques in atomic and molecular scattering theory, 8:22229 (BA:US)
MOLECULES
See also *POLYATOMIC MOLECULES*
Dissociation
Dissociation in small molecules, 8:22184 (R:US)

Energy-Level Transitions
Selective excitation, relaxation, and energy channeling in molecular systems. Progress report, December 1, 1981-November 30, 1982, 8:22193 (R:US)
Entropy
Statistical mechanical prediction of entropies and free energy functions for small clusters of atoms, 8:22575 (J:US)
Excitation
Selective excitation, relaxation, and energy channeling in molecular systems. Progress report, December 1, 1981-November 30, 1982, 8:22193 (R:US)
Free Energy
Statistical mechanical prediction of entropies and free energy functions for small clusters of atoms, 8:22575 (J:US)
Predissociation
Dissociation in small molecules, 8:22184 (R:US)

MOLLUSCS
See also OYSTERS
Population Dynamics
Ecological studies of wood-boring bivalves in the vicinity of the Oyster Creek Nuclear Generating Station. Progress report Sep-Nov 81, 8:21876 (R:US)
Spatial Distribution
Ecological studies of wood-boring bivalves in the vicinity of the Oyster Creek Nuclear Generating Station. Progress report Sep-Nov 81, 8:21876 (R:US)
Species Diversity
Ecological studies of wood-boring bivalves in the vicinity of the Oyster Creek Nuclear Generating Station. Progress report Sep-Nov 81, 8:21876 (R:US)

MOLTEN CARBONATE FUEL CELLS
Prior to June 1980 this information was indexed with the descriptors HIGH-TEMPERATURE FUEL CELLS + MOLTEN SALTS + CARBONATES.
Electrolyte vaporization losses from molten-carbonate fuel cells, 8:20885 (R:US)
Cathodes
Advanced-fuel cell development. Progress report, July-September 1981, 8:20884 (R:US)
Electrolytes
High-temperature fuel-cell research and development. Final technical progress report, 1 Oct 1980-30 Sep 1981, 8:20887 (R:US)
Matrix Materials
Advanced-fuel cell development. Progress report, July-September 1981, 8:20884 (R:US)
High-temperature fuel-cell research and development. Final technical progress report, 1 Oct 1980-30 Sep 1981, 8:20887 (R:US)

MOLTEN METAL-WATER REACTIONS
SWAAM1; LMFBR sodium-water reaction analysis (IBM370,3033; FORTRAN IV), 8:20414 (R:US)

MOLYBDATES
Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Catalytic Effects
Pollution control in coal gasification, 8:19470 (RA:US)

MOLYBDENUM
Adsorption
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Bond Lengths
Supersonic metal cluster beams of refractory metals: Spectral investigations of ultracold Mo$_2$, 8:22205 (J:US)
Catalytic Effects
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Corrosion Protection
Corrosion and high temperature resistant coatings for molybdenum, made out of iron and nickel alloys and applied by explosive welding, 8:21087 (R:DE:In German)
Electronic Structure
Supersonic metal cluster beams of refractory metals: Spectral investigations of ultracold Mo$_2$, 8:22205 (J:US)
Evaporation
Supersonic metal cluster beams of refractory metals: Spectral investigations of ultracold Mo$_2$, 8:22205 (J:US)
Molecular Structure
Supersonic metal cluster beams of refractory metals: Spectral investigations of ultracold Mo$_2$, 8:22205 (J:US)

MOLYBDENUM ALLOYS
See also INCONEL 625
STAINLESS STEEL-316
Charpy Test
Fractographic examination of HT-9 and 9Cr-1Mo Charpy specimens irradiated in the AD-2 test, 8:22715 (RA:US)
Miniature Charpy impact test results for irradiated ferritic alloys, 8:22719 (RA:US)
Corrosion
Corrosion of path A PCA, type 316 stainless steel and Fe-12 Cr-1 MoVW steel in flowing lithium, 8:22720 (RA:US)
Crack Propagation
Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV (Ti-30 Mo), 8:21067 (R:US)
Fatigue
Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV (Ti-30 Mo), 8:21067 (R:US)
Fractures
Fractographic examination of HT-9 and 9Cr-1Mo Charpy specimens irradiated in the AD-2 test, 8:22715 (RA:US)
Fracture toughness of unirradiated HT-9 and modified 9Cr-1Mo welds, 8:22716 (RA:US)
Mechanical Properties
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)
Microstructure
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)
Oxidation
Microstructures, transformations and properties of oxidation-resistant, iron-base, aluminum-modified alloys (Fe-8Al-6Mo-0.25Nb-0.8Zr-0.1Ce-0.1C), 8:21073 (R:US)

MUONIC ATOMS
Hyperfine Structure
Theoretical hyperfine structure of the muonic ^{3}He and ^{4}He atoms, 8:22210 (J:US)
Spectral Shift
Charge distributions of barium isotopes from muonic X-rays, 8:22217 (J:NL)
Spectroscopy
Laser excitation, 8:22187 (R:US)
MUONIUM
Hyperfine Structure
Muonium, 8:22194 (RA:US)
Spectroscopy
Laser excitation, 8:22187 (R:US)
MUONS MINUS
Capture
Muon capture reaction (μ^-,nu/sub μ/) with nuclei, 8:22259 (RA:US)
MUSCULAR TISSUE
See TISSUES
MUSHROOMS
Productivity
Uptake and fate of Cd and Zn in edible fungi of the Agaricus bisporus species, 8:22002 (R:DE:In German)
MX DEVICES
See MFTF DEVICES
MYCORRHIZAS
Metabolism
Carbon metabolism in legume nodules. Progress report, June 1, 1982-January 30, 1983, 8:21910 (R:US)

N

NAGASAKI
A-Bomb Survivors
Mortality follow-up of Shirabe 1945 Nagasaki questionnaire sample, 1945-1966, 8:21666 (R:US:In English and Japanese)
NAL SYNCHROTRON
See FERMILAB ACCELERATOR
NAPHTHA
Boiling point range 0-204°C.
Chemical Analysis
Measuring alkenes in SRC-I naphthas, 8:19482 (RA:US)
Microanalytical procedures, 8:19484 (RA:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Prices
Monthly petroleum-product price report, 8:19697 (R:US)
NAPHTHALENE
Molecular Weight
Enthalpy measurement of coal-derived liquids. Technical progress report, November 1982-January 1983, 8:19559 (R:US)
NAP-M STORAGE RING
Electron Cooling
Study on the compensation of electron beam space charge in facilittes with electron cooling, 8:21554 (RA:SU:In Russian)
NATIONAL ACCELERATOR LABORATORY
See FERMILAB ACCELERATOR
NATIONAL ENERGY SECURITY CORPORATION
See SYNTHETIC FUELS CORPORATION
NATIONAL GOVERNMENT
Use only when needed in conjunction with one or both of the terms LOCAL GOVERNMENT and STATE GOVERNMENT.
Energy Policy
Federal role and activities in energy research and development 1946-1980: an historical summary, 8:21890 (R:US)
NATIONAL PROGRAM PLANS
For reports describing the Federal RD and D program plan for energy technologies.
Federal role and activities in energy research and development 1946-1980: an historical summary, 8:21890 (R:US)
NATIONAL REACTOR TESTING STATION
See IDAHO NATIONAL ENGINEERING LABORATORY
NATURAL BRIDGES NATIONAL MONUMENT
Photovoltaic Power Plants
Natural Bridges National Monument photovoltaic power plant: maintenance manual, 8:20034 (R:US)
NATURAL GAS
California energy prices, 1980-2000. Staff report (final), 8:19718 (R:US)
Energy information report to Congress: quarterly report. Second quarter, 1982, 8:19691 (R:US)
Consumption Rates
Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
Cost and quality of fuels for electric utility plants (For August 1982), 8:20253 (R:US)
Texas energy history, 8:20794 (R:US)
Cost
Cost and quality of fuels for electric-utility plants: 1981 annual, 8:20817 (R:US)
Electric Power Annual (For 1981), 8:20823 (R:US)
Monthly energy review, 8:20857 (R:US)
Monthly energy review. First half 1982 summary, 8:20858 (R:US)
Distribution
Natural gas monthly, 8:19756 (R:US)
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Energy Consumption
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Energy Demand
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Energy Models
Oil and gas, 8:20759 (RA:US)
Energy Supplies
International energy annual, 1981, 8:19672 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Exports
Natural gas monthly, 8:19756 (R:US)
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Fuel Consumption
Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)
Pacific northwest industrial energy load analysis. Final report May 81-Feb 82, 8:19760 (R:US)
Fuel Substitution
Economics of utility oil and gas substitution: national and region-specific analysis, 8:19715 (R:US)
Imports
Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)
Monthly energy review, 8:20857 (R:US)
Monthly energy review. First half 1982 summary, 8:20858 (R:US)
Natural gas monthly, 8:19756 (R:US)
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Market
Analysis of post-NGPA interstate pipeline wellhead purchases: an analysis of the Natural Gas Policy Act and several alternatives, Part III, 8:19758 (R:US)
Analysis of industrial demand for natural gas, 8:19759 (R:US)
Phase Diagrams
Liquid-vapor equilibria for ternary natural gas systems. Annual report Sep 80-Sep 81, 8:19772 (R:US)
Prices
Cost and quality of fuels for electric utility plants (For June 1983), 8:20251 (R:US)
Cost and quality of fuels for electric utility plants (For July 1982), 8:20252 (R:US)
Cost and quality of fuels for electric utility plants (For February 1982), 8:20249 (R:US)
Cost and quality of fuels for electric utility plants (For March 1982), 8:20250 (R:US)
Natural gas monthly, 8:19756 (R:US)
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Short term energy outlook. Volume I. Quarterly projections, 8:19710 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)
Production
Energy information. Quarterly report: third quarter, 1982, 8:20789 (R:US)
Large-scale stimulation of a low-permeability Permian Pennsylvanian, gas reservoir, 8:19765 (R:US)
Monthly energy review, 8:20857 (R:US)
Monthly energy review. First half 1982 summary, 8:20858 (R:US)
Natural gas monthly, 8:19756 (R:US)
Natural gas monthly, 8:19755 (R:US)
Natural gas monthly, 8:19754 (R:US)
Tennessee energy statistics quarterly, third quarter 1982, 8:19719 (R:US)

Recovery
  Gas saturation in formation waters: Volume 1. Annual report Apr 80-Mar 81, 8:19751 (R:US)
  Gas saturation in formation waters: Volume 2. Annual report Apr 80-Mar 81, 8:19752 (R:US)
Reserves
  Domestic natural gas reserves and production dedicated to interstate pipeline companies, 1981 (preliminary report), 8:20806 (R:US)
  Estimation of resources and reserves. Final report, 8:19673 (R:US)
  Petroleum Supply Monthly (August 1982), 8:19707 (R:US)
Sales
  Analysis of post-NGPA interstate pipeline wellhead purchases: an analysis of the Natural Gas Policy Act and several alternatives, Part III, 8:19758 (R:US)
  Natural gas monthly, 8:19754 (R:US)
Storage
  Natural gas monthly, 8:19756 (R:US)
  Natural gas monthly, 8:19755 (R:US)
  Natural gas monthly, 8:19754 (R:US)
Supply and Demand
  Analysis of industrial demand for natural gas, 8:19759 (R:US)
Wellhead Prices
  Analysis of post-NGPA interstate pipeline wellhead purchases: an analysis of the Natural Gas Policy Act and several alternatives, Part III, 8:19758 (R:US)
NATURAL GAS APPLIANCES
  See GAS APPLIANCES
NATURAL GAS DEPOSITS
Exploration
  Estimation of the future rates of oil and gas discoveries in the western Gulf of Mexico. Professional paper, 8:19678 (R:US)
  Final report of special geological, geochemical, and petrological studies of the Devonian shales in the Appalachian Basin, 8:19750 (R:US)
  Prospects for oil and gas in the Coos Basin, western Coos, Douglas, and Lane Counties, Oregon. Oil and gas investigation 6, 8:19676 (R:US)
Geological Surveys
  Summary chart of geological data from the COST No. B-3 well, US Mid-Atlantic Continental Slope (Charts and map), 8:19679 (R:US)
Leasing
  Outer Continental Shelf (OCS) Oil and Gas Supply Model. Model 1. Model summary and methodology description, 8:19674 (R:US)
  Proposed 1983 outer continental shelf oil and gas lease sale offshore the Mid-Atlantic states. Final environmental impact statement, 8:19730 (R:US)
Origin
  Studies related to the deep earth gas. Annual report Jan-Dec 81, 8:19677 (R:US)
Resource Development
  Outer Continental Shelf (OCS) Oil and Gas Supply Model. Volume 2. Data description, 8:19675 (R:US)
  Outer Continental Shelf (OCS) Oil and Gas Supply Model. Model 1. Model summary and methodology description, 8:19674 (R:US)
NATURAL GAS DISTRIBUTION SYSTEMS
Data Compilation
  Analysis of post-NGPA interstate pipeline wellhead purchases: an analysis of the Natural Gas Policy Act and several alternatives, Part III, 8:19758 (R:US)
Financial Data
  Statistics of interstate natural gas pipeline companies: 1981, 8:19757 (R:US)

Performance
Electronically focused power diffractometers at IPNS-I, 8:21515 (R:US)
NEUTRON DIFFUSION EQUATION
ADEP; 1-dimensional and 2-dimensional few-group space-time kinetics (CDC6400; FORTRAN IV), 8:20539 (R:US)
MC-2; fast neutron spectra & multigroup cross section (IBM360,370;CDC7600; FORTRAN IV (99nd Assembly language (1IBM370), FORTRAN IV (99) and COMPASS (1) (CDC7600).), 8:22465 (R:US)
SYN; 2-dimensional synthesis multigroup diffusion and 1-group depletion (GE635; FORTRAN IV and GMAP), 8:20411 (R:US)
Multigroup Theory
3DDT; 3-dimensional multigroup diffusion xyz or r-theta-z (CDC6600; FORTRAN IV), 8:20528 (R:US)
Numerical Solution
TEMPEST2; thermal neutron spectrum cross sections (IBM360; FORTRAN IV), 8:22424 (R:US)
One-Dimensional Calculations
1DX; one-dimensional diffusion fast cross section generation (UNIVAC1108;IBM360,370; FORTRAN IV (UNIVAC1108), FORTRAN IV and BAL (IBM360,370)), 8:22472 (R:US)
AIM6; one-dimensional multi-group diffusion slabs, cylinders, and spherese (IBM370; FORTRAN IV), 8:22421 (R:US)
BNWIGL;UNIWIGL; two-group time-dependent one-dimensional diffusion (UNIVAC1108,1100;CDC6600; FORTRAN (99%) and COMPASS (1%) (CDC6600), FORTRAN V (UNIVAC1108)), 8:22510 (R:US)
CAESAR4; liblst; one-dimensional, multigroup diffusion (IBM360; FORTRAN IV), 8:22441 (R:US)
CITATION; one-, two-, and three-dimensional diffusion depletion using multigroup theory (IBM360,303x; FORTRAN IV), 8:22479 (R:US)
FAIMOS; one-dimensional, multigroup diffusion in slab, cylindrical, or spherical geometries (IBM360; FORTRAN IV (H)), 8:22427 (R:US)
FEVER; one-dimensional, few-group diffusion depletion program (CDC CYBER73,175;CDC7600; FORTRAN IV), 8:20390 (R:US)
FEVER7; one-dimensional multigroup diffusion and depletion (UNIVAC1108; FORTRAN IV), 8:22454 (R:US)
FOG; one-dimensional few-group few-gp diffusion slab cylinder sphere (GE625; FORTRAN IV), 8:22420 (R:US)
GAKIN2; 10 multigroup time-dependent diffusion (IBM370; FORTRAN IV), 8:22453 (R:US)
GAKIT; one-dimensional, multigroup kinetics with temperature feedback (UNIVAC1108; FORTRAN IV), 8:22470 (R:US)
GASP7; one-dimensional burnup power distribution search (UNIVAC1108; FORTRAN IV), 8:22455 (R:US)
GAZE2; one-dimensional multigroup diffusion in slab, spherical, and cylindrical geometries (UNIVAC1108; FORTRAN IV (95%) and Assembly language (5%)), 8:22491 (R:US)
HAMMER;LITHE;HELP; critical analysis system (IBM360; FORTRAN IV and BAL), 8:20502 (R:US)
HFN; one-dimensional, multigroup diffusion in slabs, cylinders, and spheres (UNIVAC1107;CDC6600,CYBER74; FORTRAN IV (99.9%) and SLEUTH-II (0.1%) (UNIVAC1107), FORTRAN IV (CDC6600)), 8:22436 (R:US)
MACH1; one-dimensional, multigroup diffusion is slabs, cylinders, and spheres (CDC6500;IBM360,370/195; FORTRAN IV (CDC6500, IBM360-98%), BAL (IBM360-2%)), 8:22439 (R:US)
NOAH; one-dimensional, one-group space-time diffusion feedback (CDC6600; FORTRAN IV), 8:22485 (R:US)
NOWIG; one-dimensional, two-group kinetics with temperature feedback (CDC6600; FORTRAN IV), 8:22471 (R:US)
PDQ8;PDQ7; one, two, or three-dimensional, few group (CDC7600,6600,CYBER175,170;IBM360; PDQ8 - FORTRAN and COMPASS (RUN and FTN compatible); PDQ7 - FORTRAN IV and COMPASS (CDC CYBER175), FORTRAN FTN4.6 (CDC7600), FORTRAN IV (H) and BAL (IBM360)), 8:22444 (R:US)
PERT; one-dimensional perturbation for AIM and FOG codes (IBM360; FORTRAN IV), 8:22422 (R:US)
RAUMZEIT; one-dimensional time-dependent diffusion calculations (CDC6600; FORTRAN IV), 8:22464 (R:US)
RELOAD FEVER; one-dimensional, few-group diffusion depletion (CDC CYBER73,175; FORTRAN IV), 8:20467 (R:US)
SIZZLE; one-dimensional multigroup diffusion depletion (IBM360; FORTRAN IV), 8:22426 (R:US)
STINT3; single-channel space-time synthesis (CDC6600; FORTRAN IV), 8:22481 (R:US)
TEMCO7; temperature coefficient calculation (UNIVAC1108; FORTRAN IV), 8:22456 (R:US)
THREDES; one-dimensional few group diffusion design system (IBM360; FORTRAN IV), 8:20501 (R:US)
WIGL2; one-dimensional, two-group space-time diffusion (CDC6600;UNIVAC1108;IBM370; FORTRAN IV), 8:22443 (R:US)
Three-Dimensional Calculations
CITATION; one-, two-, and three-dimensional diffusion depletion using multigroup theory (IBM360,303x; FORTRAN IV), 8:22479 (R:US)
GATT; three-dimensional, few-group diffusion calculations in hexagonal geometries (UNIVAC1108; FORTRAN IV), 8:22476 (R:US)
PDQ8;PDQ7; one, two, or three-dimensional, few group (CDC7600,6600,CYBER175,170;IBM360; PDQ8 - FORTRAN and COMPASS (RUN and FTN compatible); PDQ7 - FORTRAN IV and COMPASS (CDC CYBER175), FORTRAN FTN4.6 (CDC7600), FORTRAN IV (H) and BAL (IBM360)), 8:22444 (R:US)
STINT3; single-channel space-time synthesis (CDC6600; FORTRAN IV), 8:22481 (R:US)
Two-Dimensional Calculations
2DB; two-dimensional multigroup diffusion and depletion (UNIVAC1108;CDC6600; FORTRAN IV), 8:22457 (R:US)
2DF; two-dimensional, multigroup discrete ordinate code (UNIVAC1108; FORTRAN V), 8:22430 (R:US)
BISYN; two-dimensional, multigroup diffusion synthesis calculations (GE635;UNIVAC1108; FORTRAN IV), 8:22447 (R:US)
BUG2; two-dimensional multigroup diffusion & burnup in xy, rz geometries (UNIVAC1108; FORTRAN IV and Assembly language), 8:22495 (R:US)
BUGTRI; two-dimensional multigroup diffusion & burnup in triangular geometries (UNIVAC1108; FORTRAN IV and Assembly language), 8:22496 (R:US)

CITATION; one-, two-, and three-dimensional diffusion depletion using multigroup theory (IBM360,303x; FORTRAN IV), 8:22479 (R:US)
EQUIPOISE3; two-dimensional, two group diffusion is slabs or cylinders (CDC CYBER73,175;CDC7600; FORTRAN IV), 8:22423 (R:US)
EXTERMINATOR2; two-dimensional, multigroup diffusion program diffusion program (IBM360;GE625;CDC6600; FORTRAN IV), 8:22429 (R:US)
FX2-TH; two-dimensional time-dependent reactor kinetics (IBM370,303X; FORTRAN IV (99%) and Assembly language (1%)), 8:22509 (R:US)
GAMBLE5; two-dimensional, multigroup diffusion in xy and rz geometry (UNIVAC1108; FORTRAN IV and Assembly language), 8:22435 (R:US)
GAMTRI; two-dimensional, multigroup, diffusion triangular mesh geometries (UNIVAC1108; FORTRAN IV (90%) and Assembly language (10%)), 8:22484 (R:US)
GAUGE; two-dimensional, few-group, neutron diffusion in hexagonal geometries (UNIVAC1108; FORTRAN IV), 8:22459 (R:US)
M0807; two-dimensional diffusion absorption removal cross sections (CDC6600; FORTRAN IV), 8:22446 (R:US)
PDQ8;PDQ7; one, two, or three-dimensional, few group (CDC7600,6600,CYBER175,170;IBM360; PDQ8 - FORTRAN and COMPASS (RUN and FTN compatible); PDQ7 - FORTRAN IV and COMPASS (CDC CYBER175), FORTRAN FTN4.6 (CDC7600), FORTRAN IV (H) and BAL (IBM360)), 8:22444 (R:US)
TWIGL;TWIGGLE; two-dimensional, two-group space-time diffusion feedback (CDC6600;IBM360; FORTRAN IV), 8:22458 (R:US)
VARI-QUIR; time-dependent, two-dimensional, multigroup diffusion (CDC6600;IBM360; FORTRAN IV), 8:22433 (R:US)

NEUTRON DOSIMETRY
Calculation and interpretation of In-Situ measurements of initial radiations at Hiroshima and Nagasaki, 8:21935 (R:US)
DOS; neutron flux-dosimeter activity relation (GE625,635; FORTRAN IV), 8:20522 (R:US)

BF3 Counters
Neutron REM survey meter (Engineering Materials), 8:21613 (E:US)

Energy Dependence
Neutron dosimeters based on hydrogenous materials, 8:21601 (RA:US)

Gamma Detection
Gamma-ray component from a Cf fission source, 8:21591 (RA:US)

Meetings
Ninth DOE workshop on personnel neutron dosimetry (Lead abstract), 8:22543 (R:US)

NEUTRON ECONOMY
See NEUTRON FLUX

NEUTRON FLUX
FCC4; fundamental mode fast reactor cross section calculations (UNIVAC1108; FORTRAN IV), 8:20243 (R:US)

NEUTRON FLUX DENSITY
See NEUTRON FLUX

NEUTRON LIFETIME LOG
See NEUTRON-NEUTRON LOGGING

NEUTRON LOGGING
See also NEUTRON-GAMMA LOGGING
NEUTRON-NEUTRON LOGGING

Computer Codes
Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)

NEUTRON MATTER
See NUCLEAR MATTER

NEUTRON MULTIPLIER FACILITY
See SUBCRITICAL ASSEMBLIES

NEUTRON REACTIONS
LASL group-averaged cross-sections; SN 18- 24- and 25-group sets (CDC6600; FORTRAN IV), 8:20548 (R:US)

Capture
Nuclear-structure studies via neutron interactions. Progress report, July 1, 1982-June 30, 1983, 8:22358 (R:US)
Strengths of E0 transitions in ^{188}Os and ^{196}Pt and the structure of IBA wavefunctions in the Os-Pt transition region, 8:22384 (J:NL)
Study of the level schemes of ^{75}Se, ^{76}Se, and ^{77}Se by capture of thermal neutrons, 8:22364 (R:DE:In German)

Charge-Exchange Reactions
(n,α) and (n,p) reactions with 3 MeV neutrons, 8:22359 (RA:CS:In Slovak)

Compound-Nucleus Reactions
COMNUC;CASCADE; compound nucleus reaction (IBM360; FORTRAN IV with one Assembler language subroutine for performing internal I/O.), 8:22366 (R:US)
GRAMP; r-m parameters of unresolved resonances (CDC6600; FORTRAN IV), 8:22387 (R:US)

Cross Sections
1DX; one-dimensional diffusion fast cross section generation (UNIVAC1108;IBM360,370; FORTRAN IV (UNIVAC1108), FORTRAN IV and BAL (IBM360,370)), 8:22472 (R:US)
ACSAP; resonance region cross section analysis (IBM360,370,303x; FORTRAN IV (92%) and BAL (8%)), 8:22512 (R:US)
AVERAGE; unresolved region average cross section calculations (CDC6600; FORTRAN IV), 8:22474 (R:US)
AVOID; annular void cross section calculation (GE625; FORTRAN IV), 8:22445 (R:US)
CHECKER;CRECT;DAMMET;PLOTFB; SLAVE3 ENDF/B V1 processing codes; CHECKER,CRECT,DAMMET,PLOTFB,... ENDF/B V1 proc (CDC6600; FORTRAN IV), 8:22477 (R:US)
FLANGE1; scattering law cross section calculation (UNIVAC1108; FORTRAN V), 8:22437 (R:US)
FSDP3; pointwise cross sections from Breit-Wigner parameters (UNIVAC1108; FORTRAN V), 8:22434 (R:US)
GAND; GAFGAR cross-section library preparation (UNIVAC1108; FORTRAN IV), 8:20514 (R:US)
GANDY3; unresolved resonance cross secton calculation (UNIVAC1108; FORTRAN IV), 8:22460 (R:US)
CGC4; multigroup cross sections fast thermal spectra (UNIVAC1108;CDC6600; FORTRAN V (UNIVAC1108), FORTRAN IV (CDC6600)), 8:22451 (R:US)
GROUSE; space-dependent cross section generation (GE625,635; FORTRAN IV), 8:20521 (R:US)
JP1XR; coupled-channel scattering cross section calculations (CDC6600; FORTRAN IV), 8:22504 (R:US)
JUPITOR1;JP1; coupled channel x-sec evaluation (IBM360; FORTRAN IV), 8:22452 (R:US)
LARCA; flux-weighting of DTF4 cross sections (CDC6600; FORTRAN IV), 8:22486 (R:US)
MC-2; fast neutron spectra & multigroup cross section (IBM360,370;CDC7600; FORTRAN IV (99nd Assembly language (1IBM370), FORTRAN IV (99) and COMPASS (1) (CDC7600).), 8:22465 (R:US)
MINX; multigroup crosssections from ENDF/B-IV data (CDC7600;IBM370; FORTRAN IV (H compiler) and BAL (IBM370), FORTRAN IV (RUN or FTN compiler) and COMPASS (CDC7600)), 8:22507 (R:US)
MULTI; multi-level resonance theory cross section calculations (CDC6600; FORTRAN IV), 8:20550 (R:US)
NJOY; neutron & photon crosssections from ENDF/B (CDC7600; American National Standard X3.9-1966 FORTRAN language is used with a few exceptions, such as CDC overlay commands, mixed-mode arithmetic, and expressions as array indices. Machine-dependent functions such as timing, input-output, and character manipulation are isolated in special subroutines. Changes required for IBM implementation are denoted by 'CIBM' comment cards. Some loops have been rearranged to facilitate vectorization.), 8:22513 (R:US)
RAMP1; Reich-Moore resolved region cross-sections (CDC6600; FORTRAN IV), 8:22503 (R:US)
SCORE3; SCISRS ENDF/B graphic cross section evaluation (IBM360; FORTRAN IV and BAL), 8:22473 (R:US)
SIGPLOT; resolved multilevel Briet-Wigner cross section calculations (CDC6600; FORTRAN IV), 8:22475 (R:US)

SUMOR;m0271; s-wave neutron cross section calculation (CDC6600; FORTRAN IV), 8:22483 (R:US)
THRES2; statistical model reaction cross-sections (CDC6600;IBM360; FORTRAN IV), 8:22355 (R:US)
ZPR-III Assembly 48 GAFGAR ENDF/B Data Tapes; ZPR-III assembly 48 GAFGAR ENDF/B data tapes (UNIVAC1108; Variable-length binary records), 8:20515 (R:US)
Data Compilation
Nuclear data guide for reactor neutron metrology. part I: activation reactions (1979 edition). Part II: fission reactions (1979 edition), 8:20558 (R:US)
Elastic Scattering
PHASER; phase shift cross section and polarization calculations (CDC6600; FORTRAN IV), 8:22505 (R:US)
Exciton Model
Inclusion of surface interactions in exciton model, 8:22399 (RA:CS:In Slovak)
Experimental Data
(n,γf) reaction in ^{235}U, 8:22390 (RA:CS:In Slovak)
Fast Fission
Measurement of the neutron-induced fission cross section of /sup 232/Th relative to /sup 235/U from 0.7 to 30 MeV, 8:22395 (J:US)
Fission Spectra
THRES2; statistical model reaction cross-sections (CDC6600;IBM360; FORTRAN IV), 8:22355 (R:US)
Group Constants
ETOX3; multigroup constants from ENDF/B for one dimension (UNIVAC1108;IBM360,370; FORTRAN IV), 8:22480 (R:US)
Inelastic Scattering
Nuclear-structure studies via neutron interactions. Progress report, July 1, 1982-June 30, 1983, 8:22358 (R:US)
PHASER; phase shift cross section and polarization calculations (CDC6600; FORTRAN IV), 8:22505 (R:US)
RICE; primary recoil atom spectra ENDF/B data (IBM360; FORTRAN IV), 8:22497 (R:US)
Least Square Fit
CODILLI; least squares analysis of resonance data (IBM360; FORTRAN IV), 8:22463 (R:US)
P Codes
PUN1; unresolved resonance integral cross sections (CDC6600; FORTRAN IV), 8:22467 (R:US)
Pickup Reactions
(n,α) and (n,p) reactions with 3 MeV neutrons, 8:22359 (RA:CS:In Slovak)
Scattering
Electron excitation in atoms and molecules by neutron-nucleus scattering, 8:22372 (R:US)
ENDF/B-THERMOS; 30-group ENDF/B scattering kernels (Auxiliary program written in FORTRAN IV), 8:22506 (R:US)
JP1XR; coupled-channel scattering cross section calculations (CDC6600; FORTRAN IV), 8:22504 (R:US)
MULTI; multi-level resonance theory cross section calculations (CDC6600; FORTRAN IV), 8:20550 (R:US)
Thermal Fission
Calculated beta-spectra from decay of fission products produced by thermal-neutron fission of ^{235}U, 8:22396 (J:NL)
Total Cross Sections
Evaluation of the ^{238}U neutron total cross section, 8:22385 (R:US)
NEUTRON REFLECTORS
Physical Radiation Effects
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
NEUTRON SOURCE FACILITIES
See also IPNS-I SYNCHROTRON
Design
HFIR/FFTF irradiation experiment: final design phase, 8:22706 (RA:US)
Neutron Diffractometers
Electronically focused power diffractometers at IPNS-I, 8:21515 (R:US)
Performance
Neutron source characterization for materials experiments, 8:22705 (RA:US)
NEUTRON SOURCES
Excludes reactors even when used as neutron sources.
EXPN; analysis of pulsed neutron source data (GE635; FORTRAN IV), 8:19904 (R:US)
Accelerators
Pulse neutron generator design update, 8:19907 (RA:US)
Fabrication
Zetatron tube and transformer technology transfer, 8:21648 (RA:US)
Neutron Flux
Neutron-source characterization for fusion-materials studies, 8:22690 (R:US)
Neutron Spectra
Effect of multiple deuteron scattering on neutron spectrum of d+T generator, 8:22520 (RA:CS:In Czech)
Neutron-source characterization for fusion-materials studies, 8:22690 (R:US)
Theoretical neutron spectrum of a 14 MeV neutron tube with cylindrical ion acceleration structure, 8:21518 (R:DE)
Service Life
Life-test results on the Zetatron tube, transformer and the tube-transformer assembly, 8:21649 (RA:US)
Specifications
Zetatron neutron generating tube revisited, 8:19906 (RA:US)
NEUTRON SPECTRA
GAFGAR;p3t;PROC;TAPCOP; spectra and group-averaged cross section calculation (UNIVAC1108; FORTRAN IV), 8:20511 (R:US)
LEOPARD;SPOTS; sjectrum calculation with depletion (IBM360;UNIVAC1108; FORTRAN IV(H) (IBM360) and FORTRAN V (UNIVAC1108)), 8:20503 (R:US)
PHROG; multi-group constant and fast spectra calculations (IBM360; FORTRAN IV), 8:20543 (R:US)
Computer Calculations
PAX03; harmony-PDQ cross section generation code (CDC6600; FORTRAN IV and COMPASS), 8:22489 (R:US)
Multigroup Theory
CAGE;BIRD;SPEC; time-of-flight data analysis (UNIVAC1108; FORTRAN V), 8:22501 (R:US)
NEUTRON SPECTROMETERS
Comparative Evaluations
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)
Design
A high throughput inelastic neutron scattering spectrometer for the Harwell linac and the spallation neutron source, 8:21585 (R:US)
Portable neutron spectrometer/dosimeter, 8:21600 (RA:US)
Spectroscopy and dosimetry of fast neutrons in the energy range (0.5 - 15) MeV using CR-39, 8:21597 (RA:US)
Performance
Tests of a resonance detector spectrometer for electron-volt spectroscopy, 8:21571 (R:US)
Radiator Counters
Tests of a resonance detector spectrometer for electron-volt spectroscopy, 8:21571 (R:US)
Sensitivity
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)
Spectroscopy and dosimetry of fast neutrons in the energy range (0.5 - 15) MeV using CR-39, 8:21597 (RA:US)
Spectral Response
Portable neutron spectrometer/dosimeter, 8:21600 (RA:US)
Progress on development of a passive, personnel neutron dosimetry/spectrometer - DOSPEC, 8:21598 (RA:US)
Uses
Spectroscopy and dosimetry of fast neutrons in the energy range (0.5 - 15) MeV using CR-39, 8:21597 (RA:US)
NEUTRON SPECTROSCOPY
Calibration Standards
White source use in a neutron standards laboratory. Final report, 8:22521 (R:US)

NEUTRON STARS
Gamma Astronomy
Compact objects, 8:22087 (R:US)
X-Ray Spectra
Neutron star binaries, pulsars and burst sources, 8:22110 (R:US)
NEUTRON TRANSPORT
TACASI; analysis of resonance measurements (UNIVAC1108; FORTRAN IV), 8:22487 (R:US)
Cross Sections
APRFX1; 99-group DLC-2B library group-collapsing (CDC6600; FORTRAN IV), 8:20530 (R:US)
Sensitivity Analysis
Sensitivity study of neutron transport through standard and rebar concrete, 8:22529 (J:US)
NEUTRON TRANSPORT THEORY
2DF; two-dimensional, multigroup discrete ordinate code (UNIVAC1108; FORTRAN V), 8:22430 (R:US)
AILMOE; cross section calculation of elastic scattering resonancess (IBM360; FORTRAN IV (H)), 8:22428 (R:US)
BRT1; thermal spectrum cross section calculations (UNIVAC1108; FORTRAN V), 8:20497 (R:US)
LASER; spectrum calculations with burnup cylindrical lattice (IBM360,370; FORTRAN IV), 8:20499 (R:US)
NJOY; neutron & photon crosssections from ENDF/B (CDC7600; American National Standard X3.9-1966 FORTRAN language is used with a few exceptions, such as CDC overlay commands, mixed-mode arithmetic, and expressions as array indices. Machine-dependent functions such as timing, input-output, and character manipulation are isolated in special subroutines. Changes required for IBM implementation are denoted by 'CIBM' comment cards. Some loops have been rearranged to facilitate vectorization.), 8:22513 (R:US)
Transport and reactor theory. Progress report, July 1-September 30, 1982, 8:22738 (R:US)
Discrete Ordinate Method
BE21; few-group, discrete ordinates for slab geometry (CDC6600; FORTRAN IV), 8:22482 (R:US)
TSN; spatially-dependent reactor kinetics (IBM360; FORTRAN IV), 8:20508 (R:US)
TWOTRAN2; two-dimensional, multigroup transport in xy, rz, and r theta geometries (CDC7600,6600;IBM360/195; FORTRAN IV), 8:22466 (R:US)
Monte Carlo Method
RAFFLE; first flight collision probabilities for multiple-cell geometries (IBM360,370/195; FORTRAN IV and BAL), 8:20517 (R:US)
One-Dimensional Calculations
APARNA2; one-dimensional integral neutron transport in slab geometries (IBM370,303x; FORTRAN IV), 8:22511 (R:US)
DTF4; one-dimensional, multigroup discrete ordinate program (IBM360;CDC6600;GE625; FORTRAN IV (CDC6600), FORTRAN IV and MAP (GE625), FORTRAN IV and BAL (IBM360)), 8:22432 (R:US)
M0648; one-dimensional slab transport with slowing down (CDC6600; FORTRAN IV), 8:22461 (R:US)
Two-Dimensional Calculations
FESH; x-y multi-group neutron transport method (CDC6600,7600; FORTRAN IV (MNF, University of Minnesota FORTRAN)), 8:22508 (R:US)
TWOTRAN2; two-dimensional, multigroup transport in xy, rz, and r theta geometries (CDC7600,6600;IBM360/195; FORTRAN IV), 8:22466 (R:US)
NEUTRON-GAMMA LOGGING
Computer Codes
Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
NEUTRON-NEUTRON LOGGING
Calibration
Alternate neutron output calibration techniques for users of a PFN probe, 8:21644 (RA:US)
Log interpretation, 8:21647 (RA:US)
PFN field logging, 8:21645 (RA:US)
Data Acquisition Systems
Uphole instrumentation for PFN logging, 8:21642 (RA:US)
Electronic Circuits
Description of PFN probe electronic circuits, 8:21641 (RA:US)
Meetings
Proceedings of the second PFN uranium logging seminar, 8:21639 (R:US)
Neutron Sources
Life-test results on the Zetatron tube, transformer and the tube-transformer assembly, 8:21649 (RA:US)
Pulse neutron generator design update, 8:19907 (RA:US)
Zetatron neutron generating tube revisited, 8:19906 (RA:US)
Performance Testing
Discussion of the performance and calibration of two PFN probes, 8:21646 (RA:US)
Specifications
Principles of the PFN probe, 8:21640 (RA:US)
Uphole instrumentation for PFN logging, 8:21642 (RA:US)
NEUTRON-RICH ISOTOPES
Beta Decay
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
Mass
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
Nuclear Structure
Atomic-mass measurements and nuclear spectroscopy at TRISTAN. Progress report, February 1, 1982-January 31, 1983, 8:22369 (R:US)
NEUTRONS
See also FAST NEUTRONS
THERMAL NEUTRONS
Kerma
Air-over-ground calculations of the neutron, prompt, and secondary gamma free-in-air tissue kerma from the Hiroshima and Nagaski devices, 8:21671 (J:US)
Semileptonic Decay
Proton decay in supersymmetric models, 8:22312 (J:NL)
Slowing-Down
HRG3; slowing-down spectrum, multigroup constants (UNIVAC1108;IBM360,370; FORTRAN IV), 8:20531 (R:US)
MOD5; stochastic model of neutron slowing-down (IBM360; FORTRAN IV), 8:22502 (R:US)
Weak Particle Decay
Neutron decay electron injection into the magnetosphere. Master's thesis, 8:22169 (R:US)
NEVADA
Geochemical Surveys
McCoy Area, Nevada geothermal reservoir assessment case history - Northern Basin and Range. Final report, 1 October 1978-30 September 1982, 8:20154 (R:US)
Geological Surveys
McCoy Area, Nevada geothermal reservoir assessment case history - Northern Basin and Range. Final report, 1 October 1978-30 September 1982, 8:20154 (R:US)
Geophysical Surveys
McCoy Area, Nevada geothermal reservoir assessment case history - Northern Basin and Range. Final report, 1 October 1978-30 September 1982, 8:20154 (R:US)
Geothermal Exploration
Deep electromagnetic sounding in the Basin and Range Province, 8:20157 (RA:US)
Magnetotelluric Surveys
Deep electromagnetic sounding in the Basin and Range Province, 8:20157 (RA:US)
NEVADA TEST SITE
Lizards
A population model of the lizard Uta stansburiana in southern Nevada, 8:21895 (J:US)
NEW HAMPSHIRE
Electric Utilities
Developer handbook for Section 210 of PURPA for New Hampshire, 8:20830 (R:US)

Low-Head Hydroelectric Power Plants
Small-Scale Hydroelectric Power Demonstration Project. Public Service Company of New Hampshire Drop No. 1 power plant expansion of Garvins Falls hydroelectric plant. Final technical and construction cost report, 8:19960 (R:US)

NEW JERSEY
Coal Gasification Plants
District gasification in New Jersey, 8:19538 (J:US)
Electric Utilities
District gasification in New Jersey, 8:19538 (J:US)
Fossil-Fuel Power Plants
District gasification in New Jersey, 8:19538 (J:US)
Seismic Arrays
Earthquake hazard studies in New York State and adjacent areas. Final report, April 1976-June 1982, 8:22051 (R:US)

NEW MEXICO
Hydrology
Results of hydrologic tests and water-chemistry analyses, wells H-6A, H-6B, and H-6C, at the proposed Waste Isolation Pilot Plant site, southeastern New Mexico. Water resources investigations (final), 8:19862 (R:US)
Uranium Deposits
Probabilistic endowment appraisal system based upon the formalization of geologic decisions. National Uranium Resource Evaluation. Final report: demonstration and comparative analysis of estimates and methods, 8:19795 (R:US)
Volcanoes
Thermal and kinematic history of mantle xenoliths from Kilbourne Hole, New Mexico, 8:22030 (R:US)

NEW YORK
Electric Utilities
Public Utility Commission manual for Section 210 PURPA for New york, 8:20828 (R:US)
Energy Demand
Econometrical model of the energy demand of New York State, 8:20793 (R:DE)
Geology
Final report of special geological, geochemical, and petrological studies of the Devonian shales in the Appalachian Basin, 8:19750 (R:US)
Natural Gas Deposits
Final report of special geological, geochemical, and petrological studies of the Devonian shales in the Appalachian Basin, 8:19750 (R:US)
Seismic Arrays
Earthquake hazard studies in New York State and adjacent areas. Final report, April 1976-June 1982, 8:22051 (R:US)
Wind
Wind-energy resources in the area of the City of Buffalo, 8:20204 (R:US)

NEW ZEALAND
Radiation Monitoring
Environmental Measurements Laboratory. Environmental report, March 1-September 1, 1982, 8:21832 (R:US)

NEWTON METHOD
Newton's method with a model trust region modification, 8:22881 (J:US)

NGL
See NATURAL GAS LIQUIDS

NICKEL
Catalytic Effects
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
Nutritional stimulation of methane fermentation, 8:21925 (RA:US)
Sulfur deactivation of nickel methanation catalysts, 8:19943 (J:US)
Chemical Analysis
Comparison of analytical methods for percent phosphorous determination in electroless nickel plate, 8:21214 (R:US)
Corrosion
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Electronic Structure
Magnetic and electronic properties of Ni films, surfaces, and interfaces, 8:21095 (J:US)
Energy Beam Deposition Films
Pulsed laser mixing of Ni-Au surface films on nickel substrates, 8:21114 (BA:NL)
Flame Spraying
Description of the method of producing coatings of Raney nickel catalyst by flame-spraying and findings obtained by examining samples of the coatings (Raney nickel), 8:21069 (R:US)
Ion Collisions
Computer simulations of low-energy neon-ion scattering from nickel crystals, 8:22221 (J:NL)
Magnetic Properties
Magnetic and electronic properties of Ni films, surfaces, and interfaces, 8:21095 (J:US)
Nucleation
He bubbles in Ni: a small-angle X-ray scattering study, 8:21104 (J:NL)
Physical Radiation Effects
Depth distribution of 2-keV helium-ion irradiation-induced cavities in nickel, 8:21042 (R:US)
Structural Chemical Analysis
Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)

NICKEL 56
High Spin States
High-spin resonances in heavy-ion collisions, 8:22356 (R:US)

NICKEL ALLOYS
See also INCOLOY ALLOYS
NICKEL BASE ALLOYS
Creep
Irradiation creep in simple binary alloys, 8:21044 (R:US)
Ductility
Ductility behavior of irradiated path B alloys, 8:22712 (RA:US)
Energy Beam Deposition
Pulsed laser mixing of Ni-Au surface films on nickel substrates, 8:21114 (BA:NL)
Erosion
Erosion of hard-metal coatings (Ni-Cr-B), 8:21126 (R:US)
Microstructure
Microstructure of welds in an iron-base long-range-ordered alloy, 8:22714 (RA:US)
Molecular Structure
Iron-nickel alloys as canister material for radioactive waste disposal in underground repositories, 8:19835 (RA:US)
Physical Radiation Effects
Compositional changes in Fe-Cr-Ni alloys under proton bombardment at elevated temperatures, 8:21058 (R:US)
Irradiation creep in simple binary alloys, 8:21044 (R:US)
Modifications of subsurface alloy composition during high-temperature sputtering, 8:21043 (R:US)
Thermodynamic Properties
Iron-nickel alloys as canister material for radioactive waste disposal in underground repositories, 8:19835 (RA:US)

NICKEL BASE ALLOYS
See also INCONEL ALLOYS
MONEL
Physical Radiation Effects
Mechanism and kinetics of radiation-induced segregation in Ni-Si alloys, 8:21048 (R:US)
Ordered alloys reveal fundamental mechanisms of neutron-damage production (Ni_3Mn; Cu_3Au), 8:21046 (R:US)
Radiation-induced microstructural changes in Ni-C and Pt-C alloys, 8:21061 (R:US)
Voids
Quantitative comparison of the void distribution in a β'-phase Ni-Al-In alloy using x-ray small-angle scattering and transmission-electron microscopy (Ni-51.2 at. % Al-2.6 at. % In), 8:21047 (R:US)

NICKEL HYDRIDES
  Stability
    Stabilities, stoichiometries, and site occupancies in hydrides of intermetallic compounds. Final report, 8:21119 (R:US)
  Stoichiometry
    Stabilities, stoichiometries, and site occupancies in hydrides of intermetallic compounds. Final report, 8:21119 (R:US)
NICKEL IONS
  E1-Transitions
    Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
  Oscillator Strengths
    Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
NICKEL NITRATES
  Chemical Reactions
    Reaction between alcohol and nitric acid in the presence of metal nitrates, 8:21247 (TJ:DE:GE)
NICKEL OXIDES
  Atom Transport
    Impurity diffusion in transition-metal oxides, 8:21121 (R:US)
  Reduction
    Surface studies of WO$_3$/Al$_2$O$_3$ and Ni/W/Al$_2$O$_3$ catalysts, 8:21230 (R:US)
  Sintering
    Advanced-fuel cell development. Progress report, July-September 1981, 8:20884 (R:US)
  Structural Chemical Analysis
    Surface studies of WO$_3$/Al$_2$O$_3$ and Ni/W/Al$_2$O$_3$ catalysts, 8:21230 (R:US)
  Vapor Plating
    Development of gas phase metallized plaques for electrodes of storage batteries, in particular for nickel oxide electrodes. Final Report, Jul. 1979, 8:20742 (R:DE:In several languages)
NICKEL-CADMIUM BATTERIES
  Electrodes
    Development of gas phase metallized plaques for electrodes of storage batteries, in particular for nickel oxide electrodes. Final Report, Jul. 1979, 8:20742 (R:DE:In several languages)
NICKEL-IRON BATTERIES
  See IRON-NICKEL BATTERIES
NICKEL-ZINC BATTERIES
  Electrodes
    Development of gas phase metallized plaques for electrodes of storage batteries, in particular for nickel oxide electrodes. Final Report, Jul. 1979, 8:20742 (R:DE:In several languages)
    Effect of electrolyte conductance on current distribution in porous zinc electrode in KOH electrolyte, 8:20747 (R:US)
    Transient-current distributions in porous zinc electrodes in KOH electrolyte, 8:20746 (R:US)
  Specifications
    Nickel-zinc batteries for RPV applications. Final technical report 15 Nov 79-15 Aug 81, 8:21022 (R:US)
NIOBIUM
  Chemistry
    Contribution to the study of the behavior of fission-product niobium during the reprocessing of spent nuclear fuel, 8:19806 (TG:US)
  Solvent Extraction
    Contribution to the study of the behavior of fission-product niobium during the reprocessing of spent nuclear fuel, 8:19806 (TG:US)
  Superconductivity
    Superconductivity in artificial Nb/Cu heterostructures, 8:21052 (R:US)
  Void Fraction
    Void formation and solute segregation in ion-irradiated niobium-base alloys, 8:21055 (R:US)
NIOBIUM 95
  Radioecological Concentration
    ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
NIOBIUM ALLOYS
  See also *INCONEL 600*
    INCONEL 625
    NIOBIUM BASE ALLOYS
  Critical Current
    Submicron multifilamentary high performance Nb$_3$Sn produced by powder metallurgy processing of large powders, 8:21174 (J:US)
  Electron Beam Welding
    Thermal profiles from electron-beam welds on uranium-6 niobium alloy, 8:21091 (R:US)
  Powder Metallurgy
    Submicron multifilamentary high performance Nb$_3$Sn produced by powder metallurgy processing of large powders, 8:21174 (J:US)
NIOBIUM BASE ALLOYS
  Void Fraction
    Void formation and solute segregation in ion-irradiated niobium-base alloys, 8:21055 (R:US)
NITRATES
  See also *COPPER NITRATES*
    NICKEL NITRATES
    PLUTONIUM NITRATES
    URANIUM NITRATES
    URANYL NITRATES
  Air Pollution
    Relative importance of atmospheric sulfates and nitrates in visibility reduction, 8:21784 (J:GB)
  Ecological Concentration
    ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
NITRIC ACID
  Chemical Reaction Kinetics
    Kinetics and product yield of the reaction of HO with HNO$_3$, 8:21244 (J:NL)
  Surface Tension
    Interfacial tension in systems involving TBP in dodecane, nitric acid, uranyl nitrate and water, 8:21231 (R:DE)
NITRIC OXIDE
  NO.
  Adsorption
    Mechanism and kinetics of NO/sub x/ gas absorption into alkaline solutions: considerations for selectivity toward hydroxylamine, 8:21229 (R:US)
  Infrared Spectra
    Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)
  Photoionization
    Gas-phase radiolysis and vacuum-ultraviolet photolysis of heterocyclic organic compounds, 8:21265 (R:US)
  Vibrational States
    Semiclassical vibrational spectra for diatomic molecules: Application to HF, CO, and NO, 8:22209 (J:US)
NITRITES
  Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
  Reaction Kinetics
    Aqueous reactions of nitrite with bisulfite ions in sulfate aerosol formation, 8:21681 (RA:US)
NITROGEN
  Abundance
    Nature and distribution of organic matter in the surface sediments of world oceans and seas, 8:21869 (J:GB)
  Activation Analysis
    Determination of low-z elements simultaneously by charged particle activation analysis, 8:21744 (RA:US)
  Adsorption
    Small-angle x-ray scattering studies of the porosity of coals and chars. Final technical report, Sept. 30, 1978-March 31, 1981, 8:19545 (R:US)
  Compression
    Tri-State Synfuels Project Review: Volume 11A. Engineering and processing alternatives (Proposed Henderson, Kentucky coal to gasoline plant; some 41 engineering studies of process alternatives), 8:19508 (R:US)
  Emission Spectroscopy
    Excitation of nitrogen in a luminous discharge, 8:22197 (R:FR:French)
  Ion Mobility
    Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
  Ionization
    Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)

Laser Spectroscopy
N$_2$ pressure - broadened O$_3$ line widths and strengths near 1129.4 cm-1, 8:22203 (R:US)
Line Broadening
N$_2$ pressure - broadened O$_3$ line widths and strengths near 1129.4 cm-1, 8:22203 (R:US)
Phase Diagrams
Liquid-vapor equilibria for ternary natural gas systems. Annual report Sep 80-Sep 81, 8:19772 (R:US)
Phase Transformations
The metallization of some simple systems, 8:22554 (BA:NL)
Photoelectron Spectroscopy
Branching ratios and photoelectron angular distributions through the Hopfield bands in N$_2$ between 650 and 730 A, 8:22227 (J:GB)
Radiosensitivity Effects
Radiation responses in air-, nitrous oxide-, and nitrogen-saturated mammalian cells, 8:21974 (J:US)
Thermalization
Electron thermalization in gases. V. Diatomic molecules H$_2$, N$_2$, and CO, 8:22522 (J:US)

NITROGEN 16
Beta-Minus Decay
Beta decay rate of ^{16}N(0$^-$, 120 keV): meson exchange currents and the value of the induced pseudoscalar-coupling constant, 8:22352 (R:US)

NITROGEN DIOXIDE
NO$_2$.
Adsorption
Mechanism and kinetics of NO/sub x/ gas absorption into alkaline solutions: considerations for selectivity toward hydroxylamine, 8:21229 (R:US)
Air Pollution
Guidance for the future use of NASN (This guideline replaces OAQPS number 1.2-020), 8:21769 (R:US)
Biological Effects
Effects of NO$_2$ on immune responses in pulmonary lymph of sheep, 8:22009 (J:US)
Lung function and morphology of dogs after sublethal exposure to nitrogen dioxide, 8:22010 (J:US)
Potentially hazardous air contaminants in the home, 8:21990 (R:US)
Radiological and environmental research 1980: ecology, 8:21993 (R:US)
Ecological Concentration
Air quality non-attainment areas in Region V, 8:21824 (R:US)
Monitoring
Potentially hazardous air contaminants in the home, 8:21990 (R:US)

NITROGEN IONS
Energy-Level Transitions
Doubly excited states in some light atoms, 8:22180 (R:US)
Quenching
A selected ion flow tube investigation on the quenching of N$_2$ (v not equal to o) by various neutrals, 8:22199 (R:AT)

NITROGEN NITRIDES
See NITROGEN

NITROGEN OXIDES
See also NITRIC OXIDE
NITROGEN DIOXIDE
NITROUS OXIDE
Air Pollution Abatement
Effects of fuel properties and atomization parameters on Nox control for heavy liquid fuel fired package boilers. Final report Jan 77-Jan 79, 8:21459 (R:US)
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Air Pollution Control
Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
Combustion modification controls for stationary gas turbine. Volume I: environmental assessment. Final report Feb 78-Jun 80, 8:21756 (R:US)
Combustion modification Nox controls for utility boilers. Volume I: tangential coal-fired unit field test. Final report Jul 78-Jul 79, 8:20293 (R:US)
Combustion modification Nox controls for utility boilers. volume II: pulverized-coal wall-fired unit field test. Final report Jul 78-Jul 79, 8:20294 (R:US)
Combustion modification Nox controls for utility boilers. Volume III: residual oil wall-fired unit field test. Final report Jul 78-Jul 79, 8:20295 (R:US)
Combustion characterization of coals for industrial applications. Third quarterly progress report, 1 October 1982-31 December 1982 (Staged combustion), 8:19635 (R:US)
Environmental assessment of stationary source Nox control technologies. Final report Jun 76-Sep 79, 8:20305 (R:US)
Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 5 - results, 8:20262 (R:US)
Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)
Harrington Station Unit 2 fabric filter system special testing report. Final report Dec 78-Jul 81, 8:20296 (R:US)
High-Temperature Turbine-Technology Program. Phase II. Technology test and support studies. Design and development of a regeneratively fuel cooled high temperature gas turbine combustor for operation on low Btu gas, 8:20246 (R:US)
Impact of Nox selective catalytic reduction processes on flue gas cleaning systems. Final report Oct 80-Oct 81, 8:20304 (R:US)
Industrial boiler combustion modification Nox controls. Volume I: environmental assessment. Final report Jan 78-Jul 79, 8:21460 (R:US)
Industrial boiler combustion modification Nox controls. Volume II: stoker-coal-fired boiler field test - Site A. Final report Jul 78-Jul 79, 8:21461 (R:US)
Industrial boiler combustion modification Nox controls. Volume III: stoker-coal-fired boiler field test - Site B. Final report Jul 78-Jul 79, 8:21462 (R:US)
Mechanisms of NO/sub x/ formation and control: alternative and petroleum-derived liquid fuels, 8:19748 (R:US)
Process for the removal of oxides of nitrogen and the aqueous solution used, 8:21193 (R:US)
Atmospheric Chemistry
Aqueous reactions of nitrite with bisulfite ions in sulfate aerosol formation, 8:21681 (RA:US)
Diurnal variations of short-lived trace substances, 8:21725 (RA:DE:In German)
Bibliographies
Nitrogen oxides: an annotated bibliography, 8:21764 (R:US)
Photochemistry
Investigations on the reaction systems HOsub(X)/ClOsub(X)/NOsub(X) under tropospheric and stratospheric conditions, 8:21728 (RA:DE:In German)
Reaction Kinetics
Investigations on the reaction systems HOsub(X)/ClOsub(X)/NOsub(X) under tropospheric and stratospheric conditions, 8:21728 (RA:DE:In German)
Reduction
Process for the removal of oxides of nitrogen and the aqueous solution used, 8:21193 (R:US)
Sampling
Application of thermal analysis and photoelectron spectroscopy for the characterization of particulate matter, 8:21740 (RA:US)

NITROMETHANE
Chemical Reactions
Photonitration of phenols by tetranitromethane under visible light, 8:21253 (J:US)

NITROUS OXIDE
N$_2$O.
Air Pollution
Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)
Combustion
Fundamental combustion and diagnostics research at Sandia. Progress report, October-December 1982, 8:21302 (R:US)

Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983, 8:21295 (R:US)
Radiosensitivity Effects
Radiation responses in air-, nitrous oxide-, and nitrogen-saturated mammalian cells, 8:21974 (J:US)
NO. 2 FUEL OIL

NUCLEAR DATA COLLECTIONS
ETOG1 Data for MUFT and GAM Libraries; MUFT4 or 5, GAM1 or 2 (CDC6600), 8:22341 (R:US)
LASL group-averaged cross-sections; SN 18- 24- and 25-group sets (CDC6600; FORTRAN IV), 8:20548 (R:US)
Report to the DOE Nuclear Data Committee, 1983, 8:22347 (R:US)
Cross Sections
ETOG3; ENDF/B to MUFT, GAM, ANISN cross-section format (CDC7600; FORTRAN IV), 8:20552 (R:US)
Data Processing
EDITOR; ENDF/B tape processing and editing (IBM360;CDC6600; FORTRAN IV), 8:20540 (R:US)
Information Needs
Review of Panel on Reference Nuclear Data surveys and discussions on reference nuclear data needs, 8:22342 (R:US)
NUCLEAR DISARMAMENT
Political Aspects
Analytic research on strategic, tactical and doctrinal military concepts: the concept of stability. Final report 1 May-19 Dec 79, 8:21665 (R:US)
NUCLEAR EXPLOSION DETECTION
A two step method to treat variable winds in fallout smearing codes. Master's thesis, 8:21794 (R:US)
Seismic Detection
A statistical discrimination experiment for eurasian events using a twenty-seven-station network. Technical report, 8:21673 (R:US)
NUCLEAR EXPLOSIONS
Specifically named single nuclear explosions are listed by name and the word EVENT, e.g., BOXCAR EVENT. All projects involving nuclear explosions are listed by the project name and the word PROJECT, e.g., PLOWSHARE PROJECT.
Blast Effects
Fire and the related effects of nuclear explosions. 1982 Asilomar Conference, 8:21670 (R:US)
Containment
Blast attenuation in a shot tunnel using water jets, 8:21669 (R:US)
Electromagnetic Pulses
Standing waves and notches in a parallel-plate type of EMP simulator and their reduction. Final report, 8:21659 (R:US)
Evaluation
Reevaluation of the Hiroshima-Nagasaki radiation doses, 8:21970 (RA:US)
Fire Hazards
Fire and the related effects of nuclear explosions. 1982 Asilomar Conference, 8:21670 (R:US)
Fires
Assessment of combined effects of blast and fire on personnel survivability. Final report 3 Apr 7-31 Jan 81, 8:21660 (R:US)
Mass fire model concept. Final report 8 Sep 80-31 May 81, 8:21664 (R:US)
Gamma Spectra
Source spectra calculations, 8:21672 (J:US)
Source terms for the initial radiations, 8:21668 (R:US)
Ionospheric Effects
Neutron decay electron injection into the magnetosphere. Master's thesis, 8:22169 (R:US)
Meetings
Fire and the related effects of nuclear explosions. 1982 Asilomar Conference, 8:21670 (R:US)

Neutron Spectra
Source spectra calculations, 8:21672 (J:US)
Source terms for the initial radiations, 8:21668 (R:US)
Radiation Doses
Air-over-ground calculations of the neutron, prompt, and secondary gamma free-in-air tissue kerma from the Hiroshima and Nagaski devices, 8:21671 (J:US)
Radiation Hazards
Health effects from internally deposited radionuclides released in nuclear disasters, 8:21984 (BA:US)
Radiations
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)
Seismic Detection
Users' manual for SNAP/D: seismic network assessment program for detection. Final report, 8:22036 (R:US)
Shock Waves
Assessment of combined effects of blast and fire on personnel survivability. Final report 3 Apr 7-31 Jan 81, 8:21660 (R:US)
Thermal Radiation
Nuclear weapons effects mitigation techniques, 8:21662 (R:US)

Nuclear Insurance
Nuclear property insurance: status and outlook, 8:20704 (R:US)
Ownership
Study of a conceptual nuclear energy center at Green River, Utah: institutional and licensing issues, 8:20464 (R:US)
Performance
OPUS; power plant performance and price study (UNIVAC1108; FORTRAN IV), 8:20469 (R:US)
Pipes
Effect of pulsation pipelines in nuclear installations on the environment, 8:20698 (R:DE:GE)
Power Generation
Electric Power Monthly (For September 1982), 8:20821 (R:US)
Electric power monthly (For January 1982), 8:20818 (R:US)
Study of a conceptual nuclear energy center at Green River, Utah. Power demand, load center assessment and transmission, 8:20625 (R:US)
Power Systems
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Power Transmission Lines
Study of a conceptual nuclear energy center at Green River, Utah. Power demand, load center assessment and transmission, 8:20625 (R:US)
Public Opinion
The socio-environmental impacts of energy development on local user groups and water resources planning, 8:20630 (R:US)
Pumps
Functional qualification of mechanical components and considerations for aging problems, 8:20580 (RA:US)
Radiation Hazards
HERMES; regional radiological effects analysis (UNIVAC1108; FORTRAN IV and SLEUTH), 8:20663 (R:US)
Radiation Monitoring
Aerial radiological survey of the Callaway Plant and surrounding area, Fulton, Missouri, 8:21796 (R:US)
Selected monitoring practices, 8:20710 (RA:US)
Radioactive Effluents
Atmospheric releases from standardized nuclear power plants: A wind tunnel study. Fluid modeling report No. 12, 8:20629 (R:US)
HERMES; regional radiological effects analysis (UNIVAC1108; FORTRAN IV and SLEUTH), 8:20663 (R:US)
Plume diffusion modeling: annual report to the Nuclear Regulatory Commission, 8:20628 (R:US)
Reactor Accidents
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Reactor Components
Brief overview and comparison of thermal aging models used for power plant equipment qualification, 8:20588 (RA:US)
Case for non-material specific thermal aging, 8:20590 (RA:US)
Condition monitoring, 8:20579 (RA:US)
Maintaining qualified life of equipment and parts in nuclear power plants, 8:20584 (RA:US)
Methodology for estimating remaining life of components using multifactor accelerated life tests, 8:20578 (RA:US)
Operation testing and maintenance approach to aging problems in mechanical components, 8:20581 (RA:US)
Proceedings of the workshop on nuclear-power-plant aging, 8:20574 (R:US)
State regulator views the aging of nuclear power plants, 8:20583 (RA:US)
Reactor Control Systems
Predictor display concepts for use in nuclear-plant control, 8:20620 (R:US)
Reactor Licensing
Study of a conceptual nuclear energy center at Green River, Utah: institutional and licensing issues, 8:20464 (R:US)
Reactor Maintenance
Equipment qualification maintenance, 8:20586 (RA:US)
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
State regulator views the aging of nuclear power plants, 8:20583 (RA:US)
Reactor Materials
Brief overview and comparison of thermal aging models used for power plant equipment qualification, 8:20588 (RA:US)
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)

Overview of synergistic aging effects, 8:20582 (RA:US)
Reactor Operation
Licensed operating reactors. Status summary report, 8:20450 (R:US)
Operating reactors licensing actions summary, 8:20458 (R:US)
Reactor Operators
Engineering expertise on shift in nuclear power plants: the foreign experience, 8:20316 (R:US)
Peer-review study of the draft handbook for human-reliability analysis with emphasis on nuclear-power-plant applications, NUREG/CR-1278, 8:20348 (R:US)
Reactor Protection Systems
Effect of aging on the performance of safety-related equipment, 8:20575 (RA:US)
EPRI-sponsored correlation of age-sensitivity and seismic qualification, 8:20589 (RA:US)
Equipment aging: an overview of status and research needs, 8:20577 (RA:US)
Impact of pre-conditioning on the qualification of safety-related equipment, 8:20585 (RA:US)
Reactor Safety
Systematic evaluation program status summary report, April 1982, 8:20700 (R:US)
Reactor Shutdown
Loss of benefits resulting from mandated nuclear plant shutdowns, 8:20477 (R:US)
Reliability
RIO; power plant reliability characteristics (CDC7600,CYBER175; FORTRAN IV (86%) and COMPASS (14%)), 8:20675 (R:US)
Research Programs
EPRI Research and Development Projects, 8:20268 (R:US)
Risk Assessment
A european atomic energy Community Report. Part I: comparative risks from electricity generating systems. Part II: risk assessment of energy systems. Final report, 8:20274 (R:US)
Legal opinion in risk assessment of nuclear power plants, 8:20696 (RA:DE:In German)
Precaution against damage required in the light of existing scientific and technical knowledge, 8:20695 (RA:DE:In German)
Safety

PROTEINS

Absorption Spectra

Bibliographies on radiation chemistry. 7. Triplet-triplet absorption spectra: Pt. B (1976 - April, 1982), 8:21286 (J:GB)

Air Pollution Control

General design study of pilot VOC control units (volatile organic compounds), 8:21886 (R:US)

Sampling for high-molecular-weight organic compounds in power plant stack gases. Final report, 8:20301 (R:US)

Biodegradation

Development and proof-testing of a method for assaying the bio-degradibility of organic substances under anaerobic milieu conditions, 8:21997 (RA:DE:In German)

Ecological Concentration

Organic contaminants in groundwater near an underground coal gasification site in northeastern Wyoming, 8:21868 (J:US)

Synthesis

Homogeneous carbon monoxide fixation. Progress report, May 1, 1980-March 1, 1982. Final rport, 8:19932 (R:US)

ORGANIC FLUORINE COMPOUNDS

Air Pollution

Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)

Chemical Reaction Kinetics

Investigations on the behaviour of organic fluorine compounds on surfaces, 8:21734 (RA:DE:In German)

ORGANIC NITROGEN COMPOUNDS

Excluding PROTEINS, AMINES, ALKALOIDS, AMINO ACIDS, NUCLEIC ACIDS, and NUCLEOTIDES.

See also PORPHYRINS

Air Pollution

Vertical distribution of stable trace gases in mean latitudes, 8:21716 (RA:DE:In German)

Qualitative Chemical Analysis

Identification and comparative genotoxicity of polycyclic aromatic hydrocarbons and related nitrogen-containing heteroatomic species in products from coal liquefaction processes, 8:19667 (R:US)

Toxicity

Identification and comparative genotoxicity of polycyclic aromatic hydrocarbons and related nitrogen-containing heteroatomic species in products from coal liquefaction processes, 8:19667 (R:US)

ORGANIC SOLVENTS

Chemical Reactions

Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R:US)

Comparative Evaluations

Solvent screening experiments for SRC-I phenol recovery, 8:19480 (RA:US)

Fractionation

Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)

Hydrogen Transfer

Exploratory study of coal-conversion chemistry. Quarterly report No. 6, August 19, 1982-November 18, 1982, 8:19515 (R:US)

Hydrogenation

LC-Finer catalyst testing, 8:19485 (RA:US)

Recovery

Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

Recycling

Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)

ORGANIC SULFUR COMPOUNDS

Petroleum supply monthly (February 1982), 8:19701 (R:US)
Petroleum supply monthly (January 1982), 8:19700 (R:US)
Storage
Petroleum supply monthly, 8:19702 (R:US)
Transport
Petroleum supply monthly (January 1982), 8:19700 (R:US)
Review of the commodity flow studies (1975-1979), 8:19622 (R:US)
The inland distribution of the products of North Sea oil, 8:19740 (R:US)

PETROLEUM REFINERIES
Energy information report to Congress: quarterly report. Second quarter, 1982, 8:19691 (R:US)
Capacity
Petroleum supply monthly, 8:19703 (R:US)
Coal Gasification
Preliminary assessment of the integration of a coal gasifier into a petroleum refinery (Alabama), 8:19539 (J:US)
Energy Conservation
New concepts reduce process energy, 8:19686 (J:US)
Energy Consumption
Petroleum supply monthly (February 1982), 8:19701 (R:US)

Petroleum supply monthly, 8:19700 (R:US)
Gas Burners
Emissions from refinery process heaters equipped with low-Nox burners. Final report Oct 80-Jan 81, 8:19720 (R:US)
Gaseous Wastes
Emissions from refinery process heaters equipped with low-Nox burners. Final report Oct 80-Jan 81, 8:19720 (R:US)
Oil Burners
Emissions from refinery process heaters equipped with low-Nox burners. Final report Oct 80-Jan 81, 8:19720 (R:US)
Particulates
Emissions from refinery process heaters equipped with low-Nox burners. Final report Oct 80-Jan 81, 8:19720 (R:US)
Process Control
Multivariable process control: a survey (396 references), 8:19685 (R:US)
Production
Petroleum supply monthly, 8:19703 (R:US)
Waste Heat Utilization
New concepts reduce process energy, 8:19686 (J:US)

PETROLEUM STOCKS
See INVENTORIES

PETT
See POSITRON COMPUTED TOMOGRAPHY

PHANTOMS
Dosimetry
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)

PHASE CHANGE MATERIALS
Use with the specific phase change material (e.g. calcium chloride) when known.
Corrosive Effects
Investigation of medium and high temperature phase change materials for thermal energy storage. Final report, Apr. 1980, 8:20140 (R:DE:In several languages)
Latent Heat Storage
Development of a modular heat exchanger with integrated latent heat energy store. Final report, Dec. 1979, 8:20139 (R:DE:In several languages)
Thermal Cycling
Investigation of medium and high temperature phase change materials for thermal energy storage. Final report, Apr. 1980, 8:20140 (R:DE:In several languages)
Thermal Degradation
Investigation of medium and high temperature phase change materials for thermal energy storage. Final report, Apr. 1980, 8:20140 (R:DE:In several languages)

PHENANTHRENE
Pyrolysis
Coal-transformation chemistry. Eleventh quarterly progress report, 8:19514 (R:US)
Synthesis
Studies of the pyrolysis mechanisms of tricyclic aromatic compounds and their hydrogen derivatives, traced by means of radioactive carbon and tritium, 8:19524 (RA:XE:In French)

PHENOBARBITAL
Metabolism
Cytochrome P_{450} dependent monooxygenases in nasal epithelial membranes: effect of phenobarbital and benzo(a)pyrene, 8:22015 (J:US)

PHENOL
Biodegradation
Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
Biological Effects
Acute and chronic effects of selected substances of the EC 'black list' on representative freshwater animals, 8:22001 (RA:DE:In German)
Catalytic Effects
Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
Solvent Extraction
Solvent screening experiments for SRC-I phenol recovery, 8:19480 (RA:US)

PHENOLS
See also PHENOL
Catalytic Cracking
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Environmental Transport
Illustration of environmental fate modeling on a micro-computer, 8:21865 (R:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Nitration
Photonitration of phenols by tetranitromethane under visible light, 8:21253 (J:US)
Recovery
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Removal
Environmental studies, 8:19580 (RA:US)
Solvent Extraction
Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
Ultraviolet Spectra
Ultraviolet spectrometric determination of phenols as phenolate anions, 8:21223 (J:US)

PHENOSOLVAN PROCESS
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)

PHI-1019 RESONANCES
Particle Production
Reaction $\pi p\,p \rightarrow$phiphin and evidence for glueballs, 8:22279 (J:US)
Photoproduction
High-energy photoproduction of rho and phi vector mesons, 8:22250 (R:US)

PHI4-FIELD THEORY
Monte Carlo Method
Solving phi^{4}sub(1,2) field theory with Monte Carlo, 8:22328 (J:NL)

PHILADELPHIA ELECTRIC POWER REACTOR-1
See LIMERICK-1 REACTOR

PHILADELPHIA ELECTRIC POWER REACTOR-2
See LIMERICK-2 REACTOR

PHOSPHATE GLASS
Physical Properties
Laser phosphate glasses, 8:21176 (TG:US)

PHOSPHATE ROCKS
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of phosphate rocks, 8:21210 (RA:CS)

PHOSPHORUS
Absorption Spectroscopy
Comparison of analytical methods for percent phosphorous determination in electroless nickel plate (UCC-ND alkalimetric method; UCC-ND Inductively Coupled Plasma (ICP) method; ASTM-E39 gravimetric method; development colorimetric method; independent colorimetric method), 8:21214 (R:US)
Gravimetric Analysis
Comparison of analytical methods for percent phosphorous determination in electroless nickel plate (UCC-ND alkalimetric method; UCC-ND Inductively Coupled Plasma (ICP) method; ASTM-E39 gravimetric method; development colorimetric method; independent colorimetric method), 8:21214 (R:US)
Quantitative Chemical Analysis
Comparison of analytical methods for percent phosphorous determination in electroless nickel plate (UCC-ND alkalimetric method; UCC-ND Inductively Coupled Plasma (ICP) method; ASTM-E39 gravimetric method; development colorimetric method; independent colorimetric method), 8:21214 (R:US)

Solvent Extraction
Role of phosphorus in lunar samples: a chemical study, 8:21197 (R:US)
PHOSPHORYLASES
See PHOSPHOTRANSFERASES
PHOSPHOTRANSFERASES
Code number 2.7.1
Biochemical Reaction Kinetics
New developments in on-line isoenzyme monitoring for use in clinical diagnostics, 8:21901 (BA:US)
PHOTOANODES
Decomposition
Effect of the electrical field in the membrane of photosynthesis, 8:19999 (R:XE)
Materials Testing
Photo-Kolbe reaction in biomass wastestreams, 8:20814 (RA:US)
PHOTOCHEMICAL OXIDANTS
Photochemistry
Air quality criteria for photochemical oxidants, 8:21767 (R:US)
Pollution Sources
Air quality criteria for photochemical oxidants, 8:21767 (R:US)
Toxicity
Air quality criteria for photochemical oxidants, 8:21767 (R:US)
PHOTOCHEMISTRY
Research Programs
University of Notre Dame Radiation Laboratory quarterly report, October 1, 1982-December 31, 1982, 8:21285 (R:US)
PHOTODISINTEGRATION
See PHOTONUCLEAR REACTIONS
PHOTOELECTROCHEMICAL CELLS
Photoluminescence and electroluminescence as probes of interfacial charge-transfer processes relevant to cadmium sulfo-selenide-based photoelectrochemical cells. Technical report, 8:19978 (R:US)
Photoluminescence and electroluminescence in graded cadmium sulfoselenide electrodes: applications to photoelectrochemical cells. Technical report, 8:19979 (R:US)
Dyes
Conversion and chemical storage of solar energy in a photoelectrochemical cell, 8:20000 (R:XE)
Hydrogen Production
Conversion and chemical storage of solar energy in a photoelectrochemical cell, 8:20000 (R:XE)
Photoanodes
Effect of the electrical field in the membrane of photosynthesis, 8:19999 (R:XE)
PHOTOLYSIS
Catalysts
Investigation of the potential of polymer-bound co-ordination compounds as catalysts for the photolytic production of hydrogen from water, 8:19928 (B:XE)
Computer Codes
Modelling of polymer photodegradation for solar cell modules, 8:20006 (R:US)
Computerized Simulation
Modelling of polymer photodegradation for solar cell modules, 8:20007 (R:US)
Requirements for heat resistant and highly heat resistant materials in the construction of stationary turbines, 8:21062 (R:DE:In German)
Research Programs
Gas-phase radiolysis and vacuum-ultraviolet photolysis of heterocyclic organic compounds, 8:21265 (R:US)
PHOTOMAGNETOELECTRIC EFFECT
See MAGNETIC FIELDS
PHOTOMETERS
Design
Study of image processing in a photon detection assembly. Final report, 8:21629 (R:IT)
Image Processing
Study of image processing in a photon detection assembly. Final report, 8:21629 (R:IT)
Testing
ASTM standard practice for testing fixed-wavelength photometric detectors used in liquid chromatography, 8:21637 (J:US)
PHOTOMULTIPLIERS
Electron Emission
DYNO1; photomultiplier electron distribution (CDC6600;IBM360; FORTRAN IV), 8:21624 (R:US)
Operation
Detectors for energies less than 10 MeV, 8:22092 (R:US)
Photocathodes
Cathode uniformity of new square photomultiplier tubes, 8:21569 (R:US)
PHOTON ACTIVATION ANALYSIS
See ACTIVATION ANALYSIS
PHOTON BEAMS
Computerized Simulation
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
Contamination
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
Dosimetry
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
PHOTON COLLISIONS

Photochemical dissociation of water adsorbed in artificial membranes made from phyllosilicates, 8:21270 (R:XE)
Photosensitized electron transport across lipid vesicle walls, 8:20001 (R:US)
Chemical Reaction Yield
Kinetic factors controlling the yield of photosystem II and O_2 emission, 8:21267 (R:XE)
Electron Transfer
Correlation between photosynthesis and the transthylakoid proton gradient, 8:21902 (J:NL)
Investigation of the properties of the primary electron acceptor complex of photosystem I, 8:21274 (B:XE)
Photochemical dissociation of water adsorbed in artificial membranes made from phyllosilicates, 8:21270 (R:XE)
Primary events of photosynthesis, 8:21263 (R:US)
Two-electron gates in photosynthesis, 8:21264 (R:US)
Photochemistry
Primary events of photosynthesis, 8:21263 (R:US)
Proton Transport
Correlation between photosynthesis and the transthylakoid proton gradient, 8:21902 (J:NL)

PHOTOSYNTHETIC BACTERIA
Enhancement of H_2 production by photosynthetic bacteria, 8:19921 (RA:US)
Cellulolytic Activity
Photoproduction of H_2 from cellulose by an anaerobic bacterial coculture, 8:19924 (RA:US)
Immobilized Cells
Study of hydrogen production by tropical marine photosynthetic bacteria for applied systems: the second year study, 8:19923 (RA:US)
Metabolism
Study of hydrogen production by tropical marine photosynthetic bacteria for applied systems: the second year study, 8:19923 (RA:US)

PHOTOSYNTHETIC REACTION CENTERS
Electron Transfer
Study of primary reactions of photosynthesis in green plants by rapid flash absorption spectroscopy, 8:21268 (R:XE)

PHOTOVOLTAIC CELLS
See also SOLAR CELLS
Bonding
Hermetic edge sealing of photovoltaic modules. Quarterly technical report, 8:19998 (R:US)

PHOTOVOLTAIC CONVERSION
Simulation
SOLCEL2; simulation of photovoltaic systems (CDC6600,7600,CYBER175; SOLCEL2 is written primarily in ANSI FORTRAN.), 8:20031 (R:US)

PHOTOVOLTAIC POWER PLANTS
Maintenance
Natural Bridges National Monument photovoltaic power plant: maintenance manual, 8:20034 (R:US)

PHOTOVOLTAIC POWER SUPPLIES
Combined Collectors
Photovoltaic concentrator application experiment. Final report, 8:20033 (R:US)
Computer Codes
User's guide to SOLREL: a simulation of reliability and availability of photovoltaic systems, 8:20047 (R:US)
Computerized Simulation
User's guide to SOLREL: a simulation of reliability and availability of photovoltaic systems, 8:20047 (R:US)
Concentrator Solar Cells
Photovoltaic concentrator application experiment. Final report, 8:20033 (R:US)
Design
ARCO Solar final report: fabrication of a prototype system for residences in the Southwest, 8:20038 (R:US)
Photovoltaic concentrator application experiment. Final report, 8:20033 (R:US)
Solarex final report: design and fabrication of a prototype system for a photovoltaic residence in the Southwest, 8:20037 (R:US)
Equipment Interfaces
Effects on the utility feeder of utility-interactive inverters at the Northeast Residential Experiment Station, 8:20036 (R:US)
Fabrication
ARCO Solar final report: fabrication of a prototype system for residences in the Southwest, 8:20038 (R:US)
Solarex final report: design and fabrication of a prototype system for a photovoltaic residence in the Southwest, 8:20037 (R:US)
Feasibility Studies
Solar power systems smaller than 500 W for military use, 8:20045 (R:NL:In several languages)
Performance Testing
Photovoltaic-system evaluation at the Northeast Residential Experiment Station. Final report, November 1980-May 1982, 8:20035 (R:US)
Reliability
User's guide to SOLREL: a simulation of reliability and availability of photovoltaic systems, 8:20047 (R:US)
Research Programs
The U.S. National Photovoltaic Program, 8:20049 (J:US)
Solar Cell Arrays
New designs and installations of photovoltaic-array fields with low balance-of-system costs, 8:20048 (R:US)
Technology Assessment
Solar power systems smaller than 500 W for military use, 8:20045 (R:NL:In several languages)
Testing
Solarex final report: design and fabrication of a prototype system for a photovoltaic residence in the Southwest, 8:20037 (R:US)

PHTHALOCYANINES
Collective Excitations
Collective excitations in π-electron systems, 8:21241 (J:US)
Electronic Structure
Electronic structure of iron phthalocyanine and its analogs: a theoretical study, 8:21249 (R:US)

PHYSICAL RADIATION EFFECTS
Displacement Rates
Neutron-source characterization and radiation-damage calculations for material studies, 8:22516 (R:US)

PHYSICS

PION MINUS-NEUTRON INTERACTIONS
Pair Production
Comparison of dimuon production by 125 GeV/c anti p and πp with predictions of the Drell-Yan model, 8:22254 (R:US)

PION MINUS-PROTON INTERACTIONS
- **Pair Production**
  - Comparison of dimuon production by 125 GeV/c anti p and π^- with predictions of the Drell-Yan model, 8:22254 (R:US)
- **Partial Waves**
  - Reaction π^- p→phiphin and evidence for glueballs, 8:22279 (J:US)

PION PLUS-PROTON INTERACTIONS
- **Jet Model**
  - Hadron production in π^+ p, K^+ p and pp collisions at 147 GeV/c and properties of jet-like multiparticle systems, 8:22269 (R:IT)
- **Multiple Production**
  - Hadron production in π^+ p, K^+ p and pp collisions at 147 GeV/c and properties of jet-like multiparticle systems, 8:22269 (R:IT)

PION REACTIONS
- **Absorption**
  - Experimental medium-energy physics at Carnegie-Mellon University, 1968-1983, 8:22252 (R:US)
- **Annihilation**
  - Experimental medium-energy physics at Carnegie-Mellon University, 1968-1983, 8:22252 (R:US)
- **Charge-Exchange Reactions**
  - Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
- **Delta-1236 Resonances**
  - Δ isobars in nuclei, 8:22401 (RA:US)
- **Experiment Planning**
  - Nuclear response to p, anti p, π and K^{+-} projectiles up to a few GeV, 8:22297 (RA:US)
- **Inelastic Scattering**
  - Nuclear structure in pion scattering and charge exchange, 8:22351 (R:US)
- **Nuclear Chemistry**
  - Nuclear chemistry at LAMPF II, 8:22402 (RA:US)

PIONIC ATOMS
- **Research Programs**
  - Hadronic atoms. Technical progress report, February 1, 1982-January 31, 1983, 8:22188 (R:US)
- **X-Ray Spectra**
  - Hadronic atoms. Technical progress report, February 1, 1982-January 31, 1983, 8:22188 (R:US)

PION-PROTON INTERACTIONS
See also PION MINUS-PROTON INTERACTIONS
PION PLUS-PROTON INTERACTIONS
- **Polarization**
  - Perturbative QCD and weak asymmetries in lepton pair production, 8:22305 (J:US)

PIONS
See also PIONS MINUS
PIONS NEUTRAL
PIONS PLUS
- **Electroproduction**
  - Parity violation in pion electroproduction and photoproduction with a proton target, 8:22307 (J:US)
- **Pair Production**
  - First results from DELCO at PEP, 8:22270 (R:US)
- **Photoproduction**
  - Parity violation in pion electroproduction and photoproduction with a proton target, 8:22307 (J:US)

PIONS MINUS
- **Multiple Production**
  - Negative pions production in nucleus-nucleus collisions at pc=4.2 GeV per nucleon, 8:22353 (RA:CS:In Czech)
- **Particle Decay**
  - Rare pion decays, 8:22298 (RA:US)

PIONS NEUTRAL
- **Particle Decay**
  - Rare pion decays, 8:22298 (RA:US)

PIONS PLUS
- **Particle Decay**
  - Rare pion decays, 8:22298 (RA:US)

PIPELINE QUALITY GAS

LASER-PRODUCED PLASMA
Bibliographies
Fusion Energy Update: a current awareness journal, 8:22595 (R:US)
Charged-Particle Transport
Neutral-beam-induced alteration in impurity transport, 8:22665 (BA:DE)
Computerized Simulation
Computer simulation of kinetic properties of plasmas. Final report, 8:22073 (R:US)
Electric Fields
Influence exerted by the plasma edge potential on recycling, sputtering and impurity accumulation, 8:22650 (J:NL)
Equilibrium
Energy principle with global invariants: Applications, 8:22643 (J:US)
Some minimum-energy toroidal equilibria, 8:22642 (J:US)
Transport and isomorphic equilibria, 8:22640 (J:US)
High-Frequency Heating
Theory of rf heating of toroidal plasmas, 8:22601 (R:US)
ICR Heating
Ion-cyclotron resonance heating in a strongly inhomogeneous magnetic field, 8:22639 (J:US)
Impurities
Charge, quantum state, and energy distributions of impurities released in plasma-wall interaction processes, 8:22698 (R:US)
Neutral-beam-induced alteration in impurity transport, 8:22665 (BA:DE)
Semi-empirical studies of atomic structure. Progress report, 1 July 1982-1 February 1983, 8:22599 (R:US)
Magnetic Flux
Frozen magnetic flux in a tokamak discharge, 8:22636 (J:US)
Mass Spectroscopy
Physico-chemical characteristics of plasmachemical reactions, 8:21213 (RA:CS)
Nonlinear Problems
Gyrokinetic approach in particle simulation, 8:22645 (J:US)
Plasma Diagnostics
Frozen magnetic flux in a tokamak discharge, 8:22636 (J:US)
Plasma Microinstabilities
Gyrokinetic approach in particle simulation, 8:22645 (J:US)
Positioning
FED control power, 8:22813 (J:US)
Power
Determination of electron and ion thermal conductivities by analysis of Alcator-A profile data, 8:22646 (J:US)
Simulation
Gyrokinetic approach in particle simulation, 8:22645 (J:US)
Stability
Magnetohydrodynamic and double adiabatic stability of compact toroid plasmas, 8:22641 (J:US)
Thermal Conductivity
Determination of electron and ion thermal conductivities by analysis of Alcator-A profile data, 8:22646 (J:US)
Thermodynamic Properties
N-dependence in the classical one-component plasma Monte Carlo calculations, 8:22659 (J:US)
Transport Theory
Determination of electron and ion thermal conductivities by analysis of Alcator-A profile data, 8:22646 (J:US)
Plasma engineering analyses of tokamak reactor operating space, 8:22669 (J:US)
Study of plasma edge conditions for a commercial tokamak reactor, 8:22681 (J:US)
Transport and isomorphic equilibria, 8:22640 (J:US)

PLASMA CONFINEMENT
See also *INERTIAL CONFINEMENT*
Magnetic Field Configurations
Very strong double layers in a magnetized plasma column, 8:22629 (R:SE)

PLASMA DIAGNOSTICS
Review of intense-ion-beam propagation with a view toward measuring ion energy, 8:22631 (R:US)
Atomic Beams
Attenuation of atomic beam by plasma, 8:22606 (RA:CS:In Czech)
Calorimeters
Calorimeter probe studies of PDX and PLT, 8:22656 (J:NL)
Deposition
Deposition probe measurements in EBT-S, 8:22658 (J:NL)
Dye Lasers
Dye laser fluorescence spectroscopy on the Doublet III tokamak, 8:22653 (J:NL)
Electric Grounds
TFTR diagnostics grounding, 8:22679 (J:US)
Electric Probes
High frequency probe circuits for plasma diagnostics, 8:22630 (R:SE)
Fluorescence Spectroscopy
Measurement of the density and velocity distribution of sputtered Al in EBT-S by laser-induced fluorescence, 8:22654 (J:NL)
Langmuir Probe
Edge plasma transport experiments in the Caltech tokamak, 8:22651 (J:NL)
Magnetic Probes
Frozen magnetic flux in a tokamak discharge, 8:22636 (J:US)
Magnetometers
Research support for plasma diagnostics on Elmo Bumpy Torus. Observations of EBT ring geometry by means of diamagnetic field measurements using a compensated ferromagnetic resonance magnetometer, and a preliminary numerical study of EBT flux penetration dynamics, 8:22627 (R:US)
Neutron Detectors
Mechanical design of epithermal neutron diagnostic for TFTR, 8:22674 (J:US)
Stark Effect
Diagnostics of low-pressure high-frequency discharges, 8:22608 (RA:CS:In Czech)
Thermometers
Infrared thermometer for tokamak limiter surface temperature measurements, 8:22655 (J:NL)

Thomson Scattering
Computer data-acquisition and control system for Thomson-scattering measurements, 8:22628 (R:US)
X-Ray Spectroscopy
Final report on the scientific and engineering design of a soft X-ray diode array diagnostic system for JET (KJ 1), 8:22622 (R:DE)
PLASMA DRIFT
Measuring Instruments
Measurement of plasma drifts in planetary magnetospheres, 8:22172 (R:NL)
PLASMA HEATING
See also HIGH-FREQUENCY HEATING
Beam Injection
Determination of species yield of ion sources used for intense neutral beam injector, 8:22657 (J:NL)
Mathematical Models
Production of hollow gas cylinder and pulsed gas insulated discharge, 8:22671 (J:US)
PLASMA MACROINSTABILITIES
See also BALLOONING INSTABILITY
Experimental observations of MHD instabilities in the high-beta tokamak Torus-II, 8:22602 (R:US)
PLASMA OSCILLATIONS

See PDX DEVICES
POLOIDAL DIVERTORS
A divertor which takes out poloidal magnetic field lines, forming a separatrix in the poloidal field.
Divertor modelling, 8:22777 (BA:DE)
Expanded boundary divertor experiments in Doublet III, 8:22774 (BA:DE)
Charge Exchange
Mass resolving charge-exchange system on the poloidal divertor experiment, 8:22634 (J:US)
Computerized Simulation
Modelling of the INTOR poloidal divertor, 8:22780 (BA:DE)
Efficiency
Divertor scrape-off studies, 8:22776 (BA:DE)
Mass Resolution
Mass resolving charge-exchange system on the poloidal divertor experiment, 8:22634 (J:US)
Radiative Cooling
Remote radiative cooling and helium ash exhaustion with single-null poloidal divertor in Doublet III, 8:22775 (BA:DE)
POLONIUM 210
Alpha Spectroscopy
Improved sensitive assay for polonium-210 by use of a background-rejecting extractive liquid-scintillation method, 8:21222 (J:GB)

Solvent Extraction
Improved sensitive assay for polonium-210 by use of a background-rejecting extractive liquid-scintillation method, 8:21222 (J:GB)

POLYATOMIC MOLECULES
Dissociation
Theory of polyatomic photodissociation. Adiabatic description of the dissociative state and the translation-vibration interaction, 8:21240 (J:US)
Dynamics
Applications of a simple dynamical model to the reaction path Hamiltonian: tunneling corrections to rate constants, product state distributions, line widths of local mode overtones, and mode specificity in unimolecular decomposition, 8:21237 (J:US)
Incorporation of quantum effects in generalized-transition-state theory, 8:21242 (J:US)

POLYCARBONATES
Chemical Preparation
Characterization and control of a model CR-39 polymer, 8:21596 (RA:US)
Structural Models
Characterization and control of a model CR-39 polymer, 8:21596 (RA:US)

POLYCYCLIC AROMATIC HYDROCARBONS
Atmospheric Chemistry
Relation between concentrations of polynuclear aromatic hydrocarbons and black carbon, 8:21743 (RA:US)
Chemical Analysis
Analytical methodology in studies of polycyclic aromatic hydrocarbons in coal derived products, 8:19566 (RA:XE)
Fluorescence Spectroscopy
Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983, 8:21295 (R:US)
Hydrocracking
Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
Hydrogenation
Chemistry and catalysis of coal liquefaction: catalytic and thermal upgrading of coal liquid and hydrogenation of CO to produce fuels. Quarterly progress report, October-December 1982, 8:19430 (R:US)
Mutagen Screening
Mutagenicity of potential effluents from an experimental low Btu coal gasifier, 8:22018 (J:DE)
Pyrolysis
Study of pyrolysis of perhydrofluorene and perhydropyrene, 8:19525 (RA:XE:In French)
Qualitative Chemical Analysis
Identification and comparative genotoxicity of polycyclic aromatic hydrocarbons and related nitrogen-containing heteroatomic species in products from coal liquefaction processes, 8:19667 (R:US)
Solvent Extraction
Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
Toxicity
Identification and comparative genotoxicity of polycyclic aromatic hydrocarbons and related nitrogen-containing heteroatomic species in products from coal liquefaction processes, 8:19667 (R:US)

POLYETHYLENES
Cross-Linking
Crosslinking of polyethylene in view of an application in wire coating. Final report, December 1979, 8:21248 (R:DE:In several languages)
Reaction Kinetics
Reaction kinetics of oxygen atoms and hydroxyl radicals with tetrachlorethylene, 8:21731 (RA:DE:In German)

POLY(ISOBUTYLENE OXIDE)
See EPOXIDES

POLYMERS
Aging
Comments on the prediction of service lives of polymeric materials by the Arrhenius methods, 8:20587 (RA:US)
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)
Overview of synergistic aging effects, 8:20582 (RA:US)
Cracks
Time-dependent small-angle x-ray scattering from stress-induced crazes in polymers, 8:21146 (J:US)
Electroplating
Nonliquid surface preparation for electrodeposition (Nonconductive materials), 8:21077 (R:US)
Photolysis
Modelling of polymer photodegradation for solar cell modules, 8:20007 (R:US)
Modelling of polymer photodegradation for solar cell modules, 8:20006 (R:US)
Requirements for heat resistant and highly heat resistant materials in the construction of stationary turbines, 8:21062 (R:DE:In German)
Physical Radiation Effects
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)
Overview of synergistic aging effects, 8:20582 (RA:US)
Time-dependent small-angle x-ray scattering from stress-induced crazes in polymers, 8:21146 (J:US)
Reduction
Novel method for the electroless metallization of polyimide: surface oxidation of Zintl anions, 8:21060 (R:US)
Sorptive Properties
Porous polymers as new sorptive materials, 8:21467 (R:NL)
Surface Coating
Novel method for the electroless metallization of polyimide: surface oxidation of Zintl anions, 8:21060 (R:US)
Thermal Stresses
Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)

POLYNOMIALS
ROPE; finding roots of a polynomial (CDC6600; FORTRAN IV), 8:22832 (R:US)

POLYNUCLEAR AROMATIC HYDROCARBONS
See POLYCYCLIC AROMATIC HYDROCARBONS

POLYOLEFINS
See also POLYETHYLENES
POLYSTYRENE
Chemical Radiation Effects
Crosslinking of polyolefin insulation of cables and insulated wires by the use of energy-rich radiation. Part 1: material of irradiation. Final report, March 1980, 8:21276 (R:US:In several languages)
Crosslinking of polyolefin insulations of cables and insulated wires by the use of energy-rich radiation. Part 3: production engineering. Final report, March 1980, 8:21277 (R:DE:In several languages)

POLYSTYRENE
Dosimetry
Investigation of buildup dose from electron contamination of clinical photon beams, 8:22545 (J:US)
Microstructure
Microstructural analysis of ion-containing polymers. Progress report, January 1-December 31, 1982 (Sulfonated polystyrene), 8:21145 (R:US)

POLYTHENE
See POLYETHYLENES

PONDS
See also COOLING PONDS
SOLAR PONDS
Ecology
Studies of using artificial ponds for ecotoxicological examination of chemicals, 8:21862 (RA:DE:In German)

PONDS (COOLING)
See COOLING PONDS

POOLS
See PONDS

POROUS MATERIALS
Compacting
Response of porous beds to rapid gas pressurization, 8:21653 (R:US)

Heat Transfer
MARIAH - a finite-element computer program for incompressible porous-flow problems: user's manual, 8:21427 (R:US)
Incompressible Flow
MARIAH - a finite-element computer program for incompressible porous-flow problems: user's manual, 8:21427 (R:US)
Natural Convection
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R:US)
Saturation
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R:US)
Temperature Distribution
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R:US)
Two-Phase Flow
Response of porous beds to rapid gas pressurization, 8:21653 (R:US)

PORPHYRINS
See also CHLOROPHYLL
Electron Transfer
Photosensitized electron transport across lipid vesicle walls, 8:20001 (R:US)
Electronic Structure
Electronic structure of iron phthalocyanine and its analogs: a theoretical study, 8:21249 (R:US)

PORTSMOUTH GASEOUS DIFFUSION PLANT
Criticality
Analysis of an oil-uranium deposit in gaseous diffusion equipment, 8:21363 (J:US)

PORTSMOUTH PLANT
See PORTSMOUTH GASEOUS DIFFUSION PLANT

PORTUGAL
Energy Models
Energy-sector-model applications in energy assessments of industrializing and developing countries, 8:20788 (R:US)

POSITION INDICATORS
See DISPLACEMENT GAGES

POSITION SENSITIVE DETECTORS
Photomultipliers
Cathode uniformity of new square photomultiplier tubes, 8:21569 (R:US)

POSITRON BEAMS
Acceleration
Dynamics of positron beam from a convertor target while beam additional accelerating in a travelling wave electron linac, 8:21489 (RA:SU:In Russian)
Beam Production
VLEPP conversion system for polarized beam production, 8:21556 (RA:SU:In Russian)
Colliding Beams
Polarized e^{+-} - polarized p colliding beams: physics issues, 8:21491 (R:US)
Polarized Beams
VLEPP conversion system for polarized beam production, 8:21556 (RA:SU:In Russian)

POSITRON COMPUTED TOMOGRAPHY
Data Analysis
Biomedical research with cyclotron-produced radionuclides. Progress report, August 1, 1982-February 28, 1983, 8:21913 (R:US)
Diagnostic Uses
Evaluative studies in nuclear medicine research: positron computed tomography assessment. Final report, January 1, 1982-December 31, 1982, 8:21912 (R:US)
Image Processing
Biomedical research with cyclotron-produced radionuclides. Progress report, August 1, 1982-February 28, 1983, 8:21913 (R:US)

POSITRON SOURCES
Beam Extraction
RF particle separator for the SLAC linear accelerator's positron source (Engineering Materials), 8:21532 (E:US)
Installation
SLAC positron-source station Mark II (Engineering Materials), 8:21531 (E:US)

POSITRON-ATOM COLLISIONS
Scattering
Moment techniques in atomic and molecular scattering theory, 8:22229 (BA:US)

POSITRON-ELECTRON-PROTON STORAGE RING
See PEP STORAGE RINGS

POSITRONIUM
Spectroscopy
Laser excitation, 8:22187 (R:US)

POSITRONS
Annihilation
Defects in metals (Positron annihilation spectroscopy), 8:21049 (R:US)
Positron-annihilation spectroscopy of defects in metals: an assessment, 8:21051 (R:US)
Transmission
Low-temperature measurements of the fraction of re-emitted positronium from a Cu(111)+S surface, 8:22534 (J:GB)
Uses
Positron-annihilation spectroscopy of defects in metals: an assessment, 8:21051 (R:US)

POSTULATED PARTICLES
See also CHARM PARTICLES
GLUONS
MAGNETIC MONOPOLES
QUARKS
Particle Production
Hunting for the selectron, 8:22308 (J:NL)

POTABLE WATER
See DRINKING WATER

POTASSIUM
Energy-Level Transitions
Tunable far-infrared radiation from optically pumped potassium Rydberg transitions, 8:22219 (J:US)
Monitoring
Cesium-137 in various Chicago foods: (collection month, April 1982), 8:21836 (RA:US)
Specific Heat
Absence of phason contribution in the specific heat of potassium, 8:21096 (J:US)

POTASSIUM 40
Gamma Spectroscopy
Radiogeologic assessment for nuclear waste isolation: studies of the Stripa pluton, 8:19847 (RA:US)

POTASSIUM BROMIDES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)

POTASSIUM CARBONATES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)
Evaporation
Electrolyte vaporization losses from molten-carbonate fuel cells, 8:20885 (R:US)

POTASSIUM CHLORIDES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)
Recombination
Monte-Carlo calculations of two- and three-body ionic recombination, 8:22220 (J:GB)

POTASSIUM COMPOUNDS
See also POTASSIUM BROMIDES
POTASSIUM CARBONATES
POTASSIUM CHLORIDES
POTASSIUM FLUORIDES
POTASSIUM HYDROXIDES
POTASSIUM IODIDES
POTASSIUM SULFATES
POTASSIUM SULFIDES

Radiolysis
EPR and NMR detection of transient radicals and reaction products (Radiolysis of methanol and aqueous potassium acetate), 8:21279 (R:US)

POTASSIUM FLUORIDES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)
Exchange Interactions
Magnetic-resonance investigation of the ordering in randomly-site-diluted antiferromagnets: KMnF$_3$:Mg, 8:21179 (J:US)

POTASSIUM HYDROXIDES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)
Change in catalyst activity during catalytic steam gasification of char. First quarterly report, 8:19517 (R:US)

POTASSIUM IODIDES
Catalytic Effects
Catalytic gasification of coal char, 8:19446 (RA:US)

POTASSIUM SULFATES
Thermodynamic Properties
Vaporization thermodynamics of K$_2$S and K$_2$SO$_4$, 8:20877 (R:US)

POTASSIUM SULFIDES
Thermodynamic Properties
Vaporization thermodynamics of K$_2$S and K$_2$SO$_4$, 8:20877 (R:US)

POTTING MATERIALS
Equations of State
Equation of state data of APC 2.5, 8:21169 (R:US)

POULTRY
See FOWL

POWDERS
Variations
Estimation of material variation in powdered materials. Report No. 2115, 8:21037 (R:ZA)

POWER DEMAND
Forecasting
Utilities, 8:20791 (RA:US)

POWER DISTRIBUTION SYSTEMS
Mathematical Models
Effects on the utility feeder of utility-interactive inverters at the Northeast Residential Experiment Station, 8:20036 (R:US)

POWER GENERATION
See also COGENERATION
ON-SITE POWER GENERATION
Availability
Information system for generation availability: executive summary. Final report, 8:20839 (R:US)
Cost
POWERCO; nuclear station electricity costs (CDC6600; FORTRAN IV), 8:20471 (R:US)
Electrical Equipment
The market for power generation equipment in Turkey (1982-1986). Foreign market survey report, 8:20844 (R:US)
Environmental Impacts
Study of a conceptual nuclear energy center at Green River, Utah. Power demand, load center assessment and transmission, 8:20625 (R:US)
Fuel Consumption
Use of steam coal in power stations, 8:20285 (B:XU)
Information Systems
Information system for generation availability: executive summary. Final report, 8:20839 (R:US)
Research Programs
EPRI Research and Development Projects, 8:20268 (R:US)
Technology Assessment
Guide for the assessment of technologies for generating electricity, 8:20822 (R:US)

POWER PLANT AND INDUSTRIAL FUEL USE ACT
Guidelines for coping with the Powerplant and Industrial Fuel Use Act of 1978, 8:19670 (RA:US)

POWER PLANTS

HYDROELECTRIC POWER PLANTS
MHD POWER PLANTS
THERMAL POWER PLANTS
THERMONUCLEAR POWER PLANTS
WIND POWER PLANTS
Capitalized Cost
Electric-utility financial database documentation, 8:20836 (R:US)
Environmental Impacts
Power plant cumulative environmental impact report. Final report, 8:21830 (R:US)
Financing
Financing new electric-generating facilities in deregulated markets: insights from analogous industries, 8:20825 (R:US)
Inventories
Inventory of power plants in the United States. 1981 annual (For 1981), 8:20254 (R:US)
Life-Cycle Cost
Electric-utility financial database documentation, 8:20836 (R:US)
Maps
Maps: Poland, Eastern Europe: major power facilities, 8:21848 (R:US)
Operating Cost
Electric-utility financial database documentation, 8:20836 (R:US)
Site Selection
Manual for using energy analysis for plant siting, 8:20289 (R:US)
Systems Analysis
GSMP; general systems analysis modeling code (IBM370,303x; PL/I (90%), FORTRAN IV (9%), and Assembly language (1%)), 8:22853 (R:US)
Waste Heat
Substituting power plant waste heat for on-farm heat requirements. Final report, 8:20977 (R:US)

POWER POOLS
See INTERCONNECTED POWER SYSTEMS

POWER SUPPLIES
See also PHOTOVOLTAIC POWER SUPPLIES
SPACECRAFT POWER SUPPLIES
Manuals
PEP storage ring magnets and power supply system, 8:21558 (R:US)

POWER SYSTEMS
Includes electric power networks with associated generating and transmission facilities.
See also AC SYSTEMS
BRAYTON CYCLE POWER SYSTEMS
INTERCONNECTED POWER SYSTEMS
RANKINE CYCLE POWER SYSTEMS
Damage
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)
Electromagnetic Pulses
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Load Management
Load flow optimization in an electrical energy network by means of a searching technique with random numbers, 8:20271 (R:DE:In German)
Mathematical Models
Development of a reduced-order functional representation of an alternator-rectifier excitation system, 8:20240 (R:US)
Using parallel-computer systems to evaluate the dynamical protection of power networks, 8:20272 (R:DE:In German)
Optimization
Load flow optimization in an electrical energy network by means of a searching technique with random numbers, 8:20271 (R:DE:In German)
Safety
Using parallel-computer systems to evaluate the dynamical protection of power networks, 8:20272 (R:DE:In German)
Vulnerability
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems, 8:20723 (R:US)
Interaction of electromagnetic pulse with commercial nuclear-power-plant systems. Volume I. Executive summary, 8:20722 (R:US)

POWER TRANSMISSION
Research Programs
EPRI Research and Development Projects, 8:20268 (R:US)
POWER TRANSMISSION LINES
Electrical Insulation
Electric power for the island of Borkum, 8:20315 (TJ:US)
Environmental Impacts
Study of a conceptual nuclear energy center at Green River, Utah. Power demand, load center assessment and transmission, 8:20625 (R:US)
Installation
Electric power for the island of Borkum, 8:20315 (TJ:US)
Performance
Electric power for the island of Borkum, 8:20315 (TJ:US)
POWERED SUPPORTS
Automation
Automation of the longwall mining system, 8:19608 (R:US)
PRECIPITATIONS (ATMOSPHERIC)
See ATMOSPHERIC PRECIPITATIONS
PRECOMPOUND-NUCLEUS EMISSION
Nuclear Models
Theory of heavy-ion collisions. Final report, 8:22397 (R:US)
PREDICTION
See FORECASTING
PREEQUILIBRIUM NUCLEAR PROCESSES
See PRECOMPOUND-NUCLEUS EMISSION
PRENATAL IRRADIATION
Reviews
Carcinogenesis following prenatal exposure to radiation, 8:21983 (J:DE)
PRESSURE SUPPRESSION
Mechanical Vibrations
Vibration phenomena in large scale pressure suppression tests, 8:20693 (R:DE)
PRESSURE VESSELS
Failures
OCTAVIA; pressure vessel failure probabilities (IBM370,303x; FORTRAN IV), 8:20573 (R:US)
Fatigue
SORSDB; pressure vessel stress and fatigue (CDC6600; FORTRAN IV), 8:20567 (R:US)
Fracture Mechanics
Contribution to the determination of J-integral and crack opening displacement as material characteristics and their application in safety-assessments of pressure vessels, 8:21432 (R:AT:In German)
Fracture Properties
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws (PWR; BWR), 8:20733 (TG:US)
Level Indicators
H-Coal Pilot Plant: radiation safety, 8:19428 (R:US)
Level indicator for pressure vessels (Patent), 8:19536 (P:US)
Materials
New class of steels for thick-wall pressure vessels. Final technical report, June 21, 1980-June 30, 1982, 8:21088 (R:US)
Nozzles
Results of EDF/Framatome underclad crack-detection methods. Final report (PWR), 8:20371 (R:US)
Physical Radiation Effects
LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
Safety
Contribution to the determination of J-integral and crack opening displacement as material characteristics and their application in safety-assessments of pressure vessels, 8:21432 (R:AT:In German)
Specifications
Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)
Stress Analysis
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws (PWR; BWR), 8:20733 (TG:US)
Stresses
SORSDB; pressure vessel stress and fatigue (CDC6600; FORTRAN IV), 8:20567 (R:US)
Transients
M0555;ACT1; loss-of-coolant accident analysis (CDC6600; FORTRAN IV), 8:20563 (R:US)
Ultrasonic Testing
Detection of small-sized near-surface under-clad cracks for reactor pressure vessels, 8:20594 (R:US)
Investigation of special-purpose processors for real-time synthetic-aperture-focusing techniques for nondestructive evaluation of nuclear-reactor vessels and piping components (PWR; BWR), 8:20344 (R:US)
PRESSURIZED WATER COOLED MODERATED REACTOR
See PWR TYPE REACTORS
PRESSURIZED WATER REACTORS

Steam Systems
High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)
HTGR steam-cycle/cogeneration lead plant design and cost report. Volume II. Nuclear Steam Supply System, 8:20484 (R:US)
Thermochemical Processes
Monolithic HTGR - reformer design and cost summary: thermochemical pipeline application, 8:20479 (R:US)
PROCESS SOLUTIONS
Monitoring
Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)
Mutagen Screening
Toxicological characterization of the process stream from an experimental low Btu coal gasifier, 8:22017 (J:DE)
On-Line Measurement Systems
Optical instrumentation for on-line analysis of chemical processes, 8:21216 (R:US)
Separation Processes
Mercuric iodate precipitation from radioiodine-containing off-gas scrubber solution (Patent), 8:19803 (P:US)
Toxicity
Toxicological characterization of the process stream from an experimental low Btu coal gasifier, 8:22017 (J:DE)
PROCESSING (DATA)
See DATA PROCESSING
PRODUCER GAS
130 to 140 Btu/ft^3.
Production
Coal is a gas, 8:19540 (J:US)
Uses
Coal is a gas, 8:19540 (J:US)
PRODUCTION (HYDROGEN)
See HYDROGEN PRODUCTION
PRODUCTION (ISOTOPE)
See ISOTOPE PRODUCTION
PRODUCTION (PARTICLE)
See PARTICLE PRODUCTION

PRODUCTIVITY
LCURVE; learning curve production calculations (Honeywell Series 60 Level 66 Model 20; BASIC), 8:22868 (R:US)
PROGRAMMING
Limited to computer programming.
See also LINEAR PROGRAMMING
NONLINEAR PROGRAMMING
Documentation
Computer program abstract as software documentation, 8:22872 (R:US)
PROGRAMMING LANGUAGES
See also FORTRAN
ANSI standard PL/I: an update, 8:22873 (R:US)
PORTABLE LISP; a list-processing interpreter (CDC7600; PASCAL), 8:22844 (R:US)
SIMPLE1; time-sharing programming language (CDC6600; FORTRAN IV and ASCENT), 8:22831 (R:US)
UPD; source deck maintenance utility routine (IBM360,370,303x;Amdahl470; FORTRAN IV (64%) and BAL (36%)), 8:22847 (R:US)
VAL language: description and analysis, 8:22885 (J:US)
PROJECTILES
Impact Tests
Laboratory technique for simulation of projectile penetration into geological targets, 8:21351 (R:US)
Penetration Depth
Laboratory technique for simulation of projectile penetration into geological targets, 8:21351 (R:US)
PROJECTION SPARK CHAMBERS
Liquid Scintillation Detectors
Liquid time projection chamber, 8:21578 (RA:US)
PROMINENCES (SOLAR)
See SOLAR PROMINENCES
PRONGS
See PARTICLE TRACKS
PROPANE
Density
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Dielectric Properties
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Enthalpy
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Entropy
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Equations of State
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Melting Points
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Specific Heat
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Vapor Pressure
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
Vaporization Heat
Thermophysical properties of propane from 85 to 700°K at pressures to 70 MPa, 8:19771 (R:US)
PROPANONE
See ACETONE
PROPELLANTS
Brightness
I.R. emission measurements of shocked rocket propellants by time-resolved infrared radiometry, 8:21655 (R:US)
Chemical Reactions
I.R. emission measurements of shocked rocket propellants by time-resolved infrared radiometry, 8:21655 (R:US)
Combustion
Numerical methods and calculations for droplet flow, heating and ignition, 8:21297 (R:US)
Ignition
Numerical methods and calculations for droplet flow, heating and ignition, 8:21297 (R:US)
PROPORTIONAL COUNTERS
See also BF3 COUNTERS
Design
Portable neutron spectrometer/dosimeter, 8:21600 (RA:US)
Engineering Drawings
Alpha Survey Meter (Engineering Materials), 8:21615 (E:US)
Spectral Response
Portable neutron spectrometer/dosimeter, 8:21600 (RA:US)
PROPULSION SYSTEMS
Maintenance
Estimated maintenance and repair requirements for coal-fired propulsion systems. Final report, 8:21014 (R:US)
Repair
Estimated maintenance and repair requirements for coal-fired propulsion systems. Final report, 8:21014 (R:US)
PROTACTINIUM 229
Electron Capture Decay
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
Energy Levels
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
Energy-Level Transitions
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
Parity
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
Spin
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
PROTACTINIUM 231 TARGET
Proton Reactions
Possible ground-state octupole deformation in ^{229}Pa, 8:22393 (J:US)
PROTECTION
See SAFETY
PROTECTION (RADIATION)
See RADIATION PROTECTION
PROTECTIVE CLOTHING
Design
A second field investigation of noise reduction afforded by insert-type hearing protectors, 8:22024 (R:US)
PROTECTIVE COATINGS
Development of improved high temperature coatings for In-792 + Hf. Final report, 8:21081 (R:US)
Erosion
Evaluation of advanced materials. Final report, 8:21124 (R:US)
PROTEINS
Bioassay
Introduction to high-resolution two-dimensional electrophoresis in clinical chemistry, 8:21897 (R:US)
Biochemical Reaction Kinetics
Introduction to high-resolution two-dimensional electrophoresis in clinical chemistry, 8:21897 (R:US)
Biochemistry
Biochemical changes in blood components after lethal doses of radiation. Final report Oct 80-Sep 81, 8:21939 (R:US)
Configuration Interaction
Lateral diffusion in an archipelago - effects of impermeable patches on diffusion in a cell membrane, 8:21907 (J:US)
PROTON BEAMS
Beam Bunching
Bunch diffusion due to rf noise, 8:21496 (J:GB)
Colliding Beams
Polarized e^{+-} - polarized p colliding beams: physics issues, 8:21491 (R:US)
Electron Cooling
Proton-antiproton colliding beam electron cooling, 8:21553 (RA:SU:In Russian)

Licensee Event Report (LER) compilation for month of January 1983, 8:20463 (R:US)
Reactor Operators
Peer-review study of the draft handbook for human-reliability analysis with emphasis on nuclear-power-plant applications, NUREG/CR-1278, 8:20348 (R:US)
Reactor Shutdown
Loss of benefits resulting from mandated nuclear plant shutdowns, 8:20477 (R:US)
Secondary Coolant Circuits
Iodine transport predicted for a postulated steam-line break with concurrent ruptures of steam-generator tubes, 8:20716 (R:US)
Seismic Effects
Seismic hazard analysis overview and executive summary, 8:20712 (R:US)
Spent Fuel Elements
Determination of isotopic and gravimetric content of uranium and plutonium by mass spectrometry in nitric acid extraction solutions, 8:20386 (TG:US)
Steam Generators
Alloy steel corrosion kinetics and oxide morphologies in acid chloride environments, 8:20360 (RA:US)
Characterization of model boiler specimens, 8:20366 (RA:US)
Corrosion of support materials, 8:20358 (RA:US)
Effect of oxygen and oxidizing ions on denting corrosion, 8:20367 (RA:US)
Examinations of support plate samples from steam generators, 8:20362 (RA:US)
Impedance studies of the growth of porous magnetite films on carbon steel in high temperature aqueous systems, 8:20369 (RA:US)
In-service inspection of system generator tubes with multiple-frequency eddy currents, 8:20388 (J:US)
Initial inspection of a service degraded steam generator removed from service, 8:20389 (J:US)
Iodine transport predicted for a postulated steam-line break with concurrent ruptures of steam-generator tubes, 8:20716 (R:US)
Measuring corrosion rates in crevices with a computer-controlled flow loop, 8:20361 (RA:US)
Methods for predicting strain in dented steam generator tubes from profilometry data, 8:20380 (RA:US)
Modeling of salt concentrations in crevices, 8:20368 (RA:US)
Preliminary corrosion results on alternative support materials from two model steam generator tests, 8:20359 (RA:US)
Proceedings: support-structure corrosion in steam generators, 8:20356 (R:US)
Recent Westinghouse experience with tube support plate materials corrosion studies, 8:20357 (RA:US)
Results of EDF/Framatome underclad crack-detection methods. Final report, 8:20371 (R:US)
Steam-Generator Dilute-Chemical-Cleaning Program: steam-generator chemical-cleaning project. Annual report for 1981, 8:20353 (R:US)
Use of conductance probe method to measure two phase flow pattens, 8:20378 (RA:US)
Steam Lines
Iodine transport predicted for a postulated steam-line break with concurrent ruptures of steam-generator tubes, 8:20716 (R:US)
Steam Systems
Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)
Utility of low-order linear nuclear-power-plant models in plant diagnostics and control, 8:20617 (R:US)
Steam Turbines
Scale-model turbine-missile-casing impact tests. Final report, 8:20691 (R:US)
Thermodynamics
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)
Transients
Hydrodynamics of annular-dispersed flow, 8:20680 (R:US)
M0219;FLOT1; PWR flow transient analysis (CDC6600; FORTRAN IV), 8:20350 (R:US)
RELAP4/MOD6; transient thermal-hydraulic study (IBM360,370;CDC7600; FORTRAN IV (95) and BAL (5) (IBM360), FORTRAN IV (95) and COMPASS (5) (CDC7600)), 8:20320 (R:US)
Westinghouse FREY calculations: excessive load increase, boron dilution, and rod withdrawal at power. Final report, 8:20690 (R:US)
Two-Phase Flow
K-FIX;3D; three-dimensional extension two-phase flow dynamics (CDC7600; FORTRAN IV), 8:20553 (R:US)
K-TIF; two-fluid PWR downcomer fluid dynamics (CDC7600; FORTRAN (LRLTRAN and CHAT compiler)), 8:20351 (R:US)
PYRENE
Fluorescence Spectroscopy
Separation of asphaltenes using high-resolution supercritical-fluid chromatography. Progress report, December 1, 1982-February 28, 1983, 8:19561 (R:US)
PYREX
Antireflection Coatings
Antireflection pyrex envelopes for parabolic solar collectors, 8:20132 (R:US)
PYRHELIOMETERS
Calibration Standards
Final report of the E.C. comparison of the national standard pyrheliometers, 8:19968 (R:XE:In French)
Testing
Final report of the E.C. comparison of the national standard pyrheliometers, 8:19968 (R:XE:In French)
PYRIDINE
Catalytic Effects
Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
Combustion Kinetics
Synthetic-fuel combustion: pollutant formation. Soot-initiation mechanisms in burning aromatics. Final report, 19 September 1980-18 September 1982, 8:21296 (R:US)
Combustion Products
Synthetic-fuel combustion: pollutant formation. Soot-initiation mechanisms in burning aromatics. Final report, 19 September 1980-18 September 1982, 8:21296 (R:US)
PYRIDINES
See also BIPYRIDINES
PYRIDINE
QUINOLINES
Adsorption
Reaction calorimetry for coal chemistry and catalysis. Quarterly report, November 1, 1982-January 20, 1983, 8:19563 (R:US)
PYRITE
Catalytic Effects
Study of the behaviour of pyrite during hydrogenation of graphite, 8:19520 (RA:XE:In French)
Oxidation
Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)
Particle-size effects in oxidation of pyrite in air/water chemical coal cleaning. Final report, March 1, 1979-February 29, 1980, 8:19553 (R:US)
Subsurface oxidation of pyritic coal-cleaning wastes by chemoautotrophic bacteria (51 references), 8:19595 (R:US)
Removal
Oxydesulfurization of coal and sulfur-containing compounds, 8:19619 (R:US)
PYRITES
See PYRITE
PYROLYSIS
See also FLASH HYDROPYROLYSIS PROCESS
By-Products
Studies toward improved techniques for gasifying coal, 8:19452 (RA:US)
Catalysts
Kinetics of coal pyrolysis and gasification, 8:19437 (RA:US)

Thermal reactions of aromatics with CaO, 8:19467 (RA:US)
Chemical Reaction Kinetics
Studies of the pyrolysis mechanisms of tricyclic aromatic compounds and their hydrogen derivatives, traced by means of radioactive carbon and tritium, 8:19524 (RA:XE:In French)
Chemical Reactors
Short residence time hydropyrolysis, 8:19438 (RA:US)
Mathematical Models
Coal gasification reactions with on-line, in-situ FT-IR analysis, 8:19460 (RA:US)
Photochemical Reactions
IR laser induced reactions: temperature distributions and detection of primary products, 8:21283 (R:DE:In German)

Q

QUADRUPOLE LINACS
Beam Dynamics
Derivation of an elementary RFQ formula, 8:21492 (R:DE)
QUALITY CONTROL
SALE; analytical chemistry quality control (IBM360,3033; FORTRAN IV (97%) and Assembly language (3%)), 8:21192 (R:US)
QUANTUM CHROMODYNAMICS
Asymmetry
Perturbative QCD and weak asymmetries in lepton pair production, 8:22305 (J:US)
Exclusive Interactions
What can we count on? A discussion of constituent-counting rules for interactions involving composite systems, 8:22332 (J:US)
QUANTUM MECHANICS
Comparative Evaluations
Criteria for quantum chaos, 8:21239 (J:US)
Semiclassical theory of intensities of vibrational fundamentals, overtones, and combination bands, 8:21238 (J:US)
Many-Body Problem
Many-body theory in condensed matter physics, 8:22566 (J:US)
Monte Carlo Method
Review of quantum Monte Carlo methods and results for Coulombic systems, 8:22565 (R:US)
Wave Functions
INSCAT; inelastic scattering method (CDC7600,CYBER175; FORTRAN IV), 8:22337 (R:US)
QUARK CONFINEMENT
See BAG MODEL
QUARK-ANTIQUARK INTERACTIONS
Bound State
Observation of P-wave bb-bar bound states, 8:22277 (J:US)
P Waves
Observation of P-wave bb-bar bound states, 8:22277 (J:US)
QUARKONIUM
A hypothetical bound state of quark and antiquark.
Meson Spectroscopy
New-particle spectroscopy, quarkonium and gluonic mesons, 8:22275 (R:US)
QUARKS
Composite Models
Composite models of quarks and leptons and strong-coupling lattice gauge theories, 8:22319 (J:US)
Polarization
Perturbative QCD and weak asymmetries in lepton pair production, 8:22305 (J:US)
Quantum Flavordynamics
Particle searches in $e^+ e^-$ experiments at PEP and PETRA, 8:22274 (R:US)
Reviews
Quark-antiquark bound-state spectroscopy and QCD, 8:22303 (R:US)
QUARTZ
Electron Spin Resonance
Electron spin echo envelope modulation study of lithium nuclear hyperfine and quadrupole coupling in the A(Ti—Li) center of α-quartz, 8:21175 (J:US)
QUASARS
X Radiation
X-rays from quasars and active galaxies, 8:22113 (R:US)
QUINOLINES
Catalytic Effects
Hydrogen bonding in asphaltenes and coal liquids. Quarterly report, November 1, 1982-January 31, 1983, 8:19558 (R:US)
Denitrification
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
Hydrogenation
Cross-reaction networks in the catalytic hydrodenitrogenation of synthetic liquid fuels. Quarterly report, November 1, 1982-January 31, 1983, 8:21250 (R:US)
QUINONES
Chemical Bonds
Two-electron gates in photosynthesis, 8:21264 (R:US)
Electron Transfer
Two-electron gates in photosynthesis, 8:21264 (R:US)

R

RABBITS
Radionuclide Kinetics
Iodine-129 in rabbit thyroids near a nuclear fuel reprocessing plant in Idaho, 8:21840 (J:GB)
Thyroid
Iodine-129 in rabbit thyroids near a nuclear fuel reprocessing plant in Idaho, 8:21840 (J:GB)
RADAPPERTIZATION
See RADIOSTERILIZATION
RADAR
Uses
Use of side looking airborne radar (SLAR) for oil pollution monitoring in norway, 8:19728 (R:FR)
RADIANT HEAT TRANSFER
Mathematical Models
Radiative transfer in spectrally-dissimilar absorbing-emitting-scattering adjacent mediums, 8:20867 (R:US)
RADIATION ACCIDENTS
Radiation Hazards
Health effects from internally deposited radionuclides released in nuclear disasters, 8:21984 (BA:US)
RADIATION BURDEN
See RADIATION DOSES
RADIATION CHEMISTRY
Bibliographies
Bibliographies on radiation chemistry. 7. Triplet-triplet absorption spectra: Pt. B (1976 - April, 1982), 8:21286 (J:GB)
Research Programs
University of Notre Dame Radiation Laboratory quarterly report, October 1, 1982-December 31, 1982, 8:21285 (R:US)
RADIATION DECONTAMINATION
See DECONTAMINATION
RADIATION DETECTION AND RANGE
See RADAR
RADIATION DETECTORS
See also CHERENKOV COUNTERS
DIELECTRIC TRACK DETECTORS
GEIGER-MUELLER COUNTERS
IONIZATION CHAMBERS
NEUTRON DETECTORS
POSITION SENSITIVE DETECTORS
PROPORTIONAL COUNTERS
RADIOMETERS
SCINTILLATION COUNTERS
SEMICONDUCTOR DETECTORS
Detectors for energies greater than 10 MeV, 8:22093 (R:US)

Accuracy
Accuracy of power peaking monitoring using fixed incore detector systems, 8:20379 (RA:US)
Coincidence Circuits
Triple majority coincidence with four inputs, 8:21576 (R:IT:IT)
Data Acquisition Systems
SPORT-SPEAR Mark III Electronics (Engineering Materials), 8:21618 (E:US)
Design
Superconducting toroidal particle detector for high-energy physics research, 8:21614 (J:US)
Performance
LAMAR: a high throughput x-ray astronomy facility for a moderate cost mission, 8:22115 (R:US)
Physical Radiation Effects
Effect of high energy neutrons on a microchannel plate detector, 8:21622 (J:US)
RADIATION DOSEMETERS
See DOSEMETERS
RADIATION DOSES
Calculation Methods
Off-site dose calculations, 8:21839 (RA:US)
Measuring Methods
Estimation of radiation doses to the lungs of early uranium processing plant workers, 8:21979 (J:US)
RADIATION DOSIMETRY
See DOSIMETRY
RADIATION EXPOSURE (DOSES)
See RADIATION DOSES
RADIATION HAZARDS
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Age Dependence
Modifications of the IRCP task group lung model to reflect age-dependence, 8:21982 (J:GB)
RADIATION HYGIENE
See RADIATION PROTECTION
RADIATION PROTECTION
Decision Making
Impact of the 1980 BEIR-III report on low-level radiation risk assessment, radiation protection guides, and public health policy, 8:20711 (RA:US)
Manuals
H-Coal Pilot Plant: radiation safety, 8:19428 (R:US)
Meetings
Proceedings of the Health Physics Society 1981 summer school on selected topics in Reactor Health Physics (Lead abstract), 8:20709 (R:US)
Research Programs
Radiation protection: progress report. 1981, 8:21967 (R:US)
RADIATION SAFETY
See RADIATION PROTECTION
RADIATION SOURCES
For cosmic sources of radiation see also COSMIC GAMMA SOURCES, COSMIC RADIO SOURCES, and COSMIC X-RAY SOURCES.
Dosimetry
Sources of pulsed radiation, 8:21513 (R:US)
RADIATION TRANSPORT
See also CHARGED-PARTICLE TRANSPORT
SCAP; point kernel single or albedo scatter (CDC7600,CYBER175; FORTRAN (99%) and COMPASS (1%)), 8:22515 (R:US)
Computer Calculations
Neutron and gamma radiation transport problems solved using TARNP and MORSE codes, 8:22544 (RA:US)
Planck Radiation Formula
Use of mean absorption coefficients in the presence of strong temperature gradients, 8:22535 (J:GB)
Reviews
Directions in the theory of resonance-radiation pressure, 8:22533 (J:GB)
Rosseland Approximation
Use of mean absorption coefficients in the presence of strong temperature gradients, 8:22535 (J:GB)
RADICALS
Not to be used for compound descriptions.
See also HYDROXYL RADICALS
METHYLENE RADICALS
PEROXY RADICALS
Electron Spin Resonance
EPR and NMR detection of transient radicals and reaction products (Radiolysis of methanol and aqueous potassium acetate), 8:21279 (R:US)
Radical ions and excited states in radiolysis. Optically detected time resolved EPR, 8:21280 (R:US)
Structure and dynamics of paramagnetic transients by pulsed EPR and NMR detection of nuclear resonance (Pulse radiolysis of methanol in D_2O), 8:21278 (R:US)
Fluorescence Spectroscopy
Measurement of radical species concentrations and polycyclic aromatic hydrocarbons in flames by fluorescence and absorption using a tunable dye laser. Progress report, March 1, 1982-February 28, 1983 (NH radicals), 8:21295 (R:US)
Nuclear Magnetic Resonance
EPR and NMR detection of transient radicals and reaction products (Radiolysis of methanol and aqueous potassium acetate), 8:21279 (R:US)
Structure and dynamics of paramagnetic transients by pulsed EPR and NMR detection of nuclear resonance (Pulse radiolysis of methanol in D_2O), 8:21278 (R:US)
Recombination
Radical ions and excited states in radiolysis. Optically detected time resolved EPR, 8:21280 (R:US)
RADIO GALAXIES
Galaxy Clusters
Galaxies, 8:22088 (R:US)
RADIOACTIVE AEROSOLS
Aerosol Monitoring
Characterization of nuclear fuel aerosol by sedimentation, 8:21810 (BA:DE)
Studying a hot particle with radiological methods, 8:21811 (BA:DE)
Bronchitis
Application of radioactive aerosols in diagnostic techniques of bronchial obstructions in the clinical practice, 8:21922 (BA:DE:In German)
Dose Rates
AERIN; radioactive aerosol dose calculations (IBM360,303x; FORTRAN IV), 8:21940 (R:US)
Filtration
Mica nuclear track filters, 8:21807 (BA:DE)
Inhalation
AERIN; radioactive aerosol dose calculations (IBM360,303x; FORTRAN IV), 8:21940 (R:US)
DACRIN; radiation organ dose from inhalation (UNIVAC1100; FORTRAN), 8:21941 (R:US)
Risks of radiation: induced lung cancer, 8:21985 (BA:US)
Monitoring
Emission and ambient concentrations of longliving aerosol radionuclides at stade nuclear power plant, 8:21808 (BA:DE)
Radiation Monitoring
Emergency response capabilities and example assessments for airborne radionuclide discharges, 8:21803 (R:US)
Radioactivity Transport
Aerosol Release and Transport Program. Quarterly progress report, July-September 1982 (PWR; BWR; LMFBR), 8:20719 (R:US)
Degraded-core accidents: review of aerosol behaviour in the containment of a PWR, 8:20651 (R:GB)
Simulation
Resuspension of cerium-IV-oxide powder aggregates and measurement of their mass distribution, 8:21812 (BA:DE:In German)
RADIOACTIVE BIOLOGICAL WASTES
See RADIOACTIVE WASTES
RADIOACTIVE CLOUDS
Decay
CLOUD; gamma-ray dose rate from a cloud (IBM360; FORTRAN IV), 8:21795 (R:US)
RADIOACTIVE EFFLUENTS
Diffusion
A collection of mathematical models for dispersion in surface water and groundwater, 8:21874 (R:US)

Atmospheric releases from standardized nuclear power plants: A wind tunnel study. Fluid modeling report No. 12, 8:20629 (R:US)
Meteorological considerations in the development of a real-time atmospheric dispersion model for reactor effluent exposure pathway, 8:21802 (R:US)
Environmental Exposure Pathway
Meteorological considerations in the development of a real-time atmospheric dispersion model for reactor effluent exposure pathway, 8:21802 (R:US)
Health Hazards
Summary of annual environmental reports for CY 1981: Department of Energy nuclear sites, 8:21831 (R:US)
Monitoring
ICPP effluent monitoring report, December 1982, 8:21871 (R:US)
Plumes
Plume diffusion modeling: annual report to the Nuclear Regulatory Commission, 8:20628 (R:US)
Radionuclide Migration
ARRRG;FOOD; aquatic & terrestrial radiation (UNIVAC1100; FORTRAN), 8:21943 (R:US)
Risk Assessment
Summary of annual environmental reports for CY 1981: Department of Energy nuclear sites, 8:21831 (R:US)

RADIOACTIVE GASEOUS WASTES
See GASEOUS WASTES
RADIOACTIVE WASTES

RADIOACTIVE MATERIALS
See also FISSION PRODUCTS
RADIOACTIVE WASTES
Emergency Plans
Agency procedures for the NRC incident response plan. Final report, 8:20703 (R:US)
Packaging Rules
Directory of Certificates of Compliance for Radioactive-Materials Packages. Summary report of NRC approved packages, 8:19808 (R:US)
Directory of Certificates of Compliance for Radioactive-Materials Packages. Summary report of NRC approved quality assurance programs for radioactive material packages, 8:19810 (R:US)
Directory of Certificates of Compliance for Radioactive-Materials Packages. Certificates of Compliance, 8:19809 (R:US)

RADIOACTIVE PARTICULATES
See RADIOACTIVE AEROSOLS

RADIOACTIVE WASTE DISPOSAL
Alluvial Deposits
Nuclear-waste isolation in the unsaturated zone of arid regions, 8:19853 (R:US)
Alpha-Bearing Wastes
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Backfilling
Nuclear waste package program for high-level isolation in Nevada tuff, 8:19872 (J:US)
Bibliographies
Waste isolation: a bibliography (1024 citations), 8:19828 (R:US)
Containers
Concept of a canister for high-level radioactive waste, 8:19877 (J:US)
Cost
Projected costs for mined geologic repositories for dispoal of commercial nuclear wastes, 8:19857 (R:US)
Economic Impact
Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
Engineered Safety Systems
Development of structural barriers for containment of nuclear waste in basalt, 8:19870 (J:US)
Environmental Impacts
Hydrologic analyses of two brine encounters in the vicinity of the Waste Isolation Pilot Plant (WIPP) Site, 8:22028 (R:US)
Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
User's guide for 10 CFR 61 impact analysis codes, 8:19882 (R:US)
Feasibility Studies
Geologic systems as analogs for long-term radioactive waste isolation: intrusive-rock/country-rock contact zones, 8:19834 (RA:US)
Geologic Deposits
Approach to resolution of geologic uncertainty in the licensing of a high-level-waste repository in tuff, 8:19868 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, April 1, 1982-June 30, 1982, 8:19864 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, July 1, 1982-September 30, 1982, 8:19865 (R:US)
Commercial high-level-waste management: options and economics. A comparative analysis of the ceramic and glass waste forms, 8:19822 (R:US)
Development of structural barriers for containment of nuclear waste in basalt, 8:19870 (J:US)
Nuclear waste package program for high-level isolation in Nevada tuff, 8:19872 (J:US)
Projected costs for mined geologic repositories for dispoal of commercial nuclear wastes, 8:19857 (R:US)
Selected hydrologic and geochemical issues in site characterization for nuclear waste disposal: flood basalts at the Hanford Reservation, 8:19854 (R:US)
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Waste isolation: a bibliography (1024 citations), 8:19828 (R:US)
High-Level Radioactive Wastes
Basalt Waste Isolation Project drilling and testing. Quarterly report, April 1, 1982-June 30, 1982, 8:19864 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, July 1, 1982-September 30, 1982, 8:19865 (R:US)
Commercial high-level-waste management: options and economics. A comparative analysis of the ceramic and glass waste forms, 8:19822 (R:US)
Concept of a canister for high-level radioactive waste, 8:19877 (J:US)
Development of structural barriers for containment of nuclear waste in basalt, 8:19870 (J:US)
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Materials for high-level waste canister/overpacks in salt formations, 8:19871 (J:US)
Nuclear waste package program for high-level isolation in Nevada tuff, 8:19872 (J:US)
Projected costs for mined geologic repositories for dispoal of commercial nuclear wastes, 8:19857 (R:US)
Selected hydrologic and geochemical issues in site characterization for nuclear waste disposal: flood basalts at the Hanford Reservation, 8:19854 (R:US)
Synroc technology for immobilizing U.S. defense waste, 8:19874 (J:US)
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Intermediate-Level Radioactive Wastes
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Low-Level Radioactive Wastes
Geohydrological considerations in land disposal of LLW, 8:19819 (R:US)
Parameters for characterizing sites for disposal of low-level radioactive waste. Technical report, 8:19856 (R:US)
Process for locating shallow land-burial sites for low-level radioactive waste. National Low-Level Radioactive Waste Management program, 8:19826 (R:US)
Relevance of biotic pathways to the long-term regulation of nuclear waste disposal. Topical report on reference eastern humid low-level sites, 8:19884 (R:US)
Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
Studies of transport of waste radionuclides, through soil at the Maxey Flats, Kentucky, waste-burial site, 8:19885 (R:US)
User's guide for 10 CFR 61 impact analysis codes, 8:19882 (R:US)
Mill Tailings
Management of wastes from uranium mining and milling, 8:19869 (R:XA)

Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
Uranium Mill Tailings Remedial Action Program. Annual status report, 8:19827 (R:US)
Packaging
Materials for high-level waste canister/overpacks in salt formations, 8:19871 (J:US)
Nuclear waste package program for high-level isolation in Nevada tuff, 8:19872 (J:US)
Radionuclide Migration
Pathways for dose to man from buried solid waste, 8:19829 (R:US)
Research Programs
Earth Sciences Division annual report 1981 (Lead abstract), 8:22031 (R:US)
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Salt Deposits
Materials for high-level waste canister/overpacks in salt formations, 8:19871 (J:US)
Projected costs for mined geologic repositories for dispoal of commercial nuclear wastes, 8:19857 (R:US)
Results of hydrologic tests and water-chemistry analyses, wells H-6A, H-6B, and H-6C, at the proposed Waste Isolation Pilot Plant site, southeastern New Mexico. Water resources investigations (final), 8:19862 (R:US)
Technical progress report for the quarter, 1 April-30 June 1982, 8:19858 (R:US)
Waste isolation: a bibliography (1024 citations), 8:19828 (R:US)
Site Selection
Area environmental characterization report of the Dalhart and Palo Duro basins in the Texas Panhandle. Volume I. Dalhart Basin, 8:19859 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, April 1, 1982-June 30, 1982, 8:19864 (R:US)
Basalt Waste Isolation Project drilling and testing. Quarterly report, July 1, 1982-September 30, 1982, 8:19865 (R:US)
Process for locating shallow land-burial sites for low-level radioactive waste. National Low-Level Radioactive Waste Management program, 8:19826 (R:US)
Site Surveys
Area environmental characterization report of the Dalhart and Palo Duro basins in the Texas Panhandle. Volume II. Palo Duro basin, 8:19860 (R:US)
Parameters for characterizing sites for disposal of low-level radioactive waste. Technical report, 8:19856 (R:US)
Social Impact
Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
Solid Wastes
Dissolution of tailored ceramic nuclear waste forms, 8:19878 (J:US)
FFTF radioactive solid waste handling and transport, 8:19831 (R:US)
Synthetic Rocks
Synroc technology for immobilizing U.S. defense waste, 8:19874 (J:US)
Tuff
Nuclear-waste isolation in the unsaturated zone of arid regions, 8:19853 (R:US)
Underground Disposal
Geohydrological considerations in land disposal of LLW, 8:19819 (R:US)
Process for locating shallow land-burial sites for low-level radioactive waste. National Low-Level Radioactive Waste Management program, 8:19826 (R:US)
Radiological safety studies on ground disposal of radioactive wastes. Distribution and migration of radionuclides in the aerated zone, 8:19832 (R:JP:MIXED)
Relevance of biotic pathways to the long-term regulation of nuclear waste disposal. Topical report on reference eastern humid low-level sites, 8:19884 (R:US)
Scoping survey of perceived concerns, issues, and problems for near-surface disposal of FUSRAP waste, 8:19880 (R:US)
User's guide for 10 CFR 61 impact analysis codes, 8:19882 (R:US)
Waste-Rock Interactions
Sorptive diffusion in clay gels, 8:19844 (RA:US)

RADIOACTIVE WASTE FACILITIES
Capitalized Cost
Review comments on Environmental Analysis Cost Reduction Proposals (WIPP-DOE-136), July 1982, 8:19816 (R:US)
Cost
Projected costs for mined geologic repositories for dispoal of commercial nuclear wastes, 8:19857 (R:US)
Criticality
Fault tree methods in the criticality assessment of the transuranic waste treatment facility, 8:21362 (J:US)
Design
Process description and plant design for preparing ceramic high-level waste forms, 8:19821 (R:US)
Environmental Impacts
Review comments on Environmental Analysis Cost Reduction Proposals (WIPP-DOE-136), July 1982, 8:19816 (R:US)
High-Level Radioactive Wastes
Approach to resolution of geologic uncertainty in the licensing of a high-level-waste repository in tuff, 8:19868 (R:US)
Licensing
Approach to resolution of geologic uncertainty in the licensing of a high-level-waste repository in tuff, 8:19868 (R:US)
Operating Cost
Review comments on Environmental Analysis Cost Reduction Proposals (WIPP-DOE-136), July 1982, 8:19816 (R:US)

RADIOACTIVE WASTE MANAGEMENT
New directions in US waste management, 8:19873 (J:GB)
Cost Benefit Analysis
Two hypothetical problems in radioactive waste management: a comparison of cost/benefit analysis and decision analysis, 8:19861 (R:US)
Decision Making
Two hypothetical problems in radioactive waste management: a comparison of cost/benefit analysis and decision analysis, 8:19861 (R:US)
Meetings
Management of wastes from uranium mining and milling, 8:19869 (R:XA)
Mill Tailings
Management of wastes from uranium mining and milling, 8:19869 (R:XA)

RADIOACTIVE WASTE PROCESSING
See also SYNROC PROCESS
Chemical systems engineering progress report, January-December 1981, 8:19802 (R:US)
Alpha-Bearing Wastes
Actinide removal from waste solutions by ferrite treatment, 8:19863 (R:US)
Fault tree methods in the criticality assessment of the transuranic waste treatment facility, 8:21362 (J:US)
Americium
Actinide removal from waste solutions by ferrite treatment, 8:19863 (R:US)
Economics
Commercial high-level-waste management: options and economics. A comparative analysis of the ceramic and glass waste forms, 8:19822 (R:US)
Encapsulation
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Fuel Cycle
Chemistry of nuclear waste disposal, 8:19801 (RA:DE:In German)
High-Level Radioactive Wastes
Commercial high-level-waste management: options and economics. A comparative analysis of the ceramic and glass waste forms, 8:19822 (R:US)
Development of polyphase ceramics for the immobilization of high-level Defense nuclear waste, 8:19823 (R:US)
Formulation and processing of alumina based ceramic nuclear waste forms, 8:19825 (RA:US)
Improved polyphase ceramic form for high-level defense nuclear waste, 8:19824 (RA:US)

Incorporation of high-level nuclear waste in gel spheres, 8:19820 (R:US)
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Process description and plant design for preparing ceramic high-level waste forms, 8:19821 (R:US)
Synroc technology for immobilizing U.S. defense waste, 8:19874 (J:US)

Intermediate-Level Radioactive Wastes
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)

Low-Level Radioactive Wastes
Waste-Form Development Program. Annual progress report, October 1981-September 1982, 8:19818 (R:US)

Mill Tailings
Management of wastes from uranium mining and milling, 8:19869 (R:XA)

Plutonium
Actinide removal from waste solutions by ferrite treatment, 8:19863 (R:US)

Research Programs
Waste-Form Development Program. Annual progress report, October 1981-September 1982, 8:19818 (R:US)

Solidification
Commercial high-level-waste management: options and economics. A comparative analysis of the ceramic and glass waste forms, 8:19822 (R:US)
Development of polyphase ceramics for the immobilization of high-level Defense nuclear waste, 8:19823 (R:US)
Dissolution of tailored ceramic nuclear waste forms, 8:19878 (J:US)
Formulation and processing of alumina based ceramic nuclear waste forms, 8:19825 (RA:US)
Improved polyphase ceramic form for high-level defense nuclear waste, 8:19824 (RA:US)
Leach characterization of cement encapsulated wastes, 8:19876 (J:US)
Pelletized Waste Form Demonstration Program. Volume II. Description and performance, 8:19855 (R:US)
Process description and plant design for preparing ceramic high-level waste forms, 8:19821 (R:US)
Synroc technology for immobilizing U.S. defense waste, 8:19874 (J:US)
Waste-Form Development Program. Annual progress report, October 1981-September 1982, 8:19818 (R:US)

RADIOACTIVE WASTE STORAGE

Engineering Geology
Assessment and evaluation of engineering options at a low-level radioactive waste storage site, 8:19840 (RA:US)

Environmental Impacts
Methods for assessing environmental impacts of a FUSRAP property-cleanup/interim-storage remedial action, 8:19879 (R:US)

Materials
Grout formulations for nuclear waste isolation. Final report, 8:19817 (R:US)

Radionuclide Migration
Chemistry of nuclear waste substances in aqueous solutions, 8:19852 (RA:US)
GETOUT; radionuclide transport geologic media (UNIVAC1100; FORTRAN), 8:21870 (R:US)

Salt Caverns
Sensitivity study of the thermomechanical reaction of rock salt to radioactive waste storage, 8:19830 (R:DE:In German)

RADIOACTIVE WASTES
See also ALPHA-BEARING WASTES
CALCINED WASTES
HIGH-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS

Environmental Impacts
Radiological and environmental research 1980: ecology, 8:21993 (R:US)

Heat Transfer
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R:US)

Leaching
Chemistry of nuclear waste substances in aqueous solutions, 8:19852 (RA:US)

Surface Coating
Method of deposition of silicon carbide layers on substrates, 8:19875 (P:US)

Transport Regulations
Advance notification of shipments of nuclear waste and spent fuel: guidance, 8:19812 (R:US)

Underground Disposal
Basis for a tentative thermohydrologic criterion for emplacement density in a nuclear waste repository, 8:19838 (RA:US)
Coupled hydrologic-thermomechanical experiments for radioactive waste isolation, 8:19836 (RA:US)
Natural-convection experiments in a liquid-saturated porous medium bounded by vertical coaxial cylinders, 8:19867 (R:US)
Thermal impact of waste emplacement and surface cooling associated with geologic disposal of nuclear waste, 8:19837 (RA:US)

Water Chemistry
Chemistry of nuclear waste substances in aqueous solutions, 8:19852 (RA:US)

RADIOACTIVITY
For measured values of radioactivity and for unidentified radiation sources; not for experimental studies.
NRC TLD (thermoluminescent dosimeter) direct radiation monitoring network. Technical progress report Jul-Dec 81, 8:21806 (R:US)
NRC TLD direct radiation monitoring network: Progress report, October-December 1981. Technical report, 8:21838 (R:US)

Least Square Fit
EXPALS; least squares exponential decay curves (CDC7600,6600; FORTRAN IV), 8:21289 (R:US)
FRANTIC; least squares fit sum of exponentials (IBM370; FORTRAN IV), 8:21291 (R:US)

RADIOAPPLICATORS
See RADIATION SOURCES

RADIOBIOLOGICAL EFFECTS
See BIOLOGICAL RADIATION EFFECTS

RADIOBIOLOGY

Gamma Dosimetry
Calculation and interpretation of In-Situ measurements of initial radiations at Hiroshima and Nagasaki, 8:21935 (R:US)

Neutron Dosimetry
Calculation and interpretation of In-Situ measurements of initial radiations at Hiroshima and Nagasaki, 8:21935 (R:US)

RADIOCARBON DATING

RADIOPROTECTIVE SUBSTANCES
Side Effects
Adverse cardiovascular changes after application of radioprotective substances, and their influencing, 8:21964 (RA:CS:In Czech)
RADIOSTERILIZATION
Radiation Doses
Dosimetry for industrial radiation processing. Final report, 8:21966 (R:US)
RADIOSURGERY
See RADIOTHERAPY
RADIOTHERAPY
Positron Sources
Physical measurements with high-energy radioactive beams, 8:22525 (J:US)
Reviews
Clinical treatment of cancer: radiation therapy. Cancergram ct15, 8:21917 (R:US)
Side Effects
Clinical treatment of cancer: radiation therapy. Cancergram ct15, 8:21917 (R:US)
Temperature Distribution
Temperature rise during photoradiation therapy of malignant tumors, 8:21920 (J:US)
RADIUM
Carcinogenesis
Human-health effects of radium: an epidemiolgic perspective of research at Argonne National Laboratory, 8:21945 (R:US)
Radiation Hazards
Human-health effects of radium: an epidemiolgic perspective of research at Argonne National Laboratory, 8:21945 (R:US)
Sorption
Radionuclide sorption on basalt-interbed materials. Annual report FY 1981, 8:19887 (R:US)
RADIUM 224
Retention
Radium-224 retention, distribution, and dosimetry in beagles, 8:21977 (J:US)
Tissue Distribution
Radium-224 retention, distribution, and dosimetry in beagles, 8:21977 (J:US)
RADIUM 226
Radioecological Concentration
Variability of values of gross volume beta activity in natural waters containing ^{226}Ra and Usub(nat), 8:21873 (RA:CS)
Surface Waters
Variability of values of gross volume beta activity in natural waters containing ^{226}Ra and Usub(nat), 8:21873 (RA:CS)
RADIUM D
See LEAD 210
RADIUM F

RADON
Biological Effects
Potentially hazardous air contaminants in the home, 8:21990 (R:US)
Ecological Concentration
Comparison of five-minute radon-daughter measurements with long-term radon and radon-daughter concentrations, 8:21745 (R:US)
Quantitative Chemical Analysis
Comparison of five-minute radon-daughter measurements with long-term radon and radon-daughter concentrations, 8:21745 (R:US)
Radiation Monitoring
Potentially hazardous air contaminants in the home, 8:21990 (R:US)
RADON 211
Nuclear Reaction Yield
Method for the preparation of radon-211 (Patent), 8:21293 (P:US)
RADON 222
Drinking Water
Problems of assessing increased radon level in drinking water, 8:21872 (RA:CS:In Czech)
Removal
Engineering evaluation of radon daughter removal techniques. Open file report (final), 8:19893 (R:US)
RADON ISOTOPES
See also RADON 211
RADON 222
Delayed Radiation Effects
Development of various histological types of malignant lung tumour in relation to radiation exposure, 8:21961 (RA:CS:In Czech)
Intake
Long-term follow-up of chromosomal aberrations in relation to radon daughters intake in non-uranium ore miners, 8:21963 (RA:CS:In Czech)
RAMAN EFFECT
Research Programs
Nonlinear optics with broad-band lasers. Progress report, July 15, 1982-July 14, 1983, 8:21387 (R:US)
RANGELANDS
Soils
Carbon balance of world forests and their associated soils. Progress report, August 1, 1977-September 30, 1978, 8:21826 (R:US)
RANKINE CYCLE ENGINES
Feasibility Studies
Experimental Rankine cycle engine designed for heat recovery from exhaust gases of industrial plants, 8:21471 (R:XE)
RANKINE CYCLE POWER SYSTEMS
Design
Organic Rankine power conversion subsystem development for the small community solar thermal power system, 8:20059 (RA:US)

Performance Testing
Organic Rankine power conversion subsystem development for the small community solar thermal power system, 8:20059 (RA:US)
RAPID TRANSIT SYSTEMS
Computerized Simulation
Energy cost reduction study of the Washington Metropolitan Area Transit Authority metrorail system. volume 2: appendices. Final report, 8:20959 (R:US)
Energy Conservation
Energy cost reduction study of the Washington Metropolitan Area Transit Authority metrorail system. volume 1: final report, 8:20958 (R:US)
Energy cost reduction study of the Washington Metropolitan Area Transit Authority metrorail system. volume 2: appendices. Final report, 8:20959 (R:US)
Power Demand
Power and energy measurement on Morgantown People Mover system. Final report Jul 80-Nov 81, 8:20957 (R:US)
RARE GASES

LOSS OF COOLANT
LOSS OF FLOW
MELTDOWN
REACTOR CORE DISRUPTION
Report to Congress on abnormal occurrences, October-December 1981. Quarterly report, 8:20699 (R:US)
After-Heat Removal
Post accident debris cooling, 8:20730 (B:DE)
Computer Calculations
Calculational limitations in PWR system simulation, 8:20682 (R:US)
Emergency Plans
Agency procedures for the NRC incident response plan. Final report, 8:20703 (R:US)
CLEAR: a model for the calculation of evacuation-time estimates in Emergency Planning Zones, 8:20728 (R:US)
Environmental Impacts
Meteorological considerations in the development of a real-time atmospheric dispersion model for reactor effluent exposure pathway, 8:21802 (R:US)
Fission Product Release
RSAC; radiological safety analysis program (IBM360; FORTRAN IV and Assembly language), 8:20652 (R:US)
Volatile fission-product source term evaluation using the fastgrass comptuer code (PWR; BWR), 8:20681 (R:US)
Heat Transfer
HEXEREI2; HTGR thermal-hydraulic analysis (IBM360; FORTRAN IV (99%) and BAL (1%)), 8:20667 (R:US)
RETRAN-02: a program for transient thermal-hydraulic analysis of complex fluid-flow systems. Volume 4. Applications (PWR;BWR), 8:20689 (R:US)
Hydraulics
Calculational limitations in PWR system simulation, 8:20682 (R:US)
HEXEREI2; HTGR thermal-hydraulic analysis (IBM360; FORTRAN IV (99%) and BAL (1%)), 8:20667 (R:US)
RETRAN-02: a program for transient thermal-hydraulic analysis of complex fluid-flow systems. Volume 4. Applications (PWR;BWR), 8:20689 (R:US)
Hydrodynamics
PAD; one-dimensional coupled Sn neutronics & hydrodynamics (CDC7600,6600,6400; FORTRAN IV (RUN compiler)), 8:20671 (R:US)
Meetings
Proceedings of the Health Physics Society 1981 summer school on selected topics in Reactor Health Physics (Lead abstract), 8:20709 (R:US)
Radiation Hazards
Application of the lines-of-protection concept to the HTGR-SC/C, 8:20688 (R:US)
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Radiation Protection
Federal radiological assistance, 8:20732 (J:US)
Radioactive Aerosols
Aerosol Release and Transport Program. Quarterly progress report, July-September 1982 (PWR; BWR; LMFBR), 8:20719 (R:US)
Risk Assessment
Application of the lines-of-protection concept to the HTGR-SC/C, 8:20688 (R:US)
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Thermodynamics
PAD; one-dimensional coupled Sn neutronics & hydrodynamics (CDC7600,6600,6400; FORTRAN IV (RUN compiler)), 8:20671 (R:US)
Two-Phase Flow
Calculational limitations in PWR system simulation, 8:20682 (R:US)
Interphase transport in horizontal stratified cocurrent flow, 8:20713 (R:US)
REACTOR COMPONENTS

REACTOR COOLING SYSTEMS
REACTOR CORES
REACTOR EXPERIMENTAL FACILITIES
REACTOR INTERNALS
HTGR steam-cycle/cogeneration technology development plan for Nuclear Steam Supply System. Volume III. Technology development plan, 8:20482 (R:US)
Aging
Brief overview and comparison of thermal aging models used for power plant equipment qualification, 8:20588 (RA:US)
Case for non-material specific thermal aging, 8:20590 (RA:US)
Condition monitoring, 8:20579 (RA:US)

Considerations in the thermal aging analysis of safety-realted power equipment, 8:20591 (RA:US)
Equipment qualification maintenance, 8:20586 (RA:US)
Maintaining qualified life of equipment and parts in nuclear power plants, 8:20584 (RA:US)
Methodology for estimating remaining life of components using multifactor accelerated life tests, 8:20578 (RA:US)
Operation testing and maintenance approach to aging problems in mechanical components, 8:20581 (RA:US)
Proceedings of the workshop on nuclear-power-plant aging, 8:20574 (R:US)
State regulator views the aging of nuclear power plants, 8:20583 (RA:US)
Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)

Corrosion
Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)

Industrial Radiography
Portable linear accelerator development. Final report (PWR; BWR), 8:20328 (R:US)

In-Service Inspection
Operation testing and maintenance approach to aging problems in mechanical components, 8:20581 (RA:US)
Portable linear accelerator development. Final report (PWR; BWR), 8:20328 (R:US)

Quality Assurance
Equipment qualification maintenance, 8:20586 (RA:US)
Maintaining qualified life of equipment and parts in nuclear power plants, 8:20584 (RA:US)
State regulator views the aging of nuclear power plants, 8:20583 (RA:US)

Reactor Maintenance
Operation testing and maintenance approach to aging problems in mechanical components, 8:20581 (RA:US)

Repair
Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)

REACTOR CONTROL SYSTEMS
High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)

Display Devices
Predictor display concepts for use in nuclear-plant control, 8:20620 (R:US)

Mathematical Models
Utility of low-order linear nuclear-power-plant models in plant diagnostics and control, 8:20617 (R:US)

Vulnerability
Equipment fragility data base. Seismic Safety Margins Research Program, 8:20717 (R:US)

REACTOR CONTROL THEORY
See REACTOR KINETICS

REACTOR COOLING SYSTEMS

SECONDARY COOLANT CIRCUITS

Heat Transfer
Heat transfer system, 8:20596 (P:US)

REACTOR CORE DISRUPTION

Bubble Growth
A theoretical study on the growth of large sodium vapour bubbles in liquid sodium, 8:20692 (R:US)

Heat Transfer
Technical feasibility of transition phase tests in TREAT (LMFBR), 8:20678 (R:US)

Hydraulics
Technical feasibility of transition phase tests in TREAT (LMFBR), 8:20678 (R:US)

Reactivity Worths
Neutronic analysis of simulated LMFBR fuel slump experiments, 8:20706 (RA:US)

REACTOR CORES
Application of nodal methods to light water reactors, 8:20339 (RA:US)
Control-rod parametrical studies in the framework of the PRE-RACINE and RACINE programs (LMFBR), 8:20618 (RA:US)
Determination of the core power distribution in the Clinch River Breeder Reactor, 8:20437 (RA:US)
Interaction between core analysis methodology and nuclear design: some PWR examples, 8:20373 (RA:US)
Physics assessments of LMFBR integral parameters, 8:20430 (RA:US)
Validation of alternative methods and data for a benchmark fast reactor depletion calculation (LMFBR), 8:20436 (RA:US)

Burnup
FUMBLE; fast reactor fuel burnup & management (GE635; FORTRAN IV), 8:20410 (R:US)
PHENIX; 2-dimensional diffusion burnup refueling history (CDC6600; FORTRAN IV), 8:20408 (R:US)

Doppler Coefficient
Extrapolation of small sample Doppler reactivity measurements, 8:20434 (RA:US)

Fission Products
Extended-burnup calculations for operating-reactor reload reviews (PWR; BWR), 8:20347 (R:US)

Fuel Management
Development and validation of core physics methods for in-core fuel management, 8:20375 (RA:US)

Heat Flux
REPP; thermal-hydraulic water reactor design (UNIVAC1108; FORTRAN V), 8:20322 (R:US)

Heat Transfer
Advances in LWR thermal hydraulics, 8:20333 (RA:US)
Analysis of neutronic space-time effects in large LMFBR's with thermal-hydraulic feedback using FX2-TH nuclear reactor kinetics code and mode expansion of the neutron flux shape function, 8:20438 (RA:US)
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Current challenges in light water reactor physics, 8:20332 (RA:US)
Sodium-cooled fast reactor thermal-hydraulics, 8:20431 (RA:US)

Hydraulics
Advances in LWR thermal hydraulics, 8:20333 (RA:US)
Analysis of neutronic space-time effects in large LMFBR's with thermal-hydraulic feedback using FX2-TH nuclear reactor kinetics code and mode expansion of the neutron flux shape function, 8:20438 (RA:US)
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Current challenges in light water reactor physics, 8:20332 (RA:US)
Sodium-cooled fast reactor thermal-hydraulics, 8:20431 (RA:US)

Meetings
Proceedings of the topical meeting on advances in reactor physics and core thermal hydraulics, 8:20554 (R:US)

Neutron Flux
Analysis of neutronic space-time effects in large LMFBR's with thermal-hydraulic feedback using FX2-TH nuclear reactor kinetics code and mode expansion of the neutron flux shape function, 8:20438 (RA:US)

Reactivity Coefficients
Assessment of physical characteristics of heterogeneous configurations with variable fertile volume (LMFBR), 8:20435 (RA:US)

Reactivity Worths
Calculated and measured reactivities in the U9 critical assemblies, 8:20433 (RA:US)
Control-rod calculation methods and uncertainties for a power LMFBR design, 8:20619 (RA:US)
Intrinsic reactivity feedback characteristics for safety analysis of heterogeneous and homogeneous LMFBR core designs, 8:20420 (R:US)

Specifications
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)

Supports
Feasibility of monitoring the strength of HTGR core support graphite: Part III, 8:20403 (R:US)
Void Coefficient
Sodium-void reactivity in LMFBRs: a physics assessment, 8:20432 (RA:US)
REACTOR EXPERIMENTAL FACILITIES
Fuel Motion Detection
In-situ material-motion diagnostics and fuel radiography in experimental reactors, 8:20637 (R:US)
Hodoscopes
In-situ material-motion diagnostics and fuel radiography in experimental reactors, 8:20637 (R:US)

Level Indicators
Review of proposed instrumentation for measurement of inadequate core cooling in LWRs, 8:20377 (RA:US)
Research Programs
Instrumentation and Controls Division progress report, September 1, 1980-July 1, 1982, 8:21565 (R:US)
REACTOR INTERNALS
Physical Radiation Effects
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
REACTOR KINETICS
ADEP; 1-dimensional and 2-dimensional few-group space-time kinetics (CDC6400; FORTRAN IV), 8:20539 (R:US)
Analysis of neutronic space-time effects in large LMFBR's with thermal-hydraulic feedback using FX2-TH nuclear reactor kinetics code and mode expansion of the neutron flux shape function, 8:20438 (RA:US)
ANCON; space-independent reactor kinetics code (CDC6600;IBM360,303x; FORTRAN IV), 8:20535 (R:US)
Application of nodal methods to light water reactors, 8:20339 (RA:US)
BLOOST6; combined kinetics two-dimensional heat transfer (UNIVAC1108; FORTRAN IV and Assembly language), 8:20505 (R:US)
BWR core response to fluctuations in coolant flow and pressure, with implications on noise diagnosis and stability monitoring, 8:20336 (RA:US)
Control-rod calculation methods and uncertainties for a power LMFBR design, 8:20619 (RA:US)
Current challenges in light water reactor physics, 8:20332 (RA:US)
Determination of the core power distribution in the Clinch River Breeder Reactor, 8:20437 (RA:US)
Development and validation of core physics methods for in-core fuel management, 8:20375 (RA:US)
GAPER2D; 2-dimensional perturbation calculation from 2DF output (UNIVAC1108; FORTRAN V), 8:20532 (R:US)
Importance of momentum dynamics in BWR neutronic stability, 8:20335 (RA:US)
Interaction of neutronics and thermal-hydraulics in the evaluation of BWR stability, 8:20334 (RA:US)
Interaction between core analysis methodology and nuclear design: some PWR examples, 8:20373 (RA:US)
JOSHUA OPERATING SYSTEM; data storage, retrieval, and display (IBM360,370,303x; FORTRAN IV (60%) and Assembler language (40%)), 8:20537 (R:US)
Lattice homogenization theory for coarse mesh diffusion analysis, 8:20340 (RA:US)
Neutronic analysis of simulated LMFBR fuel slump experiments, 8:20706 (RA:US)
Neutronics analysis of BWR partial scrams with boron injection, 8:20337 (RA:US)
Physics assessments of LMFBR integral parameters, 8:20430 (RA:US)
QX1; quasistatic spatial reactor kinetics code (IBM360/75; FORTRAN IV), 8:20533 (R:US)
Recent BWR fuel management reactor physics advances, 8:20338 (RA:US)
Response matrix nodal methods for thermal and fast reactor applications, 8:20556 (RA:US)
Sodium-void reactivity in LMFBRs: a physics assessment, 8:20432 (RA:US)
Transport and reactor theory. Progress report, July 1-September 30, 1982, 8:22738 (R:US)
Uranium recycle in PWRs, 8:20376 (RA:US)
Validation of alternative methods and data for a benchmark fast reactor depletion calculation (LMFBR), 8:20436 (RA:US)
Validation studies of the ENDF/MC^2-2/SDX, 8:20439 (RA:US)
Computer Calculations
AIREK3; space-independent kinetics with feedback (IBM360; FORTRAN IV), 8:20492 (R:US)
AIROS2A; simulation of reactor dynamics (IBM360; FORTRAN IV (95%) and Assembly language (5%)), 8:20513 (R:US)
FORE2; fast reactor excursion calculations (GE635;IBM360; FORTRAN IV), 8:20496 (R:US)
GAPOTKIN; space-independent reactor kinetics (UNIVAC1108; FORTRAN IV), 8:20512 (R:US)
INVERSE KINETICS;r102; space-independent inverse kinetics calculations (IBM360; FORTRAN IV), 8:20495 (R:US)
R101; space-independent kinetics kex options (IBM360; FORTRAN IV), 8:20500 (R:US)
Cross Sections
ESP; Monte Carlo reactor analysis calculation (IBM360/75,91; FORTRAN IV and BAL), 8:20545 (R:US)
RESEND;ADLER; ENDF/B resonance cross section codes (CDC6600;PDP10; FORTRAN IV), 8:20529 (R:US)
Finite Element Method
Extensions of the nodal expansion method based on the application of finite element techniques, 8:20555 (RA:US)
Meetings
Proceedings of the topical meeting on advances in reactor physics and core thermal hydraulics, 8:20554 (R:US)
Neutron Flux
Nodal method for direct intra-node ditribution calculation, 8:20557 (RA:US)
One-Dimensional Calculations
JITER; fluctuation experiment analysis (CDC6600; FORTRAN IV), 8:20518 (R:US)
Perturbation Theory
Application of static and time-dependent generalized perturbation theory methods in LWR physics analyses, 8:20374 (RA:US)
Stability
GASA (GA Stability Analysis); stability analysis for reactor kinetic equations (UNIVAC1108; FORTRAN IV), 8:20504 (R:US)
Temperature Coefficient
BLAST; reactor kinetics temperature distribution study (IBM360; FORTRAN IV), 8:20516 (R:US)
REACTOR LATTICES
Neutron Transport
RAHAB Lattice Physics Modules; JOSHUA system lattice physics modules (IBM360; FORTRAN IV), 8:20551 (R:US)
Neutron Transport Theory
BRT1; thermal spectrum cross section calculations (UNIVAC1108; FORTRAN V), 8:20497 (R:US)
GAMTEC2; multigroup constant calculations for 0 to 10 MeV (UNIVAC1107;GE625;CDC6400; FORTRAN IV), 8:22431 (R:US)
LASER; spectrum calculations with burnup cylindrical lattice (IBM360,370; FORTRAN IV), 8:20499 (R:US)

- RAFFLE; first flight collision probabilities for multiple-cell geometries (IBM360,370/195; FORTRAN IV and BAL), 8:20517 (R:US)

- REACTOR LICENSING
  - Nuclear Regulatory Commission Issuances, January 1982, 8:20460 (R:US)
  - Nuclear Regulatory Commission Issuances, February 1982, 8:20461 (R:US)
  - Operating reactors licensing actions summary, 8:20456 (R:US)
  - Regulatory and technical reports: compilation for first quarter 1982, January-March, 8:20451 (R:US)
  - **Indexes**
    - Indexes to Nuclear Regulatory Commission Issuances, July-September 1981, 8:20459 (R:US)
    - Title list of documents made publicly available: documents from October through December 1978 for Dockets 50-334 through STN 50-597, 8:20453 (R:US)
  - **Risk Assessment**
    - Precaution against damage required in the light of existing scientific and technical knowledge, 8:20695 (RA:DE:In German)
- REACTOR MAINTENANCE
  - **Radiation Hazards**
    - Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
  - **Risk Assessment**
    - Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
- REACTOR MATERIALS
  - *To be assigned in conjunction with the specific descriptor for the material used in a reactor, provided this descriptor is not yet upposted to reactor materials.*
  - *See also NUCLEAR FUELS*
  - HTGR steam-cycle/cogeneration technology development plan for Nuclear Steam Supply System. Volume III. Technology development plan, 8:20482 (R:US)
  - **Aging**
    - Brief overview and comparison of thermal aging models used for power plant equipment qualification, 8:20588 (RA:US)
    - Comments on the prediction of service lives of polymeric materials by the Arrhenius methods, 8:20587 (RA:US)
    - Overview of synergistic aging effects, 8:20582 (RA:US)
  - **Compression Strength**
    - Feasibility of monitoring the strength of HTGR core support graphite: Part III, 8:20403 (R:US)
  - **Corrosion**
    - Alloy steel corrosion kinetics and oxide morphologies in acid chloride environments (PWR), 8:20360 (RA:US)
    - Characterization of model boiler specimens (PWR), 8:20366 (RA:US)
    - Corrosion of support materials (PWR), 8:20358 (RA:US)
    - Examinations of support plate samples from steam generators (PWR), 8:20362 (RA:US)
    - Measuring corrosion rates in crevices with a computer-controlled flow loop (PWR), 8:20361 (RA:US)
    - Modeling of salt concentrations in crevices (PWR), 8:20368 (RA:US)
    - Preliminary corrosion results on alternative support materials from two model steam generator tests (PWR), 8:20359 (RA:US)
    - Proceedings: support-structure corrosion in steam generators, 8:20356 (R:US)
    - Recent Westinghouse experience with tube support plate materials corrosion studies (PWR), 8:20357 (RA:US)
  - **Corrosion Denting**
    - Effect of oxygen and oxidizing ions on denting corrosion (PWR), 8:20367 (RA:US)
    - Impedance studies of the growth of porous magnetite films on carbon steel in high temperature aqueous systems (PWR), 8:20369 (RA:US)
  - **Electrical Insulation**
    - Effects of simultaneous exposures to heat and radiation on insulation life, 8:20592 (RA:US)

Aging
Effect of aging on the performance of safety-related equipment, 8:20575 (RA:US)
Electrical Equipment
EPRI-sponsored correlation of age-sensitivity and seismic qualification, 8:20589 (RA:US)
Equipment aging: an overview of status and research needs, 8:20577 (RA:US)
Impact of pre-conditioning on the qualification of safety-related equipment, 8:20585 (RA:US)
Electronic Equipment
EPRI-sponsored correlation of age-sensitivity and seismic qualification, 8:20589 (RA:US)
Performance
Effect of aging on the performance of safety-related equipment, 8:20575 (RA:US)
Reactor Shutdown
Nuclear reactor control column (Patent), 8:20621 (P:US)
System Failure Analysis
SAFE; fail-to-safe analysis of protective networks (UNIVAC1106,1100; FORTRAN IV, ASCII FORTRAN (FTN) compiler), 8:20670 (R:US)
REACTOR SAFETY
Regulatory and technical reports: compilation for first quarter 1982, January-March, 8:20451 (R:US)
Computer Graphics
PLOT-3D; 3-dimensional plots on IBM2280 or CalComp780 (IBM360/75 with an IBM2280 film recorder or a CalComp 780 plotter; FORTRAN IV), 8:20666 (R:US)
Reactor Cores
Design analysis of the upgraded TREAT reactor, 8:20679 (R:US)
Reactor Experimental Facilities
Design analysis of the upgraded TREAT reactor, 8:20679 (R:US)
Research Programs
Review and evaluation of the Nuclear Regulatory Commission Safety Research Program for Fiscal Years 1984 and 1985, 8:20705 (R:US)
Systems Analysis
ICARUS; redundant system unavailability model (IBM370,303x; FORTRAN IV), 8:20668 (R:US)
Test Facilities
Design analysis of the upgraded TREAT reactor, 8:20679 (R:US)
REACTOR SITING
See SITE SELECTION
REACTOR STABILITY
Interaction of neutronics and thermal-hydraulics in the evaluation of BWR stability, 8:20334 (RA:US)
REACTORS

RECTIFIERS
Design
Advanced power-conversion concepts for HVDC transmission systems, 8:20309 (R:US)
Research Programs
Advanced power-conversion concepts for HVDC transmission systems, 8:20309 (R:US)
Reviews
Advanced power-conversion concepts for HVDC transmission systems, 8:20309 (R:US)
RECTISOL PROCESS
Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
RECYCLE (FUEL)
See FUEL CYCLE
REDOX FUEL CELLS
Materials
Study to establish cost predictions for the production of Redox chemicals, 8:20888 (R:US)
REFLECTORS (NEUTRON)
See NEUTRON REFLECTORS
REFRACTORIES
Compatibility
Refractory/coal-slag compatibility studies: progress to date, 8:19420 (R:US)
Compression Strength
VPI-4.8 - investigation of carbon monoxide disintegration of refractories in coal gasifiers, 8:19429 (R:US)
Corrosion
Corrosion and thermal-shock studies on slagging-coal-gasifier refractories, 8:19422 (R:US)
Corrosion Resistance
VPI-4.8 - investigation of carbon monoxide disintegration of refractories in coal gasifiers, 8:19429 (R:US)
Erosion
Corrosion and thermal-shock studies on slagging-coal-gasifier refractories, 8:19422 (R:US)
Materials Recovery
Refractory properties of brick produced from beneficiated chrome-containing furnace linings. Report of investigations/1982, 8:20983 (R:US)
Mechanical Properties
Refractory properties of brick produced from beneficiated chrome-containing furnace linings. Report of investigations/1982, 8:20983 (R:US)

Thermal Shock
Corrosion and thermal-shock studies on slagging-coal-gasifier refractories, 8:19422 (R:US)
Thermodynamic Properties
NBS: materials measurements, 8:21036 (R:US)
REFRIGERANTS
Chemical Composition
Effect of impure refrigerants on evaporative chillers, 8:21333 (R:US)
Impurities
Effect of impure refrigerants on evaporative chillers, 8:21333 (R:US)
REFRIGERATORS
See also *HELIUM DILUTION REFRIGERATORS*
SOLAR REFRIGERATORS
THERMOELECTRIC REFRIGERATORS
Design
Development of cryorefrigerators. Final report, September 1980, 8:21331 (R:DE:In several languages)
Performance
Effect of impure refrigerants on evaporative chillers, 8:21333 (R:US)
REFUSE
See *SOLID WASTES*
REFUSE DERIVED FUELS
Transport
Investigation of engineering and design considerations in selecting conveyors for densified refuse-derived fuel (drdf) and drdf: coal mixtures. Final report Jun 80-Sep 81, 8:19954 (R:US)
REFUSE-FUELED POWER PLANTS
Cogeneration
Cogeneration energy-recovery facility feasibility study: environmental rport, 8:21000 (R:US)
Environmental Impacts
Cogeneration energy-recovery facility feasibility study: environmental rport, 8:21000 (R:US)
Feasibility Studies
Final technical report on the development of cogeneration options at DOE facilities, 8:20247 (R:US)
REGION IX

HOUSES
Cold Storage
Opportunities for improved residential cool-storage systems, 8:20896 (R:US)
Cooling
Aquifer thermal-energy-storage costs with a seasonal-chill source, 8:20739 (R:US)
Energy Analysis
Evaluation of existing programs for simulation of residential building energy use. Final report, 8:20930 (R:US)

Energy Conservation
Cross-subsidization and competition: a case study of gas and electric utility involvement in residential energy conservation. Final report, 8:20919 (R:US)
Evaluation of the physical condition of public housing stock. Volume I: final report. Final report, 8:20935 (R:US)
Evaluation of the physical condition of public housing stock. Volume 4: energy conservation, 8:20936 (R:US)
Retrofit energy conservation in residential buildings in southern California, 8:20908 (R:US)
Geothermal Space Heating
Geothermal heating, 8:20186 (R:XE)
Heat Pumps
Evaluation of the Vuilleumier heat pump for heating applications. Vtt research report, 8:20916 (R:US)
Heating Systems
Combustion modification controls for residential and commercial heating systems. Volume I: environmental assessment. Final task report Jun 78-Sep 79, 8:20921 (R:US)
Indoor Air Pollution
Potentially hazardous air contaminants in the home, 8:21990 (R:US)
Oil Furnaces
Combustion modification controls for residential and commercial heating systems. Volume II: oil-fired residential furnace field test. Final task report Jul 78-Jul 79, 8:20922 (R:US)
Solar Energy
(seminario usos de la energia solar en la vivienda) solar energy applications for dwellings. Seminar 17-19 nov 80, 8:19976 (R:US)
Statistical Data
Annual housing survey: 1979. United States and regions. part f: energy-related housing characteristics, 8:20934 (R:US)
Water Source Heat Pumps
Lakes as a heat source for residential heating: a survey of costs in comparison with different systems and ecological consequences, 8:20940 (TG:US)
Weatherization
Nontechnical summary of the final report 'optimal weatherization of low-income housing in the united states: a research demonstration project'. Final report Sep 77-Sep 81, 8:20923 (R:US)
Optimal weatherization of low-income housing in the U.S.: a research demonstration project. Building science series (final), 8:20929 (R:US)

RESIDENTIAL SECTOR
Energy Conservation
Economic assessment of residential retrofit electricity conservation measures: consumer and utility perspectives. Staff report, 8:20920 (R:US)
Residential Conservation Service Program: summary of the second annual reports submitted to the US Department of Energy by states and non-regulated utilities. Final report, 8:20913 (R:US)
Energy Consumption
Residential energy consumption survey: consumption and expenditures, April 1980-March 1981. Part 1. National data, 8:20860 (R:US)
Energy Expenses
Economic assessment of residential retrofit electricity conservation measures: consumer and utility perspectives. Staff report, 8:20920 (R:US)
Power Demand
Energy use and customer welfare effects of residential time-of-use rates. Final report, 8:20838 (R:US)
Sample design considerations and sample selection for the Vermont time-of-day electricity use survey, 8:20854 (BA:US)
Solar Collectors
1980 Active-Solar Installations Survey, 8:20863 (R:US)
Surveys
Sample design considerations and sample selection for the Vermont time-of-day electricity use survey, 8:20854 (BA:US)

RESIDUAL FUEL OIL
See RESIDUAL FUELS

RESIDUAL FUELS
Prices
Monthly petroleum-product price report (January 1981 through June 1982), 8:19696 (R:US)
Monthly petroleum product price report (January 1981-March 1982), 8:19694 (R:US)
Monthly petroleum product price report (January 1981-May 1982), 8:19695 (R:US)
Monthly petroleum product price report (January 1981-February 1982), 8:19693 (R:US)
Monthly petroleum product price report (January 1981-January 1982), 8:19692 (R:US)

RESIDUES
See also ASHES
Gasification
Demonstration and commercialization of the SRC-I technology, 8:19407 (RA:US)

RESIDUES (RADIOACTIVE)
See RADIOACTIVE WASTES

RESIDUUMS
See RESIDUAL FUELS

RESINS
Nontoxic polyimides. Final report, 8:21155 (R:US)

RESISTIVITY (ELECTRIC)
See ELECTRIC CONDUCTIVITY

RESONANCE CAVITIES
See CAVITY RESONATORS

RESONANCE INTEGRALS
PSEUDO; statistical resonance parameter calculations (UNIVAC1108;IBM360; FORTRAN IV), 8:22450 (R:US)

RESOURCE DEVELOPMENT
Mathematical Models
Outer Continental Shelf (OCS) Oil and Gas Supply Model. Volume 2. Data description, 8:19675 (R:US)
Outer Continental Shelf (OCS) Oil and Gas Supply Model. Model 1. Model summary and methodology description, 8:19674 (R:US)

RESPIRABLE DUSTS
See DUSTS

RESPIRATORS
Maintenance
Supplied-air respirator system for underground coal miners (instruction manual), 8:19664 (R:US)
Performance
Supplied-air respirator system for underground coal miners (instruction manual), 8:19664 (R:US)

RESPIRATORY EQUIPMENT
See RESPIRATORS

RESPIRATORY SYSTEM
See also LUNGS
Radiation Doses
DACRIN; radiation organ dose from inhalation (UNIVAC1100; FORTRAN), 8:21941 (R:US)

RESPIRATORY SYSTEM DISEASES
See also BRONCHITIS
Biological Models
Effects of age on lung function and structure of adult animals, 8:21929 (J:US)
Epidemiology
Lung cancer: diagnosis, treatment. Cancergram ct08, 8:21915 (R:US)
Etiology
Lung cancer: diagnosis, treatment. Cancergram ct08, 8:21915 (R:US)
Radiotherapy
Lung cancer: diagnosis, treatment. Cancergram ct08, 8:21915 (R:US)

RESTAURANTS
Solar Heating Systems
Solar preheating of both domestic hot water and space. Final technical report for the Sea Loft restaurant in Long Branch, New Jersey, 8:20087 (R:US)
Solar preheating of both domestic hot water and space. Final technical report for the Sea Loft restaurant in Long Branch, New Jersey (Engineering Materials), 8:20111 (E:US)

RETORTED SHALES
See SPENT SHALES
RETORTING
Gaseous Wastes
Physical and chemical characterization of fine particle in off-gases from coal combustion and oil shale retorting, 8:21707 (RA:US)
RF SYSTEMS
Engineering Drawings
PEP r-f low-level system (phase lock, gap voltage, and frequency control) (Engineering Materials), 8:21563 (E:US)
Health Hazards
Industrial hygiene walk-through survey report on RF radiation exposures from heat sealers at Hazel Incorporated, Washington, Missouri, 8:22025 (R:US)
Radio Noise
Low-noise wide-band amplifiers for stochastic beam cooling experiments, 8:21528 (R:US)
RHENIUM
Solvent Extraction
The solvent extraction behavior of rhenium. Part II. The hydrochloric acid-tributyl phosphate system, 8:21224 (J:US)
RHENIUM BORIDES
Ferromagnetism
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)
Magnetic Properties
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)
Neutron Diffraction
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)
RHO-765 RESONANCES
Photoproduction
High-energy photoproduction of rho and phi vector mesons, 8:22250 (R:US)
RHODIUM
Chemical Bonds
Electronic structure of clean and carbon-covered closed-packed rhodium and ruthenium surfaces, 8:21097 (J:US)
Electronic Structure
Electronic structure of clean and carbon-covered closed-packed rhodium and ruthenium surfaces, 8:21097 (J:US)
Work Functions
Electronic structure of clean and carbon-covered closed-packed rhodium and ruthenium surfaces, 8:21097 (J:US)
RHODIUM BORIDES
Free Enthalpy
Magnetic free energy of $ErRh_4B_4$ in paramagnetic and superconducting states, 8:21131 (J:US)
Magnetization
Magnetic free energy of $ErRh_4B_4$ in paramagnetic and superconducting states, 8:21131 (J:US)
Superconductivity
Magnetic free energy of $ErRh_4B_4$ in paramagnetic and superconducting states, 8:21131 (J:US)
RHODIUM COMPLEXES
Electron Transfer
Properties and electron transfer reactivity of coordination compounds for the photochemical splitting of water, 8:19912 (R:XE)
RIBONUCLEIC ACID
See RNA
RICHLAND FFTF REACTOR
See FFTF REACTOR
RIEMANN WAVES
See SHOCK WAVES
RING LASERS
Shutters
Methods for an alternating beam ring laser. Master's thesis, 8:21373 (R:US)
RINGS (STORAGE)
See STORAGE RINGS
RISER CRACKING
See COAL LIQUEFACTION
RISK ASSESSMENT
Guidelines for nuclear-power-plant safety-issue-prioritization information development, 8:20718 (R:US)
Legal Aspects
Legal opinion in risk assessment of nuclear power plants, 8:20696 (RA:DE:In German)
Technical risks and law, 8:22894 (R:DE:In German)
Technical risks and Constitutional Law, 8:22895 (RA:DE:In German)
RITAC DOSEMETERS
Passive solid-state dosemeters based on Radiation Induced Thermally Activated Current.
Design
Ionizing radiation dose monitor using silicon-on-sapphire transistor (Patent application), 8:21611 (P:US)
RIVETS
See FASTENERS
RNA
Methylation
Final progress report on carcinogenic agents, 8:21995 (R:US)
Transferases
Final progress report on carcinogenic agents, 8:21995 (R:US)
RNA POLYMERASE
See RNA
ROADS
Binders
Highway binder materials from cellulosic and related wastes. Final report, 8:20982 (R:US)
Waste Product Utilization
Highway binder materials from cellulosic and related wastes. Final report, 8:20982 (R:US)
Waste products in Missouri with potential highway application. Missouri cooperative highway research program (final), 8:21007 (R:US)
ROADWAY-POWERED ELECTRIC VEHICLES
Environmental Impacts
Comments on "Technology for the renewal of transportation infrastructure", 8:21030 (R:US)
Technology Assessment
Comments on "Technology for the renewal of transportation infrastructure", 8:21030 (R:US)

Control
Phase control and beam steering of semiconductor laser arrays, 8:21391 (R:US)
Design
Studies of single-mode injection lasers and of quaternary materials. Volume 1: Single-mode constricted double-heterojunction AlGaAs diode lasers. Final report, 4 Feb. 1980 - 15 May 1981, 8:21395 (R:US)
Electron Beam Injection
Electronic beam steering of semiconductor injection lasers, 8:21390 (R:US)
Electro-Optical Effects
Studies of single-mode injection lasers and of quaternary materials. Volume 2: Measurement of electro-optic effects in InGaAsP junction waveguides. Final report, 4 Feb. 1980 - 15 May 1981, 8:21396 (R:US)
Fabrication
Laser diode. Final report, May 1980, 8:21385 (R:DE:In several languages)
Performance
Studies of single-mode injection lasers and of quaternary materials. Volume 1: Single-mode constricted double-heterojunction AlGaAs diode lasers. Final report, 4 Feb. 1980 - 15 May 1981, 8:21395 (R:US)
Performance Testing
Laser diode. Final report, May 1980, 8:21385 (R:DE:In several languages)

SEMICONDUCTOR MATERIALS
If possible index also the specific compounds.
Annealing
Melt depth and regrowth kinetics in pulsed laser annealing of silicon and gallium arsenide, 8:21167 (R:US)
Melting phenomena and laser annealing in semiconductors, 8:21135 (J:GB)
Melting
Melting phenomena and laser annealing in semiconductors, 8:21135 (J:GB)
Refractivity
Dispersion of the refractive index near the absorption edge in compound semiconductors, 8:21161 (R:US)
Infrared-absorption spectrum of free carriers in polar semiconductors. Progress report, July 1, 1982-June 30, 1983, 8:21160 (R:US)
Superlattices
Electronic properties of superlattices, 8:21166 (R:US)
Surface Properties
Surface chemical information from electron- and photon-stimulated desorption, 8:21273 (R:US)

SEMICONDUCTOR RESISTORS
Electrical Properties
High-voltage-gradient zinc oxide varistors: fabrication and properties, 8:20310 (R:US)
Fabrication
High-voltage-gradient zinc oxide varistors: fabrication and properties, 8:20310 (R:US)

SENIOR CENTERS
See PUBLIC BUILDINGS

SENSIBLE HEAT STORAGE
Cost
Seasonal thermal storage: Swedish practice, developments and cost projections, 8:20738 (R:US)
Feasibility Studies
Seasonal thermal storage: Swedish practice, developments and cost projections, 8:20738 (R:US)
Thermal Energy Storage Equipment
Development of natural stratification technology, 8:20736 (R:US)

SEPARATION PROCESSES
See also CHEMISORPTION
CHROMATOGRAPHY
CNG PROCESS
HEAVY MEDIA SEPARATION
ISOTOPE SEPARATION
Membranes
Membrane separation technology in the 1980's. ECUT: Energy Conversion and Utilization Technology Program. Biocatalysis research activity. Final report, 8:20971 (R:US)
Simulation
Physical-property estimation for coal liquids, 8:19544 (R:US)

SERPUKHOV SYNCHROTRON
Storage Rings
IHEP accelerating-storage facility (present status), 8:21557 (RA:SU:In Russian)
Vacuum Systems
Measuring the ion-stimulated desorption coefficient on a model of the vacuum chamber of the accelerating-storage complex at the temperature of 300 and 77 K, 8:21505 (RA:SU:In Russian)

SERVICE STATIONS
See GASOLINE SERVICE STATIONS

SEWAGE SLUDGE
Additives
Anaerobic sludge digestion with a biocatalytic additive, 8:20998 (R:US)
Anaerobic Digestion
Anaerobic sludge digestion with a biocatalytic additive, 8:20998 (R:US)
Waste Product Utilization
Effects of digested sewage sludge on the heavy metal concentrations in various vegetable species, 8:21992 (RA:DE:In German)

SEYFERT GALAXIES
Galaxy Clusters
Galaxies, 8:22088 (R:US)

SHALE MINING
See OIL SHALE MINING

SHALE OIL
Combustion Products
Nature of stack emissions from the experimental-scale combustion of crude oil, 8:21711 (R:US)
Fuel Substitution
Compendium of synfuel end use testing programs. Final report mar-sep 81, 8:19784 (R:US)
Land Leasing
The effects of lease size on yields from oil shale surface mines, 8:19780 (R:US)
Recovery
The effects of lease size on yields from oil shale surface mines, 8:19780 (R:US)
Vapor Pressure
Vapor pressure of shale oil and prediction of condenser performance, 8:19785 (R:US)

SHAPED CHARGES
Prior to August 1979 CHEMICAL EXPLOSIVES and SHAPE were used.
Detonations
Computer simulation of concrete penetration by shaped-charge jets, 8:21656 (R:US)

SHEARER LOADERS
Automation
Automation of the longwall mining system, 8:19608 (R:US)

SHEATHS (FUEL)
See FUEL CANS

SHELL MODELS
Nuclear shell models only; for electron shell models use ELECTRONIC STRUCTURE.
Moments Method
Moment methods and Lanczos methods, 8:22412 (BA:US)
Realistic Hamiltonians for no-core moment method studies, 8:22415 (BA:US)

SHELL-KOPPERS GASIFICATION PROCESS
Commercialization
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)
Comparative Evaluations
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Fuel Feeding Systems
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Pilot Plants
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)
Thermal Efficiency
Development of the Shell-Koppers coal gasification process, 8:19410 (RA:US)

SHELLS
Structural forms; for electron shells in atoms use ELECTRONIC STRUCTURE.
Deformation
Application of the procedure of dynamic relaxation for the calculation of an elastically embedded spherical shell, 8:21347 (R:DE:In German)
Stress Analysis
SAFE-SHELL; stress analysis of thin shells (UNIVAC1108;CDC CYBER73;CDC7600; FORTRAN IV), 8:21309 (R:US)
SEALSHELL2;M0110; shell stress analysis for axisymmetric loading (CDC6600,7600;IBM360; FORTRAN IV), 8:21310 (R:US)
SHELL5; thin shell 3-dimensional structural analysis (UNIVAC1108; FORTRAN V), 8:21435 (R:US)
SOR3; stress analysis of shells of revolution (CDC6600; FORTRAN IV), 8:21306 (R:US)
Stresses
GAPL3; inelastic large deflection stress study (CDC6600; FORTRAN IV and Assembly language), 8:21322 (R:US)
SABOR4; discrete-element analysis of thin shells (IBM360; FORTRAN IV), 8:21323 (R:US)

SHELTERS
See also ANIMAL SHELTERS
Blast Effects
State-of-the-art assessment: shelter habitability. Final report Oct 81-Sep 82, 8:22896 (R:US)
Technology Assessment
State-of-the-art assessment: shelter habitability. Final report Oct 81-Sep 82, 8:22896 (R:US)

SHIELDING
See also MAGNETIC SHIELDING
MUSCAT; view factor shielding code cavity geometry (UNIVAC1108; FORTRAN IV), 8:22438 (R:US)
Design
INTOR radiation shielding for personnel access, 8:22692 (R:US)
SPAN4; a point-kernel shield evaluation code (CDC6600; FORTRAN IV and ASCENT), 8:22499 (R:US)
Gamma Transport Theory
ASPIS; gamma-ray source buildup factor calculations (CDC6600; FORTRAN IV and ASCENT), 8:22490 (R:US)
Materials Testing
First-wall and blanket engineering development for magnetic-fusion reactors, 8:22697 (R:US)
Mathematical Models
Determination of transverse shielding for proton accelerators using the Moyer Model, 8:21530 (J:GB)
Radiation Transport
SCAP; point kernel single or albedo scatter (CDC7600,CYBER175; FORTRAN (99%) and COMPASS (1%)), 8:22515 (R:US)
Research Programs
Initial progress in the first wall, blanket, and shield Engineering Test Program for magnetically confined fusion-power reactors, 8:22696 (R:US)

SHIELDING MATERIALS
Buildup
Gamma-ray dose at shield-tissue interfaces and buildup factor implications, 8:22528 (J:US)

SHIFT PROCESSES
Catalysts
Coal gasification support studies, 8:19454 (RA:US)
Chemical Reaction Kinetics
Untangling the water gas shift from Fischer-Tropsch: a Gordian knot (185 references), 8:21251 (R:US)

SHIPS
Nuclear Weapons
Physical security modeling for the shipboard nuclear weapons security program, 8:21663 (R:US)
Propulsion Systems
Estimated maintenance and repair requirements for coal-fired propulsion systems. Final report, 8:21014 (R:US)

SHOCK WAVES
See also DETONATION WAVES
Attenuation
H-Division quarterly report, July-September 1982, 8:22564 (R:US)
Interferometers
ORVIS: optically recording velocity interferometer system. Theory of operation and data-reduction techniques, 8:21630 (R:US)
Reflection
Oblique interactions of detonation waves with explosive/metal interfaces, 8:21650 (R:US)

SHORT ROTATION CULTIVATION
Economic Analysis
Economic analysis method for short-rotation forestry, 8:19985 (R:US)
Economic analysis of short-rotation forestry, 8:19984 (R:US)
Research Programs
Short-rotation woody crops as a source of energy, 8:19983 (R:US)

SI SEMICONDUCTOR DETECTORS
- **Performance Testing**
  - Beta-particle measurement and dosimetry at NRC-licensed facilities, 8:21587 (R:US)

SIALON
- *See ALUMINIUM OXIDES*
- *SILICON NITRIDES*

SIGMA PARTICLES
- **Electromagnetic Particle Decay**
  - Experimental study of the electromagnetic decays of the Λ and Σ excited states, 8:22261 (RA:US)
- **Hypernuclei**
  - Recent experimental results on Σ-hypernuclei, 8:22299 (RA:US)

SIGNALS
- **Analog-to-Digital Converters**
  - Fast transient digitizer (Patent), 8:21448 (P:US)

SILANES
- **Amorphous State**
  - Transient photoconductivity studies of the light soaked state of hydrogenated amorphous silicon, 8:21170 (J:US)
- **Auger Effect**
  - Auger line-shape analysis of the structure of hydrogenated amorphous silicon, 8:21181 (J:US)
- **Electronic Structure**
  - Auger line-shape analysis of the structure of hydrogenated amorphous silicon, 8:21181 (J:US)
- **Photoconductivity**
  - Transient photoconductivity studies of the light soaked state of hydrogenated amorphous silicon, 8:21170 (J:US)

SILICA
- **Energy Beam Deposition Films**
  - Ion beam sputter deposited diamond like films, 8:21163 (R:US)
- **Phase Diagrams**
  - Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)
- **Radiation Effects**
  - X-ray-induced transient attenuation at low temperatures in polymer clad silica (PCS) fibers, 8:21185 (BA:US)
- **Sorptive Properties**
  - Reaction calorimetry for coal chemistry and catalysis. Quarterly report, November 1, 1982-January 20, 1983, 8:19563 (R:US)
  - Review of in-bed hydrocarbon, alkali, and trace metals control in coal-conversion processes, 8:19434 (R:US)

SILICA GEL
- **Sorptive Properties**
  - Reaction calorimetry for coal chemistry and catalysis. Quarterly report, November 1, 1982-January 20, 1983, 8:19563 (R:US)

SILICATE MINERALS
- *See also CLINOPTILOLITE*
- *SMECTITE*
- **Chemical Composition**
  - Thermodynamic properties of silicate materials, 8:20198 (RA:US)
- **Phase Transformations**
  - Selected hydrologic and geochemical issues in site characterization for nuclear waste disposal: flood basalts at the Hanford Reservation, 8:19854 (R:US)
- **Radionuclide Migration**
  - Investigation of silicate surface chemistry and reaction mechanisms associated with mass transport in geologic media, 8:19845 (RA:US)
- **Thermodynamic Properties**
  - Thermodynamic properties of silicate materials, 8:20198 (RA:US)

SILICON
- **Annealing**
  - Flame annealing of arsenic and boron implanted silicon, 8:21173 (J:US)
  - Larson et al. respond:, 8:21177 (J:US)
  - Melt dynamics of silicon-on-sapphire during pulsed laser annealing, 8:21172 (J:US)
- **Carrier Lifetime**
  - A method of increasing minority carrier lifetime in silicon web or the like, 8:21164 (R:US)
- **Casting**
  - Semicrystalline casting process development and verification. Quarterly progress report number 8, March 19, 1982-June 19, 1982, 8:19988 (R:US)
  - Silicon-ingot casting: heat-exchanger method (HEM); multi-wire slicing: fixed-abrasive slicing technique (FAST). Phase III and Phase IV. Silicon sheet-growth development for the large-area sheet task of the Low-Cost Solar-Array Project. Final report, December 15, 1978-June 30, 1981, 8:19993 (R:US)
- **Chemical Preparation**
  - Investigation of the hydrochlorination of $SiCl_4$. Quarterly report, October 9, 1982-January 8, 1983. Flat-Plate Solar-Array Project, Advanced-Materials Research Task, 8:19995 (R:US)
- **Chlorination**
  - Investigation of the hydrochlorination of $SiCl_4$. Quarterly report, October 9, 1982-January 8, 1983. Flat-Plate Solar-Array Project, Advanced-Materials Research Task, 8:19995 (R:US)
- **Crystal Growth**
  - Stress studies in EFG. First quarterly progress report, July 9, 1982-September 30, 1982, 8:19996 (R:US)
- **Crystal Structure**
  - Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
- **Crystal-Phase Transformations**
  - Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
- **Cutting**
  - Silicon-ingot casting: heat-exchanger method (HEM); multi-wire slicing: fixed-abrasive slicing technique (FAST). Phase III and Phase IV. Silicon sheet-growth development for the large-area sheet task of the Low-Cost Solar-Array Project. Final report, December 15, 1978-June 30, 1981, 8:19993 (R:US)
- **Grain Boundaries**
  - Structure of (110) tilt boundaries in large-area solar silicon. Annual report, August 31, 1981-September 1982, 8:19994 (R:US)
- **Hydrogenation**
  - Investigation of the hydrochlorination of $SiCl_4$. Quarterly report, October 9, 1982-January 8, 1983. Flat-Plate Solar-Array Project, Advanced-Materials Research Task, 8:19995 (R:US)
- **Ion Implantation**
  - Damage and in-situ annealing during ion implantation, 8:21075 (R:US)
  - Flame annealing of arsenic and boron implanted silicon, 8:21173 (J:US)
- **Laser-Radiation Heating**
  - Melt depth and regrowth kinetics in pulsed laser annealing of silicon and gallium arsenide, 8:21167 (R:US)
- **Oxidation**
  - Study of the formation of surface films: critical conditions for growth. Progress report, June 1, 1982-May 31, 1983, 8:21159 (R:US)
- **Stability**
  - Theory of static structural properties, crystal stability, and phase transformations: Application to Si and Ge, 8:21099 (J:US)
- **Stress Analysis**
  - Stress studies in EFG. First quarterly progress report, July 9, 1982-September 30, 1982, 8:19996 (R:US)
  - Stress studies in EFG. Second quarterly progress report, October 1, 1982-December 31, 1982, 8:19997 (R:US)
- **Surface Coating**
  - Study of the formation of surface films: critical conditions for growth. Progress report, June 1, 1982-May 31, 1983, 8:21159 (R:US)

SILICON 28 REACTIONS
- **Compound-Nucleus Reactions**
  - High-spin resonances in heavy-ion collisions, 8:22356 (R:US)

Elastic Scattering
High-spin resonances in heavy-ion collisions, 8:22356 (R:US)
Inelastic Scattering
High-angular-momentum resonances in ^{28}Si + ^{28}Si scattering, 8:22357 (R:US)
High-spin resonances in heavy-ion collisions, 8:22356 (R:US)
SILICON 28 TARGET
Silicon 28 Reactions
High-angular-momentum resonances in ^{28}Si + ^{28}Si scattering, 8:22357 (R:US)
High-spin resonances in heavy-ion collisions, 8:22356 (R:US)
SILICON 29 TARGET
Oxygen 18 Reactions
Isomer ratio measurements for the reaction ^{29}Si(^{18}O, p2n)sup(44m,44g)Sc, 8:22361 (J:NL)
SILICON ALLOYS
Physical Radiation Effects
Mechanism and kinetics of radiation-induced segregation in Ni-Si alloys, 8:21048 (R:US)
SILICON CARBIDES
Chemical Vapor Deposition
Method of deposition of silicon carbide layers on substrates, 8:19875 (P:US)
Workshop on first wall coating, 8:22737 (R:JP)
Erosion
Erosion of hard-metal coatings, 8:21126 (R:US)
Fracture Properties
Fracture strength of sintered and siliconized SiC and SiC joints, 8:22760 (J:US)
Microstructure
Fracture strength of sintered and siliconized SiC and SiC joints, 8:22760 (J:US)
Plasma Arc Spraying
Workshop on first wall coating, 8:22737 (R:JP)
Synthesis
rf plasma synthesis of ultrafine, ultrapure silicon carbide powder, 8:21125 (R:US)
SILICON CHLORIDES
Chemical Reactions
Flat-plate solar array project. Task 1: silicon material: investigation of the hydrochlorination of $SiCl_4$, 8:20008 (R:US)
Hydrogenation
Investigation of the hydrochlorination of $SiCl_4$. Quarterly report, October 9, 1982-January 8, 1983. Flat-Plate Solar-Array Project, Advanced-Materials Research Task, 8:19995 (R:US)
SILICON COMPOUNDS

SODIUM HYDROXIDES
Solvent Properties
Improved procedure for extraction of aromatic bases from synfuel materials, 8:21196 (R:US)
SODIUM LAURYL SULFATES
See SODIUM COMPOUNDS
SODIUM MINERALS
See MINERALS
SODIUM PHOSPHATES
Ionic Conductivity
NASIGLAS electrolyte for sodium/sulphur cells, 8:20745 (R:US)
SODIUM SULFATES
Latent Heat Storage
Layout of a latent heat storage system with finned tubes, 8:20737 (R:DE:In German)
SODIUM-SULFUR BATTERIES
Solid Electrolytes
NASIGLAS electrolyte for sodium/sulphur cells, 8:20745 (R:US)
SODIUM-WATER REACTIONS
See MOLTEN METAL-WATER REACTIONS
SOILS
Carbon
Carbon balance of world forests and their associated soils. Progress report, August 1, 1977-September 30, 1978, 8:21826 (R:US)
Chemical Effluents
Field measurements of N_2O emission rates from fertilized and non-fertilized soils, 8:21723 (RA:DE:In German)
Classification
Sensitivity of soil regions to acid precipitation, 8:21829 (R:US)
Leaching
Simulation of nutrient loss from soils due to rainfall acidity, 8:21773 (R:US)
Liquefaction
Probabilistic analysis for liquefaction, 8:22053 (R:US)
Nitrous Oxide
Release of N_2O from cultivated soils, 8:21735 (RA:DE:In German)
Radiation Monitoring
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the National Guard Armory at Washington Park, 52nd Street and Cottage Grove Avenue, Chicago, Illinois, September 19, 1977-October 11, 1978, 8:19890 (R:US)
Radionuclide Migration
Environmental surveillance of the Palos Park Forest Preserve, 8:19889 (R:US)
Influences of pH, temperature, and moisture on gaseous tritium uptake in surface soils, 8:21841 (J:US)
Studies of transport of waste radionuclides, through soil at the Maxey Flats, Kentucky, waste-burial site, 8:19885 (R:US)
Sensitivity
Sensitivity of soil regions to acid precipitation, 8:21829 (R:US)
SOLAR ABSORBERS
Spectrally Selective Surfaces
Interaction of electromagnetic radiation and micro-structured matter with respect to the generation of spectral selective solar absorbers, 8:20130 (R:DE:GE)
SOLAR ACCESS
Prior to September 1980 this concept was indexed to SOLAR RIGHTS.
Regulations
Handbook on solar energy and energy conservation for Arizona local governments, 8:21008 (R:US)
SOLAR ACTIVITY
See also SOLAR FLARES
SOLAR PROMINENCES
SOLAR RADIO BURSTS
SOLAR WIND
SOLAR X-RAY BURSTS
SUNSPOTS
Harmonics
Structure of the solar oscillation with period near 160 minutes, 8:22138 (R:US)
Magnetic Fields
Annotated atlas of h-alpha synoptic charts, 8:22072 (R:US)
Meetings
Forum on solar activity, 8:22167 (B:FR:In several languages)
Plages
Evolutionary charts of solar activity (calcium plages) as functions of heliographic longitude and time 1964-1979, 8:22070 (R:US)
SOLAR AIR CONDITIONERS
See also SOLAR-ASSISTED HEAT PUMPS
Absorption Refrigeration Cycle
Comparison of concepts for solar-heated or solar-driven absorption and compression cooling machines for air conditioning and food preservation purposes, phase 1. Final report, Nov. 1978, 8:20083 (R:DE)
Comparative Evaluations
Comparison of concepts for solar-heated or solar-driven absorption and compression cooling machines for air conditioning and food preservation purposes, phase 1. Final report, Nov. 1978, 8:20083 (R:DE)
Vapor Compression Refrigeration Cycle
Comparison of concepts for solar-heated or solar-driven absorption and compression cooling machines for air conditioning and food preservation purposes, phase 1. Final report, Nov. 1978, 8:20083 (R:DE)
SOLAR ARCHITECTURE
Design
Passive solar architecture in Europe, 8:20116 (B:XE)
SOLAR ATMOSPHERE
The solar atmosphere: from photosphere to corona, 8:22128 (R:GB)
Solar Activity
Solar observations, 8:22085 (R:US)
SOLAR BATTERIES
See SOLAR CELL ARRAYS
SOLAR CELL ARRAYS
Charge Collection
Differential charging model of solar panels, 8:20039 (R:DE)
Solar cell modules for plasma interaction evaluation. Final report, 8:20005 (R:US)
Concentrator Solar Cells
PV concentrator array power costs, 8:20046 (R:US)
Second-generation photovoltaic-concentrator-array design, 8:20020 (R:US)
Design
Second-generation photovoltaic-concentrator-array design, 8:20020 (R:US)
Economics
PV concentrator array power costs, 8:20046 (R:US)
Electric Charges
Tank testing of a 2500-cm2 solar panel, 8:20002 (R:US)
Electric Discharges
Tank testing of a 2500-cm2 solar panel, 8:20002 (R:US)
Emplacement
New designs and installations of photovoltaic-array fields with low balance-of-system costs, 8:20048 (R:US)
Fabrication
Method of fabricating a solar cell array (Patent), 8:20026 (P:US)
Flexibility
Modal analysis of structures with prestress effects: application to flexible solar generators, 8:20029 (R:FR:In French)
Mathematical Models
Differential charging model of solar panels, 8:20039 (R:DE)
Mechanical Tests
Second-generation photovoltaic-concentrator-array design, 8:20020 (R:US)
Power Losses
Solar cell modules for plasma interaction evaluation. Final report, 8:20005 (R:US)
Seals
Hermetic edge sealing of photovoltaic modules. Quarterly technical report, 8:19998 (R:US)

Silicon Solar Cells
Second-generation photovoltaic-concentrator-array design, 8:20020 (R:US)
SOLAR CELL RECEIVERS
See SOLAR RECEIVERS
SOLAR CELLS
See also CADMIUM SELENIDE SOLAR CELLS
CADMIUM SULFIDE SOLAR CELLS
CADMIUM TELLURIDE SOLAR CELLS
CONCENTRATOR SOLAR CELLS
COPPER SULFIDE SOLAR CELLS
MIS SOLAR CELLS
SILICON SOLAR CELLS
Polymers
Modelling of polymer photodegradation for solar cell modules, 8:20007 (R:US)
Modelling of polymer photodegradation for solar cell modules, 8:20006 (R:US)
Requirements for heat resistant and highly heat resistant materials in the construction of stationary turbines, 8:21062 (R:DE:In German)
SOLAR COLLECTORS
See also CONCENTRATING COLLECTORS
EVACUATED COLLECTORS
FLAT PLATE COLLECTORS
SOLAR PONDS
Dimensions, Volume 65, Number 3, 8:20131 (R:US)
Fabrication
Recycling for solar applications. Final report, 8:20127 (R:US)
Installation
1980 Active-Solar Installations Survey, 8:20863 (R:US)
Optical Properties
Optical characterization of solar concentrator mirrors using the solar beam of the JPL 25-foot space simulator, 8:20129 (R:US)
Solar Simulators
Optical characterization of solar concentrator mirrors using the solar beam of the JPL 25-foot space simulator, 8:20129 (R:US)
SOLAR CONCENTRATORS
Fresnel Lens
Testing of a prototype Fresnel-lens concentrator for thermal applications, 8:20137 (R:US)
Performance Testing
Testing of a prototype Fresnel-lens concentrator for thermal applications, 8:20137 (R:US)
SOLAR CONSTANT
Measurement of the solar constant, 8:22082 (R:US)
SOLAR COOLING SYSTEMS
See also PASSIVE SOLAR COOLING SYSTEMS
SOLAR AIR CONDITIONERS
SOLAR REFRIGERATORS
Computerized Simulation
Advanced solar/gas desiccant cooling system. Final report, 8:20101 (R:US)
Dehumidifiers
Study and evaluation of the latent cooling potential of chemical de-humidifiers, 8:20096 (R:XE)
Desiccants
Advanced solar/gas desiccant cooling system. Final report, 8:20101 (R:US)
Engineering Drawings
Integrated solar heating, cooling and hot water system for the San Diego City Schools, University City High School (Engineering Materials), 8:20117 (E:US)
Life-Cycle Cost
SOLCOST3.0; solar heating & cooling design (CDC CYBER172,175; FORTRAN IV), 8:20081 (R:US)
Performance Testing
Advanced solar/gas desiccant cooling system. Final report, 8:20101 (R:US)
SOLAR CORONA
Star Models
The differential emission measure of dynamic coronal loops, 8:22136 (R:US)
SOLAR CYCLE
The sun as a star, 8:22127 (R:US)
Correlations
Terrestrial cooling and solar variability. Final report, 8:22133 (R:US)
Sunspots
Sunspot variation and selected associated phenomena: a look at solar cycle 21 and beyond, 8:22141 (R:US)
SOLAR ENERGY
Demonstration Programs
(seminario usos de la energia solar en la vivienda) solar energy applications for dwellings. Seminar 17-19 nov 80, 8:19976 (R:US)
Information Systems
1980 Active-Solar Installations Survey, 8:20863 (R:US)
Research Programs
Electric-utility solar-energy activities: 1982 survey update. Special report, 8:19965 (R:US)
Solar energy in the Netherlands. Program of the second phase of the National Research Program on Solar Energy (1982-1985), 8:19964 (R:NL:In Dutch)
SOLAR ENERGY CONVERSION
See also OCEAN THERMAL ENERGY CONVERSION
Plasmons
New strategy for efficient solar energy conversion: Parallel-processing with surface plasmons, 8:20004 (R:US)
SOLAR EQUIPMENT

SOLAR HEATING SYSTEMS
SOLAR STILLS
SOLAR WATER HEATERS
SOLAR WATER PUMPS
SPECTRALLY SELECTIVE SURFACES
Heat Exchangers
Fracture strength of sintered and siliconized SiC and SiC joints, 8:22760 (J:US)
SOLAR FLARES
Why solar flares are studied, 8:22100 (R:FR:French)
Dynamics
Flares and dynamic aspects, 8:22101 (R:FR:French)
Forecasting
Interferometric observations of solar flare precursors at 10.6 ghz. Final report oct 80-jan 82, 8:22071 (R:US)
Frequency Analysis
Statistical aspects of the 1980 solar flares. 1: Data base, frequency distributions, and overview remarks, 8:22140 (R:US)
Gamma Spectra
Nuclear processes in solar flares, 8:22154 (R:US)
Indexes
Experimental comprehensive solar flare indices for 'major' and certain lesser flares 1975-1979, 8:22069 (R:US)
Magnetic Fields
Determination of magnetic fields and anisotropies of a milieu from interpretation of the linear polarization of lines, 8:22103 (R:FR:French)
Particle Kinematics
Particle acceleration in solar flares, 8:22105 (R:FR)
Site Surveys
The sites of solar flares, 8:22104 (R:FR:French)
Star Models
Recent developments in solar flare models, 8:22107 (R:US:FR)
Variations
Statistical aspects of the 1980 solar flares. 2: solar cycle activity relationships and additional remarks, 8:22142 (R:US)
X-Ray Spectra
Analysis of a series of solar flare x-ray spectra, 8:22068 (R:US)
X-Ray Spectroscopy
Spectroscopic diagnostics of solar flares, 8:22102 (R:FR:French)
SOLAR FLUX
See also DIFFUSE SOLAR RADIATION
DIRECT SOLAR RADIATION
Correlations
Solar diameter measurements for study of sun climate coupling. Final report, June 1980-May 1981, 8:22135 (R:US)

SPACE POWER REACTORS
Heat Pipes
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)
Planning
Space nuclear power and man's extraterrestrial civilization, 8:20448 (R:US)
Reactor Cores
Space reactors. Progress report, October 1981-March 1982, 8:20447 (R:US)
Shielding
Electron dose attenuation kernels for slab and spherical geometries. Final report, 8:20446 (R:US)
Specifications
Space nuclear power and man's extraterrestrial civilization, 8:20448 (R:US)
SPACE VEHICLES
Radiation Doses
Radiation environment mapping, 8:21801 (R:US)
Shielding
Electron dose attenuation kernels for slab and spherical geometries. Final report, 8:20446 (R:US)
SPACECRAFT POWER SUPPLIES
Analytical modeling of spacecraft power systems. Final Report, July 1981-April 1982, 8:20040 (R:US)
Brayton Cycle Power Systems
Study of reactor brayton power systems for nuclear electric spacecraft, 8:20270 (R:US)
Solar Cell Arrays
Differential charging model of solar panels, 8:20039 (R:DE)
Modal analysis of structures with prestress effects: application to flexible solar generators, 8:20029 (R:FR:In French)
Tank testing of a 2500-cm2 solar panel, 8:20002 (R:US)
Technology Assessment
Study of multi-megawatt technology needs for photovoltaic space power systems. Volume 1: executive summary, 8:20041 (R:US)
Study of multi-megawatt technology needs for photovoltaic space power systems, volume 2. Final report, 8:20042 (R:US)
SPARK CHAMBERS
See also PROJECTION SPARK CHAMBERS
Supports
Inorganic spark chamber frame and method of making the same (Patent), 8:21452 (R:US)
SPARK IGNITION ENGINES
Automotive Fuels
Characterization of exhaust emissions from methanol- and gasoline-fueled automobiles. Final report Jun 81-Mar 82, 8:21033 (R:US)
Exhaust Gases
Characterization of exhaust emissions from methanol- and gasoline-fueled automobiles. Final report Jun 81-Mar 82, 8:21033 (R:US)
SPEAR
Stanford positron-electron asymmetric ring.
Cavity Resonators
50-MHz SPEAR r-f cavities (out of use since 1976) (Engineering Materials), 8:21564 (E:US)
Data Acquisition Systems
SHAM: Liquid Argon Sample and Hold Module (Engineering Materials), 8:21561 (E:US)
SPORT-SPEAR Mark III Electronics (Engineering Materials), 8:21618 (E:US)
Radiation Detectors
SPORT-SPEAR Mark III Electronics (Engineering Materials), 8:21618 (E:US)

Many-Body Problem
Laser excitation, 8:22187 (R:US)
SPENT FUEL CASKS
Fractures
Protecting against failure by brittle fracture in ferritic-steel shipping containers greater than four-in. thick, 8:21356 (R:US)
SPENT FUEL ELEMENTS
Burnup
Development and test of methods for the nondestructive assay of spent-fuel assemblies. Final report, 8:19807 (R:US)
Isotope Ratio
Determination of isotopic and gravimetric content of uranium and plutonium by mass spectrometry in nitric acid extraction solutions, 8:20386 (TG:US)
Nondestructive Analysis
Development and test of methods for the nondestructive assay of spent-fuel assemblies. Final report, 8:19807 (R:US)
SPENT FUEL STORAGE
See also AWAY-FROM-REACTOR STORAGE
Reviews
U.S. reactor spent-fuel storage capabilities. Technical report, 8:20478 (R:US)

Temperature Distribution
Possibility of multiple temperature maxima in geologic repositories for spent fuel from nuclear reactors, 8:20406 (J:US)
SPENT FUELS
Land Transport
Public information circular for shipments of irradiated reactor fuel. Report for 16 Jul 79-1 May 82, 8:19811 (R:US)
Safety assessment of spent fuel transportation in extreme environments, 8:19815 (J:US)
Rail Transport
Public information circular for shipments of irradiated reactor fuel. Report for 16 Jul 79-1 May 82, 8:19811 (R:US)
Risk Assessment
Safety assessment of spent fuel transportation in extreme environments, 8:19815 (J:US)
Transport Regulations
Advance notification of shipments of nuclear waste and spent fuel: guidance, 8:19812 (R:US)
Public information circular for shipments of irradiated reactor fuel. Report for 16 Jul 79-1 May 82, 8:19811 (R:US)
SPENT SEED
Restricted to MHD seeds.
Nucleation
Nucleation of slag and seed in MHD plants, 8:20871 (R:US)
SPENT SHALES
Sorptive Properties
Combustion of oil shale in fluidized-bed combustors: an overview. Final report May-Nov 81, 8:19787 (R:US)
Waste Product Utilization
Conversion of shale and slate wastes to glass and glass-ceramic products. Open file report 20 Oct 76-19 Sep 79, 8:20980 (R:US)
SPERT-1 REACTOR
Transients
CHIC-KIN; fast and intermediate power transients (CDC6600; FORTRAN IV), 8:20632 (R:US)
SPHERES
Deformation
Application of the procedure of dynamic relaxation for the calculation of an elastically embedded spherical shell, 8:21347 (R:DE:In German)
Stress Analysis
SOR3; stress analysis of shells of revolution (CDC6600; FORTRAN IV), 8:21306 (R:US)
SPHERES (FUEL)
See FUEL SPHERES
SPHEROMAK DEVICES
High-Frequency Heating
Spheromak heating with Alfven waves, 8:22624 (R:US)
Plasma Confinement
Method and apparatus for the formation of a spheromak plasma (Patent), 8:22649 (P:US)
Plasma Production
Method and apparatus for the formation of a spheromak plasma (Patent), 8:22649 (P:US)
SPICULES
See SOLAR PROMINENCES
SPINE
See VERTEBRAE
SPOIL BANKS
Environmental Impacts
Selective placement of strip mine overburden in Montana. V: summary report. Open file report Jul 76-Jun 81, 8:19604 (R:US)
Runoff
Subsurface oxidation of pyritic coal-cleaning wastes by chemoautotrophic bacteria (51 references), 8:19595 (R:US)
Waste Disposal
Disposal of excess spoil from coal mining and the Surface Mining Control and Reclamation Act of 1977: a study of regulatory requirements, engineering practices, and environmental protection objectives, 8:19591 (R:US)
SPRAY PONDS
See COOLING PONDS
SPRINGS (WATER)
See WATER SPRINGS
SPUTTERING
Computer Calculations
Physical sputtering code for fusion applications, 8:22694 (R:US)
Fluorescence Spectroscopy
Outer-shell excitation mechanisms and static-mode laser-fluorescence spectroscopy of sputtered atoms, 8:22186 (R:US)
Ion Emission
Alternative approach to the surface-excitation model, 8:22177 (R:US)
SQUID DEVICES
Superconducting Quantum Interference Devices
Coupling
Signal coupling to thin-film SQUIDS and magnetometry without flux transformers, 8:21349 (R:US)
SRC PROCESS
Coal Preparation
20-mesh coal system study, 8:19487 (RA:US)
20-mesh vs 200-mesh coal study, 8:19486 (RA:US)
Computerized Simulation
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
Demonstration Plants
Demonstration and commercialization of the SRC-I technology (Newman, KY), 8:19407 (RA:US)
LC-Finer catalyst testing, 8:19485 (RA:US)
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
Flowsheets
Demonstration and commercialization of the SRC-I technology (Newman, KY), 8:19407 (RA:US)
Hydrogen Production
Comparison of two methods for cooling synthesis gas produced during gasification, 8:19488 (RA:US)
Laboratory examination of the suitability of three US coal samples or Gesellschaft fuer Kohle-Technologie (GKT) gasification, 8:19477 (RA:US)
Materials Handling Equipment
20-mesh coal system study, 8:19487 (RA:US)
Pilot Plants
SRC-I high-pressure slurry letdown system study, 8:19479 (RA:US)
Quality Control
Microanalytical procedures, 8:19484 (RA:US)
Research Programs
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
Residues
Demonstration and commercialization of the SRC-I technology (Newman, KY), 8:19407 (RA:US)
Waste Water
Solvent screening experiments for SRC-I phenol recovery, 8:19480 (RA:US)
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
SRC-II PROCESS
Organic Solvents
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
SR-OB REACTOR
See SUBCRITICAL ASSEMBLIES
STABILITY (REACTOR)
See REACTOR STABILITY
STACK DISPOSAL
Monitoring
Techniques to determine a company's ability to conduct a quality stack test. Technical assistant document, 8:21752 (R:US)
STACKS
Aerosol Monitoring
Application of optical particle measuring systems to high temperature/high pressure process streams, 8:21710 (RA:US)

STADE REACTOR
Environmental Impacts
Emission and ambient concentrations of longliving aerosol radionuclides at stade nuclear power plant, 8:21808 (BA:DE)
Radioactive Aerosols
Emission and ambient concentrations of longliving aerosol radionuclides at stade nuclear power plant, 8:21808 (BA:DE)
STAINLESS STEEL-304
Stress Corrosion
Oxygen suppression in boiling water reactors. Phase 2. Annual report 1981, December 2, 1980-December 31, 1981, 8:20326 (R:US)
Stress corrosion cracking in boiling water reactor (BWR) piping, 8:20343 (RA:US)
STAINLESS STEEL-316
Compatibility
Corrosion of ferrous alloys in static Pb and Pb-17 at. % Li, 8:22722 (RA:US)
Environmental effects on properties of structural alloys, 8:22721 (RA:US)
Corrosion
Corrosion of path A PCA, type 316 stainless steel and Fe-12 Cr-1 MoVW steel in flowing lithium, 8:22720 (RA:US)
Environmental effects on properties of structural alloys, 8:22721 (RA:US)
Creep
Irradiation creep in path A alloys irradiated to 5 dpa in the ORR-MFE-4A spectral tailoring experiment, 8:22707 (RA:US)
Microstructure
Microstructural development of 20%-cold-worked type 316 stainless steel irradiated in ORR at 250 to 500°C, 8:22711 (RA:US)
Swelling and microstructural development in path A PCA and type 316 stainless steel irradiated in HFIR to about 22 dpa, 8:22708 (RA:US)
Physical Radiation Effects
Effect of helium preinjection and prior thermomechanical treatment on the microstructure of Type 316 SS, 8:21056 (R:US)
Influence of helium-injection schedule and prior thermomechanical treatment on the microstructure of Type 316 SS, 8:21057 (R:US)
Irradiation creep in path A alloys irradiated to 5 dpa in the ORR-MFE-4A spectral tailoring experiment, 8:22707 (RA:US)
Microstructural development of 20%-cold-worked type 316 stainless steel irradiated in ORR at 250 to 500°C, 8:22711 (RA:US)
Swelling and microstructural development in path A PCA and type 316 stainless steel irradiated in HFIR to about 22 dpa, 8:22708 (RA:US)
Swelling
Swelling and microstructural development in path A PCA and type 316 stainless steel irradiated in HFIR to about 22 dpa, 8:22708 (RA:US)
Tensile properties and swelling of 20%-cold-worked type 316 stainless steel irradiated in HFIR, 8:22710 (RA:US)
Tensile Properties
Tensile properties of unirradiated path A PCA, 8:22709 (RA:US)
Tensile properties and swelling of 20%-cold-worked type 316 stainless steel irradiated in HFIR, 8:22710 (RA:US)
STAINLESS STEEL-347
Corrosion
Corrosion of support materials, 8:20358 (RA:US)
Measuring corrosion rates in crevices with a computer-controlled flow loop, 8:20361 (RA:US)
Preliminary corrosion results on alternative support materials from two model steam generator tests, 8:20359 (RA:US)
STAINLESS STEEL-405
Corrosion
Corrosion of support materials, 8:20358 (RA:US)
Measuring corrosion rates in crevices with a computer-controlled flow loop, 8:20361 (RA:US)
Preliminary corrosion results on alternative support materials from two model steam generator tests, 8:20359 (RA:US)
STAINLESS STEEL-430
Corrosion
Corrosion of support materials, 8:20358 (RA:US)
STAINLESS STEELS

Biological Fouling
Mitigation of biofouling using coatings, year 3. Quarterly progress report No. 1, 8:20255 (R:US)
Corrosion
Erosion/corrosion newsletter (excerpted from LBL—13840), 8:21076 (R:US)
Desorption
Measuring the ion-stimulated desorption coefficient on a model of the vacuum chamber of the accelerating-storage complex at the temperature of 300 and 77 K, 8:21505 (RA:SU:In Russian)
Erosion
Erosion/corrosion newsletter (excerpted from LBL—13840), 8:21076 (R:US)
Ion Implantation
Deuterium re-emission from 304LN stainless steel, 8:21102 (J:NL)
Physical Radiation Effects
Deuterium retention in helium-damaged stainless steel: detrapping energy, 8:21103 (J:NL)
Radiation Effects
Measuring the ion-stimulated desorption coefficient on a model of the vacuum chamber of the accelerating-storage complex at the temperature of 300 and 77 K, 8:21505 (RA:SU:In Russian)
Sprayed Coatings
Description of the method of producing coatings of Raney nickel catalyst by flame-spraying and findings obtained by examining samples of the coatings (Raney nickel), 8:21069 (R:US)
Surface Properties
Hydrogen ion impact desorption of adsorbed deuterium from stainless steel, 8:21105 (J:NL)
STANDARDS
Standards development status summary report. Quarterly report covering two periods July-December 1982, 8:20455 (R:US)
Data Processing
ANSDDF; ANSI data description file utilities (IBM360,370,303x; PL/I), 8:22890 (R:US)
STANDING CROP

Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
WATER; steam tables at 14.5-14,500 psia and 32-472°F (CDC6600; FORTRAN IV), 8:21149 (R:US)
STEAM CONDENSERS
Cathodic Protection
Electrochemical measurement of corrosion rates in cathodically protected systems. Final report, 8:21070 (R:US)
Corrosion
Electrochemical measurement of corrosion rates in cathodically protected systems. Final report, 8:21070 (R:US)
Design
Partitioning of hydrogen sulfide in the condensers of Geysers Unit 15, 8:20169 (RA:US)
Modifications
Partitioning of hydrogen sulfide in the condensers of Geysers Unit 15, 8:20169 (RA:US)
STEAM COOLANT
See STEAM
STEAM GENERATORS
Computerized Simulation
Program module simulating a gas-heated steam generator with steam condensation in the primary flow channel, 8:20402 (R:DE)
Corrosion
Modeling of salt concentrations in crevices (PWR), 8:20368 (RA:US)
Proceedings: support-structure corrosion in steam generators, 8:20356 (R:US)
Corrosion Denting
Effect of oxygen and oxidizing ions on denting corrosion (PWR), 8:20367 (RA:US)
Impedance studies of the growth of porous magnetite films on carbon steel in high temperature aqueous systems (PWR), 8:20369 (RA:US)
Design
Fluidized bed combustion for oil field steam generation and process heating applications, 8:19684 (J:US)
Eddy Current Testing
In-service inspection of system generator tubes with multiple-frequency eddy currents, 8:20388 (J:US)
Engineering
New AFBC coal-fired steam generation facility for the Idaho Chemical Processing Plant, 8:19645 (J:US)
Failures
Iodine transport predicted for a postulated steam-line break with concurrent ruptures of steam-generator tubes (PWR), 8:20716 (R:US)
Flowmeters
Use of conductance probe method to measure two phase flow pattens, 8:20378 (RA:US)
Heat Transfer
Evaluation of transient heat transfer in parallel tube bundles by the Monte-Carlo-Method, 8:21425 (R:DE:In German)
Hydrodynamics
DYNAM; dynamic analysis boiling flow steam (UNIVAC1108; FORTRAN), 8:21413 (R:US)
In-Service Inspection
In-service inspection of system generator tubes with multiple-frequency eddy currents, 8:20388 (J:US)
Inspection
Methods for predicting strain in dented steam generator tubes from profilometry data, 8:20380 (RA:US)
Reactor Maintenance
Methods for predicting strain in dented steam generator tubes from profilometry data, 8:20380 (RA:US)
Service Life
Initial inspection of a service degraded steam generator removed from service, 8:20389 (J:US)

Stress Corrosion
- Examination of bimetallic Inconel 600/316 stainless steel sodium-heated steam generator, 8:20444 (J:US)

Supports
- Alloy steel corrosion kinetics and oxide morphologies in acid chloride environments (PWR), 8:20360 (RA:US)
- Characterization of model boiler specimens (PWR), 8:20366 (RA:US)
- Corrosion of support materials (PWR), 8:20358 (RA:US)
- Examinations of support plate samples from steam generators (PWR), 8:20362 (RA:US)
- Measuring corrosion rates in crevices with a computer-controlled flow loop (PWR), 8:20361 (RA:US)
- Preliminary corrosion results on alternative support materials from two model steam generator tests (PWR), 8:20359 (RA:US)
- Recent Westinghouse experience with tube support plate materials corrosion studies (PWR), 8:20357 (RA:US)

Surface Cleaning
- Steam-Generator Dilute-Chemical-Cleaning Program: steam-generator chemical-cleaning project. Annual report for 1981, 8:20353 (R:US)

Tubes
- Methods for predicting strain in dented steam generator tubes from profilometry data, 8:20380 (RA:US)
- Results of EDF/Framatome underclad crack-detection methods. Final report (PWR), 8:20371 (R:US)

Two-Phase Flow
- Some aspects of two-phase flow, heat transfer and dynamic instabilities in medium and high pressure steam generators, 8:21424 (R:US)

STEAM LINES

Failures
- Iodine transport predicted for a postulated steam-line break with concurrent ruptures of steam-generator tubes (PWR), 8:20716 (R:US)

STEAM SYSTEMS
- High-temperature gas-cooled reactor steam cycle/cogeneration. Design and technology development plan for Nuclear Steam Supply System. Volume I: Summary, 8:20486 (R:US)
- HTGR steam-cycle/cogeneration lead plant design and cost report. Volume II. Nuclear Steam Supply System, 8:20484 (R:US)
- Utility of low-order linear nuclear-power-plant models in plant diagnostics and control, 8:20617 (R:US)

Reactor Components
- Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)

Reactor Maintenance
- Statistical performance analysis of salt water cooled pressurized water reactors, 8:20381 (RA:US)

STEAM TURBINES

Impact Strength
- Scale-model turbine-missile-casing impact tests. Final report (PWR; BWR), 8:20691 (R:US)

Missile Protection
- Scale-model turbine-missile-casing impact tests. Final report (PWR; BWR), 8:20691 (R:US)

Specifications
- Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)

Turbine Blades
- Scale-model turbine-missile-casing impact tests. Final report (PWR; BWR), 8:20691 (R:US)

STEEL INDUSTRY

See METAL INDUSTRY

STEEL-ASTM-A302

Fracture Properties
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

Physical Radiation Effects
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

STEEL-ASTM-A508

Corrosion
- Alloy steel corrosion kinetics and oxide morphologies in acid chloride environments, 8:20360 (RA:US)

Fracture Properties
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)

Physical Radiation Effects
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)

STEEL-ASTM-A533-B

Fracture Properties
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

Physical Radiation Effects
- LWR Pressure-Vessel Surveillance Dosimetry-Improvement Program. Quarterly progress report, April 1982-June 1982, 8:20345 (R:US)
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

STEEL-ASTM-A537

Fracture Properties
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

Physical Radiation Effects
- LWR Pressure-Vessel Surveillance Dosimetry Improvement Program. 1982 annual report, October 1, 1981- September 30, 1982, 8:20346 (R:US)

STEELS

CARBON STEELS
CHROMIUM STEELS
MANGANESE STEELS
STAINLESS STEELS
STEEL-ASTM-A302
STEEL-ASTM-A508
STEEL-ASTM-A537

- New class of steels for thick-wall pressure vessels. Final technical report, June 21, 1980-June 30, 1982, 8:21088 (R:US)

Allocations
- Priority support for energy programs under the Defense Production Act, 8:20799 (R:US)

Corrosion
- Examination of a corroded mild steel support plate, 8:20365 (RA:US)
- Proceedings: support-structure corrosion in steam generators, 8:20356 (R:US)
- Sampling and analysis of lower steam generator support plate - Indian Point 2, 8:20364 (RA:US)
- Summary of results, Millstone 2 tube support plate examination, 8:20363 (RA:US)

Corrosion Denting
- Effect of oxygen and oxidizing ions on denting corrosion, 8:20367 (RA:US)

Crack Propagation
- Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV, 8:21067 (R:US)

Damage
- Air-pollution damage to man-made materials: physical and economic estimates. Final report, 8:20773 (R:US)

Energy Supplies
Priority support for energy programs under the Defense Production Act, 8:20799 (R:US)
Erosion
Erosion/corrosion newsletter (excerpted from LBL—13840), 8:21076 (R:US)
Fatigue
Microstructural approach to fatigue-crack processes in polycrystalline bcc materials. Annual technical progress report IV, 8:21067 (R:US)
Fracture Properties
Influence of cladding on the values of K_1 for emerging defects in the vessel belt line: semi-elliptical flaws; longitudinal flaws, 8:20733 (TG:US)
Friction
Determination of static friction of beryllium to beryllium and beryllium to 1040 steel, 8:21089 (R:US)
Hardness
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R:US)
Mechanical Properties
Physical properties data compilations relevant to energy storage. V. Mechanical properties data on alloys for use in flywheels, 8:20734 (R:US)
Stress Corrosion
Continued investigation of the failure of Midland Unit 1 RPV anchor studs: data report, 8:20383 (R:US)
Surface Properties
Surface radiation properties of ThO_2 and other reactor materials, 8:20422 (R:US)

STELLARATOR TYPE REACTORS
Superconducting Magnets
Preliminary magnet design for a stellarator fusion reactor (UWTOR-M reactor), 8:22766 (J:US)

STELLARATORS
See also WENDELSTEIN-7 STELLARATOR
Plasma Confinement
Alternative lines with magnetic plasma confinement, 8:22664 (BA:DE:In German)

STIMULATED EMISSION DEVICES

STOVER
See AGRICULTURAL WASTES

STRANGENESS-EXCHANGE REACTIONS
Hypernuclei
Possible investigations of the (K^-, K^+) reaction, 8:22403 (RA:US)

STRATEGIC PETROLEUM RESERVE
Strategic Petroleum Reserve. Quarterly report, 8:19745 (R:US)
Capacity
Strategic Petroleum Reserve. Annual report, 8:19744 (R:US)
Evaluation
Status of strategic petroleum reserve activities as of September 30, 1982, 8:19747 (R:US)

Financing
Strategic petroleum reserve: progress after seven years, 8:19746 (R:US)
Implementation
Strategic petroleum reserve: progress after seven years, 8:19746 (R:US)
Legal Aspects
Strategic petroleum reserve: progress after seven years, 8:19746 (R:US)
Site Preparation
Strategic Petroleum Reserve. Annual report, 8:19744 (R:US)

STRATIFIED CHARGE ENGINES
Fuel Economy
Review and evaluation of automotive fuel conservation technologies. Final report, 8:21017 (R:US)

STRATOSPHERE
Air Pollution
Measurement of ions, trace gases and precondensation nuclei in the stratosphere by mass spectroscopy, 8:21714 (RA:DE:In German)
Ethane
Measurements of ethane and propane in the troposphere and stratosphere, 8:21718 (RA:DE:In German)
Hydrochloric Acid
Determination of traces of HCl in the troposphere and stratosphere, 8:21724 (RA:DE:In German)
Hydrogen Peroxide
Measurement of HO_2 and NO_2 in the stratosphere by means of ESR and matrix isolation, 8:21720 (RA:DE:In German)
Nitrogen Oxides
Measurement of HO_2 and NO_2 in the stratosphere by means of ESR and matrix isolation, 8:21720 (RA:DE:In German)
Organic Chlorine Compounds
Vertical distribution of CH_3Cl, CF_2Cl_2 and $CFCl_3$ in the stratosphere, 8:21715 (RA:DE:In German)
Ozone
Effects of anthropogenic chlorine hydrocarbons on the stratospheric ozone layer, 8:21713 (RA:DE:In German)
Propane
Measurements of ethane and propane in the troposphere and stratosphere, 8:21718 (RA:DE:In German)

STRAW
Combustion
Regional analysis of potential energy production from agricultural wastes: a technical and economic study. Final report, 8:19957 (R:US)

STREAMS
Geochemical Surveys
Uranium hydrogeochemical and stream sediment reconnaissance of the Beaver NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19792 (R:US)
Uranium hydrogeochemical and stream sediment reconnaissance of the Sterling NTMS quadrangle, Colorado. National Uranium Resource Evaluation, 8:19793 (R:US)
Uranium hydrogeochemical and stream sediment reconnaissance of the Ketchikan NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19794 (R:US)

STREETS
See ROADS

STRENGTH (FRACTURE)
See FRACTURE PROPERTIES

STRENGTH FUNCTIONS
Sum-rules, strength distributions and giant resonances, 8:22418 (BA:US)
Laplace Transformation
Partition function as a Laplace transform of a positive measure in the strength parameter, 8:22588 (BA:US)
Partition Functions
Partition function as a Laplace transform of a positive measure in the strength parameter, 8:22588 (BA:US)
Spectral Functions
Elementary principles of spectral distributions, 8:22582 (BA:US)

STRESS ANALYSIS
DUZ2; 2-dimensional axisymmetric and plane elastic-plastic (CDC6600), 8:20570 (R:US)

STRESSES
Mechanics.
See also THERMAL STRESSES
Computerized Simulation
Measurement of in situ stress using NQR/NMR, 8:22062 (RA:US)

STRETFORD PROCESS
Tri-State Synfuels Project Review: Volume 8. Commercial status of licensed process units (Proposed Henderson, Kentucky coal to gasoline plant; licensed commercial processes), 8:19504 (R:US)

STRIPPER FOILS

STRIPPERS
See BEAM STRIPPERS

STRONTIUM
Solvent Extraction
Separation of radiostrontium from radionuclide mixes in milk using cobalt dicarbolide, 8:21200 (RA:CS:In Slovak)
Sorption
Radionuclide sorption on basalt-interbed materials. Annual report FY 1981, 8:19887 (R:US)

STRONTIUM 85
Retention
Participation of gastrointestinal tract in $^{85}SrCl_2$ contamination by inhalation, 8:21960 (RA:CS:In Czech)

STRONTIUM 89
Radioecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)

STRONTIUM 90
Intake
History of population exposure due to radioactive fallout. II. History of daily dietary ^{90}Sr intake of population, 8:21958 (RA:CS:In Czech)
Radiation Monitoring
Quarterly ^{90}Sr deposition at world land sites, 8:21797 (RA:US)
Radiostrontium in milk and tap water, 8:21835 (RA:US)
Strontium-90 in human bone: 1981 results for New York City and San Francisco, 8:21834 (RA:US)
Radiochemical Analysis
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)
Radioecological Concentration
History of population exposure due to radioactive fallout. II. History of daily dietary ^{90}Sr intake of population, 8:21958 (RA:CS:In Czech)
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
Strontium-90 in the diet: results through 1981, 8:21833 (RA:US)
Spatial Distribution
Radiological safety studies on ground disposal of radioactive wastes. Distribution and migration of radionuclides in the aerated zone, 8:19832 (R:JP:MIXED)

STRONTIUM CHLORIDES
Ionic Conductivity
Enhanced thermal conduction associated with formation of the superionic state, 8:21101 (J:US)
Thermal Conductivity
Enhanced thermal conduction associated with formation of the superionic state, 8:21101 (J:US)

STRONTIUM TITANATES
Point Defects
Photolysis of water for production of fuel gases. Annual report Jan-Dec 80, 8:19916 (R:US)

STRUCTURAL BUCKLING
See DEFORMATION

STRUCTURAL MATERIALS

CESIUM SULFATES
IRON SULFATES
POTASSIUM SULFATES
SODIUM SULFATES
Air Pollution
Relative importance of atmospheric sulfates and nitrates in visibility reduction, 8:21784 (J:GB)
Ecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
SULFHYDRYL COMPOUNDS
See THIOLS
SULFONATES
For salts of sulfonic acids; for esters see SULFONIC ACID ESTERS
Radiolysis
ESR and pulse radiolysis investigation of the radiolysis of sodium vinyl sulfonate, 8:21288 (J:GB)
SULFUR
Absorptivity
Carbon particles in the Arctic, 8:21739 (RA:US)
Gasification
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Recovery
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design (Proposed Henderson, Kentucky coal to gasoline plant; engineering; process licenses), 8:19495 (R:US)
Retention
Investigate the effectiveness of calcium-treated coals in the capture of sulfur gases generated in staged fired combustors. First quarterly technical progress report, October 1, 1982-January 1, 1983, 8:19637 (R:US)
Voltametry
Microanalytical procedures, 8:19484 (RA:US)
SULFUR 32 TARGET
Triton Reactions
Interactions of polarised tritons with ^{32}S, 8:22362 (J:NL)
SULFUR 35
Energy Levels
Nuclear-structure studies via neutron interactions. Progress report, July 1, 1982-June 30, 1983, 8:22358 (R:US)
SULFUR DIOXIDE
Air Pollution
Guidance for the future use of NASN (This guideline replaces OAQPS number 1.2-020), 8:21769 (R:US)
Air Pollution Abatement
Report to the IEA AFBC technical meeting at Petten, Netherlands, May 1982: TNO's environmental program on fluidized bed combustion, 8:19643 (B:NL)
Air Pollution Control
Acid rain: control strategies for utility boilers. Volume II. Appendices, 8:19578 (R:US)
Combustion modification Nox controls for utility boilers. Volume I: tangential coal-fired unit field test. Final report Jul 78-Jul 79, 8:20293 (R:US)
Economic tradeoffs between flue gas desulfurization and coal cleaning, 8:19625 (J:US)
Harrington Station Unit 2 fabric filter system special testing report. Final report Dec 78-Jul 81, 8:20296 (R:US)
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents, 8:20242 (R:US)
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents. Addendum. Compilation of sorbent performance data from atmospheric fluidized-bed combustors, 8:19626 (R:US)
Atmospheric Chemistry
Aqueous reactions of nitrite with bisulfite ions in sulfate aerosol formation, 8:21681 (RA:US)
SO_2 oxidation of soot particles exposed to water, 8:21738 (RA:US)
Biological Effects
Impact of air pollution on vegetation near the Columbia Generating Station - Wisconsin power plant impact study, 8:22006 (R:US)
Radiological and environmental research 1980: ecology, 8:21993 (R:US)
Chemical Bonds
Structure and bonding of transition metal-sulfur dioxide complexes, 8:21793 (J:DE)
Corrosive Effects
Corrosion behaviour of engineering materials at elevated temperatures in an oxidising environment containing sulphur derivatives: influence of the composition of aggressive media and of the alloys under test (tenue a la corrosion a temperature elevee de materiaux par les milieux oxydants contenant des derives soufres: influence de la composition des phases agressives et des alliages exprimentes). Final report, 8:21082 (R:US)
Ecological Concentration
Air quality non-attainment areas in Region V, 8:21824 (R:US)
Economic Impact
Air-pollution damage to man-made materials: physical and economic estimates. Final report, 8:20773 (R:US)
Environmental Effects
Effects of sulfuric acid rain on two model hardwood forests: throughfall, litter leachate, and soil solution, 8:22003 (R:US)
Removal
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents, 8:20242 (R:US)
Sulfur control in fluidized-bed combustors: methodology for predicting the performance of limestone and dolomite sorbents. Addendum. Compilation of sorbent performance data from atmospheric fluidized-bed combustors, 8:19626 (R:US)

Sampling
Application of thermal analysis and photoelectron spectroscopy for the characterization of particulate matter, 8:21740 (RA:US)

SULFUR FLUORIDES
Breakdown
Role of electron attachment in the breakdown strength of gaseous dielectrics, 8:21189 (J:GB)
Dissociation
Energy deposition in molecules resulting from multiple infrared photon absorption, 8:22580 (J:US)
Energy Absorption
Energy deposition in molecules resulting from multiple infrared photon absorption, 8:22580 (J:US)
Focusing
Self-focusing in SF_6, 8:22228 (J:US)

SULFUR HYDRIDES
See HYDROGEN SULFIDES

SULFUR IONS
Energy-Level Transitions
Comparisons between theory and experiment in two-electron systems, 8:22179 (R:US)
Ion Spectroscopy
Comparisons between theory and experiment in two-electron systems, 8:22179 (R:US)

SULFUR OXIDES
See also SULFUR DIOXIDE
Absorption Spectra
Infrared absorption of sulfur bearing compounds, 8:22099 (R:US)
Air Pollution Abatement
Thirty-day field tests of industrial boilers: site 5 - gas-fired low-Nox burner. Final report Mar 79-Mar 80, 8:21457 (R:US)
Thirty-day field tests of industrial boilers: site 6 - gas-fired fire-tube boiler. Final report mar 79-mar 80, 8:21458 (R:US)
Air Pollution Control
Controlling sulfur oxides, 8:21747 (R:US)
EPA utility FGD survey: July-September 1981. Quarterly report, 8:20297 (R:US)
Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 5 - results, 8:20262 (R:US)
Fluidised-bed combustion: high-pressure combustor at Leatherhead, Test 6 - results, 8:20263 (R:US)
Fluidised-bed combustion. Burning coal-water mixtures in a pressurised fluidised bed: some initial results, 8:21451 (R:US)

SULFUR SULFIDES
See SULFUR

SULFURIC ACID
Chemical Spills
Laboratory study of sulfuric acid spill characteristics pertaining to maritime accidents, 8:21867 (J:US)
Maritime Transport
Laboratory study of sulfuric acid spill characteristics pertaining to maritime accidents, 8:21867 (J:US)

SUM RULES
Sum-rules, strength distributions and giant resonances, 8:22418 (BA:US)

SUN
Rotation
Preliminary determination of the sun's gravitational quadrupole moment from rotational splitting of global oscillations and its relevance to tests of general relativity, 8:22165 (J:US)
Star Models
The sun as a star, 8:22127 (R:US)

SUN SHADES
Energy Conservation
Heat transfer through transparent and non-transparent outer walls with a curtain of adjustable light shades, 8:20910 (R:DE:In German)

SUNSPOTS
Variations
Sunspot variation and selected associated phenomena: a look at solar cycle 21 and beyond, 8:22141 (R:US)

SUPERALLOYS
See HEAT RESISTING ALLOYS

SUPERCHARGERS
Performance
Turbocharging of small internal combustion engine as a means of improving engine/application system fuel economy-further turbocharger improvements. Final report Oct 80-Feb 82, 8:21009 (R:US)

SUPERCHARGING
See SUPERCHARGERS

SUPERCONDUCTING CAVITY RESONATORS
Cooling Systems
Cooling the ANL SC heavy-ion linac with two refrigerators in parallel. Preprint Paper G-26, 8:21502 (R:US)
Performance
Development of superconducting resonators for the Argonne heavy-ion linac, 8:21501 (R:US)

SUPERCONDUCTING JUNCTIONS
Transition Temperature
Superconductivity in artificial Nb/Cu heterostructures, 8:21052 (R:US)
Tunnel Effect
Superconductivity in artificial Nb/Cu heterostructures, 8:21052 (R:US)

SUPERCONDUCTING MAGNETIC ENERGY STORAGE
Economic Analysis
Evaluation of superconducting magnetic energy storage systems. Final report, 8:20267 (R:US)

SUPERCONDUCTING MAGNETS
SATDSK; saturated iron magnetic field study (IBM360,370,303x; FORTRAN IV (89%) and Assembly language (11%)), 8:21483 (R:US)
Design
Conceptual design of superconducting magnet system for magnetohydrodynamic (MHD) Engineering Test Facility (ETF) 200 MWE power plant. Final report, 8:20881 (R:US)
Four-layer, two-inch bore, superconducting dipole magnet, 8:21341 (R:US)
Preliminary magnet design for a stellarator fusion reactor (UWTOR-M reactor), 8:22766 (J:US)
Magnetic Fields
Optimization of the parameters of superconducting dipole winding front parts, 8:21334 (RA:SU:In Russian)
Performance Testing
Status reports on ISABELLE magnets, 8:21500 (R:US)
Quenching
Ramp rate sensitivities of several superconducting dipole magnets operated in He I and superfluid He II, 8:21340 (R:US)
Source, origin, and propagation of quenches measured in superconducting dipole magnets, 8:21339 (R:US)
Safety
Safety and stability of superconducting magnets for fusion using internally cooled conductors, 8:22701 (R:US)
Stability
Safety and stability of superconducting magnets for fusion using internally cooled conductors, 8:22701 (R:US)

SUPERCONDUCTING QUANTUM INTERFERENCE DEVI
See SQUID DEVICES

SUPERCONDUCTORS
Electronic Structure
Bechgaard salts: magnetotransport, dimensionality, spin-density waves, and the threshold field (2:1 salts of tetramethyltetraselenafulvalenium), 8:22558 (R:US)
Ferromagnetism
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)
Magnetic Properties
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)
Neutron Diffraction
Neutron-scattering studies of magnetic superconductors, 8:21120 (R:US)

SUPERGIANT STARS
Temperature Measurement
Observations of b-type supergiants, 8:22096 (R:US)
Ultraviolet Spectra
Data obtained from spacecraft, 8:22097 (R:US)

X-Ray Spectra
Data obtained from spacecraft, 8:22097 (R:US)
SUPERLATTICES

Maintenance
Enhanced operations through designing in reliability and maintainability, 8:22798 (J:US)
TFTR diagnostic voltage loops, 8:22809 (J:US)
Plasma Diagnostics
Design, fabrication, and testing of the TFTR Rogowski coil and diamagnetic loop, 8:22678 (J:US)
Diagnostics for TFTR first plasma, 8:22675 (J:US)
Electrical design of a multi-channel far infrared interferometer for TFTR, 8:22672 (J:US)
Miri - a multichannel far infra-red interferometer for TFTR, 8:22673 (J:US)
TFTR diagnostics grounding, 8:22679 (J:US)
Pulse Analyzers
Mechanical design of an x-ray pulse-height analysis system for TFTR, 8:22676 (J:US)
Reliability
Enhanced operations through designing in reliability and maintainability, 8:22798 (J:US)
Supports
Design and analysis of a stable support structure for TFTR diagnostics, 8:22793 (J:US)
Thermonuclear Reactor Materials
Deuterium re-emission from 304LN stainless steel, 8:21102 (J:NL)
X-Ray Equipment
Mechanical design of an x-ray imaging system for TFTR, 8:22677 (J:US)
THAILAND
Electric Power
A brief market study on electric power systems and energy conservation equipment in Thailand. Foreign market survey report (final), 8:20843 (R:US)
Energy Conservation
A brief market study on electric power systems and energy conservation equipment in Thailand. Foreign market survey report (final), 8:20843 (R:US)
THALLIUM 204
Beta Decay
Internal bremsstrahlung accompanying ^{54}Mn and ^{204}Tl decay, 8:22363 (RA:CS:In Slovak)
Internal Bremsstrahlung
Internal bremsstrahlung accompanying ^{54}Mn and ^{204}Tl decay, 8:22363 (RA:CS:In Slovak)
THERMAL ANALYSIS
Evaluation
Application of thermal analysis and photoelectron spectroscopy for the characterization of particulate matter (Evolved gas analysis), 8:21740 (RA:US)
Theoretical studies of the thermal decomposition of carbonaceous aerosol particulates, 8:21741 (RA:US)
THERMAL DECAY TIME LOG

THERMAL DECOMPOSITION
See PYROLYSIS
THERMAL DIFFUSION
COLCO; thermal diffusion column coefficients (IBM360,303x;CDC6600,CYBER175; FORTRAN IV), 8:19903 (R:US)
THERMAL EFFLUENTS
Biological Effects
Energy partitioning in largemouth bass under conditions of seasonally fluctuating prey availability, 8:21987 (J:US)
THERMAL ENERGY STORAGE EQUIPMENT
Adsorbents
Development of a thermal storage system based on the heat of absorption in hygroscopic materials, 8:20142 (R:XE)
Design
Design and demonstration of a storage assisted air conditioning system, 8:20911 (R:US)
Layout of a latent heat storage system with finned tubes, 8:20737 (R:DE:In German)
Heat Exchangers
Development of a modular heat exchanger with integrated latent heat energy store. Final report, Dec. 1979, 8:20139 (R:DE:In several languages)
Latent Heat Storage
Development of a modular heat exchanger with integrated latent heat energy store. Final report, Dec. 1979, 8:20139 (R:DE:In several languages)
Optimization
Long-duration thermal storage for solar-thermal high-pressure steam IPH, 8:20103 (R:US)
Performance
Development of natural stratification technology, 8:20736 (R:US)
Test Facilities
United States Department of Energy aquifer thermal-energy-storage field-test facilities, 8:20740 (R:US)
THERMAL ENVELOPE HOUSES
See DOUBLE ENVELOPE BUILDINGS
THERMAL INSULATING GLASS
See DOUBLE GLAZING
THERMAL INSULATION
Physical Radiation Effects
Survey analysis of radiation levels in the HTGR lower regions, 8:20404 (R:US)
Thermal Conduction
Conduction phase change beneath insulated heated or cooled structures, 8:20892 (R:US)
THERMAL NEUTRONS
Neutron Flux
SPAN4; a point-kernel shield evaluation code (CDC6600; FORTRAN IV and ASCENT), 8:22499 (R:US)
Scattering
FLANGE2/71-1; ENDF/B thermal scattering data (IBM360; FORTRAN IV), 8:22469 (R:US)
Thermalization
TEMPEST2; thermal neutron spectrum cross sections (IBM360; FORTRAN IV), 8:22424 (R:US)
THERMAL PHOTOGRAPHY

TOTAL ENERGY SYSTEMS
Solar Thermal Power Plants
400-kW/sub e/ high-efficiency steam turbine for industrial cogeneration, 8:20061 (RA:US)
TOUGHNESS (FRACTURE)
See FRACTURE PROPERTIES
TOWER FOCUS POWER PLANTS
Design
Gas cooled solar power plant for generating electrical energy in the 20MWe operating range (GAST): preliminary design phase. final report, nov. 1980, 8:20050 (R:DE:In several languages)
TOXIC MATERIALS
Atmospheric Chemistry
Atmospheric removal processes for toxic chemicals. Technical memo. report, 8:21755 (R:US)
Deposition
Atmospheric removal processes for toxic chemicals. Technical memo. report, 8:21755 (R:US)
Environmental Transport
Atmospheric removal processes for toxic chemicals. Technical memo. report, 8:21755 (R:US)
TOXICITY
Bioassay
Development and verification of a behavior test of fishes in flowing water for assessment of subacute and chronic toxicity, as well as study of influencing factors, 8:21999 (RA:DE:In German)
Studies of using artificial ponds for ecotoxicological examination of chemicals, 8:21862 (RA:DE:In German)

TRANSFER (MASS)
See MASS TRANSFER
TRANSFORMERS
Calibration
A simplified system for calibration of CCVTS in the substation. Final report, 8:20313 (R:US)
Analysis of the calibration of metering CCVTS in a utility substation. Final report, 8:20312 (R:US)
Experimental Data
Analysis of the calibration of metering CCVTS in a utility substation. Final report, 8:20312 (R:US)
Performance
Analysis of the calibration of metering CCVTS in a utility substation. Final report, 8:20312 (R:US)
TRANSIENT REACTOR TEST FACILITY
See TREAT REACTOR
TRANSIENTS
Heat Transfer
Hydrodynamics of annular-dispersed flow (PWR;BWR), 8:20680 (R:US)
Hydraulics
Hydrodynamics of annular-dispersed flow (PWR;BWR), 8:20680 (R:US)
Temperature Gradients
Westinghouse FREY calculations: excessive load increase, boron dilution, and rod withdrawal at power. Final report (PWR), 8:20690 (R:US)
Two-Phase Flow
Hydrodynamics of annular-dispersed flow (PWR;BWR), 8:20680 (R:US)
TRANSITION ELEMENT COMPLEXES
See also CHROMIUM COMPLEXES
IRIDIUM COMPLEXES
IRON COMPLEXES
OSMIUM COMPLEXES
PLATINUM COMPLEXES
RHODIUM COMPLEXES
RUTHENIUM COMPLEXES
Chemical Bonds
Structure and bonding of transition metal-sulfur dioxide complexes, 8:21793 (J:DE)
TRANSITIONS (ENERGY LEVEL)
See ENERGY-LEVEL TRANSITIONS
TRANSMISSION (DATA)
See DATA TRANSMISSION
TRANSMISSION (ENERGY)

TRANSPORT THEORY
See also NEUTRON TRANSPORT THEORY
DOT2DB; 2-dimensional multigroup diffusion & SN theory (GE635; FORTRAN IV), 8:22498 (R:US)
Discrete Ordinate Method
Finite-difference approximations and superconvergence for the discrete-ordinate equations in slab geometry, 8:22531 (J:US)
Eddington Theory
Flux limiters and Eddington factors, 8:22532 (J:GB)
Fick Laws
Flux limiters and Eddington factors, 8:22532 (J:GB)
Lorentz Gas
Lorentz gas, 8:22536 (BA:NL)
Meetings
Report on the seventh international conference on transport theory, 8:22537 (J:US)
TRANSPORTATION SECTOR
Energy Conservation
Energy-conservation strategies and their effects on travel demand, 8:20947 (R:US)
Energy Shortages
Economic impacts of petroleum shortages and the implications for the freight-transportation industry, 8:20946 (R:US)
Fuel Supplies
Preparing for possible motor-fuel shortages: a community planning guide, Taos, New Mexico, 8:20955 (R:US)
Preparing for possible motor-fuel shortages: a community planning guide, Grants, New Mexico, 8:20954 (R:US)
Mathematical Models
Sketch planning model for urban transportation policy analysis, 8:20945 (R:US)
TRANSPORTATION SYSTEMS
See also BUSES
RAPID TRANSIT SYSTEMS
Cost
Pacific Bulk commodity Transportation System, phase III. Volume IV: marad/Boeing study. Final report, 8:19624 (R:US)
Economic Analysis
Transportation methods and costs for sawlogs, pulpwood bolts, and longwood, 8:20960 (R:US)
Planning
Comments on "Technology for the renewal of transportation infrastructure", 8:21030 (R:US)
TRANSURANIUM COMPOUNDS
See also PLUTONIUM COMPOUNDS
Chemical Properties
Electronic structure and bonding in transuranics: comparison with lanthanides, 8:22196 (R:US)
Physical Properties
Electronic structure and bonding in transuranics: comparison with lanthanides, 8:22196 (R:US)
TRANSURANIUM ELEMENTS
See also NEPTUNIUM
PLUTONIUM
TRANSPLUTONIUM ELEMENTS
Electronic Structure

TREAT REACTOR
Hodoscopes
Image processing and resolution restoration of fast-neutron hodoscope data, 8:20638 (R:US)
Reactor Experimental Facilities
Energy-dependent plant protection system for the TREAT upgrade reactor, 8:20647 (RA:US)

Image processing and resolution restoration of fast-neutron hodoscope data, 8:20638 (R:US)
TREAT neutron-radiography facility, 8:20635 (R:US)
Reactor Protection Systems
Energy-dependent plant protection system for the TREAT upgrade reactor, 8:20647 (RA:US)
Reactor Safety
Design analysis of the upgraded TREAT reactor, 8:20679 (R:US)
TREE RINGS
Chemical Analysis
Interactive effects of acid rain and gaseous air pollutants on natural terrestrial vegetation, 8:21696 (R:US)
TREES
Inventories
User's manual for the TVA lumber yield and value program (LYVP). Version 1.0, 8:21934 (R:US)
Short Rotation Cultivation
Economic analysis of short-rotation forestry, 8:19984 (R:US)
Short-rotation woody crops as a source of energy, 8:19983 (R:US)
TRIAZINES
Crystal-Phase Transformations
Neutron scattering study of the phase transition in s-trizine at high pressure, 8:21186 (J:GB)
TRIBUTYL PHOSPHATE
See TBP
TRIGA TYPE REACTORS
See also AFRRI REACTOR
Reactor Kinetics
Neutronics analysis of the proposed 25-MW leu TRIGA Multipurpose Research Reactor, 8:20643 (R:US)
TRIGA-F-DASA REACTOR
See AFRRI REACTOR
TRIPLET PARTICLES
See QUARKS
TRITIUM
Atmospheric Chemistry
TSOAK-M1; analysis of fusion detritiation data (IBM370,303x; FORTRAN IV), 8:22687 (R:US)
Biological Radiation Effects
Tritium effects on germ cells and fertility, 8:21973 (R:US)
Breeding
Preliminary conceptual design study of a suppressed-fission tokamak hybrid, 8:22745 (R:US)
Chemisorption
Tritium-balance in the HTR-type reactor, 8:20400 (RA:DE:In German)
Diffusion
Studies of transport of waste radionuclides, through soil at the Maxey Flats, Kentucky, waste-burial site, 8:19885 (R:US)
Fission Product Release
Tritium-balance in the HTR-type reactor, 8:20400 (RA:DE:In German)
Radiation Monitoring
Environmental surveillance of the Palos Park Forest Preserve, 8:19889 (R:US)
Radioecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
Uptake
Influences of pH, temperature, and moisture on gaseous tritium uptake in surface soils, 8:21841 (J:US)
TRITIUM TARGET
Deuteron Reactions
Effect of multiple deuteron scattering on neutron spectrum of d+T generator, 8:22520 (RA:CS:In Czech)
TRITON REACTIONS
Elastic Scattering
Interactions of polarised tritons with ^{33}S, 8:22362 (J:NL)
Inelastic Scattering
Interactions of polarised tritons with ^{33}S, 8:22362 (J:NL)
Pickup Reactions
Interactions of polarised tritons with ^{33}S, 8:22362 (J:NL)
TRIUMF CYCLOTRON
Meson Factories
Kaon facility for TRIUMF, 8:21521 (RA:US)
TRI-UNIVERSITY MESON FACILITY
See TRIUMF CYCLOTRON
TROPOSPHERE
Ethane
Measurements of ethane and propane in the troposphere and stratosphere, 8:21718 (RA:DE:In German)
Hydrochloric Acid
Determination of traces of HCl in the troposphere and stratosphere, 8:21724 (RA:DE:In German)
Nitrogen Oxides
Measurement of RO_2 and NO_2 in the troposphere by means of ESR and matrix isolation, 8:21717 (RA:DE:In German)
Organic Chlorine Compounds
Ubiquitous concentration of C_1-C_6 organochlorine compounds in the non-polluted atmosphere, 8:21722 (RA:DE:In German)
Peroxy Radicals
Measurement of RO_2 and NO_2 in the troposphere by means of ESR and matrix isolation, 8:21717 (RA:DE:In German)
Propane
Measurements of ethane and propane in the troposphere and stratosphere, 8:21718 (RA:DE:In German)
TRU WASTES
See ALPHA-BEARING WASTES
TRUCKS
Design
Testing truck-mounted vacuum and air conveyor systems for oil spill recovery, 8:19735 (R:US)
Diesel Engines
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R:US)
Electric-Powered Vehicles
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R:US)
Energy Efficiency
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R:US)
Internal Combustion Engines
Energy consumption of an electric, a petrol and a diesel powered light goods vehicle in central london traffic. Final report for 1978, 8:20956 (R:US)
Performance
Testing truck-mounted vacuum and air conveyor systems for oil spill recovery, 8:19735 (R:US)
TSCHEBYSCHEFF APPROXIMATION
See POLYNOMIALS
TSL PROCESS
Flowsheets
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
Organic Solvents
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
Process Development Units
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
Yields
Recycle-slurry-oil characterization. Quarterly report, April 1, 1982-June 30, 1982, 8:19513 (R:US)
TUBES
For objects of tubular shape; not for DRIFT TUBES, ELECTRON TUBES or IMAGE STORAGE TUBES.
Corrosion Denting
Methods for predicting strain in dented steam generator tubes from profilometry data, 8:20380 (RA:US)
Industrial Radiography
Penetrameter positioner for bore-side radiography of tubes, 8:21633 (P:US)
Supports
Results of EDF/Framatome underclad crack-detection methods. Final report (PWR), 8:20371 (R:US)
TUBES (CONDUITS)
See PIPES

TUFF
  Hydraulic Fracturing
    In-situ stress variations and hydraulic-fracture containment in layered rock: observations from a mineback experiment, 8:19767 (R:US)
  Sorptive Properties
    Radionuclide sorption on basalt-interbed materials. Annual report FY 1981, 8:19887 (R:US)
TUMOR CELLS
  Morphological Changes
    Electrical determination of viability in saline-treated mouse myeloma cells, 8:22011 (J:US)
TUMORS
  See NEOPLASMS
TUNGSTEN
  Atom Collisions
    Energy and angle correlations of low energy backscattered light atoms, 8:22211 (J:NL)
  Bonding
    Method of producing microporous joints in metal bodies (Patent), 8:21094 (P:US)
  Ion-Atom Collisions
    Rainbow scattering of low energy Li ions on W single crystal surfaces, with special regard to the azimuthal dependence, 8:22198 (R:DE:German)
  Microstructure
    Method for producing microporous metal bodies (Patent), 8:21093 (P:US)
    Method of producing microporous joints in metal bodies (Patent), 8:21094 (P:US)
  Physical Properties
    NBS: materials measurements, 8:21036 (R:US)
  Porosity
    Method for producing microporous metal bodies (Patent), 8:21093 (P:US)
    Method of producing microporous joints in metal bodies (Patent), 8:21094 (P:US)
  Structural Chemical Analysis
    Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)
TUNGSTEN ALLOYS
  Corrosion
    Corrosion of path A PCA, type 316 stainless steel and Fe-12 Cr-1 MoVW steel in flowing lithium, 8:22720 (RA:US)
TUNGSTEN CARBIDES
  Erosion
    Erosion of hard-metal coatings, 8:21126 (R:US)
TUNGSTEN COMPOUNDS
  See also TUNGSTEN CARBIDES
  TUNGSTEN FLUORIDES
  TUNGSTEN OXIDES
  Radiolysis
    Electron reactions in the pulse radiolysis of metal carbonyls dissolved in 2,2,4-trimethylpentane, 8:21287 (J:GB)
TUNGSTEN FLUORIDES
  Evaporation
    Method for producing microporous metal bodies (Patent), 8:21093 (P:US)
TUNGSTEN IONS
  E1-Transitions
    Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
  Oscillator Strengths
    Electric dipole transitions in C/sub L/-like ions, 8:22222 (J:US)
TUNGSTEN OXIDES
  Reduction
    Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)
  Structural Chemical Analysis
    Surface studies of WO_3/Al_2O_3 and $Ni/W/Al_2O_3$ catalysts, 8:21230 (R:US)
TURBINE BLADES
  Composite Materials
    Construction of low-cost, Mod-0A wood-composite wind-turbine blades, 8:20212 (R:US)
    Design and evaluation of low-cost stainless steel - fiberglass-foam blades for large wind-driven generating systems, 8:20211 (R:US)
  Construction
    Construction of low-cost, Mod-0A wood-composite wind-turbine blades, 8:20212 (R:US)
  Design
    Aluminum blade development for the MOD-OA 200-kilowatt wind turbine. Final report, 8:20231 (R:US)
    Design and evaluation of low-cost stainless steel - fiberglass-foam blades for large wind-driven generating systems, 8:20211 (R:US)
    Rotor blade profiles for wind turbines, 8:20232 (R:DE:In German)
  Evaluation
    Design and evaluation of low-cost stainless steel - fiberglass-foam blades for large wind-driven generating systems, 8:20211 (R:US)
  Fabrication
    Aluminum blade development for the MOD-OA 200-kilowatt wind turbine. Final report, 8:20231 (R:US)
  Failures
    Scale-model turbine-missile-casing impact tests. Final report (PWR; BWR), 8:20691 (R:US)
  Performance Testing
    Rotor blade profiles for wind turbines, 8:20232 (R:DE:In German)
  Stability
    Effects of a large temperature gradient on the structure of directionally solidified eutectic composites and superalloys, 8:21078 (R:DE:In German)
TURBINES
  See also GAS TURBINES
  STEAM TURBINES
  WIND TURBINES
  Protective Coatings
    Development of improved high temperature coatings for In-792 + Hf. Final report, 8:21081 (R:US)
TURBULENCE
  Decay
    Windmill wake turbulence decay: a preliminary theoretical model, 8:20239 (R:US)
  Mathematical Models
    Windmill wake turbulence decay: a preliminary theoretical model, 8:20239 (R:US)
TURKEY
  Electrical Equipment
    The market for power generation equipment in Turkey (1982-1986). Foreign market survey report, 8:20844 (R:US)
TURNOVER (RADIONUCLIDES)

  Biological Accumulation
    Investigation levels in urine of long-lived uranium isotopes, 8:21950 (RA:IL)
  Gamma Spectroscopy
    Radiogeologic assessment for nuclear waste isolation: studies of the Stripa pluton, 8:19847 (RA:US)
  Isotope Ratio
    Uranium disequilibrium measurements on groundwaters, 8:19842 (RA:US)
  Radioecological Concentration
    ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
  Transmutation
    DBUFIT1; least squares transmutation analysis (UNIVAC1108; FORTRAN V), 8:20526 (R:US)
URANIUM 238 TARGET
  Neutron Reactions
    Evaluation of the ^{238}U neutron total cross section, 8:22385 (R:US)
URANIUM BASE ALLOYS
  Electrochemical Corrosion
    Galvanic corrosion of metals and coatings when coupled to uranium in severe environments, 8:21085 (R:US)
  Electron Beam Welding
    Thermal profiles from electron-beam welds on uranium-6 niobium alloy, 8:21091 (R:US)
URANIUM CONCENTRATES
  Nuclear Reaction Analysis
    Model for absorption-modified multiplication effects in the assay of HEU-containing powders in a random driver, 8:19898 (J:US)
URANIUM DEPOSITS
  Evaluation
    Probabilistic endowment appraisal system based upon the formalization of geologic decisions. National Uranium Resource Evaluation. Final report: demonstration and comparative analysis of estimates and methods, 8:19795 (R:US)
  Exploration
    Application of NURE data to the study of crystalline rocks in the Wyoming uranium province, 8:19791 (R:US)
    Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
    Uranium hydrogeochemical and stream sediment reconnaissance of the Beaver NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19792 (R:US)
    Uranium hydrogeochemical and stream sediment reconnaissance of the Sterling NTMS quadrangle, Colorado. National Uranium Resource Evaluation, 8:19793 (R:US)
    Uranium hydrogeochemical and stream sediment reconnaissance of the Ketchikan NTMS quadrangle, Alaska. National Uranium Resource Evaluation, 8:19794 (R:US)
  Gamma Logging
    Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
  Gamma-Gamma Logging
    Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
  Geology
    Probabilistic endowment appraisal system based upon the formalization of geologic decisions. National Uranium Resource Evaluation. Final report: demonstration and comparative analysis of estimates and methods, 8:19795 (R:US)
  Neutron Logging
    Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
  Neutron-Gamma Logging
    Computer-modeling codes to improve exploration nuclear-logging methods. National Uranium Resource Evaluation, 8:19790 (R:US)
  Neutron-Neutron Logging
    Proceedings of the second PFN uranium logging seminar, 8:21639 (R:US)
  Resource Assessment
    Assessment of uranium potential for the NURE quadrangle evaluation program: the elicitation procedure. National Uranium Resource Evaluation, 8:19789 (R:US)
  Stratigraphy
    Probabilistic endowment appraisal system based upon the formalization of geologic decisions. National Uranium Resource Evaluation. Final report: demonstration and comparative analysis of estimates and methods, 8:19795 (R:US)
URANIUM DIOXIDE
  Enthalpy
    Consistency in thermophysical properties: enthalpy, heat capacity, thermal conductivity and thermal diffusivity of UO_2, 8:19799 (R:US)
    Thermophysical properties of reactor fuels, 8:20686 (R:US)
  Fracture Properties
    Correlation between fuel structure and mechanical properties of UO_2, 8:20611 (R:US)
  Physical Radiation Effects
    Correlation between fuel structure and mechanical properties of UO_2, 8:20611 (R:US)
  Specific Heat
    Consistency in thermophysical properties: enthalpy, heat capacity, thermal conductivity and thermal diffusivity of UO_2, 8:19799 (R:US)
  Thermal Conductivity
    Consistency in thermophysical properties: enthalpy, heat capacity, thermal conductivity and thermal diffusivity of UO_2, 8:19799 (R:US)
  Thermal Diffusivity
    Consistency in thermophysical properties: enthalpy, heat capacity, thermal conductivity and thermal diffusivity of UO_2, 8:19799 (R:US)

Vapor Pressure
Thermophysical properties of reactor fuels, 8:20686 (R:US)
Vapor pressures and vapor compositions in equilibrium with hypostoichiometric uranium-plutonium dioxide at high temperatures, 8:20685 (R:US)
URANIUM FLUORIDES
See also URANIUM HEXAFLUORIDE
Enthalpy
New calorimetric studies of inorganic fluorine compounds (Silver uranium fluoride, $AgUF_6$; cesium fluoroxysulfate, $CsSO_4F$), 8:21292 (R:US)
URANIUM HEXAFLUORIDE
Nuclear Materials Management
Examples of MC and A systems to meet prompt accountability specifications, 8:19897 (R:US)
Purification
Method for selectively removing fluorine and fluorine-containing contaminants from gaseous UF_6 (Patent), 8:19798 (P:US)
URANIUM II
See URANIUM 234
URANIUM ISOTOPES
See also URANIUM 229

URANIUM 237
URANIUM 238
Burnup
BURNUP; heavy element isotopic burnup analysis (GE635; FORTRAN IV), 8:20509 (R:US)
URANIUM MILLS
See FEED MATERIALS PLANTS
URANIUM MINES
Air Pollution Control
Engineering evaluation of radon daughter removal techniques. Open file report (final), 8:19893 (R:US)
Radioactive Waste Management
Management of wastes from uranium mining and milling, 8:19869 (R:XA)
Waste Water
Contamination of ground and surface waters due to uranium mining and milling. Volume I: Biological processes for concentrating trace elements from uranium mine waters. Open file report 25 Jul 79-14 Sep 81, 8:19886 (R:US)
URANIUM NITRATES
Criticality
Plans and equipment for criticality measurements on plutonium-uranium nitrate solutions, 8:21360 (J:US)
URANIUM NITRIDES
Magnetic Susceptibility
Spin correlations in uranium nitride near the ordering temperature, 8:21127 (J:US)
Neutron Diffraction
Spin correlations in uranium nitride near the ordering temperature, 8:21127 (J:US)
URANIUM OXIDE FUEL PLANT
See MIXED OXIDE FUEL FABRICATION PLANTS
URANIUM OXIDES
See also URANIUM DIOXIDE
Solubility
Uranium (VI) retardaton mechanisms, 8:19843 (RA:US)
URANIUM RESERVES
Estimation of resources and reserves. Final report, 8:19673 (R:US)
URANYL NITRATES
Surface Tension
Interfacial tension in systems involving TBP in dodecane, nitric acid, uranyl nitrate and water, 8:21231 (R:DE)
URBAN AREAS
Fires
Mass fire model concept. Final report 8 Sep 80-31 May 81, 8:21664 (R:US)
Floods
Floods on North Toe River and Kentucky Creek in the vicinity of Newland, North Carolina. Flood report, 8:21883 (R:US)
URINALYSIS
See URINE
URINE
Radiochemical Analysis
Radiocarbon monitoring in occupationally exposed personnel, 8:21962 (RA:CS:In Czech)
Radionuclide Kinetics
Investigation levels in urine of long-lived uranium isotopes, 8:21950 (RA:IL)
US BUREAU OF MINES
Research Programs
Benefit-cost analysis of health and safety research and development projects in coal, metal and non-metal mining. Open file report Oct 79-Jun 81, 8:19662 (R:US)
US DEPARTMENT OF COMMERCE
See US DOC
US DOC
Administrative Procedures
Priority support for energy programs under the Defense Production Act, 8:20799 (R:US)

WASTE HEAT
Heat Recovery
Application of thermal energy storage to process heat recovery, Phase III, heat exchanger evaluation, 8:20964 (R:US)

WASTE HEAT UTILIZATION
Feasibility Studies
Comparison of two methods for cooling synthesis gas produced during gasification, 8:19488 (RA:US)

WASTE PELLETS
Performance
Pelletized Waste Form Demonstration Program. Volume II. Description and performance, 8:19855 (R:US)

WASTE PROCESSING PLANTS
Operation
Assessment of parameters in the simulation of an ANFLOW municipal-wastewater-treatment pilot plant, 8:21450 (R:US)

WASTE PRODUCT UTILIZATION
See also WASTE HEAT UTILIZATION
Regional analysis of potential energy production from agricultural wastes: a technical and economic study. Final report, 8:19957 (R:US)

WASTE TRANSPORTATION
Risk Assessment
Safety assessment of spent fuel transportation in extreme environments, 8:19815 (J:US)

WASTE WATER
Activated Sludge Process
Treatment of biomass gasification wastewater using a combined wet air oxidation/activated sludge process, 8:20018 (R:US)
Anaerobic Digestion
Assessment of parameters in the simulation of an ANFLOW municipal-wastewater-treatment pilot plant, 8:21450 (R:US)
Wastewater reclamation and methane production using water hyacinth and anaerobic digestion, 8:20997 (R:US)
Biochemical Oxygen Demand
Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
Biodegradation
Contamination of ground and surface waters due to uranium mining and milling. Volume I: Biological processes for concentrating trace elements from uranium mine waters. Open file report 25 Jul 79-14 Sep 81, 8:19886 (R:US)
Chemical Analysis
Extractable organic matter in municipal wastewaters. 2. Hydrocarbons: molecular characterization, 8:21258 (J:US)
Microprocessor-controlled ion selective electrode determination of total chlorine. Final report, 8:20279 (R:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 6A. Export sample program/wastewater treatability study summary report (Proposed Henderson, Kentucky coal to gasoline plant; waste water from Lugri Mark IV test at Sasol), 8:19502 (R:US)
Chemical Composition
Solvent screening experiments for SRC-I phenol recovery, 8:19480 (RA:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 6A. Export sample program/wastewater treatability study summary report (Proposed Henderson, Kentucky coal to gasoline plant; waste water from Lugri Mark IV test at Sasol), 8:19502 (R:US)
Cooling Systems
Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
Mutagen Screening
Mutagenicity of potential effluents from an experimental low Btu coal gasifier, 8:22018 (J:DE)
Oxidation
Pollution control in coal gasification, 8:19470 (RA:US)
Treatment of biomass gasification wastewater using a combined wet air oxidation/activated sludge process, 8:20018 (R:US)
Recycling
Experimental study of organically contaminated water in a cooling tower, 8:19577 (R:US)
Reinjection
Injection of cold water into geothermal reservoirs, 8:20166 (RA:US)
Solvent Extraction
Environmental studies, 8:19580 (RA:US)
Operation of wastewater treatment PDU and PTPA 643 cooling tower simulation, 8:19471 (RA:US)
Waste Processing
Contamination of ground and surface waters due to uranium mining and milling. Volume I: Biological processes for concentrating trace elements from uranium mine waters. Open file report 25 Jul 79-14 Sep 81, 8:19886 (R:US)
Water Treatment
Advanced gasification projects, 8:19435 (R:US)
Advanced process development for wastewater treatment processes, 8:19581 (RA:US)
Coal-based ammonia and methanol manufacture using Koppers-Totzek gasification, 8:19408 (RA:US)
Environmental studies, 8:19580 (RA:US)
Operating experience gained with the PKM/GSP coal fixed bed pressure gasification process, 8:19409 (RA:US)
Operation of wastewater treatment PDU and PTPA 643 cooling tower simulation, 8:19471 (RA:US)
Solvent screening experiments for SRC-I phenol recovery, 8:19480 (RA:US)
SRC-I quarterly technical report, July-September 1982, 8:19474 (R:US)
Summary and analysis of SRC-I biological treatent data, 8:19481 (RA:US)
Treatment of coal gasification process wastewater, 8:19579 (RA:US)
Tri-State Synfuels Project Commercial Scale Coal Test: Volume 6A. Export sample program/wastewater treatability study summary report (Proposed Henderson, Kentucky coal to gasoline plant; waste water from Lugri Mark IV test at Sasol), 8:19502 (R:US)
Tri-State Synfuels Project Review: Volume 7. Permitting, environmental impact statement and related environmental information (Proposed Henderson, Kentucky coal to gasoline plant), 8:19503 (R:US)
Tri-State Synfuels Project Review: Volume 14. Commercial scale coal test (Proposed Henderson, Kentucky coal to gasoline plant; gasification test of Illinois coal in Lurgi Mark IV at Sasol 1), 8:19512 (R:US)
Tri-State Synfuels Project Review: Volume 3. Process evaluation, selection and design, 8:19495 (R:US)

WASTE-FUELED POWER PLANTS
See REFUSE-FUELED POWER PLANTS

WASTE-ROCK INTERACTIONS
Temperature Effects
Analysis of temperature data from the full-scale heater experiments at Stripa, 8:19849 (RA:US)

WATER
See also DRINKING WATER
GROUND WATER
WASTE WATER
Chemical Analysis
Ultraviolet spectrometric determination of phenols as phenolate anions, 8:21223 (J:US)
Flashing
Flash evaporation from turbulent water jets, 8:20078 (R:US)
Ion Mobility
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Ionization
Ion mobilities and residence times under chemical ionization conditions, 8:21245 (J:US)
Photochemistry
Photochemical dissociation of water by means of visible light, 8:21269 (R:XE)
Photoionization
Photoionization of molecular clusters. Final report 1 May 78-30 Sep 81, 8:21262 (R:US)
Physical Properties
STEAM-67; 1967 ASME steam and water properties (IBM360,370,303x; FORTRAN IV), 8:21227 (R:US)
Potentials
Stochastic calculation of interaction energies, 8:22218 (J:US)
Quantity Ratio
Hydroscopic and hydrate water in aerosols and their effect on fine-particle mass and on atmospheric extinction, 8:21697 (R:US)
Sensible Heat Storage
Development of natural stratification technology, 8:20736 (R:US)

Surface Tension
Interfacial tension in systems involving TBP in dodecane, nitric acid, uranyl nitrate and water, 8:21231 (R:DE)
Thermodynamic Properties
WASP2; water properties for safety analysis (CDC6600,7600; FORTRAN IV), 8:21152 (R:US)
WATER COOLANT
See WATER
WATER COOLED REACTORS
See also BWR TYPE REACTORS
HFIR REACTOR
JANUS REACTOR
ORR REACTOR
PWR TYPE REACTORS
TRIGA TYPE REACTORS
Flow Models
RELAP5 constitutive relations modeling, 8:20349 (J:US)
Fuel-Coolant Interactions
SPIRT; stress-strains from transient pressures (CDC CYBER76,175; FORTRAN IV), 8:20674 (R:US)
Hydraulics
SCORE-EVET; three-dimensional hydraulic reactor core analysis (CDC7600,CYBER175; FORTRAN IV), 8:20610 (R:US)
Loss of Coolant
THETA1B; fuel rod thermal response loss of coolant accidents (IBM360/75; FORTRAN IV), 8:20323 (R:US)
Pressurizers
SURGTANK; reactor steam surge tank dynamics (IBM360,370; FORTRAN IV), 8:20572 (R:US)
Reactor Cores
REPP; thermal-hydraulic water reactor design (UNIVAC1108; FORTRAN V), 8:20322 (R:US)
Reactor Safety
Systematic evaluation program status summary report, April 1982, 8:20700 (R:US)
Subcriticality
Feasibility of LWR subcritical reactivity monitoring using the /sub 252/ CF-driven neutron noise method, 8:20560 (J:US)
Transients
FLASH6;FLASH4; fully-implicit transient simulation (IBM360,370;CDC6600,7600; FORTRAN IV), 8:20654 (R:US)
Warfare
Strategic targeting of light water reactors. Master's thesis, 8:21658 (R:US)
WATER CURRENTS
Spatial Distribution
A study of the spatial variations in the non-tidal currents of the Upper Chesapeake Bay. Final report, 8:21878 (R:US)
WATER INFLUX
Temperature Effects
Measurement of low rates of water inflow by monitored evaporation in the large-scale permeability experiment at Stripa, 8:22061 (RA:US)
WATER MODERATOR
See WATER
WATER POLLUTION
Environmental Transport
Offshore transport and dispersion in the California coastal region - BLM III. NPS data summary. Technical report, 8:21856 (R:US)
Mathematical Models
Illustration of environmental fate modeling on a micro-computer, 8:21865 (R:US)
WATER QUALITY
Biota and biological principles of the aquatic environment, 8:21854 (R:US)
WATER RESOURCES
Recycling
Feasibility of financial incentives to reuse low quality waters in the Colorado River Basin, 8:20280 (R:US)
Regional Analysis
Coal mining and ground-water resources in the United States, 8:19599 (R:US)
Socio-Economic Factors
Coal mining and ground-water resources in the United States, 8:19599 (R:US)
Uses
Coal mining and ground-water resources in the United States, 8:19599 (R:US)
Water Quality
Feasibility of financial incentives to reuse low quality waters in the Colorado River Basin, 8:20280 (R:US)
WATER SOLUTIONS
See AQUEOUS SOLUTIONS
WATER SOURCE HEAT PUMPS
Comparative Evaluations
Lakes as a heat source for residential heating: a survey of costs in comparison with different systems and ecological consequences, 8:20940 (TG:US)
Environmental Impacts
Lakes as a heat source for residential heating: a survey of costs in comparison with different systems and ecological consequences, 8:20940 (TG:US)
WATER SPRINGS
Water Quality
Characterization of LaVerkin Springs water and methods for its reuse in energy development (Utah), 8:21881 (R:US)
Water Treatment
Characterization of LaVerkin Springs water and methods for its reuse in energy development (Utah), 8:21881 (R:US)
WATER TREATMENT
Bench-Scale Experiments
Treatment of coal gasification process wastewater, 8:19579 (RA:US)
Comparative Evaluations
Summary and analysis of SRC-I biological treatent data, 8:19481 (RA:US)
Feasibility Studies
Treatment of coal gasification process wastewater, 8:19579 (RA:US)
Field Tests
Advanced process development for wastewater treatment processes, 8:19581 (RA:US)
Process Development Units
Advanced process development for wastewater treatment processes, 8:19581 (RA:US)
Research Programs
Treatment of coal gasification process wastewater, 8:19579 (RA:US)
WATER TREATMENT PLANTS
Energy Conservation
Environmental services: energy conservation in wastewater treatment (a case study from the urban consortium), 8:21006 (R:US)
WATER VAPOR
Daily Variations
Measurement of low rates of water inflow by monitored evaporation in the large-scale permeability experiment at Stripa, 8:22061 (RA:US)
Moisture
Measurement of low rates of water inflow by monitored evaporation in the large-scale permeability experiment at Stripa, 8:22061 (RA:US)
WATERBORNE PARTICLES

WEAK INTERACTIONS
P Invariance
Laser excitation, 8:22187 (R:US)
WEATHER
Forecasting
Improved weather services for helicopter operations in the Gulf of Mexico. Final report, 8:19680 (R:US)
Theory, electro-optical design, testing, and calibration of a prototype atmospheric supersaturation, humidity, and temperature sensor. Final report Mar 81-Jul 82, 8:21938 (R:US)

Remote Sensing
An evaluation of Seasat-A data in relation to optimum track ship weather routing and site specific forecasting for the offshore oil industry, 8:19725 (R:US)
WEATHERIZATION
Demonstration Programs
Nontechnical summary of the final report 'optimal weatherization of low-income housing in the united states: a research demonstration project'. Final report Sep 77-Sep 81, 8:20923 (R:US)
Optimal weatherization of low-income housing in the U.S.: a research demonstration project. Building science series (final), 8:20929 (R:US)
WECS
See WIND TURBINES
WELDED JOINTS
Fractures
Fracture toughness of unirradiated HT-9 and modified 9Cr-1Mo welds, 8:22716 (RA:US)
Mechanical Properties
Effect of melt practice (ESR vs. AOD) on the toughness of HT-9 laser welds, 8:22717 (RA:US)
Microstructure
Microstructure of welds in an iron-base long-range-ordered alloy, 8:22714 (RA:US)
Specifications
Tri-State Synfuels Project Review: Volume 10. Narrative specification (Proposed Henderson, Kentucky coal to gasoline plant; equipment specifications;), 8:19507 (R:US)
WELDS
See WELDED JOINTS
WELL LOGGING
Information Systems
User's manual for geophysical well-logging software programs, 8:22054 (R:US)
WELLS
See also ABANDONED WELLS
GEOTHERMAL WELLS
NATURAL GAS WELLS
OIL WELLS
Aquifers
Temperature profiles and aquifer mass transfer in a circulating well, 8:20185 (J:US)
WENDELSTEIN-7 STELLARATOR
Magnet Coils
Vacuum magnetic field and modular coil system of the advanced stellarator Wendelstein VII-AS, 8:22736 (R:DE)

See FEDERAL REGION IX
WESTINGHOUSE GASIFICATION PROCESS
Cost Benefit Analysis
Preliminary assessment of the integration of a coal gasifier into a petroleum refinery, 8:19539 (J:US)
WET-TYPE COOLING TOWERS
See COOLING TOWERS
WHEY
Fermentation
Whey protein concentrate market enhancement. Final report, 8:20016 (R:US)
Marketing Research
Whey protein concentrate market enhancement. Final report, 8:20016 (R:US)
Uses
Whey protein concentrate market enhancement. Final report, 8:20016 (R:US)
WIGGLER MAGNETS
Electron Drift
Electron drift in a linear magnetic wiggler with an axial guide field. Memorandum report, 8:21375 (R:US)
WILDERNESS AREAS
See NATURE RESERVES
WIND
Mathematical Models
Review of gust model concepts, 8:20223 (RA:DE)
Origin
Observations of drainage winds on a simple slope, 8:21684 (R:US)
Resource Assessment
Testing and evaluating of LS/WECS, 8:20203 (RA:DE)
Wind-energy resources in the area of the City of Buffalo, 8:20204 (R:US)
Transients
Review of gust model concepts, 8:20223 (RA:DE)
Turbulence
New look at turbulence experienced by a rotating wind turbine, 8:20234 (R:US)
WIND ENERGY CONVERSION SYSTEMS
See WIND TURBINES
WIND GENERATORS
See ELECTRIC GENERATORS
WIND TURBINES
WIND POWER
Capturing energy from the wind, 8:20230 (R:US)
Correlations
Correlation of wind velocity and power output from field measurements on wind turbines, 8:20224 (RA:DE)
Two methods for correlating wind measurements with the power output of a 200 kw MOD-OA wind turbine, 8:20226 (RA:DE)
Economic Analysis
WECS; wind energy value to electric utilities (CDC7600,CYBER175; FORTRAN IV), 8:20206 (R:US)
Economics
Wind farm economics in the area of the city of Buffalo, 8:20208 (R:US)
Research Programs
Electric-utility solar-energy activities: 1982 survey update. Special report, 8:19965 (R:US)
Resource Assessment
Engineering assessment of existing wind models for the design of large WEC's, 8:20227 (RA:DE)
WIND POWER PLANTS
See also EFD WIND GENERATORS
Capturing energy from the wind, 8:20202 (R:US)
Capacity
Operations requirements of utilities with wind-power generation, 8:20235 (R:US)
Data Acquisition Systems
Wind turbine data system, 8:20219 (RA:DE)
Economic Analysis
WECS; wind energy value to electric utilities (CDC7600,CYBER175; FORTRAN IV), 8:20206 (R:US)
Inverters
Interfacing a Gemini synchronous (line-commutated) inverter with a local utility and a mini-grid: test results, 8:20237 (R:US)
Performance
Wind turbine data system, 8:20219 (RA:DE)
Performance Testing
GROWIAN test program, 8:20218 (RA:DE)
Research Programs
Evaluation of the prototype project of the Swedish wind energy programme, 8:20220 (RA:DE)
Siting technologies for large wind turbine clusters, 8:20225 (RA:DE)
Site Selection
DOE candidate site meteorological measurement program, 8:20228 (RA:DE)

Siting technologies for large wind turbine clusters, 8:20225 (RA:DE)
Socio-Economic Factors
Wind turbine value analysis for electric utilities, 8:20207 (R:US)
WIND TUNNELS
Control Equipment
Cryogenic technology, part 2, 8:21344 (R:US)
Design
Cryogenic technology, part 1, 8:21343 (R:US)
Meetings
Cryogenic technology, part 1, 8:21343 (R:US)
Cryogenic technology, part 2, 8:21344 (R:US)
WIND TURBINES

Capturing energy from the wind, 8:20230 (R:US)
Computer Codes
Wind systems life cycle cost analysis: a description and users manual (LIFECC), 8:20209 (R:US)
Construction Permits
Building licenses for wind turbines. Preliminary directives and case studies, 8:20210 (R:NL:In Dutch)
Control Systems
Investigation of doubly-fed machine in variable speed applications: control verification, 8:20241 (R:US)
Demonstration Programs
Demonstration of an a-c utility-connected wind generator in an urban setting. Final report, June 1979-December 1982, 8:20213 (R:US)
Denmark
Measuring program for two windmills at Nibe, Denmark, 8:20221 (RA:DE)
Distribution Functions
Testing and evaluating of LS/WECS, 8:20203 (RA:DE)
Dynamic Loads
Static and dynamic investigations for the model of a wind rotor, 8:20216 (R:DE)
Economics
Wind farm economics in the area of the city of Buffalo, 8:20208 (R:US)
Electric Generators
Investigation of doubly-fed machine in variable speed applications: control verification, 8:20241 (R:US)
Environmental Impacts
Small-wind-systems zoning issues and approaches, 8:20205 (R:US)
Life-Cycle Cost
Wind systems life cycle cost analysis: a description and users manual (LIFECC), 8:20209 (R:US)
Operating Licenses
Building licenses for wind turbines. Preliminary directives and case studies, 8:20210 (R:NL:In Dutch)
Performance Testing
Comparative examination of operating conditions of wind energy converters in the 10kW output class, 8:20215 (R:DE:GE)
Measurement system used at the Gedser windmill-purpose, performance and experience, 8:20217 (RA:DE)
Measurement of wind conditions and load in the GROWIAN project, 8:20222 (RA:DE)
Wind-systems technical notes: 1981, 8:20236 (R:US)
Power Conditioning Circuits
Investigation of doubly-fed machine in variable speed applications: control verification, 8:20241 (R:US)
Safety
Small-wind-systems zoning issues and approaches, 8:20205 (R:US)
Site Selection
Siting guidelines for utility application of wind turbines. Final report, 8:20214 (R:US)
Testing and evaluating of LS/WECS, 8:20203 (RA:DE)
Static Loads
Static and dynamic investigations for the model of a wind rotor, 8:20216 (R:DE)
System Failure Analysis
Wind-systems technical notes: 1981, 8:20236 (R:US)
Turbine Blades
Aluminum blade development for the MOD-OA 200-kilowatt wind turbine. Final report, 8:20231 (R:US)
Construction of low-cost, Mod-0A wood-composite wind-turbine blades, 8:20212 (R:US)
Design and evaluation of low-cost stainless steel - fiberglass-foam blades for large wind-driven generating systems, 8:20211 (R:US)
Turbulence
New look at turbulence experienced by a rotating wind turbine, 8:20234 (R:US)
Windmill wake turbulence decay: a preliminary theoretical model, 8:20239 (R:US)
Zoning
Small-wind-systems zoning issues and approaches, 8:20205 (R:US)
WIND-POWERED PUMPS
Wind-mechanical pumps only; for wind-electric pumps use WIND TURBINES and PUMPS.
Design
Review of the literature on promotion of windpumps, 8:20233 (R:IN)
Reviews
Review of the literature on promotion of windpumps, 8:20233 (R:IN)
Uses
Review of the literature on promotion of windpumps, 8:20233 (R:IN)
WINKLER PROCESS
Commercialization
Winkler fluid bed coal gasification experience with low grade coals (Contains list of 21 gasifiers, some in operation in 1925, some recently installed), 8:19411 (RA:US)
WIRES
Design
Bonding wire for semiconductor-element use, 8:21447 (TG:US)
Electrical Insulation
Crosslinking of polyethylene in view of an application in wire coating. Final report, December 1979, 8:21248 (R:DE:In several languages)
WOLFRAM
See TUNGSTEN
WOOD
Acid Hydrolysis
Parametric analysis support for alcohol-fuels process development. Final report, 1 January-30 June 1981, 8:20022 (R:US)
Combustion
Overview of R and D programs being coordinated by the inter-governmental wood combustion research group. Paper 81.8.3, 8:19958 (J:US)
Enzymatic Hydrolysis
ECUT: energy conversion and utilization technology program. Biocatalysis research activity. Technical and economic assessment of processes for the production of butanol and acetone, 8:19992 (R:US)
Fermentation
ECUT: energy conversion and utilization technology program. Biocatalysis research activity. Technical and economic assessment of processes for the production of butanol and acetone, 8:19992 (R:US)
Hydrolysis
Autohydrolysis of organic residue to increase biodegradability to methane, 8:19938 (RA:US)
Prices
Social, economic and environmental effects of rising timber prices. Final report, 8:21887 (R:US)
WOOD ALCOHOL
See METHANOL
WOOD BURNING APPLIANCES

- **YTTERBIUM**
  - **Solvent Extraction**
    - Role of phosphorus in lunar samples: a chemical study, 8:21197 (R:US)
- **YTTERBIUM 156**
  - **Beta-Plus Decay**
    - Low lying 1^+ and 2^- states in doubly-odd terbium, holmium, and thulium nuclei, 8:22382 (J:NL)
- **YTTRIUM 88**
  - **Beta-Plus Decay**
    - Measurement of epsilon/β^+ ratio in nuclear decay, 8:22360 (RA:CS:In Slovak)
  - **Electron Capture Decay**
    - Measurement of epsilon/β^+ ratio in nuclear decay, 8:22360 (RA:CS:In Slovak)
- **YTTRIUM 90**
  - **Spatial Distribution**
    - Radiological safety studies on ground disposal of radioactive wastes. Distribution and migration of radionuclides in the aerated zone, 8:19832 (R:JP:MIXED)
- **YTTRIUM ALLOYS**
  - **Domain Structure**
    - Magnetic hyperfine fields in Dy/sub 1-x/Y/sub x/Al_2, 8:21054 (R:US)
- **YTTRIUM ALUMINIUM GARNETS**
  - *See ALUMINIUM OXIDES*
  - *YTTRIUM COMPOUNDS*
- **YTTRIUM COMPOUNDS**
  - *See also YTTRIUM OXIDES*
  - **Magnetic Properties**
    - Spin dynamics of a model singlet ground-state system, 8:21178 (J:US)
  - **Spin**
    - Spin dynamics of a model singlet ground-state system, 8:21178 (J:US)
- **YTTRIUM OXIDES**
  - **Surface Coating**
    - Anomalous reflectivity losses of coated mirrors used in the infrared, 8:21086 (R:GB)

Z

- **ZEBRA REACTOR**
  - **Criticality**
    - VIM1;VIM1X; Monte Carlo critical assembly analysis (CDC7600;IBM360; FORTRAN IV (CDC7600), FORTRAN IV and BAL (IBM360)), 8:20634 (R:US)
- **ZEOLITES**
  - *See also CLINOPTILOLITE*
  - **Phase Transformations**
    - Selected hydrologic and geochemical issues in site characterization for nuclear waste disposal: flood basalts at the Hanford Reservation, 8:19854 (R:US)
  - **Thermodynamic Properties**
    - Some natural zeolites: recent thermodynamic results, their application, and the estimation of missing thermodynamic quantities, 8:20194 (R:US)
  - **X-Ray Diffraction**
    - Method for separation of x-ray-diffraction spectra for cobalt-ZSM-catalysts, 8:19516 (R:US)
- **ZERO ENERGY BREEDER REACTOR ASSEMBLY**
  - *See ZEBRA REACTOR*
- **ZERO POWER REACTORS**
  - *See also KUCA REACTOR*
  - *ZEBRA REACTOR*
  - *ZPPR REACTOR*
  - *ZPR-3 REACTOR*
  - **Reactor Cores**
    - Calculated and measured reactivities in the U9 critical assemblies, 8:20433 (RA:US)
  - **Transport**
    - Existing experimental criticality data applicable to nuclear-fuel-transportation systems, 8:21350 (R:US)

ZET PINCH
See LONGITUDINAL PINCH
ZINC
Health Hazards
Industrial hygiene survey of the General Electric Company, Hudson Falls, New York, Fort Edward, New York. Report for Jun 76-Apr 77, 8:22007 (R:US)
Response Modifying Factors
Uptake and fate of Cd and Zn in edible fungi of the Agaricus bisporus species, 8:22002 (R:DE:In German)
ZINC 65
Beta-Plus Decay
Measurement of epsilon/βi ratio in nuclear decay, 8:22360 (RA:CS:In Slovak)
Electron Capture Decay
Measurement of epsilon/β^+ ratio in nuclear decay, 8:22360 (RA:CS:In Slovak)
ZINC ALLOYS
See also BRASS
Grain Boundaries
Grain boundary precipitation in aluminum alloys: effect of boundary structure, 8:21113 (J:US)
ZINC CHLORIDES
Fine Structure
Extended x-ray absorption fine structure (EXAFS): a novel probe for local structure of glassy solids, 8:22231 (J:US)
ZINC OXIDES
Electrical Properties
High-voltage-gradient zinc oxide varistors: fabrication and properties, 8:20310 (R:US)
ZINC SELENIDES
Crystal Defects
Investigation of deep level defects in epitaxial semiconducting. Progress report, June 15, 1982-June 14, 1983, 8:21158 (R:US)
Physical Radiation Effects
Investigation of deep level defects in epitaxial semiconducting. Progress report, June 15, 1982-June 14, 1983, 8:21158 (R:US)
ZINC SULFIDES
Crystal Defects
Investigation of deep level defects in epitaxial semiconducting. Progress report, June 15, 1982-June 14, 1983, 8:21158 (R:US)
Physical Radiation Effects
Investigation of deep level defects in epitaxial semiconducting. Progress report, June 15, 1982-June 14, 1983, 8:21158 (R:US)
ZINC TELLURIDES
Refractivity
Dispersion of the refractive index near the absorption edge in compound semiconductors, 8:21161 (R:US)
ZINC-BROMINE BATTERIES
Energy Efficiency
Simple model of Exxon's Zn/Br_2 battery, 8:20752 (R:US)
ZINC-MANGANESE BATTERIES
Electrodes
Effect of electrolyte conductance on current distribution in porous zinc electrode in KOH electrolyte, 8:20747 (R:US)
Transient-current distributions in porous zinc electrodes in KOH electrolyte, 8:20746 (R:US)
ZIRCALOY 2
Deformation
Deformation and fracture characteristics of spent Zircaloy fuel cladding, 8:21053 (R:US)
Fractures
Deformation and fracture characteristics of spent Zircaloy fuel cladding, 8:21053 (R:US)
Physical Radiation Effects
Deformation and fracture characteristics of spent Zircaloy fuel cladding, 8:21053 (R:US)
ZIRCONIUM
Solvent Extraction
Separation of zirconium and uranium, 8:19796 (P:US)
Sputtering
Implications for surface science of Doppler-shift laser-fluorescence spectroscopy, 8:21063 (R:US)
ZIRCONIUM 95
Gamma Spectroscopy
Project airstream: radioactivity in the lower stratosphere, 8:21798 (RA:US)
Leaching
Leaching study of nuclear melt glass: Part I, 8:19888 (R:US)
Radioecological Concentration
ICPP effluent monitoring report, November 1982, 8:21799 (R:US)
ZIRCONIUM OXIDES
Chemical Activation
Shock-induced reactivity enhancement of zirconia powders, 8:21132 (J:GB)
Chemical Preparation
Development of a method of preparing ZrO_2 (Y_2O_3) thin film electrolytes on porous supporting materials, 8:19909 (R:XE:In German)
Compatibility
Compatibility studies of structural alloys with solid breeder materials, 8:22723 (RA:US)
Fabrication
High-temperature fuel-cell research and development. Final technical progress report, 1 Oct 1980-30 Sep 1981, 8:20887 (R:US)
ZIRCONIUM PHOSPHATES
Ionic Conductivity
NASIGLAS electrolyte for sodium/sulphur cells, 8:20745 (R:US)
ZPPR REACTOR
Criticality
VIM1;VIM1X; Monte Carlo critical assembly analysis (CDC7600;IBM360; FORTRAN IV (CDC7600), FORTRAN IV and BAL (IBM360)), 8:20634 (R:US)
ZPR-3 REACTOR
Variously fuelled, unmoderated, uncooled.
Criticality
VIM1;VIM1X; Monte Carlo critical assembly analysis (CDC7600;IBM360; FORTRAN IV (CDC7600), FORTRAN IV and BAL (IBM360)), 8:20634 (R:US)
ZT-40 DEVICES
Operation
Initial reversed-field experiments on ZT-40M with a metallic vacuum liner, 8:22619 (RA:SU)

CONTRACT NUMBER INDEX

Numbers assigned to DOE contracts under which documents announced in this publication were prepared are included in this index.

Contract No.	*Abstract No.*	*Report No.*
AC01-76ET10348	**Curtiss-Wright Corp., Wood-Ridge, NJ (USA). Power Systems Div.**	
	8:20246	CW-WR—76-020.104A
AC01-76EV03161	**Radiation Effects Research Foundation, Hiroshima (Japan)**	
	8:21666	DOE/EV/03161—2
	8:21667	DOE/EV/03161—T1
AC01-78CS20415	**Calspan Corp., Buffalo, NY (USA)**	
	8:20914	ORNL/Sub—9001/1
AC01-78RG06380	**Temple, Barker and Sloane, Inc., Lexington, MA (USA)**

REPORT NUMBER INDEX

The numbers assigned to all reports cited in the publication appear in the first column of the index. Cross reference information and/or availability are included as appropriate. Abbreviations used in the availability column are elaborated at the end of the index. To expedite the filling of orders for reports from NTIS and TIC, an order number in the form, DE82000001, appears in column 3. Requesters are urged to use this order number where provided. In column 4, one or more DOE distribution categories are indicated, e.g. , STD-10, MN-25. STD indicates distribution was made in full-size copy; MN indicates microcopy distribution. These category numbers are included to assist DOE librarians in responding to requests for reports in their collections. The UC (Unclassified Distribution Categories) are defined in DOE/TIC-4500, available from TIC. The citation numbers are given in column 5. NOTE: DOE attempts to disseminate its information as broadly as possible. Even though a report may contain some degree of illegibility, it is believed that the report may still make a contribution. The presence of a 1, 2, or 3 following NTIS in the availability column denotes the extent to which a report may be illegible and the form in which it is available: 1 = 1 to 5% illegibility, available PC and MF; 2 = 6 to 10% illegibility, available MF only; 3 = 11% or more illegibility, available PC only.

Abbreviations Used in Availability Column

EM	Available in aperture card format only. Inquiries regarding the availability of these items should be addressed to USDOE-TIC, P.O. Box 62, Oak Ridge, Tennessee, 37830.
ETEC	Available *only to requesters within the United States* from the Energy Technology Engineering Center, P.O. Box 1449, Canoga Park, California 91304.
GJO	Available from DOE Grand Junction Office, P.O. Box 2567, Grand Junction, Colorado 81501.
GPO	For sale by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.
HMSO	Her Majesty's Stationery Office, Atlantic House, Holborn Viaduct, London, England, EC1P 1BN.
NSO	Available *only to requesters within the United States* from the Nuclear Standards Office, Oak Ridge National Laboratory, P.O. Box X, Oak Ridge, Tennessee 37830.
NTIS	For sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, Virginia 22161. Price given is the domestic price for paper copy; prices for foreign purchasers are in most instances twice the domestic price.
TIC	Available from the Technical Information Center, P.O. Box 62, Oak Ridge, Tennessee 37830.

NTIS NORTH AMERICAN PRICE CODES

Most NTIS products and services are now announced by price codes and, therefore, without specific prices in NTIS journals, newsletters and indexes.

The current dollar equivalent for each code is shown in the schedule below. Orders must list the accession number(s) and be accompanied by the total dollar amount from the current schedule.

NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers in Canada, United States, and Mexico please use this price schedule; other addressees, write for Folder PR-360-4.

MICROFICHE		E01	$6.50	T01	$125.00
A01	$4.50	E02	7.50	T02	140.00
PAPER COPY		E03	9.50	T03	240.00
A02	7.00	E04	11.50	T04	320.00
A03	8.50	E05	13.50	T05	400.00
A04	10.00	E06	15.50	T06	465.00

CODES USED ON INDEX LINES

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R:SU:In Russian). The language designator does not appear if the document is published in English.

AVAILABILITY OF REFERENCES ABSTRACTED

REPORTS

Most reports abstracted in this publication may be obtained from

National Technical Information Service (NTIS)
5285 Port Royal Road
Springfield, VA 22161

or

DOE Technical Information Center (TIC)
P. O. Box 62
Oak Ridge, TN 37830
ATTN: Customer Services Division

Note: DOE offices and contractors should order from TIC; all others should order from NTIS. For more specific information on ordering, please note the introductory paragraph to the Report Number Index. For assistance in obtaining reports that do not have an Order No. (DE...) or other availability indicated in the citation or Report Number Index, contact TIC.

PATENTS

Although not cataloged as reports, patents cited from each country are listed in the Report Number Index under PATENTS-AU, PATENTS-FR, PATENTS-US, etc. U. S. Patent Applications, e.g., A 293,415, are available from NTIS.

NON-REPORT DOCUMENTS

Check the citation closely for the availability of such documents as journal articles, conference papers, books, and monographs. It may be necessary to request directly from the publisher or originator or to contact local, state, or university libraries or commercial reprint services.

Dissertations are available from University Microfilms International, Dissertation Copies, P. O. Box 1764, Ann Arbor, MI. Please request by Order No., e.g., DA82-11997.

OTHER

When GPO is cited as available source, order from Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

REPORT COLLECTIONS

The libraries listed below purchase and maintain microfiche collections of DOE and foreign reports. Most of these libraries have microfiche reader-printers or other photocopy facilities with which to reproduce enlarged copies from microfiche. Charges for reproduction services vary.
